Subject: RE: 10 CSR 60-3.030

Hi Geoff,

So for the TMF regs for the drinking water side, those are only for community systems that are activated after a certain date in 1999. After conversing with one of our wastewater permit writers, she says that they do not have that on the wastewater side. It is strictly a drinking water reg.

I hope this answers your question. If you have any other question, please do not hesitate to contact us here at Central Field Operations.

Subject: 10 CSR 60-3.030

Marty,

Per our discussion on the phone, I am looking for confirmation one way or the other whether or not wastewater systems are subject to the 10 CSR 60-3.030 Technical, Managerial, and Financial Capacity rules. Restated, whether or not MO DNR enforces these rules on individual public wastewater systems. Any insight on this would be greatly appreciated.

Thanks,

Geoff Marke
