

FORMAL COMPLAINT FORM

Attach extra pages as necessary.

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

Catherine Cogorno
(Your name here)

Complainant,

v.

SPIRE
(Utility's name here)

Respondent,

File No.

(PSC fills this in)

FORMAL COMPLAINT

1. Complainant resides at:

[REDACTED]
(Address of complainant)

[REDACTED]
(City) (State) (Zip Code)

2. The utility service complained of was received at:

a. Complainant's address listed in paragraph 1.

b. A different address:

(Address where service is provided, if different from Complainant's address)

(City) (State) (Zip Code)

3. Respondent's address is:

(Address of complainant) (SPIRE) 700 Market St.

(City) St. Louis (State) MO (Zip Code) 63101

4. Respondent is a public utility under the jurisdiction of the Missouri Public Service Commission.

5. The amount at issue is: \$ [REDACTED]
(If your complaint is about money state how much is in dispute here.)

6. Complainant now requests the following relief:

(Explain what you want the Commission to do: the specific results you are seeking in this complaint.)

Please see attached letter of Feb 5, 2025
I am opposed to digital meter because they emit pulsed radiation, proven by thousands of studies to harm us.
I appreciate having the "opt out" chance of keeping my old analog, but do not support of the <u>[REDACTED]</u> mo. fee imposed to come and read it.
Years ago we would mail in cards w/ our own readings + Ladies Gas would come periodically to verify consumption.
I propose reading 2 mo / QTR + SPIRE reads 1 mo / qtr. Saving me <u>[REDACTED]</u> Any way they want to receive readings.

7. The relief requested is appropriate because Respondent has violated a statute, tariff, or Commission regulation or order, as follows:

(Explain why the Commission should grant the relief you seek: the facts that constitute a violation of a statute, tariff, or Commission regulation or order.)

No violation. Just a REQUEST, as explained above. Customers were NOT consulted or even informed properly about your ONE-SIDED Rules + Regulations.

8. The Complainant has taken the following steps to present this matter to the Respondent:

(Please describe in detail what steps you have already taken to resolve this complaint.)

Letter of Feb 5, 2025 sent to SPIRE + no RSC. (attached) ^{copy}

Just received on March 27 email response from Jay Bartlick, Regulatory Compliance Mgr. Consumer Services Dept.

SPIRE never had the courtesy to respond even though I also provided the letter to them multiple times.

Many people in St. Louis area are VERY UPSET about these EXTORTION fees. Some are already paying American \$40/mo to get out of their electric digital meter, therefore [REDACTED] mo for both! this is UNACCEPTABLE.

We didn't ask for this "convenience" for the Utility Companies!

St. Louis, MO 63101

Subject: GAS DIGITAL ('smart') METERS

To: SPIRE and the MO Public Service Commission

On Jan. 7 a SPIRE technician (Nick) came to check my meter. When he removed my analog meter to replace it with a digital one (called 'smart', a misnomer to say the least; not smart when they are a hazard for several reasons!)...I said NO !!! I don't want it. He put a note on my account about my refusal and reason: I already have health problems related to another digital meter (electric) put on my home AGAINST MY WILL almost 8 yrs ago.

Next I got a call from SPIRE on Jan. 30 saying they would come out and install the digital one. Opting out would cost \$/mo. additional to the cost of gas consumption. **This is EXTORTION.**

Decades ago, readers were sent out every 6+ months to physically verify readings people MAILED IN monthly. I can certainly read it and send you the readings. And you **could come quarterly**, for example, thereby reducing your manpower requirement, and saving the customer \$/yr, instead of charging the exorbitant and unfair fee of \$/yr.... which most people can't afford! We are already looking at rate increases by Ameren, probably to pay for their smart meters which last only 6-8 yrs compared to 20-40 yrs for the old analogs... This will cost them \$ in MO to replace the first round of installed digital meters...(and over and over again in time?).... Total inefficiency, ineptitude and disgraceful gouging of customer's resources.

