B. Minimum Period and Minimum Monthly Charge

The minimum period for which Recording Service is provided and for which charges apply is one month for each state in which the service is ordered.

The minimum monthly charges are the charges for IC messages recorded, IC message assembled and edited (except when Message Processing Service is ordered for the same monthly period) and when ordered by the IC, provision of the IC message detail on magnetic tape or data file. If the service is cancelled or discontinued prior to entering the detail on a magnetic tape or data file, the minimum monthly charge will be the charge for all IC messages recorded, assembled and edited for a 30-day period. The Telephone Company will use the most recent 30-day period for which data is available to determine the minimum charge.

C. Cancellation of a Special Order

An IC may cancel a Special Order for Recording Service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the IC that the Special Order is to be cancelled. The verbal notice must be followed by written confirmation within ten days. The service date for Recording Service is the date the IC requests the recordings to start.

CANCELLED

When an IC cancels a Special Order for Recording Service after the order date but prior to the start of service, the minimum monthly charges will apply.

BY Let. R.S. #6D. Changes to Special Orders Public Service Commission
MISSOURI

When an IC requests changes to a pending Special Order for Recording Service, the pending Special Order will be cancelled, and the requested changes will be undertaken if they can be accommodated by the Telephone Company under a new Special Order. All cancellation charges as set forth in Paragraph 8.1.5, C., preceding, will apply for the cancelled Special Order.

A. General Description

1. Message Processing Service

Message Processing Service is the transforming of the recorded IC call details into rated messages in preparation for billing. Message Processing Service includes initial data entry and rating of messages.

Initial data entry is the assembly of recorded IC call details into IC messages. This function includes editing and verification of recorded details to assure that the data required for rating are present.

Rating of IC messages is the computing of applicable charges for each IC message based on the IC-provided schedule of rates. Rating also includes the preparation of IC message detail for input to Bill Processing Service, the IC or other entities.

Further, rating is always performed and editing may be performed coincident with the implementation of a change in the IC's schedule of rates.

2. Bill Processing Service

Bill Processing Service is the preparation of bills for message-billed service and bulk-billed service, mailing of statements of the amounts due for service received from the IC and the collection of the deposits and monies due from the End Users. Bill Processing Service includes message-billed (when necessary) and bulk-billed account establishment, posting of rated messages and rate elements, rendering of bills, collection of deposits, receiving payments, maintenance of accounts, treatment of accounts, message investigation and inquiry (when ordered by the IC).

Bulk-billed service is a billing service for an End User's account with a Dedicated Access Line (DAL) Service to the End User's premises where individual IC messages are not posted to the account and are not listed on the bill rendered to the End User.

Message-billed service is a billing service for an End User's account with an End User's common line where individual IC messages are posted to the account and are listed on the bill rendered to the End User. Message-billed service is also a billing service for an IC credit card End User's account without an End User's common line or Dedicated Access Line Service where individual messages or groups of messages are posted to the account and listed on the bill rendered to the End User.

Account establishment is the preparation of an IC End User's record so that a bill can be sent to that End User.

Posting of rated messages is the processing for billing of rated messages. Posting also is the examination and identification of all the rateable elements specified by the IC to be billed to an End User. Application of appropriate IC rates and charges to all such rate elements is also included when requested by the IC. The rating may be performed by the Telephone Company, another entity or the IC. Editing and rating of rate elements is performed when IC services are established or changed. D. Obligations of the IC

1. The IC shall order Message Billing Services under a Special Order for each state where service is desired. The IC shall be responsible for all balances due from End Users that exist prior to ordering Bill Processing Service.

At the time Message Processing Service and/or Bill Processing Service is initially ordered, the IC shall order the service for one, three or five years. Thereafter, upon six months' written notice, additional service may be ordered for one, three or five years at the rates and charges as set forth in Paragraph 8.2.1, G., following. 8. BILLING AND COLLECTION SERVICES-(Continued)

8.2 Billing Service-(Continued)

8.2.2 Private Line Billing Service

The Telephone Company will provide Private Line Billing Service only for those IC Private Line Services for which the Telephone Company is providing Special Access Service. The Telephone Company will not render bills for IC Private Line Services for which it does not provide Special Access Services that are connected at End User's premises to IC Private Line Services for which it does render bills.

The Telephone Company will not render bills for usage-based rate elements under this Section of the Tariff. Usage-based rate elements will be billed as set forth in Paragraph 8.2.1, preceding.

A. General Description

Private Line Billing Service includes editing and rating, account establishment, rendering of bills, receiving payments, maintenance of accounts, treatment of accounts and inquiry (when ordered by the IC).

Editing and rating is the examination and identification of all the rateable elements of an IC Private Line Service and the application of the appropriate IC rates and charges to the service. These functions are performed when Private Line Services for an IC's End User are established or changed. Rating is always performed, and editing may be performed, coincident with the implementation of a change in the IC's schedule of rates.

Account establishment is the preparation of an IC End User's record so that a bill can be sent to that End User.

Rendering of bills is the preparation and mailing of statements of the amounts due from End Users for service received from the IC. These statements may, at Telephone Company's choice, be included as part of the regular monthly bill for Local Telephone Exchange Service mailed to the End User.

Receiving payment and maintenance of accounts is the collecting of deposits and monies from End Users for services furnished by the IC and maintenance of records of all transactions.

A. General Description-(Continued)

Treatment of accounts is the forwarding of notices of delinquent or unpaid End User's accounts, posting credits and adjustments, and when necessary as determined by the Telephone Company, denial of the IC's Special Access Service.

