SMARTTRUNKsm

2.1 GENERAL

All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available in the customer's serving office and do not create an obligation for the Company to construct such facilities or equipment especially for the provisioning of this service.

This service is competitively classified in the following exchanges:

Business:
St. Louis
Kansas City

2.2 SERVICE DESCRIPTION

SmartTrunk Service provides access to and from the Public Switched Telephone Network (PSTN) for circuit-switched voice (CSV) and circuit-switched data (CSD) communications. SmartTrunk Service can also be configured to provide packet switched data (PSD) capability. This capability provides access to Southwestern Bell's Public Packet Switched Network (PPSN). SmartTrunk Service is provided using Integrated Services Digital Network (ISDN) architecture. ISDN services available with SmartTrunk Service use Primary Rate Interface (PRI) technology. SmartTrunk Service employs a 1.544 Mbps facility typically divided into twenty-three B channels and one D channel. B channels are used for voice and data communications while the D channel provides out-of-band signaling.

2.3 SERVICE COMPONENTS

(AT) 2 B-Channel Transfer - Allows, in certain central offices, the SmartTrunk to connect two calls,
(AT) transfer the call together and then release the parties from the SmartTrunk.

Backup D-Channel (BD-C) - Allows, in certain central offices, enhanced survivability of SmartTrunk links by providing automatic takeover for a failed D-Channel.

Calling Line Identification (CLID) - Allows the number and/or name (where technically capable) of the calling party to be delivered to the called party as part of the called party set up message, i.e., before ringing begins. Blocked calling name and/or number will be delivered to certain qualifying entities as described in FCC Memorandum Opinion and Order, CC Docket No. 91-281, January 4, 2002. Such entities must certify to the Telephone Company compliance with the Memorandum Opinion and Order's eligibility requirements.

2.3 Service Components-(cont'd)

(MT)

Closed User Group - A packet switched data feature that provides a mechanism for creating a private network that restricts packet data communications between group members and non members. It includes the following features: Closed User Group with Incoming Access and Closed User Group with Outgoing Access.

Closed User Group with Incoming Access - A packet switched data feature that enables terminals belonging to a closed user group to receive incoming calls from terminals outside of the closed user group.

Closed User Group with Outgoing Access - A packet switched data feature that enables terminals belonging to a closed user group to originate outgoing calls to terminals both within and outside of the closed user group.

Common Line 800 Service Option - Provides the customer with the capability to complete Common Line 800 Service calls over a SmartTrunk Interface or Port.

Dynamic Channel Allocation (DCA) - Allows a customer to designate the quantity of call types to be allocated within previously provisioned criteria for either DID or DOD services. In equipped central offices, this feature will also include FSO, Common Line 800, Outward WATS, tie line and FX services. (This feature is also known in the industry as call-by-call service selection.)

Enhanced Alternate Route - Allows incoming voice or data calls to overflow on a disaster and busy basis to a line side connection designated by the customer. Available where technical capabilities exist. A route may be limited in the number of simultaneous calls that can be routed.

Flow Control Parameter Negotiation - A packet switched data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for PSD - A packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

SmartTrunkSM SERVICE

REC'D AUG 17 1998

2.3 Service Components-(Continued)

(MT)

Dynamic Channel Allocation (DCA) - Allows a customer to designate the quantity of call types to be allocated within previously provisioned criteria for either DID or DOD services. In equipped central offices, this feature will also include FSO, Common Line 800, Outward WATS, tie line and FX services. (This feature is also known in the industry as call-by-call service selection.)

(MT)

(AT)

Enhanced Alternate Route - Allows incoming voice or data calls to overflow on a disaster and busy basis to a line side connection designated by the customer. Available where technical capabilities exist. A route may be limited in the number of simultaneous calls that can be routed.

(AT)

(MT)

Flow Control Parameter Negotiation - A packet switched data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for PSD - A packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

(MT)

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

(AT)

Inform 911 - An optional upgrade feature which allows the Calling Party Number of the station to be sent to the E911 database rather than the Billed Telephone Number. It is the customer's responsibility to provide station number updates to the 911 database. Available where technical capabilities exist.

Hunt Group for PSD - A packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

Inform 911 - An optional upgrade feature which allows the Calling Party Number of the station to be sent to the E911 database rather than the Billed Telephone Number. It is the customer's responsibility to provide station number updates to the 911 database. Available where technical capabilities exist.

Integrated Services Digital CSV/CSD Transport Option - Provides for the local use of the PSTN. Only Integrated Service Digital CSV/CSD Transport Options, noted as "SmartTrunk Service Compatible" in Section 1 of this tariff, can be associated with SmartTrunk Service. This component is not required with tie line services and Permanent PSD B-Channel.

Link Extension - Provides the additional central office hardware and facility required to provide SmartTrunk Service to a customer located in an exchange outside the non-optional local calling scope of the SmartTrunk-equipped serving office. Application of this rate element is dependent upon the customer's location and the fact that the customer is served from the SmartTrunk serving office designated by Southwestern Bell.

Local Charge Prevention - This feature prevents virtual packet calls from being charged to the data terminal equipment (DTE). All virtual packet calls originated from the DTE will have to be reversed charged. All incoming calls signaling reverse charging will be cleared.

Logical Channel - A packet switched data communication path which allows two-way simultaneous transmission of data packets through the network.

Network Ring Again (NRA) - Allows, in certain central offices, the customer to automatically complete calls made to busy stations of a different PRI connected PBX system served by the same central office switch.

