## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE-(Continued)

#### 6.10 Rate Regulations-(Continued)

(RT)

—  
—  
—

(RT)

#### 6.10.6 DNAL Recurring Rates

Recurring rates for the DNAL BSA apply as follows:

##### A. DNAL Termination

A monthly rate applies for each DNAL point of termination requested by the customer.

##### B. DNAL Mileage

A fixed monthly rate applies, per mileage band, for each DNAL channel between the customer's designated premises and the Telephone Company end office switch where the DNAL is terminated.

A monthly rate per mile applies to each airline mile between the serving wire center of the customer's designated premises and the Telephone Company end office switch where the BSE requiring the DNAL is provided.

Airline mileage is calculated as set forth in Paragraph 6.10.15.

#### 6.10.7 Change of Feature Group Type

Changes from one type of Feature Group to another will be treated as a discontinuance of one type of service and a start of another.

Nonrecurring charges will apply, with one exception. When a customer upgrades a Feature Group A, B or C service to a Feature Group

D service, the trunk installation charges will not apply. Any features that are added when the customer upgrades to FGD will incur the charges

applicable to that feature. When a customer upgrades a Feature A, B or C service to Feature Group D service, minimum period obligations will not change, i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations for

Feature Group D service. For all other changes from one type of Feature Group to another, new minimum period obligations will be established.

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE-(Continued)

#### 6.10 Rate Regulations-(Continued)

##### 6.10.7 Change of Feature Group Type-(Continued)

Changes within Feature Group A (i.e., MTS/WATS-type to FX/ONAL or FX/ONAL to MTS/WATS-type) are not treated as a discontinuance of one type of service and start of another but are subject to the non-recurring charge as set forth in Paragraph 5.2.2.A, preceding.

##### 6.10.8 Change of Basic Serving Arrangements

Changes from one type of BSA to another will be treated as a discontinuance of one type of service and a start of another. Nonrecurring charges will apply with one exception. When a customer upgrades a Circuit Switched - Line Side or a Circuit Switched - Trunk Side Alternative B or C service to a Circuit Switched - Trunk Side

(CT)

Alternative D service, the BSA-D trunk installation charges will not

(AT)

apply. Any features or BSE's that are added or changed when the customer upgrades the service to BSA-D will incur the charge applicable

(AT)

to that feature or BSE. When a customer makes such an upgrade, minimum period obligations will not change, i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations for Circuit Switched - Trunk Side Alternative D service. For all other changes from one type of BSA to another, new minimum period obligations will be established.

##### 6.10.9 Conversion of Existing Feature Groups to Basic Serving Arrangements

During the transition period, as set forth in Paragraph 6.1, preceding, nonrecurring charges will not apply to the conversion of existing Feature Groups to their unbundled BSA equivalents. However, conversions from a BSA to its equivalent Feature Group will be treated as a discontinuance of one type of service and a start of another (nonrecurring charges will apply).

When a customer converts an existing Feature Group to its unbundled BSA equivalent, minimum period obligations will not change, i.e., the time elapsed in the existing minimum period obligations will be credited to the minimum period obligations for the BSA. For changes from a BSA to a bundled Feature Group during the transition period as noted above, new minimum period obligations will be established.

(CP)ACCESS SERVICES

6. SWITCHED ACCESS SERVICE-(Continued)

6.7 Rate Regulations-(Continued)

6.7.7 Moves

A move involves a change in the physical location of one of the following:

- The point of termination at the customer's premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

A. Moves Within the Same Building

When the move is to a new location within the same building, the move will be treated as an extension of access service facilities as set forth in Paragraph 2.1.4.C, preceding. There will be no change in minimum period requirements.

B. Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The customer will remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

6.7.8 Measuring Access Minutes

Customer traffic to end offices will be measured (i.e., recorded or assumed) by the Telephone Company at end office switches or access tandem switches. Originating and terminating calls will be measured by the Telephone Company to determine the basis for computing chargeable access minutes. For terminating calls over FGA and FGB, FGC to 800 and FGD, and for originating calls over MTS/WATS-type FGA and FGB and FGD, the measured access minutes are the chargeable access minutes. For originating calls over FX/ONAL FGA and FGC, chargeable originating access minutes are derived from recorded minutes in the following manner.