Inquiry is the answering of End User's questions about charges for IC services and negotiating of credits and adjustments to End User's accounts and review of IC charges which are removed from an End User's bill.

B. Undertaking of the Telephone Company

1. When Private Line Billing Service is ordered by an IC, the Telephone Company will establish a Private Line account, edit and rate the billing detail, bill the End User and maintain and treat the Private Line account (based on the rate and End User's data supplied by the IC) at the rates and charges set forth in Paragraph 8.2.2, G., following, as set forth in Paragraph 8.2.2, B.2. through 14., following. The Telephone Company will not establish a Private Line End User's account with any IC balance due. In addition, the Telephone Company will, in accordance with Telephone Company deposit regulations, determine and collect a deposit from the End User for the IC service. The Telephone Company will, when necessary, in accordance with the Telephone Company deposit regulations, determine and collect the service deposit when an End User's account is established. 2. Private Line Billing Service records and End User's accounts will be maintained by the Telephone Company in a standard format in order to identify the End User and bill the rateable elements. The Telephone Company will establish this format and provide it to the IC. The Telephone Company will also establish the format it will use to bill Private Line Services and provide it to the IC. If, in the course of Telephone Company business, it is necessary to change these formats, the Telephone Company will notify the involved IC's six months prior to the change.
3. The Telephone Company will develop the IC's schedule of rates and charges into a rating program. Program development charges as set forth in Paragraph 8.2.2, G.3., following, apply for the hours required to design, develop, test and maintain the necessary programs.
4. Upon acceptance by the Telephone Company of a Special Order for Private Line Billing Service from an IC, the Telephone Company will determine the period of time to implement such service on an individual-case basis.
5. Changes in the rate levels of IC services to be billed will normally be implemented within 60 days after receipt of a Special Order from the IC requesting such changes. When the Telephone Company provides Private Line Billing with inquiry, the Telephone Company will be responsible for contacts and arrangements with the IC's End Users concerning the billing, collecting, crediting and adjusting of the IC service charges, except prior IC balances due from End Users in accordance with written instructions furnished by the IC. At the request of the IC, the billed IC charges which are removed from the End User's bill in accordance with the IC inquiry instructions will be reviewed for unauthorized use of the IC service by Telephone Company message investigation groups for a period of up to 90 days after the billed IC charges have been removed from the End User's bill. The Telephone Company will purchase from the IC its accounts receivable that arise from bills rendered by the Telephone Company to that IC's End Users. For IC's subscribing to Message Processing Service, the purchase will be handled as described in (A) following. When an IC does not subscribe to Message Processing Service but does subscribe to Bill Processing Service, the Telephone Company may purchase accounts receivable from an IC who provides the Telephone Company with files of rated messages as described in (B) following. The purchase of accounts receivable will be limited to amounts due the IC when the Telephone Company provides Bill Processing Service and/or Private Line Billing Service for that IC. After an IC orders Bill Processing Service and/or Private Line Billing Service and the Telephone Company is purchasing the IC's accounts receivable, the IC is prohibited from assigning, transferring, selling, exchanging or giving these accounts receivable to any other entity or person. The IC will provide a written assurance to the Telephone Company as such forbearance and any such assignment, transfer, sale, exchange or gift is null and void and will subject the IC to all liabilities, expenses, costs including attorney fees expended and incurred by the Telephone Company in pursuing exclusive ownership to accounts receivable.

Such activities include bypass or circumvention of Telephone Company billing equipment, unauthorized use of Telephone Company and IC service offerings and unauthorized use of Telephone Company facilities.

8.3.1 General Description

Investigation also includes provision of services to coordinate the investigative activities between exchange telephone companies and/or law enforcement agencies.

Deterrence is the contacting and interviewing of parties identified in billing evasion activities, the recovery of devices or materials used in billing evasion activities (where legally permitted), the service review for possible suspension of service over access lines identified in billing evasion activities and publicity assistance in publicizing billing evasion deterrence.

- A. The number and type of records for which charges apply as set forth in Paragraph 8.4.7, following, will be accumulated by the Telephone Company, and the Telephone Company will bill the IC in accordance with these accumulations. A record is a logical grouping of information as described in the programs that process the information, print the paper output and load the magnetic tape or file used to supply the detail which is data-transmitted or put on fiche. For each service and type of output ordered, the number of records processed by the Telephone Company to prepare the output will be used to determine the charges. The number of records processed will be determined using the number of records input to or the number of records output from the programs that process the information, print the paper output and load the magnetic tape or data file, whichever number of records is higher.
- B. The number of hours and fraction thereof for which charges apply as set forth in Paragraph 8.4.7, following, will be accumulated by the Telephone Company. The per-hour rate is for the use of one hour of one Telephone Company's programmer. The Telephone Company will bill the IC for hourly charges in accordance with these accumulations. The accumulated hours for each order will be summed and rounded to the nearest hour, except that when the total is less than one hour, one hour will be used to determine the charges.
- C. When a CNA request is received, the Telephone Company will keep a count of the requests. The Telephone Company will bill the IC in accordance with these records even though the Telephone Company was not able to provide a name and town location for all requests.
- D. When records are entered on a data file or magnetic tape in order to provide information to an IC, the per-tape charge applies for each data file or tape prepared. In addition, the per-record charge applies for each record entered on the data file or tape. The Telephone Company will determine the charges based on the number of data files or tapes prepared and on its count of the records entered on the data file or tape.
- E. When marking of message End User's accounts is ordered, the marking charge applies for each End User's account marked. Once an account is marked, the maintenance of mark charge applies for each month following the month the account is marked until the IC requests the mark be removed.