2.6 Regulations

- 2.6.1 The following regulations apply in addition to other regulations stated in this and the other tariffs of the Company, including but not limited to, the General Exchange Tariff, Section 17. For the purposes of this service, where such other regulations apply on a "per line" basis, they shall be interpreted, in this instance, to apply on a "per channel" basis.

- (CT) 2.6.2 SmartTrunk Service requires compatible registered customer-provided equipment (CPE) under FCC Part 68. The customer will be required to select a service term for the SmartTrunk Interface consisting of 36 or 60 continuous months. Customers selecting the 36 month service term may opt to convert to the 60 month term prior to the expiration of the 36 month term. All service components, except the SmartTrunk Interface, have a minimum service term of one month.

- 2.6.3 SmartTrunk Service is offered only in conjunction with the CSV/central service transport SmartTrunk Service compatible option and is not available on a stand-alone basis.

- 2.6.4 Other ancillary tariff offerings requested by the customer and compatible with this offering may be furnished in accordance with the regulations and at the rates and charges specified in the applicable section of this tariff or other tariffs of the Company. Should such ancillary services normally be applied on a "per line" basis, they will, in this instance, apply on a "per channel" basis.

- A. Touch-Tone Calling Service is not applicable for DOD local exchange services associated with this offering, therefore, not chargeable.
- B. The central office switching equipment (trunk termination) portion of DID Service is not applicable for DID local exchange service associated with this offering, therefore, not chargeable.

- 2.6.5 In addition to the rates and charges contained in this tariff, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental service as specified in this and other tariffs of the Company.

2.3 Service Components (cont'd)

Permanent Virtual Circuit - This feature allows the transfer of packet switched data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit, and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

Recognized Private Operating Agency (RPOA) Selection - Allows the customer to use a packet inter-network provider other than the preselected primary provider by dialing a specific code on a per call basis.

(AT)

Redirected Number - Provides, in certain central offices, the redirected number (i.e., the directory number to which the call was last presented) to the CPE, as well as the calling number in cases such as call forwarding. If during the call establishment phase, the call is redirected to another directory number by call forwarding, both the calling party number and the redirected number are delivered to the called party. If a call is redirected multiple times, only the first and the last redirecting numbers are delivered.

(AT)

Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

Permanent Virtual Circuit - This feature allows the transfer of packet switched data without need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit, and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

Recognized Private Operating Agency (RPOA) Selection - Allows the customer to use a packet inter-network provider other than the preselected primary provider by dialing a specific code on a per call basis.

Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

SmartTrunk Interface (SI) - Provides the PRI termination and a digital multichannel transmission path between the central office and the customer's premises.

(AT)

SmartTrunk Port - A PRI connection that does not include the facility between the customer's premises and the SmartTrunk Serving Office. The connection is made using a SWBT facility purchased separately. This facility must be at a minimum of DSI level and must conform to technical specifications listed in Paragraph 2.5 of this tariff.

(AT)

Station Record Detail - An optional feature that will provide the customer with the station number of all originating calls on the customer bill so that call information can be tracked at a station level. Available where technical capabilities exist.

Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal to negotiate a lower throughput class other than the preassigned standard network default.

Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200.

(AT)

Universal Termination - Provides continuity between the SmartTrunk Interface or Port and the PSTN using central office equipment for Foreign Exchange (FX), Foreign Serving Office (FSO), and tie line services.

2.4 Standards Compliance

SmartTrunk Service is designed to all relevant International Telephone and Telegraph Consultative Committee (CCITT) and Bellcore standards.

Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal to negotiate a lower throughput class other than the preassigned standard network default.

Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200.

Universal Termination - Provides continuity between the SmartTrunk Interface and the PSTN using central office equipment for Foreign Exchange (FX), Foreign Serving Office (FSO) and tie line services.

2.4 Standards Compliance

SmartTrunk Service is designed to all relevant International Telephone and Telegraph Consultative Committee (CCITT) and Bellcore standards.

SmartTrunkSM SERVICE

RECEIVED

2.3 Service Components-(Continued)

AUG 20 1996

- (AT) Outward WATS Option - Provides the customer with the capability to originate Outward WATS calls over a SmartTrunk Interface.
- Permanent Packet Switched Data (PSD) B Channel - Packet switching virtual circuit over a B channel using X.25 packet switched data at speeds up to 64 Kbps. It includes the following features: Up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation, Reverse Charge, Reverse Charge Acceptance, Throughput Class Selection, Incoming Calls Barred, Outgoing Calls Barred, Hunt Group for PSD, and RPOA Selection.
- Permanent Virtual Circuit - This feature allows the transfer of packet switched data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit, and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.
- Recognized Private Operating Agency (RPOA) Selection - Allows the customer to use a packet inter-network provider other than the preselected primary provider by dialing a specific code on a per call basis.
- Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.
- Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.
- (AT)
- (MT) SmartTrunk Interface (SI) - Provides the PRI termination and a digital multichannel transmission path between the central office and the customer's premises.
- (MT)
- (AT) Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal to negotiate a lower throughput class other than the preassigned standard network default.
- Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200.

SMARTTRUNKSM

(MT) 2.3 Service Components (cont'd)

SmartTrunk Interface (SI) - Provides the PRI termination and a digital multichannel transmission path between the central office and the customer's premises.

SmartTrunk Port - A PRI connection that does not include the facility between the customer's premises and the SmartTrunk Serving Office. The connection is made using a SWBT facility purchased separately. This facility must be at a minimum of DSI level and must conform to technical specifications listed in Paragraph 2.5 of this tariff.

