Laura,

Please enter into EFIS File No. EW-2011-0175. Thanks!

Regards,

Randy

Save the Date:

“Missouri Smart Grid Status Update and Technical Conference”

A Missouri Smart Grid Status Update and Technical Conference has been scheduled in Jefferson City on Tuesday, November 29 to showcase current Missouri Smart Grid projects, vendor products, and conduct panel discussions.

Panel discussions and technical presentations will be scheduled for the following topics.

- **What’s happening in Missouri?** Presentations on current Smart Grid projects that includes a project overview, technology highlights and innovations, key success factors, challenges, consumer engagement, consumer data privacy and policies, cyber security, and future developments. An open question and discussion period will follow.
- **Empowering Consumers; Customer Engagement.** A common theme often heard from Missouri Utility Customers is that they are excited about adopting new technology, innovation and helping the environment as long as it does not raise their electrical rates. What are the key elements to gain customer acceptance to assure customer participation? What are the lessons learned from other pilot projects and deployments? What are some of the successful marketing and consumer education techniques that have produced positive results? Can we create a customer base that is educated about the benefits and opportunities of smart grid deployment that will demand it be available to them? Are there untapped educational opportunities in our schools to educated and in some cases show the benefits? An open question and discussion period will follow.
- **Modernizing T&D on the Grid Smart.** Smart Grid implementation will require increased automation, instrumentation and control devices to accommodate distributed generation, electrical vehicle deployments, advanced metering and demand side management program implementation. What are the challenges and opportunities associated with the advanced technology deployment? How does dynamic voltage control work, what equipment is required and what are the expected benefits? What substation modernization is required and why? What new innovations and technologies are on the horizon? How does the consumer directly or indirectly benefit and will they realize the benefits? An open question and discussion period will follow.

When: Tuesday, November 29, 2011

9:00 a.m. to 5:00 p.m.

Where: Room 450(Ballroom) Governor Office Building
200 Madison Street, Fourth Floor
Jefferson City, Missouri 65102-0360

Should you need accommodations in Jefferson City, the following is a useful link;
<http://www.visitjeffersoncity.com/home.html>

Who should attend: Missouri utilities, vendors, municipalities, COOPs, and others who are interested in Smart Grid deployment.

The conference will be open to the public and all stakeholders are invited to attend.

Cost to Attend: There is no charge for participants or vendors.

Additional e-mails will send the proposed Agenda and more specifics regarding the meeting.

For more information and to RSVP please contact: Randy Gross at randy.gross@psc.mo.gov or (573)522-8705. If you or your organization plans to attend the event, please advise by September 1.

File No. EW-2011-0175 is the repository for the Smart Grid workshops.

If you have received this Email and no longer wish to remain on the distribution list or there are other parties that should be added, please advise.
