14.1 DESCRIPTION AND APPLICATION OF SERVICE

14.1.1 General

MISSOURI
Public Service Commission

This section covers arrangements that are provided only to qualified customers located in an exchange area served by Southwestern Bell Telephone Company, for use only by educational institutions in Missouri. Arrangements terminating at a non-Southwestern Bell locations will be provided pursuant to the regulations, rates and charges of the other Local Exchange Telephone Company for the portion of the arrangement terminating at the non-Southwestern Bell location.

This service is intended for the exclusive use and purchase by educational institutions to improve the education system in Missouri and encourage economic development.

The rules and regulations of this tariff section are in addition to other rules and regulations as stated in this and other Telephone Company tariffs.

14.1.2 Definitions

For the purpose of this tariff, the following definitions shall apply:

Cluster - A group of at least two, and no more than twelve schools that are located within the same geographical area, share an educational community of interest, a desire to share classroom resources and have agreed through a mutual agreement, pact, or consortium arrangement to join together for purposes of purchasing distance learning service via this tariff.

Control Site - One school site within a cluster of schools that is designated by the school district, college, university and/or other organized group of schools for the purpose of establishing video conferences within a cluster of schools.

Control System - A control system permits a control site within a cluster to control and arrange connections to the Broadband Educational Videoconferencing Service.

participating classroom, at up to three remote sites. These signals can be displayed on individual monitors or input to a customer-provided quad-split amplifier for display as indicated in a.) above. Multiple multipoint conferences may take place concurrently with multiple point-to-point conferences or any combination of the two on an intra-cluster basis. Only one multipoint conference can take place at any one time on an inter-cluster basis. MultiMonitor Mode clusters are limited to twelve participants.

E. Connectivity

Connectivity of Broadband Educational Videoconferencing Service may be provided as follows:

1.) Intra-Cluster Connectivity

Broadband Educational Videoconferencing Service provides the capability of connectivity between schools in a cluster as an inherent feature of the service. Intra-cluster connectivity is established by the designated control site during establishment and/or rearrangement of a video conference. The customer has two service configurations to choose from as described in 14.1.3, D., preceding. Each school site must purchase an intra-cluster channel termination at the rates found in 14.2.2, A.1., following.

2.) Inter-Cluster Connectivity

Conferences may be established between clusters. At the option of SWBT, the customer will be provided with the capability to either establish conferences between clusters by contacting the SWBT Broadband Educational Videoconferencing Service Control Center and providing the appropriate information to establish the connection, or establish the conference via direct access to the scheduling system. Connect charges and usage charges will apply as found in 14.2.2, A.2., following.

E. Connectivity (Continued)

3.) Connectivity to Sites in Independent Telephone Company Areas

(CT)

Connectivity with a SWBT BEVS cluster for Quality 1 video and audio arrangements, may be made to sites in Independent Telephone Companies. This connectivity may be made only when the sites being connected are all located within the same facility sector as the SWBT cluster hub. Rates are as found in 14.2.2.A.2 following. The rates and charges for these connections will be for the facilities to the last SWBT serving office. Rates and charges for the facilities required to connect the last SWBT serving office to the Independent Company meet point will be provided via an Individual Case Basis (ICB) arrangement. These ICBs will be priced above incremental unit cost but with no more than 5% contribution.

(CT)

Connectivity with a SWBT BEVS cluster for Quality 2 business conference quality comparable to 1.544 Mbps, may be made to sites in Independent Telephone Companies, and will be provided via an Individual Case Basis (ICB) arrangement. These ICBs will be priced above incremental cost but with no more than 5% contribution. Conferences may then be established between Broadband Educational Videoconferencing Service cluster(s) and a customer site located in an Independent Telephone Company area.

At the option of SWBT, the customer may establish conferences between clusters by contacting the SWBT Broadband Educational Videoconferencing Service Control Center and providing the appropriate information to establish the connection, or establish the conference via direct access to the scheduling system.

4.) Connectivity to Private Networks or Interexchange Carriers (IXCs)

Connectivity between a Broadband Educational Videoconferencing Service cluster(s) and a private network or an IXC may be provided at 1.544 Mbps via the rates provided in 14.2.2, following. Requests for connectivity in excess of 1.544 Mbps may be provided via an ICB arrangement. At the option of SWBT, the customer may establish conferences between clusters by contacting the SWBT Broadband Educational Videoconferencing Service Control Center and providing the appropriate information to establish the connection, or establish the conference via direct access to the scheduling system.

