

EC-2025-0165

First, Ameren doesn't know how to keep the word disconnection or threat of disconnection out of a sentence or conversation. At no time during any conversation with Ameren did they tell me that the disconnection of service would be removed. Multiple times. (Ask Ameren for that tape)

Second, the Staff report is pure garbage and even confirms that these are payment agreements and not "pending". [REDACTED] throws in the term "activate" which is not only garbage, but doesn't exist in the Commission rules, regulations and tariffs. (Please specifically show me in Commission rules, regulations and tariffs the words that you have to "activate" a payment agreement? It doesn't exist, nor will ever exist. They are payment agreements, settlement agreements and deferred payment agreements.

Third, even Mr. Clark in his filing calls them payment agreements, asking for a response.

Fourth, I want to know where the over \$ [REDACTED] that the Commission and Ameren Missouri is at, and when they plan to reimburse me for the neglected damages they have caused.

Fifth, Ameren's responses back to me are garbage and pure stupidity an their legal counsel doesn't understand coherent sentences, plus hasn't given me the discovery I asked for.

Sixth, I am not interest in any modifications or changes of sentence structure like the garbage Staff, Ameren and Mr. Clark continue to give. I want them to specifically cite and state where any Commission rules say you have to "activate" a payment agreement. Otherwise, please stop with the pure stupidity and garbage.

Last, until the Commission and Ameren Missouri announce or tell me their plan how they are going to reimburse me the over \$ [REDACTED] from giving me counterfeit documents, I will not think less of anything they file as garbage and only garbage. Just like the garbage staff waited over 60 days with no factual exhibits given to the exhibits I gave to show .

As an FYI, Ameren cancelled the payment agreement clearly on November 19, 2024 with the threate of disconnection. The rest is pure garbage and stupidity given by Staff, along with conspiracy theories about what my paperwork I gave them should interpret or state. However, in reality it states something different than the garbage Staff presents.

I'll let you all get back to running your political criminal enterprise you have going on within the Commission, with the pure garbage. I've also never seen as much pure garbage and lackluster reports than what the Commission has given me, but then again, it's all garbage.

Brett Felber
