DIGILINE® SERVICE

3.1 General

SWBT will provide DIGILINE Service within a suitably equipped LATA where facilities and equipment are available. This tariff section does not create an obligation for SWBT to construct such facilities or equipment for this service. Availability of selected optional features may be dependent upon the DigiLine serving central office switching technology.

This service is competitively classified in the following exchanges:

<u>Business:</u>	<u>Residence:</u>
St. Louis	Harvester
Kansas City	St. Charles

3.2 Service Description

DigiLine Service is a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN) based service which offers two 64 Kilo bits per second (Kbps) B channels and one 16 Kbps D channel. One or both B channels may be configured for circuit switching or packet switching. Calls over a B channel configured for circuit switching may be either voice or data. The D channel carries out of band signaling for the B channel(s) and may also be configured for packet switching. DigiLine Service, when configured for circuit switching, provides access to and from the Public Switched Telephone Network (PSTN). DigiLine Service, when configured for packet switching, provides access to Southwestern Bell's Public Packet Switched Network (PPSN).

3.3 Service Component: Description and Definitions

Additional Call Offering - A non-EKTS feature that notifies the user of an additional circuit switched voice call that would normally be cleared because the user's interface is busy. (The method of notification to the end-user is customer premises equipment dependent.)

Additional End Point/Telephone Number - A PSD-D or On Demand PSD-B option that provides an additional end point (terminal equipment identifier) or telephone number. Up to eight packet end points/telephone numbers may be activated with the PSD-D or On Demand PSD-B Network Rate Element.

Analog Member in a Hunt Group - This feature provides for an analog interface in a DigiLine Hunt Group.

Automatic Callback - This feature enables the customer to place a call to the telephone number of the last incoming call, whether or not the call was answered or the number is known. The user can dial an activation code or press a feature button to request that the network place the call. If the telephone number of the last incoming call is busy, the Telephone Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot be activated for calls originating from a line that is forwarded or from a line or trunk not associated with a telephone number, e.g., a multiline hunt group.

(MT)

Automatic Recall - This feature enables the customer to automatically redial the last outgoing telephone number by dialing an activation code or pressing a feature button to request that the network place the call. When the recalled telephone number is busy, the Telephone Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed.

Basic Electronic Key Terminal Service (Basic EKTS) Feature Package - A circuit switched voice option that enhances normal telephone use. It consists of: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Message Waiting Indicator, Speed Call Long or Speed Call Short, and Three-Way Conference Calling. A Basic EKTS terminal supports only one call appearance per telephone number.

Basic Rate Interface - Provides the central office hardware, software and a 144 Kbps facility required to provide DigiLine Service.

Bridged Call Exclusion - A Basic EKTS and CACH EKTS feature that allows a user to prohibit other stations from picking up a call on hold or bridging onto a call that is active at that terminal.

Bridging - A Basic EKTS and CACH EKTS feature that allows the user to join an active call by pressing the active call appearance button and going off hook. This establishes a three-way call. This feature is different from basic three way calling because the third party initiates the bridge to the active call. Bridging is inhibited if Bridged Call Exclusion is activated on a terminal engaged in the active call. Only one additional shared call appearance user may bridge to an active two-way call. Bridging cannot be activated on an existing three-way call.

(MT)

Call Appearance - A button on an electronic telephone set that serves as a telephone number designation or appearance. A single telephone number can appear on multiple electronic telephone sets and/or multiple times on the same electronic set. A visual indicator identifies the status of the call appearance (e.g., the lamp may flash for an unanswered call, blink for a call that has been placed on hold, remain dark for an idle call appearance, or remain steady for the currently active call).

DigiLine Service Area - a geographic area consisting of one or more DigiLine equipped exchanges and/or zones.

Distinctive Ringing - This feature provides distinctive alerting for up to six specific telephone numbers.

Flow Control Parameter Negotiation - A packet switched data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for CSD - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched data call can be offered.

Hunt Group for CSV - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched voice call can be offered. Directory numbers subscribing to hunting may not have multiple call appearances.

Hunt Group for PSD - A Packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

Hunt Group Transfer for CSD - This feature transfers circuit switched data calls that terminate to a circuit switched data hunt group to a backup circuit switched data hunt group.

DIGILINE[®] SERVICE

3.3 Service Component: Description and Definitions-(Continued)

Fast Select - A packet switched data feature that allows a user to send a maximum of 128 bytes of data in call setup and clearing packets. There are two modes, fast select and fast selection with restriction. The user must request the fast select facility in the call request packet when more than 16 bytes of user data is desired in the call setup and clearing packet.

Fast Select Acceptance - A packet switched data feature that allows a user to receive a call request packet with up to 128 bytes of user data. The user may also respond with a call connect or clear request packet with up to 128 bytes of user data, depending on the type of fast select requested in the call request packet.

Flow Control Parameter Negotiation - A packet switched data feature that permits the customer's CPE and central office switch to communicate and agree upon what fundamental PSD language will be used during a data transmission. This feature allows the calling data transmission equipment to select a window or packet size in the call request packet and the called data transmission equipment to accept the transmitted values, reject the call or select new transmission values. The action occurs automatically with each call.

Hunt Group for CSD - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched data call can be offered.

Hunt Group for CSV - This feature provides for a predefined search (circular, linear or uniform) for an idle directory number to which a circuit switched voice call can be offered. Directory numbers subscribing to hunting may not have multiple call appearances.

Hunt Group for PSD - A Packet switched data feature that allows an incoming call to terminate on any line within a designated group of lines. The sequence in which the search for the terminating line is conducted is determined by the type of hunting (linear or uniform) feature chosen by the customer.

Hunt Group Transfer for CSD - This feature transfers circuit switched data calls that terminate to a circuit switched data hunt group to a backup circuit switched data hunt group.

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

Intercom - This feature allows a CACH EKTS user to call other terminals in the CACH EKTS group with one or two-digit dialing or by activating a button on the CACH EKTS set.

Integrated Services Digital Circuit-Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Option - Provides for the circuit switched local use of the PSTN. Only the Integrated Services Digital CSV/CSD Transport Option noted DigiLine Service Compatible in Section 1 of the Integrated Services Tariff can be associated with DigiLine Service.

DIGILINE SERVICE

OCT 25 1994

3.3 Service Component: Description and Definitions-(Continued)

Incoming Calls Barred - A packet switched data feature that prohibits a data terminal from accepting incoming calls.

Intercom - This feature allows a CACH EKTS user to call other terminals in the CACH EKTS group with one or two-digit dialing or by activating a button on the CACH EKTS set.

Integrated Services Digital Circuit-Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Option - Provides for the circuit switched local use of the PSTN. Only the Integrated Services Digital CSV/CSD Transport Option noted Digiline Service Compatible in Section 1 of the Integrated Services Tariff can be associated with Digiline Service.