I am a founding member of **St. Louis for Safe Technology**. We have a fellowship of about 400 people. We are ALL opposed to these digital meters and the way the rollouts have been handled. One of our members and top contributors is **ROBERT WORKMAN**, Certified Building Biology Environmental Consultant and EM Radiation Specialist has been coaching people concerned, and helping provide solutions to mitigate radiation exposure, when possible. Below is a video he did with **BILL BATHGATE**, Electrical Engineer and Building Biology instructor, who has ample experience with these meters. **THEY ARE NOT GOOD FOR US.**

Digital gas meters put out frequencies in the form of **pulsed radiation**, proven by thousands of scientific studies (even many by our government) to harm the human body, animals and even plant life. Apparently, a propeller system recharges the battery, and some batteries now are made with lithium, which can cause the meters to explode! However, you never indicate these risks to your customers.

From the Building Biology Institute website:

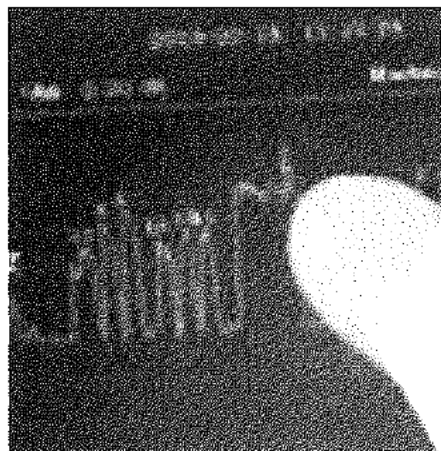

"Smart" meters do not satisfy Building Biology Institute's standards for a healthy built environment. The primary problems are the wireless communication with high frequency electromagnetic radiation and the disturbing peculiarity of the transients added to the house wiring called electromagnetic interference (EMI).

It is highly probable digital meters ("smart" meters), whether AMR, AMI or non-communicating, are an assault on the biology and ecology of all living organisms.

IBE does not support deployment of "smart" meters. Digital meters fail to meet several of our principles of a healthy and sustainably built environment. Number one among them is the "precautionary principle" related to possible health and ecology impact. We recommend, especially for people experiencing EHS, to opt-out of AMI systems and to request retention or reinstallation of an analog electric meter whenever possible.

Messrs. Workman and Bathgate produced this short video.

<https://www.facebook.com/100000065892382/videos/997192107912194/>

They use a radio frequency spectrum analyzer... in the presence of a GAS SMART METER. It registers can the frequencies... Although there are other radiating devices in the area in there (e.g. cell towers), he notes the meter changes the broad spectrum transmittance, bouncing from one frequency to another (typically between 500 and 690 MHz). In this reading Mr. Bathgate is able to isolate the ones corresponding to the gas meter: 646.26 MHz (-60 dBm), in one instance...630 MHz (-67 dBm) in another (peak) noting that anything greater than -70 dBm (as the readings noted) is worrisome

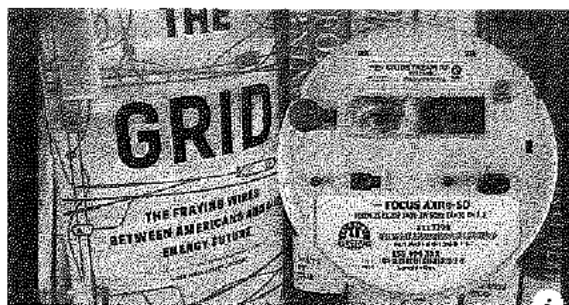

MORE REFERENCES FOLLOW:

Smart meters emit high levels of harmful RF radiation that have been shown to cause **health issues**. The utility industry claims that smart meters emit high levels of harmful RF radiation that have been shown to cause **health issues**. The utility industry claims that smart meters are safe. However, measurements show that smart meters cause an extraordinary RF/MW antenna effect on electrical distribution systems when they are used as intended, rather than in the isolation of a testing laboratory.