Station Record Detail - An optional feature that will provide the customer with the station number of all originating calls on the customer bill so that call information can be tracked at a station level. Available where technical capabilities exist.

Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal to negotiate a lower throughput class other than the preassigned standard network default.

Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200.

Universal Termination - Provides continuity between the SmartTrunk Interface or Port and the PSTN using central office equipment for Foreign Exchange (FX), Foreign Serving Office (FSO), and tie line services.

2.6 Regulations

2.6.1 The following regulations apply in addition to other regulations stated in this and the other tariffs of the Company, including but not limited to, the General Exchange Tariff, Section 17. For the purposes of this service, where such other regulations apply on a "per line" basis, they shall be interpreted, in this instance, to apply on a "per channel" basis.

2.6.2 SmartTrunk Service requires compatible registered customer-provided equipment (CPE) under FCC Part 68.

(AT) 2.6.3 The SmartTrunk Interface or Port is not available on a standalone basis. At a minimum, the SmartTrunk
(AT) Interface or Port is offered with the CSV/CSD local service transport SmartTrunk Service compatible option, or with the Permanent Packet Switched Data B Channel, or with the Universal Termination for private line/tie line services.

2.6.4 Other ancillary tariff offerings requested by the customer and compatible with this offering may be furnished in accordance with the regulations and at the rates and charges specified in the applicable section of this tariff or other tariffs of the Company. Should such ancillary services normally be applied on a "per line" basis, they will, in this instance, apply on a "per channel" basis. The central office switching equipment (trunk termination) portion of DID Service is not applicable for DID local exchange service associated with this offering, and is therefore, not chargeable.

SmartTrunksm SERVICE

2.6 Regulations-(Continued)

2.6.5 In addition to the rates and charges contained in this tariff, the customer is responsible for the payment of all related charges for exchange services, miscellaneous and supplemental service as specified in this and other tariffs of the Company.

2.6.6 Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests will be based upon cost.

2.6.7 In certain central offices, the additional services of Intrastate, IntraLATA Foreign Exchange (FX) Service, Foreign Serving Office (FSO) Service and tie line service may be associated with SmartTrunk Service on a per channel basis.

2.6.8 Upon subscribing to SmartTrunk Service, the customer may be required to change telephone numbers.

2.6.9 Southwestern Bell will designate the SmartTrunk-equipped central office(s) used to physically provision SmartTrunk Service to customers in each exchange. In many cases, a customer's designated SmartTrunk serving central office will be different from the normal serving office designated for basic local exchange service.

1. If the customer's normal serving office is within the non-optional local calling scope of the designated SmartTrunk serving office, Link Extension and FSO charges will not apply.
2. If the customer's normal serving office is not within the non-optional local calling scope of a SmartTrunk-equipped central office, the customer will be provided with SmartTrunk Service from the designated SmartTrunk equipped central office and the rates and charges for Link Extension, as specified in this tariff, will apply.
3. In cases 1 and 2 preceding, when there is a change in the central office designated as the SmartTrunk serving office for a customer's location, the customer's SmartTrunk Service will continue to be provided from the original SmartTrunk serving office, if possible. Should the customer subsequently request that their SmartTrunk Service be provisioned from the new designated serving office, the provisions and charges specified in this Tariff for moves and disconnects will apply. Southwestern Bell may request that the customer, at the customer's option, have the customer's SmartTrunk Service provided from the new designated serving office and, in conjunction therewith, may offer to waive move and/or disconnect charges.

2.6.10 If a customer requests that SmartTrunk Service be provisioned from an office other than the SmartTrunk serving office designated by the Company, and if agreed to by the Company, the charges specified in this Tariff are applicable in addition to the rates, charges, terms and conditions of FSO-FX Service pursuant to the "Foreign Exchange Service" and "Foreign Serving Office Service" sections of the General Exchange Tariff.

RECEIVED

(C) 2.6 Regulation-(Continued)

SEP 7 1993

2.6.6 Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests will be based upon cost.

(AT) 2.6.7 In certain central offices, the additional services of Intrastate, IntraLATA Foreign Exchange (FX) Service, Foreign Serving Office (FSO) Service and TIE Service may be associated with SmartTrunk Service on a per channel basis. However, Dynamic Channel Allocation is not applicable for these services.

(CT) 2.6.8 Upon subscribing to SmartTrunk Service, the customer may be required to change telephone numbers.

(AT) 2.6.9 The central office from which a customer's SmartTrunk Service is physically provisioned shall be designated the customer's SmartTrunk serving office. The Telephone Company will determine a customer's SmartTrunk serving office as follows:

1. If the customer's normal serving office is SmartTrunk equipped, the customer will be provided SmartTrunk Service from their normal serving office.
2. If the customer's normal serving office is not SmartTrunk equipped, the customer may be provided SmartTrunk Service from another SmartTrunk equipped central office located within the customer's exchange at the rates and charges specified in this Tariff.
3. If the customer's exchange is not SmartTrunk equipped, the customer may be provided SmartTrunk Service from a SmartTrunk equipped central office located in a different exchange, if agreed to by the Telephone Company. In such cases, this Tariff is applicable in addition to the rates and charges for interoffice mileage as specified in Paragraph 4.1.4.,B., of the Digital Link Services Tariff.
4. In cases 2 and 3 preceding, when the customer's normal serving office becomes SmartTrunk equipped, their SmartTrunk Service will continue to be provided from their original SmartTrunk serving office. Should the customer subsequently request that their SmartTrunk service be provisioned from their normal serving office, the provisions and charges specified in this Tariff for moves and disconnections will apply.