## ACCESS SERVICES

## 6. SWITCHED ACCESS SERVICE-(Continued)

## 6.10 Rate Regulations-(Continued)

## 6.10.10 Moves and Rollovers-(Continued)

(AT) Nonrecurring Charges for Rollovers will apply as specified in Paragraph 6.11. There will be no change in minimum period requirements.

## (2) Relocation

A customer initiated move of a Point of Termination to a new location within the same customer premises, will be treated as an extension of access service facilities. Extension of access service facilities will be provided, at the customer's request, on a time sensitive charge basis. The labor rates which apply are as set forth in Section 13 following for Other Labor. There will be no change

(AT) in minimum period requirements.

## (CT) B. Moves of Customer Premises

(CT) A move of a customer premise will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The customer will remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

## (MT) 6.10.11 Measuring Access Minutes

Customer traffic to end offices will be measured (i.e., recorded or assumed) by the Telephone Company at end office switches or access tandem switches. Originating and terminating calls will be measured by the Telephone Company to determine the basis for computing chargeable access minutes. For terminating calls over FGA, FGB, BSA-A and BSA-B, for terminating calls over FGC or BSA-C to 800 terminated on WATS Access Line Service and FGD, and for originating calls over MTS/WATS-type FGA or BSA-A, FGB or BSA-B and FGD or BSA-D, the measured access minutes are the chargeable access minutes. For originating calls over FX/ONAL FGA and FX/ONAL BSA-A and for originating calls over FGC and BSA-C, chargeable originating access minutes are derived from recorded minutes in the following manner.

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE-(Continued)

#### 6.10 Rate Regulations-(Continued)

##### 6.10.11 Measuring Access Minutes-(Continued)

Step 1: Obtain recorded originating minutes and messages  
(measured as set forth in Paragraph (A) and (C)  
following for FX/ONAL FGA, FX/ONAL, BSA-A, FGC and BSA-C,  
respectively) from the appropriate recording data.

(AT) Step 2: Obtain the total attempts by dividing the originating  
measured messages by the completion ratio. Completion  
Ratios (CR) are obtained separately for the major call  
categories such as DDD, operator, ACIS, 800, 900, directory  
assistance and international from a sample study which  
analyzes the ultimate completion status of the total  
attempts which receive acknowledgment from the customer.  
That is, Measured Messages divided by Completion Ratio  
equals Total Attempts.

Step 3: Obtain the total non-conversation time additive (NCTA) by  
multiplying the total attempts (obtained in Step 2) by the NCTA per attempt ratio. The  
NCTA per attempt ratio is  
obtained from the sample study identified in Step 2 by  
measuring the non-conversation time associated with both  
completed and incomplete attempts. The total NCTA is the  
time on a completed attempt from customer acknowledgment  
of receipt of call to called party answer (set up and  
ringing) plus the time on an incomplete attempt from  
customer acknowledgment of call unit the access tandem or  
end office receives a disconnect signal (ring - no answer,  
busy or network blockage). That is, Total Attempts times  
Non-Conversation Time per Attempt Ratio equals Total NCTA.

Step 4: Obtain total chargeable originating access minutes by adding  
the total NCTA (obtained in Step 3) to the recorded  
originating measured minutes (obtained in Step 1). That is,  
Measured Minutes plus NCTA equals Chargeable Originating  
Access Minutes.

## 6. SWITCHED ACCESS SERVICE-(Continued)

## (FC) 6.10 Rate Regulations-(Continued)

## (FC) 6.10.11 Measuring Access Minutes-(Continued)

- (AT) When assumed minutes are used, the assumed minutes are the  
(AT) chargeable access minutes. Assumed minutes are used for FGA, FGB,  
(AT) BSA-A and BSA-B services which originate or terminate in end offices not equipped with  
(FC) measurement capabilities and are applied on a line  
(AT) or trunk basis, as set forth in Paragraph 6.10.1.D., preceding.
- (AT) FGA and BSA-A access minutes or fractions thereof, the exact value of the fraction being a  
function of the switch technology where the  
measurement is made, are accumulated over the billing period for  
each line or hunt group, and are then rounded up to the nearest  
(AT) access minute for each line or hunt group. FGB, FGC, FGD, BSA-B,  
(AT) BSA-C and BSA-D access minutes or fractions thereof, the exact value of the fraction being a  
function of the switch technology where the measurement is made, are accumulated over the  
billing period for each end office, and are then rounded up to the nearest access minute for  
each end office.
- (AT) A. FGA and BSA-A Usage Measurement
- (AT) For originating calls over FGA or BSA-A, usage measurement begins when the  
(AT) originating FGA or BSA-A entry switch receives an off-hook supervisory  
(AT) signal forwarded from the customer's point of termination. (Where FGA or  
(AT) BSA-A is used for MTS/WATS-type services, this off-hook signal is  
(AT) generally provided by the customer's equipment. Where FGA or BSA-A is used for FX/ONAL  
services, the off-hook signal is generally forwarded by  
the customer's equipment when the called party answers.)
- (AT) The measurement of originating call usage over FGA or BSA-A ends when the  
(AT) originating FGA or BSA-A entry switch receives an on-hook supervisory signal from either the  
originating end user's end office, indicating the originating end user has disconnected, or the  
customer's point of termination, whichever is recognized first by the entry switch.