NOV 27 1995

14.1.3 Provision of Service (Continued)

F. Ethernet Option

MO. PUBLIC SERVICE COMM.

Broadband Educational Videoconferencing Service (BEVS) provides, as an option, Wide Area Network (WAN) connectivity within the BEVS LATA service area. This optional service is provided via a dedicated native ethernet bit rate (10 Mbps, maximum capacity) and interface connection on the customer's premises. As potentially a part of a larger Ethernet Local Area Network (LAN) on the customer's premises, the BEVS Ethernet option monitors all transmitted frames on the customer's LAN and recognizes when an Ethernet frame is destined for an address that is not local to the customer's LAN. Such remote LAN traffic routes through the SWBT BEVS network to the appropriate remote Ethernet interface and is in turn delivered to the remote LAN for subsequent delivery to the appropriate address. The specifications employed on this option follow the IEEE 802.3 Ethernet standard.

(RT)

(RT)

(CT)

Charges apply as found in 14.2.2, A.6, following.

- G. The subscriber to Broadband Educational Videoconferencing Service is responsible for the video hardware and software at all school sites in the cluster, including but not limited to, cameras, monitors, control systems and physical classroom preparation.
- H. Broadband Educational Videoconferencing Service will be located on the customer's premises at a point that is within 100 feet of the customer's equipment.
- I. The subscriber to Broadband Educational Videoconferencing Service is responsible for the provisioning of sufficient space to house the customer premises electronics, including, but not limited to, accessibility for Telephone Company personnel for maintenance and repair, proper temperature control, and easily accessible power sources.

(AT)

(AT)

14.1.4 Authorized Use

Broadband Educational Videoconferencing Service may be used for the transmission of communications (audio and video) for other purposes in conjunction with the customer's rental or lease of its educational facilities where the service terminates and where the customer's video studio equipment is located. Use of Broadband Educational videoconferencing Service for such purposes is allowed upon payment to Southwestern Bell Telephone Company of the hourly charge set out in 14.2.2, A.7.

The specifications employed on this option follow the IEEE 802.3 Ethernet standard. The physical interface consists of an Attachment Unit Interface (AUI) protocol with a DB-15 connector located on the BEVS interface panel provided by SWBT at the customer's premises. This type interface provides the customer the ability to select the type of wiring they will utilize for their local Ethernet LAN and connection to the interface. Charges apply as found in 14.2.2, A.5., following.

- G. The subscriber to Broadband Educational Videoconferencing Service is responsible for the video hardware and software at all school sites in the cluster, including but not limited to, cameras, monitors, control systems and physical classroom preparation.
- H. Broadband Educational Videoconferencing Service will be located on the customer's premises at a point that is within 100 feet of the customer's equipment.

14.1.4 Authorized Use

Broadband Educational Videoconferencing Service may be used for the transmission of communications (audio and video) for other purposes in conjunction with the customer's rental or lease of its educational facilities where the service terminates and where the customer's video studio equipment is located. Use of Broadband Educational videoconferencing Service for such purposes is allowed upon payment to Southwestern Bell Telephone Company of the hourly charges set out in 14.2.2, A.7.

CANCELLED

14.2 RATE REGULATIONS

14.2.1 General

MAR 08 2000

A. Channel Termination

By 1st RS 7
Public Service Commission
MISSOURI

A channel termination provides for the communications path between a customer designated premises and the serving wire center for that premises within a cluster. One channel termination charge applies per customer designated premises at which the channel is terminated. Rates and charges are as found in 14.2.2 A.1., following.

B. Connect Charges

A connect charge applies per school site for certain connections to Broadband Educational Videoconferencing Service conferences. Rates and appropriate applications are found in 14.2.2, following.

C. Minute of Use Charges

A rate per minute of use applies per school site for certain connections to Broadband Educational Videoconferencing Service conferences. Rates and appropriate applications are found in 14.2.2, following.

D. Service Connection Charges

Service Connection Charges, as found in Section 19 of the General Exchange Tariff, do not apply to Broadband Educational Videoconferencing Service.