Key System Coverage for Analog Lines - This feature allows an analog station set to share calls with a CACH EKTS set.

Link Extension Equipment - Provides the additional central office hardware required to provide Digiline Service to a customer located outside a Digiline Service Area or as a FS0/FX arrangement.

Link Extension Facility - A 144 Kbps facility that extends from the customer's normal serving central office to their SWBT designated Digiline serving office. This rate element is only applicable when the customer's exchange is not located within a Digiline Service Area and the customer is served from a SWBT designated Digiline serving office.

Local Charge Prevention - This feature prevents virtual packet calls being charged to the data terminal equipment (DTE). All virtual packet calls originated from the DTE will have to be reversed charged. All incoming calls signaling reverse charging will be cleared.

Logical Channel - A packet switched data communication path which allows two-way simultaneous transmission of data packets through the network.

Message Waiting Indicator - This feature provides the user of a message service with either a visual and/or audible indication that a message is waiting.

On Demand PSD B Channel - Allows a B channel to be used for packet switched services on a per call basis. When the B channel is not being used for packet switched data, it can be used for circuit switched calls. It includes the following features: Up to 127 Logical Channels, Flow Control, Parameter Negotiation, Throughput Class Negotiation, and Throughput Class Selection.

DIGILINE[®] SERVICE

3.3 Service Component: Description and Definitions-(Continued)

Key System Coverage for Analog Lines - This feature allows an analog station set to share calls with a CACH EKTS

Link Extension Equipment - Provides the additional central office hardware required to provide DigiLine Service to a customer located outside a DigiLine Service Area or as a FSO/FX arrangement.

Link Extension Facility - A 144 Kbps facility that extends from the customer's normal serving central office to their SWBT designated DigiLine serving office. This rate element is only applicable when the customer's exchange is not located within a DigiLine Service Area and the customer is served from a SWBT designated DigiLine serving office.

Local Charge Prevention - This feature prevents virtual packet calls from being charged to the data terminal equipment (DTE). All virtual packet calls originated from the DTE will have to be reversed charged. All incoming calls signaling reverse charging will be cleared.

Logical Channel - A packet switched data communication path which allows two-way simultaneous transmission of data packets through the network.

Message Waiting Indicator - This feature provides the user of a message service with either a visual and/or audible indication that a message is waiting.

Multiple B Channel Terminals on a BRI - This capability allows a user to place more than two B channel terminals on a BRI. Because there are only two B channels on a BRI, only two terminals can use the B channels simultaneously. The maximum number of terminals is eight per BRI. These terminals can use the B channels, D channel, or a combination. When there are two users on a BRI, it would be possible for one user to engage both B channels and, thus, leave the other user without access to a B channel. To prevent this from occurring, Associated Groups may be defined. The first user is assigned to one Associated Group and the other user is assigned to a second Associated Group. Each Associated Group is allowed access to one B channel at any particular time. Both users are allowed access to the D channel. These capabilities are available without additional charge.

On Demand PSD B Channel - Allows a B channel to be used for packet switched services on a per call basis. When the B channel is not being used for packet switched data, it can be used for circuit switched calls. It includes the following features: Up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation, and Throughput Class Selection.

Outgoing Calls Barred - A packet switched data feature that prohibits a data terminal from sending outgoing packet calls.

Outgoing Calls Barred - A packet switched data feature that prohibits a data terminal from sending outgoing packet calls.

Permanent PSD B Channel - Packet switching virtual circuit over a B channel (up to 64 Kbps) using X.25 packet switched data. It includes the following features: Up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection.

Permanent Virtual Circuit - This feature allows the transfer of packet data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

PSD D Channel - Packet switching virtual circuit over a D channel (up to 9.6 Kbps) using a X.25 packet switched data. It includes the following features: Up to 15 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection. The customer is provided one end point and one telephone number at no additional charge.

Remote Access To Call Forwarding - This feature allows a customer at a remote location to activate/deactivate the Call Forwarding features. If a DigiLine station CPE is equipped with feature buttons and feature status lamps, the call forwarding status lamp lights when Call Forwarding is activated using remote access.

Secondary Only Telephone Number - A circuit switched option that allows any telephone number, other than a primary telephone number, to be assigned to a DigiLine station. A Secondary-Only Telephone number does not have to be a primary telephone number at another station. A DigiLine station can have one, or more, Secondary Only Telephone Numbers. Each Secondary-Only Telephone Number can have multiple call appearances. A Secondary-Only Telephone Number can be shared among the same DigiLine customer's DigiLine stations.

3.3 Service Component: Description and Definitions-(Continued)

Permanent PSD B Channel - Packet switching virtual circuit over a B channel (up to 64 Kbps) using X.25 packet switched data. It includes the following features: Up to 127 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection.

Permanent Virtual Circuit - This feature allows the transfer of packet data without the need for call setup and clearing procedures to occur. A logical channel is permanently assigned to this circuit and data may be passed at any time. Call set-up charges are not applicable to Permanent Virtual Circuits.

PSD D Channel - Packet switching virtual circuit over a D channel (up to 9.6 Kbps) using a X.25 packet switched data. It includes the following features: Up to 15 Logical Channels, Flow Control Parameter Negotiation, Throughput Class Negotiation and Throughput Class Selection. The customer is provided one end point and one telephone number at no additional charge.

Remote Access To Call Forwarding - This feature allows a customer at a remote location to activate/deactivate the Call Forwarding features. If a DigiLine station CPE is equipped with feature buttons and feature status lamps, the call forwarding status lamp lights when Call Forwarding is activated using remote access.

Reverse Charge - A packet switched data feature that allows a user to assign billing (on a per-call basis) charges to the called party rather than the calling party.

Reverse Charge Acceptance - A packet switched data feature that allows the data communications equipment to accept incoming calls which have requested the reverse charging facility. The charges for this call will be billed to the terminating party.

Secondary Only Telephone Number - A circuit switched option that allows any telephone number, other than a primary telephone number, to be assigned to a DigiLine station. A Secondary-Only Telephone number does not have to be a primary telephone number at another station. A DigiLine station can have one, or more, Secondary Only Telephone Numbers. Each Secondary-Only Telephone Number can have multiple call appearances. A Secondary-Only Telephone Number can be shared among the same DigiLine customer's DigiLine stations.

Selective Call Forwarding - This feature allows a customer to forward selected calls to another telephone number. A screening list of up to six numbers is created by the user via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list. If the user also subscribes to Selective Call Rejection and the same telephone number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to be forwarded. This feature will not work if the incoming call is from a telephone number in a multi-line hunt group unless the telephone number is the main number of the hunt group, or is the Telephone Number identified.