## (FC) 6.10.11 Measuring Access Minutes--(Continued)

## (AT) B. FGB and BSA-B Usage Measurement--(Continued)

(AT) The measurement of terminating call usage over FGB or BSA-B ends when the  
(AT) terminating FGB or BSA-B entry switch receives disconnect supervision from  
either the terminating end user's end office, indicating the end user has  
disconnected, or the customer's point of termination, whichever is  
recognized first by the entry switch.

## (AT) C. FGC and BSA-C Usage Measurement

(AT) For originating calls over FGC or BSA-C usage measurement begins when the  
(AT) originating FGC or BSA-C entry switch receives answer supervision from the  
customer's point of termination, indicating the called party has answered.

(AT) The measurement of originating call usage over FGC or BSA-C ends when the  
(AT) originating FGC or BSA-C entry switch receives disconnect supervision from  
either the originating end user's end office, indicating the originating  
end user has disconnected, or the customer's point of termination,  
whichever is recognized first by the entry switch.

(AT) For terminating calls over FGC or BSA-C to services other than 800, 900 or  
(AT) Directory Assistance, terminating FGC or BSA-C usage may not be directly  
measured at the terminating entry switch, but may be imputed and updated  
monthly from originating usage, excluding usage from calls to 800, 900 or  
Directory Assistance Services. Actual measured usage will be used where  
available rather than an imputed value.

(AT) For terminating calls over FGC or BSA-C to 800 Service, usage measurement  
(AT) begins when the terminating FGC or BSA-C entry switch receives answer  
supervision from the terminating end user's end office, indicating the  
terminating 800 Service end user has answered.

### 6. SWITCHED ACCESS SERVICE-(Continued)

#### (FC) 6.10 Rate Regulations-(Continued)

#### (FC) 6.10.15 Mileage Measurement

The mileage to be used to determine the monthly rate for Local Transport is calculated on the airline distance between the end office switch where the call carried by Local Transport originates or terminates and the IC serving wire center, except as set forth

(FC) in Paragraphs 6.10.14, A., B., C., and D., following. Where applicable, the V&H coordinates method is used to determine mileage. This method is set forth in the appropriate Exchange Carrier Association Tariff filed with the F.C.C.(1)

(FC) Mileage is shown in Paragraph 6.11.1, following, in terms of mileage bands. To determine the rate to be billed, first compute the mileage, then find the band into which the computed mileage falls and apply the rate shown for that band. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band and applying the rates.

Exceptions to the mileage measurement rules are as follows:

(AT) A. Mileage for FGA or BSA-A originating access minutes will be calculated using the V&H coordinates of the customer's serving wire center and the end office switch  
(AT) where the FGA or BSA-A dial tone is provided.

(C) B. When a non-AT&T IC terminal location is within five miles of an AT&T Class 4 office, the Local Transport mileage for a call which is carried over a Switched Access Service, originating or terminating through an end office switch shall be the distance as would be determined from that end office switch to the IC's serving wire center unless the IC specifies that for an entire LATA, it wants all measurements determined from the serving wire center for that AT&T class 4 office. This designation (i.e., which serving wire center to use in calculating mileage) may be changed only once in any 12-month period. Such change will be made without charge to the IC.