<http://www.stopsmartmetersny.org/debunkingutility.html>

Smart meters can be used to monitor and control our usage. The ability to remotely restrict our access to a necessity can be used for the nefarious purpose of forcing compliance. Digital GAS meters easily pulse over 100 x/day, and electric ones over 1,000; this constant pulsing is **DAMAGING**. See more on pg. 4 about the **DISRUPTION** caused to the **VOLTED GATED CALCIUM CHANNEL** IN EACH OF OUR CELLS.

The REAL Problem with Smart Meters

Reverse Engineering Smart Meters for years to solve this problem. I think...

Non-Ionizing radiation can be worse than ionizing (over time).

The utility consistently states the RF emissions of the meters meet FCC requirements, this is a misleading statement. FCC requirements are for the effects of enough non-ionizing power to cause the brain to heat up 1° C. This is a deception

because there are effects of non-ionizing radiation. There have been over 800 peer reviewed independent studies not funded by the industry that have linked this type of low level non-ionizing RF radiation to a group of diseases including brain cancer, Parkinson's, Alzheimer's, high blood pressure, tinnitus, skin rashes and open sores as an example. Industry funded studies always fail to point out that 32% of their funded studies show an effect on health from non-ionizing radiation. The industry NEVER mentions these studies. This adds to confusion on the health effects attributed to the meters.

Health Risks Associated with Smart Meter Wireless Emissions. (Smart grid awareness website by SkyVision Solutions, Consumer Protection Advocate.

<http://www.stopsmartmetersny.org/debunkingutility.html>

Article Key Points

- There is a “reasonable basis” for concern regarding health risks associated with smart meter wireless emissions.
- It is “unreasonable” to involuntarily and chronically expose consumers to the electromagnetic energy emitted by smart meters.

Building Biology Institute
The science of healthy buildings

Electromagnetic Radiation [Bf 21.2.1]

2. Growing tissue (embryos, genetics and cancer)

Depending on the strength, frequency and composition of external fields virtually every system of the body is adversely impacted: central nervous system, endocrine system, immune system, chronic diseases, behavioral abnormalities, malignant growth. The symptoms can be mild or acute:

Headaches	Difficulties in concentration
Dizziness	Muscle aches
Cardiac palpitations	Memory loss
Coordination problems	Childhood leukemia
Sleep disorders	Cancer

Voltage Gated Calcium Channels (VGCC)²¹

Dr. Martin Pall, PhD, Washington State University School of Molecular Biosciences, has taken the lead to explain VGCC. Substantial literature shows *all* EMF's activate the VGCC in the cell membrane and increase intercellular calcium (Ca^{2+}) ions.

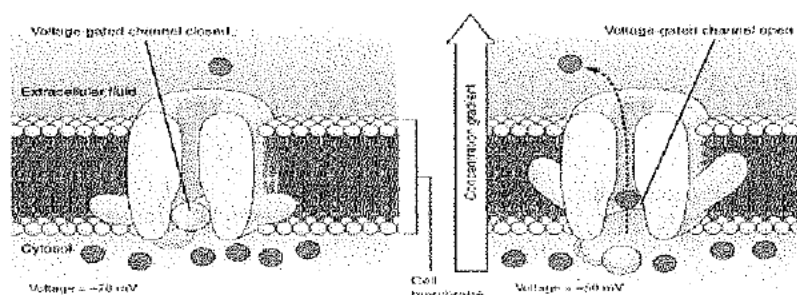

Figure 28 Voltage Gated Calcium Channels

Increased intracellular Ca^{2+} can act to stimulate nitric oxide (NO) synthesis; such NO increases also have an important role in biology & medicine. *Arthur A. Pilla (2012)*, researcher, showed that such low-intensity pulsed microwave exposures produce increases in both Ca^{2+} and NO synthesis in less than 5 seconds.