3.3 Service Components: Description and Definitions--(Continued) OCT 25 1994

Throughput Class Negotiation - A packet switched data feature that allows the calling data terminal, to negotiate a lower throughput rate than the pre-assigned standard network default.

Throughput Class Selection - A packet switched data feature that allows a user to select one of the following speeds in bits per second: 75, 150, 300, 600, 1200, 2400, 4800, 9600 and 19200 (B channel only).

3.4 Technical Specifications

- 3.4.1 Technical equipment guidelines for ISDN customer access to DigiLine serving offices are found in SR-NWT-001953. This document may be obtained from:

- 3.4.2 DigiLine Service is designed to all relevant International Telecommunications Union-Telephony (ITU-T) standards.
- 3.4.3 The transmission characteristics of DigiLine Service support 64 Kbps Clear Channel Capability.

3.5 Regulations

- 3.5.1 The following regulations apply in addition to those in other SWBT tariffs. Where other regulations apply on a per line basis, they shall be interpreted to apply per channel.
- 3.5.2 DigiLine Service requires compatible registered CPE under FCC Part 68.
- 3.5.3 For use of the PSTN, only those Integrated Services Digital CSV/CSD Transport Options noted as DigiLine Service Compatible in Section 1 of the Integrated Services Tariff can be used with DigiLine Service.
- 3.5.4 Ancillary Services compatible with DigiLine Service will be furnished under the business rates and regulations of their respective tariffs. Since DigiLine Service provides ISDN signaling, Touch-Tone Service and charges are not applicable.
- 3.5.5 Resale of DigiLine Service is prohibited.

3.5.6 Upon subscribing to DigiLine Service, the customer may change his existing telephone number. **MO. PUBLIC SERVICE COMM.**

3.5.7 The central office from which a customer's DigiLine Service is physically provided shall be designated the customer's DigiLine serving office. SWBT will determine a customer's DigiLine serving office as follows:

1. If the customer's normal serving office is DigiLine equipped, the customer will be provided DigiLine from their normal serving office.
2. If the customer's normal service office is located within a DigiLine Service Area and is not DigiLine equipped or lacks available capacity, the customer may be provided DigiLine Service from another DigiLine equipped central office at the rates and charges specified in Paragraph 3.13, following. (Note that Link Extension charges do not apply if the customer's normal serving office is within a DigiLine Service Area.)
3. In case 2 preceding, when the customer's normal serving office becomes DigiLine equipped, their existing DigiLine Service will continue to be provided from their original DigiLine serving office. Should the customer subsequently request that their DigiLine Service be provisioned from their normal serving office, the provisions for moves (Paragraph 3.9) will apply. SWBT may request that the customer, at the customer's option, have the customer's DigiLine Service provided from the customer's normal serving office and, in conjunction therewith, may offer to waive move charges.
4. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the LATA, if agreed to by SWBT. In such cases, the charges for the Link Extension Equipment and the Link Extension Facility specified in Paragraph 3.13, following will apply in addition to the other charges for DigiLine Service.

RECEIVED

MAY 28 1999

3.5 Regulations-(Continued)

(FC) 3.5.5 Upon subscribing to DigiLine Service, the customer may be required to change his existing telephone number. **MO. PUBLIC SERVICE COMMISSION**

(FC) 3.5.6 DigiLine Service is physically provisioned from the DigiLine serving office designated by Southwestern Bell. Southwestern Bell will determine a customer's designated serving office based on the location and capacity of DigiLine equipped central offices.

CANCELLED - Missouri Public Service Commission - 02/16/2003 - IN-2003-0247

1. If the customer's normal serving office is located within a DigiLine Service Area, the customer may be provided DigiLine Service from the designated DigiLine serving office at the rates and charges listed in 3.13 following and FSO or Link Extension Equipment and Link Extension Facility charges will not apply.
2. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the customer's LATA, if agreed to by SWBT. In such cases, the charges for the Link Extension Equipment and Link Extension Facility specified in 3.13 following will apply in addition to the other charges for DigiLine Service.
3. If, in case one preceding, a new central office becomes the designated DigiLine serving office for a customer's location, their existing DigiLine Service will continue to be provided from their original DigiLine serving office if technically possible. If necessary, SWBT may require that the customer move the existing DigiLine Service to the new designated serving office and, in conjunction therewith, waive the move charges. Such a move may require the customer to change telephone numbers(s). If the move to the new designated serving office is at the customer's request, the provisions and charges specified in this tariff for moves will apply.
4. In case two preceding, when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service may be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move may require the customer to change telephone number(s), and in conjunction therewith, SWBT will waive the provisions and charges for moves specified in paragraph 3.9 of this tariff. The Link Extension Equipment and Link Extension Facility charges will no longer apply once the customer's DigiLine Service is moved. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such case, the Link Extension Equipment and Link Extension Facility charges will continue to apply.

3.5 Regulations-(Continued)

3.5.6 Upon subscribing to DigiLine Service, the customer may be required to change his existing telephone number.

(MT)(CT) 3.5.7 DigiLine Service is physically provisioned from the DigiLine serving office designated by Southwestern Bell. Southwestern Bell will determine a customer's designated serving office based on the location and capacity of DigiLine equipped central offices.

1. If the customer's normal serving office is located within a DigiLine Service Area, the customer may be provided DigiLine Service from the designated DigiLine serving office at the rates and charges listed in 3.13 following and FSO or Link Extension Equipment and Link Extension Facility charges will not apply.
2. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the customer's LATA, if agreed to by SWBT. In such cases, the charges for the Link Extension Equipment and Link Extension Facility specified in 3.13 following will apply in addition to the other charges for DigiLine Service.
3. If, in case one preceding, a new central office becomes the designated DigiLine serving office for a customer's location, their existing DigiLine Service will continue to be provided from their original DigiLine serving office if technically possible. If necessary, SWBT may require that the customer move the existing DigiLine Service to the new designated serving office and, in conjunction therewith, waive the move charges. Such a move will not require the customer to change telephone numbers(s). If the move to the new designated serving office is at the customer's request, the provisions and charges specified in this tariff for moves will apply.
4. In case two preceding, when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service will be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move will normally require the customer to change telephone number(s), and in conjunction therewith, SWBT will waive the provisions and charges for moves specified in paragraph 3.9 of this tariff. The Link Extension Equipment and Link Extension Facility charges will no longer apply once the customer's DigiLine Service is moved. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such case, the Link Extension Equipment charges will continue to apply in addition to the rates, charges, terms and conditions of Foreign Exchange (FX) Service pursuant to Section 9 of the General Exchange Tariff and Section 2 of the Private Line Service Tariff. FX charges will apply per D channel configured for packet switched data and per B channel.