(AT) C. When the Alternate Traffic Routing feature is provided with FGB, FGC and FGD or  
(AT) the Alternate Traffic Routing BSE is provided with BSA-B, BSA-C or BSA-D to provide service to multiple customer switching systems, usage rated Local Transport access minutes will be apportioned between the two transmission routes  
(AT) used to provide this feature. Such apportionment will be made for FGB, FGC,  
(AT) BSA-B and BSA-C using standard Telephone Company traffic engineering methodology  
(RT)(CT) as set forth in appropriate Technical References and will be based on the last trunk CCS desired for the high usage group, as described in Paragraph 6.3.1, L.,  
preceding, and the relative capacity ordered to the end office, when the feature

(CP) ACCESS SERVICES

6. SWITCHED ACCESS SERVICE-(Continued)

6.7 Rate Regulations-(Continued)

6.7.12 Mileage Measurement

The mileage to be used to determine the monthly rate for Local Transport is calculated on the airline distance between the end office switch where the call carried by Local Transport originates or terminates and the IC serving wire center, except as set forth in Paragraphs 6.7.12, A., B., C., and D., following. Local Transport for the WATS Access Line optional feature will apply as follows. When the WATS serving office is a different end office than the end user's end office, Local Transport will be measured between the end user's end office and the WATS serving office in addition to being measured between the WATS serving office and the serving wire center for the customer's premises. Local Transport rates will apply separately to each of these Local Transport measurements. Where applicable, the V&H coordinates method is used to determine mileage. This method is set forth in the Exchange Carrier Association Tariff, FCC No. 2 for Wire Center Information.

Mileage is shown in Paragraph 6.8.1, following, in terms of mileage bands. To determine the rate to be billed, first compute the mileage, then find the band into which the computed mileage falls and apply the rate shown for that band. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage band and applying the rates.

Exceptions to the mileage measurement rules are as follows:

- A. Mileage for FGA originating access minutes will be calculated using the V&H coordinates of the customer's serving wire center and the end office switch where the FGA dial tone is provided.
- B. When a non-AT&T IC terminal location is within five miles of an AT&T Class 4 office, the Local Transport mileage for a call which is carried over a Switched Access Service, originating or terminating through an end office switch, shall be the distance as would be determined from that end office switch to the IC's serving wire center unless the IC specifies that for an entire LATA, it wants all measurements determined from the serving wire center for that AT&T class 4 office. This designation (i.e., which serving wire center to use in calculating mileage) may be changed only once in any 12-month period. Such change will be made without charge to the IC.

### 6. SWITCHED ACCESS SERVICE-(Continued)

#### 6.10 Rate Regulations-(Continued)

##### 6.10.15 Mileage Measurement-(Continued)

G. When 800 NPAS originates from an end office that routes its traffic through an intermediate access tandem or an OSS tandem to an SSP equipped access tandem, a representative NXX for the intermediate tandem or the OSS tandem will be used to determine the Local Transport mileage for those end offices subtending the intermediate tandem or the OSS tandem. The V&H coordinates of the representative NXX will be based on the average distance from all end offices subtending the tandem to the SSP equipped access tandem.

##### 6.10.16 Shared Use

Shared use occurs when Switched Access Service and Special Access Service are provided over the same analog or digital high capacity service through a common interface. The regulations governing the provision of Shared Use Facilities are set forth in Paragraph 7.3.8, following. Switched Access rates and charges, as set forth in Paragraph 6.11, following, apply for each equivalent voice grade Channel utilized to provide Switched Access Service.

(AT) When a customer requests a Rollover of Shared use Facilities, the Special Access  
(AT) Nonrecurring Charge(s) for a Rollover, as set forth in  
(MT) Section 7, will apply.

## 6.10.17 800 Number Portability Access Service (NPAS)

MO. PUBLIC SERVICE COMM.

The following rate elements found in Paragraph 6.11.7 are applicable  
to 800 NPAS:

- CANCELLED - Missouri Public Service Commission - 02/16/2003 - IN-2003-0247
- (AT) A. The 800 NPAS Query provides the customer identification function required to determine the appropriate routing for each 1+800+NXX+XXXX number based on the geographic origination of the call, from a specific NPA/NXX, NPA, or LATA, up to any combination of the same. The 800 NPAS Query rate applies per call for each 800 Query received at the Telephone Company SCP that returns a valid carrier identification code that provides the appropriate routing information of that call and results in the delivery of the 800 call to the customer. The following features are available with 800 NPAS:
- (AT) B. The POTS translation feature converts the 800 number into a designated Plain Old Telephone Service (POTS) ten-digit number. If the customer provides the POTS number associated with the 800 number and requests delivery of the POTS number in place of the 800 number, the Telephone Company will deliver the POTS number.
- The charge for this feature will be applied for each POTS translation Query and will be in addition to the 800 NPAS Query.
- (AT) C. The Call Validation feature ensures that calls originate only from an 800 Subscriber's customized service area. Calls originating outside the area will be screened and an out of band recording will be returned to the calling party.
- The charge for this feature will be applied for each Call Validation query and will be in addition to the 800 NPAS Query.
- (AT) D. The Call Handling and Destination feature allows routing of 800 calls based on one or any combination of the following: time of day, day of week, percent allocation and specific ten-digit ANI.
- The charge for this feature will be applied for each Call Handling and Destination query and will be in addition to the 800 NPAS Query.
- (AT) E. The 800 NPAS rate elements will be billed to the customer utilizing FGD/BSA-D trunk side Switched Access Service for the delivery of 800 calls. Upon written notification by an exchange telephone company, the Telephone Company will render the 800 NPAS charges to the exchange telephone company, instead of the customer. The Telephone Company will bill the exchange telephone company for the appropriate 800 NPAS charges when an 800 NPAS call originates in the exchange telephone company's territory but uses the Telephone Company's SSP to execute the carrier identification function and delivery of the 800 call to the customer.

##### 6.10.19 Switched Access Optional Payment Plan

###### (A) Description

The Switched Access Optional Payment Plan provides the customer with an optional pricing plan and discounted tariff rates for a one, two, three, four and five year period when the customer agrees to a specific minimum monthly usage commitment level for the Optional Payment Plan period. The Switched Access Optional Payment Plan is available with Switched Access Service, i.e., Feature Group A (FGA), FGB, FGC, FGD, Basic Service Arrangement - A (BSA-A), BSA-B, BSA-C and BSA-D; however, it does not apply to assumed usage, monthly rated (flat recurring) elements or nonrecurring charges. The Telephone Company's portion of usage related to traffic jointly provided by the Telephone Company and other local exchange carriers will be included.

The Switched Access Optional Payment Plan, which includes both originating and terminating access minutes of use, provides the customer with discounts for usage sensitive switched access rate elements based upon a customer's commitment to purchase switched access for a specified length of time at a specific volume level. Switched Access Optional Payment Plan discounts apply to usage sensitive rate elements, such as Carrier Common Line, Local Switching, Interconnection Charge and Local Transport.

The Switched Access Optional Payment Plan is available as a one, two, three, four or five-year Plan. The Switched Access Optional Payment Plan commitment levels range from 80%, the minimum commitment level, to 100% of a customer's base period usage. A base period is defined as the customer's most recent twelve months of billed usage.

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

###### (A) Description - (Continued)

The Switched Access Optional Payment Plan discounts are applied to the applicable switched access usage sensitive rate elements. The discount applies to all minutes of use including those minutes exceeding the customer's commitment level. Reassessment charges will apply if actual usage for the annual period is less than the Switched Access Optional Payment Plan commitment level but greater than the 80% minimum commitment level. Termination charges will apply when a customer either terminates the Plan prior to the stop date of the Plan or when the actual usage for the annual period falls below the 80% minimum commitment level.

###### (B) Ordering and Renewing

The Switched Access Optional Payment Plan is available to all customers and may be ordered at the state or LATA level within the State of Missouri. A customer may subscribe to only one Switched Access Optional Payment Plan per state or LATA at one time. The Switched Access Optional Payment Plan is subscribed to at an Access Carrier Name Abbreviation (ACNA) level. The sum of ACNAs may be used to develop a customer's base period commitment level. Should merger or acquisition activity occur, a customer may combine additional ACNAs after the start date of the Plan. Upon written request of the customer to add ACNAs to the existing Plan, the Telephone Company will work cooperatively with the customer to renegotiate the new base period usage.

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

###### (B) Ordering and Renewing - (Continued)

An Access Service Request (ASR) form is not required to order a Switched Access Optional Payment Plan. Instead, a customer must request the Switched Access Optional Payment Plan in writing by providing the following information:

- Length of Plan expressed as one, two, three, four, five years;
- Minutes of use in base period;
- Percentage of commitment level of base period usage;
- ACNA to be included in the calculations of base period and commitment levels;
- State or LATA option.