VGCCs have been shown to have a universal or near universal role in converting electrical effects into chemical changes in the cell. Note: *NO is an important cellular signaling molecule. It helps modulate vascular tone, insulin secretion, airway tone, and peristalsis, and is involved in angiogenesis and neural development. It may function as a retrograde neurotransmitter.*

Pulsed EMF's are much more bio-active than non-pulsed fields this has been known for 30 years. A series of studies show EHS effects can be blocked by calcium channel blockers. There are 100's of studies that show low intensity microwave exposures are followed by changes in calcium fluxes and/or by changes in calcium signaling. Also, there are 100's of studies showing low-intensity microwave radiation produces oxidative stress responses due to downstream effects of VGCC activation. *There can be no question that VGCCs are the major, perhaps the only targets of low intensity EMF's in the body.* Strong support for cell level effects from HF and other human-made EMFs. VGCCs have physical properties which predict that

²¹ Electromagnetic fields act via activation of voltage-gated calcium ... J Cell Mol Med. Aug 2013; 17(8): 958–965. Published online Jun 26, 2013. doi: 10.1111/jcmm.12088

Non-Thermal Effects

Scientists from all over the world keep observing non-thermal effects, which are quite alarming. Electromagnetic waves exert forces on charged particles of matter: electric charges are changed in their sphere of influence; molecules and ions follow the orientation of the constantly alternating field. Microwave radiation, for example, is capable of exciting rotation or vibration in heavily polarized water molecules, converting radiation into heat along the way. It also seems to be more than likely that sensitive hydrogen bonds in cells and membranes are affected. These are some of the pathways through which radio frequency radiation can be taken in or absorbed by the body.

In 1996, Dr. Henry Lai found enormous increase in double-stranded DNA breaks in rat brain tissue only after 2 hours cell phone microwave exposure. A Swedish group at Lundt University studied the effect of 915 MHz EMR on the blood brain barrier (BBB) in rats. Cellular phones use frequencies from 824 to 894 MHz. The BBB restricts the movement of medium and large size molecules from the blood to cerebrospinal fluid (EMR Health, 1995). Figure 14.

The introduction of smart meter AMI technology is relatively new and little research has been conducted. However, anecdotal and observational studies are showing that people who were not medically affected by other wireless technology suddenly or within months of smart meter installation display a host of symptoms: headache, heart arrhythmia, dizziness, nausea, memory loss, muscle spasms, inflammation, breathing

© Building Biology Institute (BBi)

Page 62 of

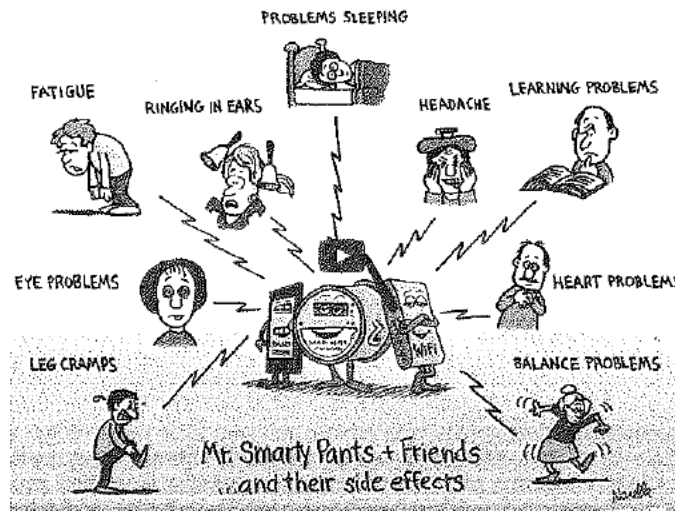

SECTION II – EMR: Health

problems, weakness, insomnia, seizures. From early information it appears that up to 18% of the population is being affected with 3% affected immediately and the remainder after several months of exposure.