5. In case 4 preceding, when the customer's normal serving office becomes DigiLine equipped, the customer's DigiLine Service will be moved from their original DigiLine serving office to the customer's normal serving office. Such a move will require the customer to change telephone number(s), and in conjunction therewith, SWBT will waive the provisions and charges for moves specified in Paragraph 3.9 of this tariff section. The Link Extension Equipment and Link Extension Facility charges will no longer apply once the customer's DigiLine Service has been moved back to their normal serving office. However, if agreed to by SWBT, the customer may request that their DigiLine Service not be moved from their original DigiLine serving office. In such case, the Link Extension Equipment charges will continue to apply in addition to the rates, charges, terms and conditions of Foreign Exchange (FX) Service, pursuant to Section 9 of the General Exchange Tariff and Section 2 of the Private Line Service Tariff.

3.5.8 Calling Number Delivery (CND)

- A. CND Service is offered on a subscription basis which requires the customer to order the service. Where CND Service is available, any calling party, whether they subscribe to CND Service or not, has per call blocking capability.

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (CPN) to the called party by dialing an access code (*67 on their Touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CND customers will receive an anonymous indicator. This anonymous indicator identifies the CND customer that the calling party has elected to block delivery of the telephone number.

DIGILINE[®] SERVICE

3.5 Regulations-(Continued)

MO. PUBLIC SERVICE COMMISSION

(FC) 3.5.6 (Continued)

5. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Serving Office Service as described in that section of the General Exchange Tariff. Foreign Serving Office charges will apply per D channel configured for packet switched data and per B channel.
6. If a customer requests DigiLine Service to be provisioned from an office outside their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Exchange Service, as defined in the General Exchange Tariff. Foreign Exchange Service charges shall apply per D channel configured for packet switched data and per B channel.
7. Ancillary services compatible with DigiLine Service will be furnished under the business or residence rates and regulations of the respective tariffs based on the classification of the DigiLine customer's account (as defined by Section 17 of the General Exchange Tariff). A business or residence listing will be provided in the directory for the DigiLine service office according to the regulations provided in Section 6 of the General Exchange Tariff. Customers may combine an analog local exchange access service at residential or business rates with DigiLine Service arrangement. Since DigiLine Service provides ISDN signaling, Touch-Tone Calling Service charges are not applicable.

(FC) 3.5.7 Caller ID

- A. Caller ID is offered on a subscription basis, which requires the customer to order the service. Where Caller ID is available, any calling party, whether they subscribe to Caller ID or not, has per call blocking capability.

The Southwestern Bell Telephone calling party may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their Touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If the calling party activates blocking, the name and/or number will not be transmitted across the line. Instead, Caller ID customers will receive an anonymous indicator. This anonymous indicator indicates to the Caller ID customer that the calling party has elected to block delivery of the telephone number.

DIGILINE SERVICE

RECEIVED

3.5 Regulations-(Continued)

JAN - 9 1997

3.5.7 (Continued)

MISSOURI
Public Service Commission

(MT)(CT) 5. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Serving Office Service as described in that section of the General Exchange Tariff. Foreign Serving Office charges will apply per D channel configured for packet switched data and per B channel.

6. If a customer requests DigiLine Service to be provisioned from an office outside their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph 3.13 of this tariff will apply in addition to the charges for Foreign Exchange Service, as defined in the General Exchange Tariff. Foreign Exchange Service charges shall apply per D channel configured for packet switched data and per B channel.

CANCELLED

(MT)(CT)

3.5.8 Calling Number Delivery (CND)

JAN 16 1998

(MT) A. CND Service is offered on a subscription basis which requires the customer to order the service. Where CND Service is available, any calling party, who subscribes to CND Service or not, has per call blocking capability.

By *and RS#11*
Public Service Commission
MISSOURI

The Southwestern Bell Telephone calling party may prevent the delivery of Calling Party Number (CPN) to the called party by dialing an access code (*67 on their Touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge.

If the calling party activates blocking, the CPN will not be transmitted across the line. Instead, CND customers will receive an anonymous indicator. This anonymous indicator identifies the CND customer that the calling party has elected to block delivery of the telephone number.

(MT)

Line Blocking for the delivery of the calling number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residences of employees/volunteers where an executive office of the agency registers with Southwestern Bell Telephone a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. The calling number will not be transmitted from a line equipped with this capability.

- B. In addition to the provisions of the General Exchange Tariff, Section 17, Paragraph 17.8, the calling party and customer indemnifies and saves Southwestern Bell harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the transmission to a CND customer or a telephone number which the calling party has requested to be omitted from the telephone directory or has requested not to be disclosed to any person.
- C. CND information may not be sold or given to another party without the caller's written permission. CND information may only be used for: (a) routing or completion of calls, (b) billing of calls, (c) account management purposes, (d) services directly related to the call or transaction, (e) verification of calling party identity and (f) marketing products or services that are directly related to those previously acquired by the customer from the CND services subscriber. This applies if the CND service subscriber has an existing relationship with the customer. CND customers failing to comply with any of these conditions will have their service terminated.

- 3.5.9 The regulations specified in General Exchange Tariff, Paragraph 17.5.1, Paralleling Service, shall not apply when Digiline Service and Local Exchange Services are furnished at the same premises.

3.7 Service Terms

(CT) 3.7.1 Minimum Service Term: All DigiLine Service components have a minimum service term of one month.

(CT) 3.7.2 Basic Rate Interface Installation Charge Service Term Agreements: Term pricing options are available for the Installation Charge associated with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Options include a 12 or 24 month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a charge will be due. This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

(CT) 3.7.3 If a customer chooses to disconnect DigiLine Service in order to convert to another Telephone Company digital service of equal or greater speed the Telephone Company will waive the termination charge associated with the term agreement if (1) the customer has had DigiLine Service for at least six months, and (2) the customer enters into a new service term agreement for a comparable quantity of service for a period greater than or equal to the number of months remaining on the DigiLine agreement.

3.8 Moves

3.8.1 A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri, except as described in the following paragraphs. If the customer is moving the service prior to the expiration of an Installation Charge service term agreement, the move will not be considered a disconnect for the purpose of calculating a termination charge if: (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location.