A customer may, at any time during the Plan, renew the Plan based upon current market and tariff conditions provided the new Plan's expiration date is not earlier than the current Plan's expiration date and the new Plan is at the same or higher commitment level. For example, a customer, having completed one year of a three year term Plan, may renew for two years (or longer) at the same or higher commitment level to take advantage of a higher discount rate for the renewed Plan commitment level and term period. New base period commitments will be determined for the renewal.

Upon expiration of a customer's Switched Access Optional Payment Plan, nondiscounted tariff rates will apply to the customer's switched access usage sensitive rate elements.

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

#### (C) Terms and Conditions - (Continued)

##### (1) Discount Factor

Discount factors are percentage discounts applied to current tariff rates for switched access usage sensitive rate elements. The discount applies to all switched access minutes of use included in the Switched Access Optional Payment Plan, including those exceeding the commitment level. The resulting discounted tariff rate will be calculated to the same number of decimal places as the nondiscounted tariff rate. If a Switched Access Optional Payment Plan Matrix discount factor is increased, the new factor will automatically apply to the customer's usage as of the effective date of the tariff change. The Switched Access Optional Payment Plan Matrix discount factors are displayed in (9) following.

##### (2) Annual Commitment and Commitment Percentage

To obtain the discounted tariff rates, the customer agrees to purchase a specific level of usage over a specified period of time. The commitment is an annual quantity of billed minutes of use associated with the applicable switched access usage sensitive rate elements and is expressed as a percentage level of the customer's previous twelve months (base period) billed usage. The annual quantity will be based on the local switching MOU. All applicable rate elements should be consistent with the commitment percentage. For multi-year Plans, the base period is recast each anniversary date and defined as the previous twelve month period. If a customer does not have twelve months of prior usage, the Telephone Company will work cooperatively with the customer to develop an estimated base period usage level upon which to base a Switched Access Optional Payment Plan commitment. No discounts are applicable to usage volume levels below the 80% minimum commitment level.

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

###### (C) Terms and Conditions - (Continued)

###### (3) Start and Stop Dates

The Switched Access Optional Payment Plan is initiated at the beginning of a bill period (start date) and is completed at the end of a pre-determined bill period (stop date) in 12 month increments. During this time period, the discount is applied to the switched access usage sensitive rate elements.

###### (4) Anniversary Dates

Anniversary date(s) occur annually between the start and stop dates. Ninety days after the anniversary date, actual usage is compared to the commitment level. The billing for the given year will be adjusted as of the anniversary date. For one year Plans, the anniversary date is the end date of the Plan. For multi-year Plans, anniversary dates occur at the end of each twelve-month period of the Plan. On the anniversary date of a multi-year Plan, the base period is recast and defined as the previous twelve month period.

###### (5) Reassessment Charges

###### (a) Definition

Reassessment charges are charges that apply when the actual usage is less than the customer's Switched Access Optional Payment Plan commitment level but greater than the 80% minimum level.

Issued: July 5, 1995

Effective: November 3, 1995

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

###### (C) Terms and Conditions - (Continued)

###### (5) Reassessment Charges - (Continued)

###### (b) Determination

Each Plan is reviewed ninety days following the Plan anniversary or early termination date to determine if commitment levels were achieved. This determination is made by comparing the total usage accumulated from the last anniversary date up to the current anniversary or termination date. The ninety day period allows late usage to be applied to the Plan. If actual usage is below the commitment level, but greater than the 80% minimum level, Reassessment charges apply.

###### (c) Application of Reassessment Charges

With the exception of a one year Plan, when actual usage is less than the customer's commitment level but greater than the 80% minimum level, actual usage is multiplied by the tariff rate and the difference between the customer's existing Optional Payment Plan discount factor and the new applicable discount factor for the shorter plan period at the percentage level appropriate for the actual usage. Application of Reassessment charges represents a recovery of the difference between discount levels.

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

##### (C) Terms and Conditions - (Continued)

##### (5) Reassessment Charges - (Continued)

##### (c) Application of Reassessment Charges - (Continued)

- For a one year Plan, actual usage is re-rated at the tariff rate in effect at the time usage was recorded.
- For a multi-year Plan, actual usage is re-rated using the discount factor for a Plan of that length. For example, a five year Plan in the third year would re-rate all actual usage for each year (i.e., years one, two and three) using the discount factor for a three year Plan.

At the time Reassessment charges are applied, the customer is considered to have terminated the Plan; however, Termination charges will not apply.