Research conducted in Switzerland and reported by Dr. Dietrich Klinghardt, MD in 2011 took mold cultures and initially shielded them from ambient laboratory EMR using RF shielding cloth, effectively creating a faraday cage. When the cloth was removed the mold cultures were exposed to the ambient EMR in the lab from the lights, computers and nearby cell phone tower. Under this new influence the molds produced more than 600 times the quantity of biotoxins than they produced when shielded from EMR. And the biotoxins weren't simply more plentiful, they were also more potent and virulent. This finding could explain many things – from the rise of 'superbugs' sweeping through entire hospital wards (hospitals are bristling with cell towers, Wi-Fi and EMR in general), to the reason that some people are far more sensitive to EMR than others. The sensitive people may well have an underlying Candida infection or other microbial infection that is flooding their bodies with biotoxins in response to the exposure to wireless emissions and other sources of EMR.

Reports on Smart Meter Problems

Posted on December 14, 2012 by admin

Updated July 23 2019

The 50-page paper "[Overview: Fire and Electrical Hazards from 'Smart', Wireless, PLC, and Digital Utility Meters](#)" is available free for downloading and printing. It provides information from experts on utility meters used in the U.S. and Canada.

The report "[Analysis: Smart Meter and Smart Grid Problems - Legislative Proposal](#)" is available free to the public for downloading and printing. This 173-page report, released in 2012 by health and environmental advocate Nina Beety, has extensive referenced information on the many problems and risks of the Smart Meter program known at that time, with information from state, national, and international resources.

Investigation and admissions by the industry since 2012 continue to substantiate these serious problems, providing a searing indictment on regulatory and legislative officials who have failed to halt Smart Meter deployments.

A case in New Mexico

Robert Workman

Top contributor · April 26, 2024 ·

DEAR FRIENDS, NEW MEXICO

TODAY WE WON A VICTORY IN THE FIGHT AGAINST RADIATION IN NEW MEXICO. THE PUBLIC REGULATION COMMISSION HAS DENIED PNM'S APPLICATION FOR SMART METERS. "THE PLAN PRESENTED IN THE APPLICATION DOES NOT PROVIDE A NET PUBLIC BENEFIT AND IT DOES NOT PROMOTE THE PUBLIC INTEREST," WROTE THE COMMISSION.

THE COMMISSION ACCEPTED THE HEARING EXAMINER'S RECOMMENDED DECISION WITHOUT ALTERATION. IT RULED THAT:

- PNM DID NOT DEMONSTRATE THAT SMART METERS WILL SAVE MONEY.
- PNM DID NOT DEMONSTRATE THAT SMART METERS WILL PRODUCE ENERGY EFFICIENCY.
- PNM DID NOT SHOW THAT CUSTOMERS WANT SMART METERS.
- PNM DID NOT EVALUATE ALTERNATIVES.
- PNM DID NOT SAY HOW IT WOULD PROTECT CUSTOMER DATA PRIVACY.
- CYBERSECURITY ISSUES NEED TO BE ADDRESSED.
- 125 GOOD, HIGH-PAYING JOBS WOULD BE LOST.
- PROPOSED OPT-OUT FEES WERE UNREASONABLE.
- THERE WAS INSUFFICIENT PUBLIC INPUT.
- THERE WAS INSUFFICIENT RESPONSE BY PNM TO PUBLIC OBJECTIONS.

EVIDENCE ABOUT HEALTH EFFECTS WAS DISCUSSED AT LENGTH. "CUSTOMERS WHO HAVE STRONG FEELINGS ABOUT THE HEALTH EFFECTS OF THE METERS SHOULD BE ALLOWED TO PROTECT THEIR STATED HEALTH CONCERNS WITHOUT A PROHIBITIVELY HIGH COST."