3.8.2 If there are no existing Basic Rate Interface Installation Charge service term agreements associated with the service, the customer may choose a 12 or 24 month service term agreement at the new location and the Move Charge will not apply. The customer will be charged the installation charge associated with the 12 or 24 month service term agreement. **Missouri Public Service Commission**

3.8.3 If the customer requests a move prior to the expiration of a Basic Rate Interface Installation Charge service term agreement and the customer elects to move the same quantity of Basic Rate Interfaces to another location in Missouri served by SWBT, the customer may

DIGILINE® SERVICE

DEC 16 1997

(MT) 3.7 Service Terms

3.7.1 Minimum Service Term: All DigiLine Service components have a minimum service term of one month. **MISSOURI PUBLIC SERVICE COMMISSION**

3.7.2 Basic Rate Interface Installation Charge Service Term Agreements: Term pricing options are available for the Installation Charge associated with the Basic Rate Interface. These options are in addition to the typical month-to-month payment option for the Basic Rate Interface. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the Basic Rate Interface. Options include a 12 or 24 month term. If a customer chooses a service term and then disconnects the Basic Rate Interface prior to the expiration of that term, a charge will be due. This termination charge is equal to the difference between the normal month-to-month Installation Charge in effect at the time the service was installed and the actual amount paid for the installation.

(MT)

(AT) 3.7.3 If a customer chooses to disconnect DigiLine Service in order to convert to another Telephone company Basic Rate Interface service, the Telephone Company will waive the termination charge associated with the term agreement if (1) the customer enters into a new service term agreement for a quantity of BRIs equal to or greater than the existing agreement; and (2) the new term period is greater than or equal to the number of months remaining on the DigiLine agreement. **CANCELLED**

3.8 Special DigiLine Service Requests

MAY 30 1995

3.8.1 DigiLine Service will be furnished at the rates contained in this tariff section, provided facilities are available. Where facilities are not available or unusual expenditures are involved in making them available, the customer may be required to pay additional charges (under Section 5 of the General Exchange Tariff) to cover the unusual expenditure, or to contract for services beyond the service term or both.

3.8.2 If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by SWBT, and if agreed to by SWBT, the DigiLine Extension Equipment charge found in Paragraph 3.12 of this tariff will apply in addition to the charges for Foreign Serving Office Service, under Section 2 of the Private Line Service Tariff. Foreign Serving Office Service charges shall apply on a per Channel basis.

3.8.3 If a customer requests DigiLine Service to be provisioned from an office outside of their exchange other than the DigiLine serving office designated by SWBT, and if agreed to by SWBT, the DigiLine Extension Equipment charge found in Paragraph 3.12 of this tariff will apply in addition to the charges for Foreign Exchange Service, under Section 2 of the Private Line Service Tariff. Foreign Exchange Service charges shall apply on a per Channel basis.

3.9 Moves

(CT)

A Move Charge, as specified in this tariff, will apply when a customer moves his DigiLine Service from one location to another within SWBT's jurisdiction in Missouri. If the customer is moving the service prior to the expiration of a service term, the move will not be considered a disconnect for the purpose of calculating a termination charge if (1) the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and (2) the customer agrees to complete the unexpired term at the new location.

(CT)

3.10 Supersedures

DigiLine Service may be transferred to a new customer at the same premises upon written concurrence of SWBT. The customer to whom service is transferred must accept all past indebtedness liabilities, minimum term provisions and equipment configurations in effect for the previous customer at the time of the transfer.

MO. PUBLIC SERVICE COMM.

3.10 Suspension of Service - Initiated by the Customer (Vacation Service)

Vacation Service (Section 22 of the General Exchange Tariff) is not offered for DigiLine Service.

3.12. Rate Application

3.12.1 General

1. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by SWBT before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
2. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges through a series of equal monthly payments not to exceed a period of 12 months. An amount of five dollars (\$5.00) will be applied to the first monthly payment for each installment billing arrangement. This charge will only apply once when multiple orders are issued for one customer, at one location, with one due date.

3.12.2 Integrated Services Digital CSV/CSD Transport Option - Usage Options

1. DigiLine Service provides for usage of the PSTN on either a flat rate or usage sensitive basis per BRI. The flat rate usage charge applies per B-channel activated for CSV/CSD. Customers opting for the usage sensitive option must select a usage package which applies on a per BRI basis. Customers may not combine a flat rate option with a usage sensitive option on the same BRI.
2. The customer may opt to switch usage options or usage packages upon notification to SWBT. Billing under the newly selected usage option or usage package will commence with the beginning of the customer's next billing period. The Change a Network Rate Element charge will apply for customers switching usage options or usage packages.

DIGILINE® SERVICE

3.13 Promotional Rates

REC'D JAN 08 2003

A promotional period will begin December 23, 2002 and end December 22, 2003 for business customers who established service with another local exchange carrier within the SWBT service area and who now wish to establish service with SWBT. Business customers who purchase DigiLine Service will receive a waiver of the non-recurring Installation Charges associated with the Basic Rate Interface.

Subscribers under this DigiLine Service Promotion are not eligible for other promotional pricing offers of DigiLine Service that may be available in Section 3 of the Integrated Services Tariff.

(CT)

Business customers who have past due bills for regulated services owed to the Company are eligible for this promotion as long as they have established mutually acceptable payment arrangements with the Company.

(CT)

Service must be installed by January 31, 2004.

A promotional period will begin April 9, 2001 and end April 8, 2002 for business customers who wish to upgrade their established local access service, have received a competitive local access offer and are considering changing their local access service to the competitive carrier. Business customers who remain with SWBT, add to their existing DigiLine Service or upgrade to DigiLine Service, and commit to a minimum 1-year term for DigiLine Service will receive a waiver of the non-recurring Installation Charges associated with the Basic Rate Interface.

Subscribers under this DigiLine Service Promotion are not eligible for other promotional pricing of DigiLine Service available in Section 3 of the Integrated Services Tariff.

The business customer must not have had: 1) service disconnected for nonpayment; or 2) any past due bills for regulated service owed to the Company.

Service must be installed by May 31, 2002.

REC'D MAR 09 2001

A promotional period will begin April 9, 2001 and end April 8, 2002 for business customers who established service with another local exchange carrier within the SWBT service area and who now wish to establish service with SWBT. Business customers who purchase Digiline Service will receive a waiver of the non-recurring Installation Charges associated with the Basic Rate Interface.

Subscribers under this Digiline Service Promotion are not eligible for other promotional pricing offer of Digiline Service that may be available in Section 3 of the Integrated Services Tariff.

The business customer must not have had: 1) service disconnected for non-payment, or 2) any past due bills for regulated service owed to the Company.

Service must be installed by May 31, 2002.

A promotional period will begin April 9, 2001 and end April 8, 2002 for business customers who wish to upgrade their established local access service, have received a competitive local access offer and are considering changing their local access service to the competitive carrier. Business customers who remain with SWBT, add to their existing DigiLine Service or upgrade to Digiline Service, and commit to a minimum 1-year term for DigiLine Service will receive a waiver of the non-recurring Installation Charges associated with the Basic Rate Interface.

Subscribers under this Digiline Service Promotion are not eligible for other promotional pricing of Digiline Service available in Section 3 of the Integrated Services Tariff.

The business customer must not have had: 1) service disconnected for non-payment, or 2) any past due bills for regulated service owed to the Company.