SmartTrunk SERVICE

APR 28 1992

- 2.6.6 Unique requests for special or modified service arrangements will be accepted, whenever possible, if not detrimental to this or other services of the Company. Such requests will be based on the Public Service Commission's Missouri Public Service Commission
- 2.6.7 In certain central offices, the additional services of Intrastate, IntraLATA Foreign Exchange (FX) Service, Foreign Serving Office (FSO) Service and TIE Service may be associated with SmartTrunk Service. However, Dynamic Channel Allocation is not applicable for these services.
- 2.6.8 In the event a customer's serving office is not equipped for SmartTrunk Service, the customer may request SmartTrunk Service from an FSO/FX serving office that is appropriately equipped. In such cases, where facilities permit, this tariff is applicable in addition to the rates, charges, terms and conditions for the FSO/FX service pursuant to the Private Line or Access Tariff(s).

CANCELLED

2.7 Additions

Any additions of service are subject to current rates and charges.

2.8 Moves

- 2.8.1 Customer moves which require the SmartTrunk Interface to be provided from a different central office, will be considered a disconnection of service for each SmartTrunk Interface moved. Refer to Paragraphs 2.12.4 and 2.12.5 for applicable charges. Installation charges will also apply.

- 2.8.2 Customer moves which do not require the SmartTrunk Interface to be provided from a different central office, will not constitute a disconnection of service provided the customer's service continues uninterrupted from the old location to its re-establishment at the new location. Installation charges will apply.

2.9 Supersedure

SmartTrunk Service may be transferred to a new customer at the same premises location upon written concurrence of the Telephone Company. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer.

SMARTTRUNKsm SERVICE

2.6 Regulations-(Continued)

2.6.11 Calling Line Identification (CLID).

- A. CLID Service is offered on a subscription basis which requires the customer to order the service. Where CLID Service is available, any calling party, whether they subscribe to CLID Service or not, has per call blocking capability.

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (or Name) (CPN) to the called party by dialing an access code (*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. CLID subscribers are responsible for providing per line blocking on their own PBX. Southwestern Bell will transmit the anonymous indicator received from the customer. The anonymous indicator is included in the call setup message provided by the customer's equipment, and specified by the presentation indicator in the CPN information element.

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CLID customers will receive an anonymous indicator. This anonymous indicator notifies the CLID customer that the calling party has elected to block the delivery of the CPN.

Line Blocking for the delivery of the CPN is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive office of the agency registers with Southwestern Bell Telephone a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

(CT)

The blocking of the CPN will not be provided on calls originating from Payphone Exchange Access Service.

- B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell Telephone harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CLID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
- C. CLID information may not be sold or given to another party without the caller's written permission. CLID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CLID services subscriber. This applies if the CLID service subscriber has an existing relationship with the customer. CLID customers failing to comply with any of these conditions will have their service terminated.

(AT)

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (or Name) (CPN) to the called party by dialing an access code (*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. CLID subscribers are responsible for providing per line blocking on their own PBX. Southwestern Bell will transmit the anonymous indicator received from the customer. The anonymous indicator is included in the call setup message provided by the customer's equipment, and specified by the presentation indicator in the CPN information element.

(CT)

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CLID customers will receive an anonymous indicator. This anonymous indicator notifies the CLID customer that the calling party has elected to block the delivery of the CPN.

(CT)

(CT)

Line Blocking for the delivery of the CPN is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers, where an executive office of the agency registers with Southwestern Bell Telephone a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

The blocking of the CPN will not be provided on calls originating from Customer-Owned Pay Telephone Service.

- B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell Telephone harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CLID customer of a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
- C. CLID information may not be sold or given to another party without the caller's written permission. CLID information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CLID services subscriber. This applies if the CLID service subscriber has an existing relationship with the customer. CLID customers failing to comply with any of these conditions will have their service terminated.

SmartTrunksm SERVICE

2.6 Regulations-(Continued)

2.6.11 Calling Line Identification (CLID)-(Continued)

2.6.12 Note that special steps are required for SmartTrunk DID stations to have 911 service features consistent with those provided to other end users in the same 911 service area. SmartTrunk Service provides Automatic Number Identification (ANI), but the only Automatic Location Identification (ALI) record is associated with the main number for the service. This can create a situation where the 911 Public Safety Answering Point receives a call from an individual DID station and receives identification of the originating telephone number, but the System provides a "no record found" error instead of customer location information. SmartTrunk Service customers are therefore encouraged to consider implementing Private Switch 911 Service, as described in Section 28 of the General Exchange Tariff. With this service, the SmartTrunk customer can create location information records for every unique DID telephone number associated with the SmartTrunk Service.

2.7 Additions

Any additions of service are subject to current rates and charges.

2.8 Moves

- (AT) 1. A Move Charge as specified in this Tariff will apply when the SmartTrunk Interface or Port is moved within the same SmartTrunk serving office or moved to a different SmartTrunk serving office. In addition, installation charges as specified in this Tariff will apply for all service components other than the SmartTrunk Interface or Port.
- (AT) 2. The service term agreement subscribed to by the customer is not affected by moves of the SmartTrunk Interface or Port as described above.

2.9 Supersedure

SmartTrunk Service may be transferred to a new customer at the same premises location upon written concurrence of Southwestern Bell. The customer to whom service is transferred will be subject to all past indebtedness, liabilities, minimum term provisions and equipment configurations currently in effect for the previous customer.