THE DECISION GOES ON TO STATE: "THE CONDITIONS OF THE PORTION OF THE POPULATION WHO BELIEVE THEY ARE ELECTROMAGNETICALLY SENSITIVE DESERVE ACKNOWLEDGMENT AND CONSIDERATION AS DECISIONS ARE MADE REGARDING THE IMPLEMENTATION OF AN AMI PROJECT. ACCOMMODATIONS COULD INCLUDE REASONABLE OPT-OUT PROVISIONS AND FEES AND PERHAPS THE SELECTION OF TECHNOLOGIES THAT MINIMIZE THE IMPACTS ON SUCH PEOPLE. SUCH ACCOMMODATIONS MAY BE DESIRABLE TO MINIMIZE HEALTH RISKS TO CUSTOMERS AND ADDRESS THE NEEDS AND PREFERENCES OF PNM'S CUSTOMERS. THESE ARE ISSUES THAT CAN AND SHOULD BE ADDRESSED IN A PUBLIC INPUT PROCESS OF THE SORT PNM STATED IN ITS 2012 REPORT THAT IT WOULD CONDUCT BEFORE BRINGING A SMART METER PROPOSAL TO THE COMMISSION FOR APPROVAL."

THE DECISION MEANS THERE WILL NOT BE SMART METERS IN THE NEAR FUTURE IN NEW MEXICO'S METROPOLITAN AREAS: SANTA FE, ALBUQUERQUE, LAS VEGAS, CLAYTON, RUIDOSO, TULAROSA, ALAMOGORDO, SILVER CITY, LORDSBURG AND DEMING.

Consumers Energy fined \$1M over complaints of faulty meters, delays in electric and gas services

Consumers Energy, one of the state's largest energy providers, has agreed to pay \$1 million after state energy regulators investigated complaints of malfunctioning electrical meters, violations of rules on estimated billing and significant delays in providing new electric and gas service.

The Michigan Public Service Commission (MPSC), which regulates energy and telecommunications co... [See more](#)

His smart meter stopped sending readings so they entirely replaced it claiming the software version was out of date? When actually it has to do with the hardware version, if it was just software they could have updated that.

Replacing these in MO since the life cycle of these is avg. 8 years means we spend \$2,000 times 8 Million as billable via our Utility Industry goes they tack it into our fees. So every 8 yrs. We as MO Utility Consumers pay for the next crop of smart meters all over again! Analogs last 30 to 60 years cost from \$100 to \$500 depending on the Supplier. Anyone, who is keeping the smart meter scam going is costing us the rest of us who opted out! Plus they are all the while charging US a tariff fee on top of everything for opting out! Wake up and help US get these out of Missouri!

[YOUTUBE.COM](https://www.youtube.com)

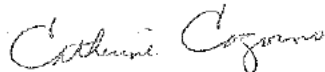

Smart meters? Not so smart meters! Why is it not sending readings?

The EHT vs. FCC Federal Circuit #1 case: FCC lost in 2021. FCC's guidelines are 25 yrs obsolete, and they are in contempt of court for not having looked the thousands of scientific papers evidencing damage of EMF to our bodies. People should have the OPTION to take on more radiation in our midst, or not. Many people are electromagnetic-sensitive (a growing trend) or have a serious debilitating illness or disability, or cancer (which can recur in high EMF fields), etc. Children, pets and plant life are also vulnerable. Are you aware?

You need to consider the serious points raised, and be truthful and ethical with SPIRE customers, by providing transparency and options. All this excessive and unnecessary radiation is also affecting you and your family.

My scheduled date for SPIRE visit is March 31, the last possible date.... I must keep my analog meter, and I wish to send you in my own readings 8 months of the year (the first 2 of each quarter); I could call them in, email them, mail them, text them, you choose. That is a reasonable proposal and I hope you will accept it. This is the time of GREAT and NECESSARY CHANGE.

I look forward to your prompt response. Thank you.

Catherine Cogorno

PD - Further info below regarding efforts to reach you all in the Utilities Industry and Government. As a founding member of [REDACTED] for Safe Technology, we represent over 400 people in the area. THIS IS PERTINENT ESPECIALLY TO THE MO PUBLIC SERVICE COMMISSION.

***** STONE WALLING *****

Elizabeth Peterson spent 8 months doing all the work and even had a hearing set up in Jeff City and they stonewalled the hearing about the Smart Meters. Mostly this effort was geared towards the electric smart meters, but the ISSUES are essentially THE SAME for the GAS Meters.