Service must be installed by May 31, 2002.

JUL 26 1995

In the Kansas City DigiLine Service Area, the Telephone Company will waive the Installation Charge for the Basic Rate Interface listed in Paragraph 3.13 (A) for new and additional units ordered during a promotional period from the effective date of this tariff through August 31, 1995. From September 1, 1995 through September 30, 1995, a 50 percent waiver will apply for the Basic Rate Interface Installation Charge. Both waivers are only available on service installed within six months of the date of the order.

For all DigiLine Service customers, the Telephone Company will waive the Service and Equipment Charge for the Basic Rate Interface as listed in the Local Exchange Tariff for new and additional units ordered during a promotional period from July 25 through July 27, 1995. This waiver is only available on service installed within six months of the date of the order.

(AT) 3.15 Stakeholder Panels

The Telephone Company reserves the right to periodically provide DigiLine services without charge to customers in return for their participation on stakeholder panels. The panels will be established for the purpose of gathering market research. The Service and Equipment Charges, installation charge, recurring monthly rates and any other associated charges will be waived only for the DigiLine services designated by the Telephone Company as pertinent to the research and only for the duration of the stakeholder panels and the customer's participation on the panel. As a condition to participate on stakeholder panels, customers will be obligated to provide specific feedback (e.g., respond to surveys, participate in focus groups, etc.) concerning the services to the Telephone Company. Panel participants will be selected by the Company to represent a cross section of Missouri customer stakeholder groups. This service will begin on September 5, 1995, and continue until the panels are disbanded or December 31, 1996, whichever occurs first.

Miscellaneous Services

4.1 Digital Packet Switching Usage

- 4.1.1 Digital Packet Switching Usage provides for use of Southwestern Bell's Public Packet Switched Network. This service is limited to customers who have purchased a packet switched data option for SWBT's Basic Rate Interface (BRI) or Primary Rate Interface (PRI) Integrated Services Digital Network (ISDN) based service. Digital Packet Switching Usage is not available on a stand alone basis.

(AT)

This service is competitively classified in the following exchanges:

Business:
St. Louis
Kansas City

(AT)

4.1.2 Definitions

Detailed Report - Provides a printout of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by customer account.

Kilosegment - A segment is a means of measuring the volume of transmitted information. The segment size is the number of octets of call user data contained in a packet segment. The standard Telephone Company segment size is 64 octets. The number of segments in a packet is determined by dividing the number of octets of call user data in a packet by 64 and rounding up. A kilosegment is one thousand segments.

Packet Directory Number - This is the "E-164 address" associated with packet capability on the customer ISDN-based service. The number identifies customers originating calls on the packet switching network.

Packet Switching Network - Consists of the packet switches and interswitch facilities within a LATA.

Session - The time that common control network facilities are allocated to a specific switched call. It begins with call set up and continues until the common control network facilities are released for reuse by the network.

Summary Report - Provides a monthly total, on paper only, of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by either user identification or originating city.

4.2 Digital Customer Alerting Service (1)

4.1.1 This service provides the capability of activating and deactivating an alerting tone on subscriber lines served from suitably equipped end offices. The alerting tone is provided in the form of a stutter dial tone and serves as notification that some type of action is warranted (i.e., a message is waiting for retrieval). This service is limited to customers who have purchased a packet switched data option for Southwestern Bell's Basic Rate Interface (BRI) or Primary Rate Interface (PRI) Integrated Services Digital Network (ISDN) based service. Digital Customer Alerting Service is not available on a stand alone basis.

4.1.2 Rules and Regulations

The following rules and regulations are in addition to the rules, regulations, and rates in other Tariffs:

1. This service is subject to the availability and operational limitations of the equipment and facilities.
2. Temporary suspension of service is not available.
3. Southwestern Bell reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.

4.2.3 Rates and Charges

PRIMARY RATE ISDN: SelectData®

REC'D AUG 09 2002

5.1 GENERAL

Service Commission

5.1.1 SERVICE DESCRIPTION

Primary Rate ISDN is an intraLATA dial-up multi-rate switched digital data service. Primary Rate ISDN will provide digital connections ranging from 64 Kbps to 1536 Kbps (synchronous) in 64 Kbps increments of bandwidth via the public switched network. Network access to Primary Rate ISDN is via fully configured ISDN primary rate interfaces (PRI).

SelectData is an inbound-calling-only service, which provides ISDN PRI functionality for digital data transport and/or analog modem calls (voice grade), on a single channel basis. Individual calls may be received at transmission speeds up to 64 Kbps. Outbound calls may not be placed with SelectData service.

The PRIMARY RATE ISDN SelectData service is competitively classified in the following exchanges

Business:

St. Louis

Kansas City

5.2 SERVICE COMPONENTS

- 5.2.1 Primary Rate ISDN Arrangement: provides the communication path capable of bandwidth aggregation from the customer's premises to the Primary Rate ISDN serving office. A Primary Rate ISDN arrangement may consist of Control Links and Communication Links. A minimum of one Control Link is required per Primary Rate ISDN arrangement. For SelectData, the minimum configuration provides digital connections of up to 64 KBPS only.

5.2 SERVICE COMPONENTS (cont'd)

Service Commission

5.2.1 Primary Rate ISDN Arrangement: (cont'd)

- 5.2.1.1 Primary Rate ISDN Interface Control Link: an ISDN PRI termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with one D Channel or a back-up D Channel and 23 B Channels.
- 5.2.1.2 Primary Rate ISDN Interface Communication Link: an ISDN PRI termination and a digital multichannel transmission path between the central office and the customer's premises, which is configured with 24 B Channels.
- 5.2.1.3 Primary Rate ISDN Port Control Link: an ISDN PRI connection that does not include the facility between the customer's premises and the Primary Rate ISDN Serving Office, which is configured with one D Channel or a back-up D Channel and 23 B Channels. The connection is made using a SWBT facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specifications listed in Paragraph 2.5, Section 2 of the P.S.C. Mo.-No. 41 Integrated Services Tariff.
- 5.2.1.4 Primary Rate ISDN Port Communication Link: an ISDN PRI connection that does not include the facility between the customer's premises and the Primary Rate ISDN Serving Office, which is configured with 24 B Channels. The connection is made using a SWBT facility purchased separately. This facility must be at a minimum of DS1 level and must conform to technical specifications listed in Paragraph 2.5, Section 2 of the P.S.C. Mo.-No. 41 Integrated Services Tariff.