SmartTrunksm SERVICE

2.10 Suspension and Restoral of Service

Initiated by SWBT - When service is suspended by SWBT, the business restoration charge listed in the Suspension and Restoral section of the General Exchange Tariff applies per B Channel.

Initiated by the Customer (Vacation Service) - Vacation Service is not offered for SmartTrunk Service.

2.11 Service Terms

2.11.1 For each SmartTrunk Interface or Port, the customer is required to select either month-to-month service or a service term agreement of 12, 24, 36, 48, 60 continuous months. Coterminous additions are not permitted during the term of an agreement except if the customer has an agreement with a term of 36 months or greater, coterminous additions are allowed within the first 12 months of the agreement. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term.

(AT) There are two categories of service terms for the SmartTrunk Interface and Port: Initial Service Term and Renewal Service Term. Renewal Service Term rates apply only after completion of the Initial Service Term and payment of all nonrecurring charges associated with the Initial Service Term or after completion of one full

(AT) month of service at Month to Month rates after the Month to Month nonrecurring charge has been paid.

2.11.2 For month-to-month SmartTrunk Interface or Port customers and for all other service components, there is a minimum service requirement of one month.

2.11.3 Upon the expiration of the 12, 24, 36, 48, or 60 month service term, the customer may:

1. Continue service without establishing a new service term. The SmartTrunk Interface or Port will be provided on a month-to-month rate, with no additional service commitment. (This rate will be subject to SWBT-initiated rate changes when approved by the Public Service Commission.) Customers whose contract expired before January 15, 1998, and continued service at the 60 month rate will be allowed to continue at that rate until such time as they convert to a new contract or discontinue the service.
- (CT) 2. Continue service by selecting a new Renewal Service Term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to SWBT-initiated rate changes for the duration of the service term.
3. Discontinue the service.

SWBT may change any or all renewal options with the approval of the Public Service Commission.

SmartTrunkSM SERVICE

DEC 1 2 1997

2.10 Suspension and Restoral of Service

Initiated by SWBT - When service is suspended by SWBT, the business restoration charge listed in the Suspension and Restoral section of the General Exchange Tariff applies per B Channel. **MISSOURI Public Service Commission**

Initiated by the Customer (Vacation Service) - Vacation Service is not offered for SmartTrunk Service.

2.11 Service Terms

- 2.11.1 For each SmartTrunk Interface, the customer is required to select either month-to month service or a service term agreement of 12, 24, 36, 48, or 60 continuous months. Coterminous additions are not permitted for the service term options. Customers may opt to convert from the original service term to a longer service term prior to the expiration of the original term.
- 2.11.2 For month-to-month SmartTrunk Interface customers and for all other service components, there is a minimum service requirement of one month.
- 2.11.3 Upon the expiration of the 12, 24, 36, 48, or 60 month service term, the customer may:
1. Continue service without establishing a new service term. The SmartTrunk Interface will be provided on a month-to-month rate, with no additional service commitment. (This rate will be subject to SWBT-initiated rate changes when approved by the Public Service Commission.) Customers whose contract expired before January 15, 1998, and continued service at the 60 month rate will be allowed to continue at that rate until such time as they convert to a new contract or discontinue the service.
 2. Continue service by selecting a new service term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to SWBT-initiated rate changes for the duration of the service term.
 3. Discontinue the service.

SWBT may change any or all renewal options with the approval of the Public Service Commission.

2.12 Rate and Charge Applications

- 2.12.1 Recurring, installation and nonrecurring charges are applicable according to the specific schedule for the service quoted under this plan.
- 2.12.2 The monthly rate applicable at the time a customer subscribes or elects an additional service term for the SmartTrunk Interface under this plan is not subject to SWBT-initiated increases during the life of the service term.

2.10 Suspension of Service Initiated by the Customer

Temporary suspension of service initiated by the customer, as provided in the General Exchange Tariff, is not applicable to service furnished under the provisions of this tariff.

2.11 Options Available Upon Expiration of the Service Term

Upon the expiration of the service term, the customer may:

1. Continue service without establishing a new service term. The SmartTrunk Interface will be provided on a month-to-month basis at the current 60-month service term rate, with no additional service commitment. (However, this rate will be subject to Company-initiated rate changes when approved by the Public Service Commission.)
2. Continue service by selecting a new service term for the SmartTrunk Interface at the current rate. The new service term will commence on the day following the expiration of the previous service term. The new rate will not be subject to Company-initiated rate changes for the duration of the service term.
3. Discontinue the service.

The Company may change any or all renewal options with the approval of the Public Service Commission.

2.12 Rate and Charge Applications

- 2.12.1 Recurring, installation and nonrecurring charges are applicable according to the specific schedule for the service quoted under this plan.
- 2.12.2 The monthly rate applicable at the time a customer subscribes or elects an additional service term for the SmartTrunk Interface under this plan is not subject to Company-initiated increases during the life of the service term.
- 2.12.3 When requested by the customer prior to installation, installation and/or special construction charges may be deferred and satisfied by making a series of consecutive payments. The installation and/or special construction charge may be deferred over a period of 12, 24, 36, 48 or 60 months, not to exceed the service term selected. Once a deferred charge payment period is selected, it will remain in effect for the duration of the period.

SmartTrunksm SERVICE

Missouri Public Service Commission

(MT) 2.12 Rate and Charge Applications

REC'D DEC 20 1999

2.12.1 Recurring installation and nonrecurring charges are applicable according to the specific schedule for the service quoted under this plan.