People **Robert Workman** has spent countless hours trying to communicate with in our state for these decisions and implementation... NO RESPONSE, though none of them every said we were wrong about the information presented.

1. **Mary Coleman Senator Sponsored Bill (SB 1167)**

FCC safety Code Violation citation incident report on video 2 ½ min multiple tools readings done by EMF Expert BBI Rob Workman

This incident report of UTILITY industry was electronically reported in a mass e-mail sent to FCC and the EPA and the DOJ and all of the pertinent entities in MO as well as Federal and State Legislators of the constituents filing the public reporting to proper authorities

2. **Scott Lewis**, Sheriff St Charles County - MPCS Missouri Public Service Commission
3. **EPA David Cozad** (tried to reach him MANY times)

4. Mo Public Service Commission Liaison **Doug Anderson**
5. Mo Public Service Commission **Lloyd Wilson**
6. **Matthew J Luetkemeyer**, Marshal, MO Division of Fire Safety
7. **Emily Wilbur**; Director Dept. of Energy in MO, she oversees the Division of Natural Resources and that Chief Commission of DNR. Does not have Jurisdiction over Smart Meters Safety. This is a FCC Matter which is a FEDERAL MATTER per the FCC is Federal AGENCY
8. Attorney General Liaison **Cooper Childer**, talks to Sen. Hawley
9. **Nick Schroer**, my District of STL; State Senator
10. **Samuel J Saffa** my region of STL's MO Federal, Congressman ; Senator Hawley's MO Chief of Staff
11. **Shawn**, K.C. location, Top Staff for Senator Hawley
12. **Christopher Weihs**, Chief of Staff for US Senator Josh Hawley
13. **Charles Thomas** K.C. MO Regional FEDERAL OFFICE. He is our region's DOJ; Department of Justice. Note: Charles is already informed about the FCC lawsuit they already lost to EHT

Mr. Workman's Personal Notes

CURRENT CASE CITATION evidence video footage substantiates that the FCC SAFETY REGULATION STANDARDS are being violated by MO Utility Industry. The PSC is clearly unaware these ratios of emit are already in violation of the FCC standards. Our public evidence provided disproves what the Utility Industry informed the MO PSC about what it is actually doing. The industry has not been honest with the MO PSC. Government officials and compliance officials need to be aware in order to enforce compliance upon the Utility Industry in MO at large. Science Part 15 Code Violation Unlicensed FCC mentioned 900 MHz as bad.

(Electrical digital meters) Pulsing several times per minute IS A FCC safety CODE VIOLATION for this type of unlicensed equipment

Ben Grumble is with a non-profit concerned with the Environment, and he addressed Congress to receive from the EPA any funds they need

Bob Brumley state of MO Representative is the CHAIR for the Utility Committee

ADA Americans with Disability Act Accessibility Guidelines for public affiliated Infrastructure of buildings or dwelling infrastructure set to any government standards of Federal accountability

ABA Architectural Barriers Act. Enacted by the U.S Access Board 2005. Already enough evidence that people had actually been deemed medically disabled by radiation per this very Threshold of EMF that is coming off the Smart Meter. This is a violation biologically speaking of the ABA ACT

NO DUE PROCESS thus far has been provided for this issue of not receiving any kind of a HEARING. Furthermore, one of these "Agencies" that is determined as accountable for the Code Violation citation is supposed to provide us a hearing OR turn the violation over to Compliance Officials.

The FCC Safety for Non-Ionized Radiation is totally flawed. They used a time tested either 6 min or a 30 min testing reductionism approach to the guidelines which has been outdated since 1996. They do not look at the body systems (e.g. the blood, electrical system, brain, liver, spleen, eyes, kidneys, ears, spinal cord and the immune system) or house as a system. Everything is a system including the meters. For a system approach you would also look at short and long term studies 2 yrs and 10 yrs out. **MICROWAVE RADIATION COOKS FROM THE INSIDE OUT.**