5.2.2 Link Extension:

This optional rate element provides the additional central office hardware and facility required to provide SelectData for customers located in an exchange outside the non-optional local calling scope of the SelectData equipped serving office. Application of this rate element is dependent upon both the customer's location and the fact that the customer is served from the SelectData serving office designated by Southwestern Bell

5.2.3 Optional Features

5.2.3.1 The following optional features are available with the SelectData service:

- 5.2.3.1.1 Back-Up D Channel (BD-C): Allows enhanced survivability of the Primary Rate ISDN arrangement by providing automatic takeover for a failed D-Channel.
- 5.2.3.1.2 Additional Telephone Numbers (Direct Inward Dialing Service): Provides additional telephone numbers to the Primary Rate ISDN user.
- 5.2.3.1.3 Calling Line Identification (CLID): Allows the number of the calling party to be delivered to the called party.
- 5.2.3.1.4 Loop Protection: Provides automatic restoration of the Primary Rate ISDN service Control Link or Communication Link facility and physical route redundancy from the demarcation point at the customer's premises to the customer's normal serving office in the event of a transmission failure caused by a single facility break or a single electronics failure. The automatic restoration capabilities are provided through the use of intelligent components, which are capable of sensing transmission failures. The primary and secondary transmission paths are separately routed in geographically and physically separate fiber optic cables up to the nearest point to the customer's premises that route redundancy can be achieved. In the event of a transmission failure, the intelligent components will automatically switch the Primary Rate ISDN service from the primary to the secondary transmission path within 2.0 seconds.
- 5.2.3.1.5 Trunk Group Overflow: Provides the ability to direct incoming calls to another Primary Rate ISDN service arrangement when all B Channels are in use. Each overflow arrangement consists of 2 to 10 spans as selected by the customer.
- 5.2.3.1.6 Additional Call Handling Groups: Provides the capability of grouping B channels by utilizing simulated facility groups.

Service Commission

- 5.3.1 The following regulations are in addition to other regulations as stated in this and other SWBT tariffs.
- 5.3.2 SelectData will support data mode calls, as well as analog modem (voice grade) calls.
- 5.3.3 Primary Rate ISDN requires the use of customer provided equipment (CPE) which must be compatible with SWBT's equipment and facilities, and is subject to the interface specifications in TR-TSY-000776 (Network Interface Description for ISDN Customer Access) and TR-NWT-001203 (Generic Requirements for the Switched DS1/Switched Fractional DS1 Service Capability from an ISDN Interface). These documents may be obtained from:
- Bellcore Document Register
445 South Street, Room 2J-125
P.O. Box 1910
Morristown, NJ
Telephone: 1-800-521-2673
- 5.3.4 Compatible CPE must be provided at both the originating and terminating locations to successfully complete a Primary Rate ISDN call.
- 5.3.5 Primary Rate ISDN service, when furnished at the same premises in combination with other local exchange service, shall not be considered to be in conflict with the rules of paralleling service.
- 5.3.6 Primary Rate ISDN service shall not be shared or jointly used except under Section 37 (Shared Tenant Service) of the General Exchange Tariff. Resale is prohibited under Section 17 (Rules and Regulations Applying to All Customers' Contracts) of the General Exchange Tariff.
- 5.3.7 Temporary suspension of service at the request of the customer, either partial or complete is not applicable for this offering.

5.3.8 Alternate billing is not available for Primary Rate ISDN service.

Service Commission

5.3.9 Service Terms

5.3.9.1 All Primary Rate ISDN service components have a minimum service term of one month.

5.3.9.2 SelectData customers shall select a service term for each Control Link and Communication Link of either a Month-to-Month, or 12 month term agreement. Customers selecting a term agreement will be required to sign a contract per order. When a Link Extension is required, it will be provided under the same service term as the associated Control Link / Communication Link.

5.3.9.3 Customers selecting the Month-to-Month service term may convert to a 12-month term agreement at current tariff rates. Customers converting from a Month-to-Month service term within 60 days from the date their Primary Rate ISDN service is established, will receive a credit equal to the difference in installation charges associated with the Month-to-Month term agreement and the newly selected service term.

5.3.10 Upon expiration of the term agreement, the customer may:

- (A) Continue service at the current Month-to-Month service term rate. That rate will be subject to any future changes.
- (B) Continue service by selecting a new term agreement for the Control Link and/or Communication Link at the then current rates. The rates for the Control Link and/or Communication Link and any associated Link Extensions will not be subject to rate increases for the duration of the term agreement selected by the customer. The customer will be required to sign a new contract.
- (C) Disconnect the service.

5.3.11 Moves

5.3.11.1 Different Central Office

Customer moves which require the Primary Rate ISDN Control Link or Communication Link to be provided from a different central office will be considered a disconnection of service for each Control Link and Communication Link moved. (Refer to paragraphs 5.7.5.1 and 5.7.5.2 for applicable charges.) Installation charges will apply.

5.3.11.2 Same Central Office

Customer moves which do not require the Primary Rate ISDN Control Link or Communication Link to be provided from another central office will not constitute a disconnection of service provided the service is not interrupted. Installation charges will apply.

5.3.12 Customers may transfer Primary Rate ISDN service to a new customer at the same premises, upon written concurrence of SWBT. In addition, the new customer shall assume all the previous customer's Primary Rate ISDN service indebtedness.

5.3.13 A customer may subscribe to both SelectVideo Plus and SelectData; however, each service option must be provided through a separate Primary Rate ISDN service arrangement.

5.4 RESPONSIBILITY OF THE CUSTOMER

Service Commission

5.4.1 Where Primary Rate ISDN service is available for use in connection with terminal equipment or communication systems provided by a customer or user, the operating characteristics of such equipment or systems shall be such as not to interfere with any of the services offered by SWBT. Such use is subject to the further provisions that the equipment provided by a customer or user does not endanger the safety of SWBT employees or the public; damage or require alteration of the equipment of other services of SWBT; interfere with the proper functioning of such equipment or services; impair the operations of SWBT's equipment; or otherwise injure the public in its use of SWBT services. Upon notice from SWBT that the equipment provided by the customer or user is causing, or is likely to cause, such hazard or interference, the customer shall immediately take such steps as shall be necessary to remove or prevent such hazard or interference. All customer equipment must comply with FCC Rules and Regulations Part 68.

5.4.2 The customer, upon request, shall furnish such information as may be required to permit SWBT to design and maintain the Primary Rate ISDN service it offers and to assure that the service arrangement is in accordance with the regulations contained herein.

5.4.3 The customer shall insure the continuing compatibility of the customer provided terminal and data unit equipment that is used in conjunction with the Primary Rate ISDN service.

5.5 RESPONSIBILITY OF SWBT

5.5.1 The responsibility of SWBT shall be limited to the furnishing of network equipment suitable for Primary Rate ISDN service and the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility, SWBT shall not be responsible for the through-transmission of signals generated by customer-provided equipment or systems or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems. SWBT shall not be responsible for installation, operation or maintenance of any terminal equipment, data unit or communications systems provided by a customer or user. SWBT is not responsible for adapting Primary Rate ISDN service to the technological requirements of any specific customer equipment.