12.12.2 The monthly rate applicable at the time a customer subscribes or elects an additional service term for the SmartTrunk Interface or Port under this plan is not subject to SWBT-initiated increases during the life of the service term.

(MT)

2.12.3 When requested by the customer prior to installation, installation and/or special construction charges may be deferred and satisfied by making a series of consecutive payments. The installation and/or special construction charge may be deferred over a period of 12, 24, 36, 48 or 60 months, not to exceed the service term selected. Once a deferred charge payment period is selected, it will remain in effect for the duration of the period.

To compute the value of the monthly deferred charge payment, the Installation and/or special construction charge is multiplied by an annuity factor for the appropriate term. A charge equal to the remaining payments will be due immediately should the service be terminated early.

A table of annuity factors is listed in Section 17.6.5 (Rules and Regulations Applying to All Customers' Contracts, Payments for Service) of the General Exchange Tariff.

2.12.4 In the event the SmartTrunk service is disconnected after the service is established, but prior to expiration of the service term, and the installation and/or special construction charges were deferred at the time service was established, the customer will be required to pay a charge equaling the sum of deferred payments remaining on the service term.

2.12.5 In the event that the SmartTrunk Interface or Port is disconnected after the service is established, but prior to expiration of the service term, the customer will be required to pay a termination charge equal to the lesser of the following:

- The difference between the total rates and charges actually paid for the completed months of the service term at the time of termination for each Interface or Port terminated and the total rates and charges that would have been paid had the customer purchased the service at current tariff rates at the next lower service term actually completed plus interest charges based on the approved discount rate in effect at the time of termination; or disconnect.
- The Present Worth of the monthly payments remaining on the service term.

When a customer with an existing contract converts to another SWBT digital service under a contract term which is equal to or greater than the number of months remaining on the SmartTrunk Service contract being terminated, the charges specified, above in this paragraph shall be modified as follows: If the customer converts within the first 12 months of the contract, the charge is multiplied by 0.20 (20%). If the customer converts after 12 months, there is no charge.

Service Commission

REC'D DEC 20 1999

(MT) 2.12 Rate and Charge Applications-(Continued)

2.12.6 If the customer cancels an order for service after installation of the required equipment and facilities, but before service is established, the customer agrees to pay a charge equaling the sum of monthly payments remaining on the service term as if the service had actually been established. The customer may not avoid this provision by simply extending their acceptance of the service date.

2.12.7 If the customer cancels an order for service before installation of the required equipment and facilities is completed, the customer agrees to pay all expenses incurred in connection with the handling of the request before notice of cancellation is received by Southwestern Bell. This charge, however, shall not

(MT) exceed all charges which would have been applicable if the service had been installed.

CANCELLED - Missouri Public Service Commission - 02/16/2003 - IN-2003-0247

SmartTrunksm SERVICE

2.12 Rate and Charge Applications-(Continued)

2.12.8 Dynamic Channel Allocation (DCA) Billing Procedures

When DCA is provided, the customer must specify the following:

1. The total number of channels assigned to the DCA arrangement.
2. The maximum number of channels allocated per call type within the arrangement.

The quantity of Integrated Services Network Components billed for the DCA arrangement is based on the sum of the maximum channels allocated for DID, DOD, FSO, FX, Common Line 800, and Outward WATS call types up to, but not exceeding, the total number of channels assigned to the arrangement.

The quantity of Universal Termination charges billed for the DCA arrangement is based on the maximum number of channels allocated for FX, FSO, and tie line call types.

(AT) A DCA arrangement may not include both two-way extended and two-way non-extended call types.

2.12.9 Optional Features

- A. Loop Protection: Provides automatic restoration of the SmartTrunk Interface facility and physical route redundancy from the customer's serving wire center to the point nearest the customer's premises that route redundancy can be achieved in the event of a transmission failure caused by a single facility break or a single loop electronics failure.

The automatic restoration capabilities are provided through the use of intelligent components which are capable of sensing transmission failures in the fiber facilities. The primary and secondary transmission paths are separately routed in geographically and physically separate fiber optic cables up the nearest point to the customer's premises that route redundancy can be achieved. In the event of a transmission failure, the intelligent components will automatically switch the SmartTrunk Service from the primary to the secondary transmission path within 2.0 seconds. This service is provided subject to the limitations set forth in Section 17, Paragraph 17.8.3 of the General Exchange Tariff.

2.12.10 Calling Scopes and Distance Sensitive Rates

The application of any distance sensitive rates for services associated with SmartTrunk Service will be based upon the V & H coordinates of the customer's SmartTrunk serving office (e.g., toll rates, private lines, etc.). The local calling scope associated with SmartTrunk Service will be determined by the local calling scope of the SmartTrunk serving office, as defined in the Local Exchange Tariff.

The application of any distance sensitive rates for services associated with SmartTrunk Service (e.g., toll rates, private lines, etc.) will be based upon the V & H coordinates of the customer's SmartTrunk serving office or the normal serving office if requested by the customer and if the office has the technical capability. The local calling scope associated with SmartTrunk Service will be determined by the local calling scope of the SmartTrunk serving office, as defined in the Local Exchange Tariff, or by the calling scope of the normal serving office if requested by the customer and if the office is technically capable.