##### (6) Termination Charges

##### (a) Definition

Termination charges are charges that occur when the customer either terminates the Optional Payment Plan prior to the stop date of the Plan or the actual annual usage falls below the 80% minimum commitment level. The customer must notify the Telephone Company in writing 60 days prior to the termination of the Switched Access Optional Payment Plan. When the annual usage falls below the 80% minimum commitment level, the customer is considered to have terminated the Plan.

Access Service Tariff  
Section 6  
Original Sheet 82.11

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

#### (C) Terms and Conditions - (Continued)

##### (6) Termination Charges

###### (b) Determination

Each Plan is reviewed ninety days following the Plan anniversary or early termination date, whichever occurs first, to determine if commitment levels were achieved. This determination is made by comparing the total usage accumulated from the last anniversary date up to the current anniversary or termination date. This ninety day period allows late usage to be applied to the Plan. If actual annual usage is below the customer's commitment level and the 80% minimum level, or the customer terminates the Plan prior to the stop date, Termination charges will apply.

###### (c) Application of Termination Charges

If termination occurs before the end of the first year, actual usage will be billed at the tariffed rate in effect at the time the usage was recorded.

If a customer terminates the Plan after the first year but before the Plan's stop date or the actual usage is below the 80% minimum commitment level, actual usage for all previous months is re-rated using the tariff rate in effect at the time the usage was recorded. For example, if a five year Plan is terminated in the third year, all actual usage for years one, two and three are re-rated using the tariff rate and the difference between the re-rated usage and the billed discounted usage is billed as a Termination charge.

## ACCESS SERVICES

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

###### (C) Terms and Conditions - (Continued)

###### (7) Rate Changes

The maximum rate for each rate element is equal to the nondiscounted tariff rate at the start date of the customer's Switched Access Optional Payment Plan. Any price decreases during the Plan will be passed on to the customer in the form of a lower discounted tariffed rate.

A customer may terminate its Switched Access Optional Payment Plan without liability and termination charges if any applicable switched access tariff rate increases by more than five percent of the rate at the beginning of the Switched Access Optional Payment Plan. To be eligible for the rate change termination option, the customer must notify the Telephone Company in writing within 90 days of a rate change. Upon discontinuance of the Plan, nondiscounted tariff rates will apply to the customer's usage sensitive rate elements.

###### (8) Lost or Damaged Usage Data

If usage data becomes unavailable to determine discounts, the Telephone Company will estimate the amount of lost usage. The estimate will be used in the Plan calculations.

### 6. SWITCHED ACCESS SERVICE - (Continued)

#### 6.10 Rate Regulations - (Continued)

##### 6.10.19 Switched Access Optional Payment Plan - (Continued)

#### (C) Terms and Conditions - (Continued)

##### (9) Term Plan Discount Matrix

The following matrix is used to determine the customer's Optional Payment Plan commitment level and discount factor. To determine the matrix discount factor for a Plan:

- Identify the number of years of the Switched Access Optional Payment Plan.
- Identify the usage commitment provided by the customer as the percentage of the base period minutes of use.
- Use the Plan Discount Matrix to identify the appropriate discount percentage.

### **Discount Factors**

Commitment	YEARS				
Level	1	2	3	4	5
80%	0%	.5%	1.0%	1.5%	2.0%
90%	.5%	1.0%	3.0%	4.0%	5.0%

## 1. Common Switching Features

(CP)

- a. Nonrecurring charges apply when the following features are installed, or if specified below, changed or deleted, whether concurrent with or subsequent to the installation of a trunk(s) or trunk group(s).

- (1) When the following features are installed for an End Office/Tandem, for a specific Carrier Identification Code (CIC), the charges will apply as follows:

When direct routed, the first End Office Charge applies.  
When tandem routed, the first End Office Charge applies plus any additional office charges plus one Tandem Charge.

Nonrecurring Charge  
(Charge/Per End Office  
unless otherwise noted)

## 6.8.4 Local Business Line Rates for Access to Resold Service

The local business line rates that apply for arrangements provided as set forth in Paragraph 6.7.3, preceding, are the same as the local business exchange service rates as set forth in the General and/or Local Exchange Service Tariffs of the Telephone Company applicable to the exchange involved and type of equipment at the IC terminal location. The local business line rate also includes any End User Access Service Charges authorized by the FCC.