5.5.2 SWBT shall not be responsible to the customer or user, if changes in any of the equipment, operations, or procedures of SWBT used in the provision of Primary Rate ISDN service render any facilities provided by a customer or user obsolete or require modifications or alteration of such equipment or system or otherwise affect its use or performance, provided SWBT has met any applicable information disclosure requirements.

Missouri Public

PRIMARY RATE ISDN: SelectData®

REC'D AUG 09 2002

5.5 RESPONSIBILITY OF SWBT (cont'd)

Service Commission

- 5.5.3 SWBT shall maintain and repair the service which it furnishes. The customer or user may not rearrange, disconnect, remove, attempt to repair, remote test or interfere with any network equipment installed by SWBT without prior written consent of SWBT.

5.6 SERVICE AVAILABILITY

- 5.6.1 Southwestern Bell will designate the SelectData-equipped central office(s) used to physically provision SelectData service to customers in each exchange. In many cases, a customer's designated SelectData serving central office will be different from the normal serving office designated for basic local exchange service.
- 5.6.2 If the customer's normal serving office is within the non-optional local calling scope of the designated SelectData serving office, Link Extension, Foreign Exchange service (FX) and Foreign Serving Office (FSO) charges will not apply.

If the customer's normal serving office is not within the non-optional local calling scope of a SelectData-equipped central office, the customer will be provided with SelectData service from the designated SelectData equipped central office and the rates and charges for Link Extension, as specified in this tariff, will apply.

In both cases preceding, when there is a change in the central office designated as the SelectData serving office for a customer's location, the customer's SelectData service will continue to be provided from the original SelectData serving office, if possible. Should the customer subsequently request that their SelectData service be provisioned from the new designated serving office, the provisions and charges specified in this Tariff for moves and disconnects will apply. Southwestern Bell may request that the customer, at the customer's option, have the customer's SelectData service provided from the new designated serving office and, in conjunction therewith, may offer to waive move and/or disconnect charges.

- 5.6.3 If a customer requests SelectData service to be provisioned from an office other than the SelectData serving office designated by the Telephone Company, and if agreed to by the Company, the charges specified in this Tariff are applicable in addition to the rates, charges, terms and conditions of FSO/FX Service pursuant to the "Foreign Exchange Service" and "Foreign Serving Office Service" sections of the General Exchange Tariff.

REC'D FEB 24 2004

PRIMARY RATE ISDN: SelectData®

5.6 SERVICE AVAILABILITY (cont'd) Service Commission

5.6.4 All rates, charges, terms and conditions set forth herein provide for the furnishing of service where suitable facilities and equipment are available and do not create an obligation for the Company to construct such facilities or equipment especially for the provision of this service.

5.7 APPLICATION OF RATES AND CHARGES

- 5.7.1 A minimum of one Control Link is required per Primary Rate ISDN arrangement. SelectData provides digital connections of 56/64 kbps only. A Primary Rate ISDN arrangement can consist of any combination of Control Links and Communication Links.
- 5.7.2 Where applicable, a Link Extension is charged in addition to the monthly rate for the associated Control Link or Communication Link. The Access Link Extension must be associated with and ordered at the same time as the Control Link or Communication Link.
- (AT) 5.7.3 The Primary Rate ISDN Control Link, Communication Link, and Link Extension rates will not be subject to rate increases for the duration of the 12-, 24-, 36-, 48-, or 60-month term agreement signed by the customer.
- (AT) 5.7.4 Optional Deferred Payment of installation Charges and/or Special Construction Charges is available only for customers selecting a 12-, 24-, 36-, 48-, or 60-month term agreement.
- (AT) 5.7.4.1 Before Service is established, the customer may request to spread all the installation charges (including the installation charges associated with optional features) and/or Special Construction Charges over a payment period of either 12, 24, 36, 48, or 60 months but not to exceed the length of the 12-, 24-, 36-, 48-, or 60-month term agreement. The customer cannot change the deferred payment term. The deferred monthly charge will equal the installation charges and/or special construction charges multiplied by the appropriate annuity factor as specified in Section 17 of the General Exchange Tariff.
- 5.7.4.2 This optional deferred payment is not offered for customers selecting the Month-to-Month service term.

5.7 APPLICATION OF RATES AND CHARGES (cont'd)

Service Commission

5.7.5 Disconnection of Service Prior to the Expiration of the Service Term.

- 5.7.5.1 If the customer disconnects a Primary Rate ISDN Control Link or Communication Link prior to the expiration of the term agreement, the customer shall pay a charge equal to the Control Link or Communication Link rate in effect on the date of the contract times the number of months remaining on the term agreement for each Control Link or Communication Link disconnected. See Item 5.7.5.3 below for exceptions to this provision. Additional charges will not be applied for any Link Extensions disconnected prior to the expiration of the service term.
- 5.7.5.2 If the customer disconnects a Primary Rate ISDN Control Link or Communication Link prior to the expiration of the term agreement and the installation charges and/or special construction charge were deferred at the time service was established (Pursuant to Paragraph 5.7.4.1 above), the customer shall pay a charge equal to the remaining principal on the deferred payment term for each Control Link or Communication Link disconnected.
- 5.7.5.3 The provisions of Paragraph 5.7.5.1, above do not apply in the following circumstances:
1. If the customer converts from Select Data to SelectVideo Plus.
 2. When the customer with an existing contract converts to another SWBT digital service under a contract term which is equal to or greater than the number of months remaining on the Primary Rate ISDN Service contract being terminated. In this instance, the charges specified in Paragraph 5.7.5.1, above, are multiplied by 0.20 (20%).
 3. If the disconnection of service is the result of a customer move which required the Primary Rate ISDN Service to be provided from a different central office.

In each of the above circumstances, deferred installation charges will become due as specified in Paragraph 5.7.5.2, above.

Service Commission

Footnotes

- (1) Applies to the first unit ordered per request, per customer premises, per installation date.
- (2) The installation charge for customer moves within the same Primary Rate ISDN serving office, as described in 5.3.11.2 preceding, will be equal to the installation charge associated with the SelectVideo 36 month service term.
- (3) Applies to all other units ordered in addition to the initial unit per request, per premises, per installation date.
- (4) For Additional Telephone Number Rates (Direct Inward Dialing Service), please see General Exchange Tariff Section 13, Paragraph 13.7.1 B.
- (5) Loop Protection will be provided where fiber optic facilities are available. Where fiber optic facilities are not available, but could technically be provided, special construction charges may apply.
- (6) An Overflow Arrangement consists of 2 to 10 spans as specified by the customer.
- (7) Charge applies on a per Link basis but all Links within the same Arrangement must be equipped.