SmartTrunk SERVICE

2.13 Promotional Rates – (Continued)

- (CT) A. Digital Plus Promotion: For a period of time beginning September 15, 2000 and ending
(CT) December 31, 2000, discounted Smart Trunk rates are available to customers also purchasing
Local Plus and committing to a three or five year contract for the service combination. The
service combination of Local Plus service with a SmartTrunk Interface under this promotion
will be referred to as a Digital Plus arrangement.

For the three-year contract, the monthly price for the SmartTrunk Interface will be discounted
28% off the month-to-month rate.

For the five-year contract, the monthly price will be the 60-Month Service Term price shown in
2.14 of this tariff.

A customer who connects new Smart Trunk Interfaces, as a part of a Digital Plus arrangement is
also eligible for a waiver of installation charges associated with the Interface and a credit
payable in the third month of the contract. The credit will be equal to the number of new
Interfaces associated with a Digital Plus arrangement times \$225 for three-year contracts or
times \$500 for five-year contracts. Existing Interfaces are not eligible for credits. Existing
Interfaces must be disconnected for a period of nine months before they may be re-connected
and qualified as a new Interface under this promotion.

Unless Local Plus is purchased on all channels in the SmartTrunk Interface, a SmartTrunk
customer subscribing to a Digital Plus Arrangement must also subscribe to the Smart Trunk
Dynamic Channel Allocation (DCA) feature to ensure operational reliability. The monthly rate
for DCA will be waived for the duration of the contract covering the Digital Plus Arrangement.

Subscribers under the Digital Plus promotion are also eligible for promotional pricing of their
Local Plus Service. See General Exchange Service, Section 48, Sheet 6 for a detailed
explanation.

Termination Liability: If a customer discontinues a Digital Plus arrangement prior to the
contract expiration, the customer is liable for a termination payment. The payment associated
with SmartTrunk Service is equal to the lessor of:

- All credits issued and charges waived in association with a new connection plus the
number of months the customer had Smart Trunk times the difference between the
tariff rate for the highest completed Term and the Digital Plus rate, or
- The remaining contract obligation.

Additional termination liability applies for Digital Loop Service (if applicable) and Local Plus.

SmartTrunk SERVICE

2.13 Promotional Rates – (Continued)

MO. PUBLIC SERVICE COMMISSION

- A. Digital Plus Promotion: For a period of time beginning June 11, 1999 and ending December 31, 1999, discounted Smart Trunk rates are available to customers also purchasing Local Plus and committing to a three or five year contract for the service combination. The service combination of Local Plus service with a SmartTrunk Interface under this promotion will be referred to as a Digital Plus arrangement.

For the three-year contract, the monthly price for the SmartTrunk Interface will be discounted 28% off the month-to-month rate.

For the five-year contract, the monthly price will be the 60-Month Service Term price shown in 2.14 of this tariff.

A customer who connects new Smart Trunk Interfaces, as a part of a Digital Plus arrangement is also eligible for a waiver of installation charges associated with the Interface and a credit payable in the third month of the contract. The credit will be equal to the number of new Interfaces associated with a Digital Plus arrangement times \$225 for three-year contracts or times \$500 for five-year contracts. Existing Interfaces are not eligible for credits. Existing Interfaces must be disconnected for a period of nine months before they may be re-connected and qualified as a new Interface under this promotion.

Unless Local Plus is purchased on all channels in the SmartTrunk Interface, a SmartTrunk customer subscribing to a Digital Plus Arrangement must also subscribe to the Smart Trunk Dynamic Channel Allocation (DCA) feature to ensure operational reliability. The monthly rate for DCA will be waived for the duration of the contract covering the Digital Plus Arrangement.

Subscribers under the Digital Plus promotion are also eligible for promotional pricing of their Local Plus Service. See General Exchange Service, Section 48, Sheet 6 for a detailed explanation.

Termination Liability: If a customer discontinues a Digital Plus arrangement prior to the contract expiration, the customer is liable for a termination payment. The payment associated with SmartTrunk Service is equal to the lessor of:

- All credits issued and charges waived in association with a new connection plus the number of months the customer had Smart Trunk times the difference between the tariff rate for the highest completed Term and the Digital Plus rate, or
- The remaining contract obligation.

Additional termination liability applies for Digital Loop Service (if applicable) and Local Plus.

SMARTTRUNKSM

2.13 Promotional Rates (cont'd)

B. SmartTrunk Promotion I

A promotional period will begin December 23, 2002 and end December 22, 2003 for eligible business customers who had established service with another local exchange carrier within the SWBT service area and who now wish to establish service with SWBT. This promotional offer applies to SmartTrunk Interface services.

The non-recurring Installation Charges will be waived on those orders placed during the promotion period. Additionally, service must be installed by January 31, 2004. This promotion is only available where facilities permit.

(CT)
|
(CT)

Business customers who have past due bills for regulated services owed to the Company are eligible for this promotion as long as they have established mutually acceptable payment arrangements with the Company.

C. SmartTrunk Service Promotion II

A promotional period will begin April 9, 2001 and end April 8, 2002 for eligible business customers who wish to upgrade their established local access service, have received a competitive local access offer and are considering changing their local access service to the competitive carrier. Business customers who remain with SWBT, add to their existing SmartTrunk service or upgrade to SmartTrunk Interface service, and commit to a 24-month or longer term will have the applicable non-recurring Installation Charges waived.

The non-recurring Installation Charges will be waived on those orders placed during the promotion period. Additionally, service must be installed by May 31, 2002. This promotion is only available where facilities permit.

In the event of early termination of this service provided under the Service Term, the customer will be liable for the SmartTrunk Interface waived Installation Charges as well as any termination charges due as set forth in Section 2 of the Integrated Services tariff.

The business customers must not have had: 1) service disconnected for nonpayment; or 2) any past due bills for regulated service owed to the Company.

2.14 Rate and Charge Schedule-(Continued)

JUN 21 1999

Footnotes:

MISSOURI PUBLIC SERVICE COMMISSION

- (1) Rates and charges stated are in addition to those specified for DID, DOD, FX, FSO, and tie line services in other SWBT tariffs and in Section 1 of this tariff and applied as stated in Paragraphs 2.12.8 and 2.12.9, preceding.
- (2) This charge applies only when an additional unit is ordered and installed with an initial unit per customer, per request, per due date, per location.
- (3) Integrated Services Digital CSV/CSD Transport Options are not applicable with tie line service or with Permanent PSD B Channel.
- (4) Only the Integrated Services Digital CSV/CSD Transport options which are "SmartTrunk Service Compatible" can be associated with SmartTrunk Service. For rates see Section 1 of this tariff.
- (5) Rates applicable for those FSO/FX service terminations associated with SmartTrunk Service configuration described in Paragraph 2.6.7, preceding.
- (6) This charge applies only when an additional Universal Termination of the same call type is ordered and installed with the initial Universal Termination per customer, per request, per due date.
- (7) This charge applies only to modifications subsequent to the installation of the initial service.
- (8) FX/FSO, Outward WATS, and Common Line 800 Service each require an Integrated Services Digital CSV/CSD Transport Option.
- (9) Allows one packet end point and/or telephone number. In addition, Digital Packet Switching Usage charges apply per the Miscellaneous Services section of this Tariff.
- (10) Loop Protection Feature will be provided where fiber optic facilities are available. Special Construction Charges may apply when fiber optic facilities are not available or unusual expenditures are involved in making them available to provide this feature.
- (11) If a customer's request to upgrade from vendor-specific to National ISDN requires a move to a different SmartTrunk serving office, the change is treated as a move and this rate does not apply.
- (12) This charge applies to modify, change, or rearrange an Integrated Services Digital CSV/CSD Transport Option, Outward WATS Option, Inward WATS Option, Network Ring Again feature, PSD Network Rate Element, or Packet Switched Data Option. The charge applies per order.
- (13) This charge applies when adding an Integrated Services Digital CSV/CSD Transport Option, Outward WATS Option, Network Ring Again feature, PSD Network Rate Element, or Packet Switched Data Option subsequent to the initial installation of the SmartTrunk Interface or Port. Any service component related installation charges from this tariff are also applicable. The Add Charge applies per service component with a maximum charge of \$145.00 per order exclusive of any installation charges.
- (14) Installation charges for Enhanced Alternate Route, Station Record Detail and Inform 911 only apply when these features are added to existing SmartTrunk Interface or Port. Installation charges for these features do not apply when ordered at the same time as the SmartTrunk Interface or Port with which they are associated.
- (15) The SmartTrunk Port has the same functionality as the SmartTrunk Interface but does not include the connection between the customer's premises and the SmartTrunk Serving Office. This component is purchased separately and must be at a DS1 or greater level and must conform to Technical Specifications listed in Paragraph 2.5 of this tariff.

apply.
- (12) This charge applies to modify, change, or rearrange an Integrated Services Digital CSV/CSD
Transport Option, Outward WATS Option, Inward WATS Option, Network Ring Again feature,
PSD Network Rate Element, or Packet Switched Data Option. The charge applies per order.
- (13) This charge applies when adding an Integrated Services Digital CSV/CSD Transport Option, ||
Outward WATS Option, Network Ring Again feature, PSD Network Rate Element, or Packet
Switched Data Option subsequent to the initial installation of the SmartTrunk Interface. Any
service component related installation charges from this tariff are also applicable. The Add
Charge applies per service component with a maximum charge of \$145.00 per order exclusive
of any installation charges.

(CT)

- (1) Rates and charges stated are in addition to those specified for DID, DOD, FX, FSO, and TIE services in other tariffs of the Company and in Section 1 of this tariff and applied as stated in Paragraphs 2.12.8 and 2.12.9, preceding.
- (2) This charge applies only when an additional SI is ordered and installed with an initial SI per customer, per request, per due date.
- (3) Integrated Services Digital CSV/CSD Transport Options are not applicable with TIE service.
- (4) Only the Integrated Services Digital CSV/CSD Transport options which are "SmartTrunk Service Compatible" can be associated with SmartTrunk Service. For rates see Section 1 of this tariff.
- (5) Rates applicable for those FSO/FX service terminations associated with SmartTrunk Service configuration described in Paragraph 2.6.7, preceding.
- (6) This charge applies only when an additional Universal Termination of the same call type is ordered and installed with the initial Universal Termination per customer, per request, per due date.
- (7) This charge applies only to modifications subsequent to the installation of the initial service.
- (8) Until such time as the Company acquires the recording capability to measure and bill on a per occurrence basis, this feature will be billed on a flat rate basis.
- (9) Reference is made to the number of SIs supported by the Backup D-Channel. Rates and charges are applied per group of five SIs, or fraction thereof.
- (10) Service and Equipment charges to install, move or change service apply on a per channel basis as specified in the Local Exchange Tariff.
- (11) Loop Protection Feature will be provided where fiber optic facilities are available. Special Construction Charges may apply when fiber optic facilities are not available or unusual expenditures are involved in making them available to provide this feature.