E. Minimum Service Period

The minimum service period for Broadband Educational Videoconferencing Service is 5 years. Customers requesting to discontinue services provided in this section of the tariff, any time after one year of service and prior to the expiration of the service period, will incur termination charges calculated as follows: billed monthly rate X number of months remaining in the service period X a 50% Termination Percentage. Customers requesting to discontinue services prior to one year will incur termination charges calculated as above with a Termination Percentage of 100% for the months remaining in the first year and 50% for the remainder of the minimum service period.

MULTIPOINT VIDEO SERVICE

15.2 DEFINITIONS

Certification: At the customer's option SWBT will verify the compatibility of customer equipment with SWBT's Multipoint Control Unit in advance of the scheduled video conference. When opted, customer equipment in all locations which will participate in the conference will be certified.

Conference Control Options: The following control options are available to customers:

- **Voice Activation:** The video portion of the call is switched based upon dominant audio level. The person speaking sees the previous speaker; all other participants see the person who is currently the dominant speaker.
- **Continuous Presence** is available at an additional charge. This optional feature provides for the video signal to be divided into equal sections on the monitor(s) allowing multiple conference participants to be seen simultaneously. Due to limited availability, the customer must request this option when making the video conference reservation. (See paragraph 15.7.4.2 for applicable charges.)

Conference extension: Period of time beyond the scheduled end time of the video conference during which all or some of the ports remain connected.

Conference originator: The customer making the video conference reservation. This customer will be the billed party.

Extended Set-up: An optional period of time in excess of the standard 15 minute set-up. If this option is chosen, the customer must request it when arranging the video conference reservation.

Multipoint Control Unit: A central office based unit which provides bridging of three or more video calls using the same bandwidth.

Port: Multipoint Control Unit termination point. A port is associated with each video conference site.

MULTIPOINT VIDEO SERVICE

15.2 DEFINITIONS (Continued)

Port Minute: Chargeable unit for Multipoint Video Service conferences. Total port minutes is the sum of minutes of connection time or reserved time, whichever is greater, for all conference sites.

Reservation center/attendant: SWBT personnel who serve as the customer interface for scheduling video conference ports and provide coordinating technical video assistance.

Set-up: A standard 15 minute period prior to the scheduled start time of the video conference during which all reserved ports will be operational. This period allows the customer to verify that each leg of the video conference is connected properly.

MULTIPOINT VIDEO SERVICE

15.3 REGULATIONS

15.3.1 The following regulations are in addition to other regulations as stated in other Southwestern Bell Telephone Company tariffs.

15.3.2 Multipoint Video Service will be provided from a suitably equipped serving office. The location of the Multipoint Video serving office is at the Company's discretion. Each conference participant will be responsible for all local/toll charges which would normally apply to calls from their location to the Multipoint Video serving office and all charges applicable to the service(s) used to access the Multipoint Control Unit.

15.3.3 To make reservations for a video conference, the customer must call the SWBT reservation center between the hours of 7:00 a.m. and 5:00 p.m. Central Time(1). The customer must provide the following information at the time the reservation is made:

- date, start time, and duration of conference;
- number of conference ports needed;
- transmission speed;
- any optional features desired (e.g., extended set up, continuous presence);
- customer billing information.

If conference participant(s) will establish connections using inverse multiplexers, the customer must advise SWBT at the time the reservation is made.

15.3.4 With the continuous presence option, a limited number of conference sites can appear on the monitor(s) simultaneously. Therefore, if the number of ports reserved exceeds this limit, the conference originator must designate which ports should be on the monitor. This information must be provided to SWBT at the time the reservation is made. Ports which are not designated to appear on the monitor will only be heard by the other participants but will receive video of the ports which are designated.

- (1) SWBT's reservation center will not be available on weekends or SWBT designated holidays. Availability may be verified by calling the reservation center during its normal hours of operation.

MULTIPOINT VIDEO SERVICE

15.3 REGULATIONS (Continued)

- 15.3.5 The minimum reservation period for a video conference is 30 minutes. This minimum period applies per port reserved and does not include set up time.
- 15.3.6 Upon SWBT acceptance of the conference reservation, the customer will be provided telephone numbers for the conference participants to use to connect to the Multipoint Control Unit.
- 15.3.7 All conference participants must connect to the Multipoint Control Unit using the same bandwidth.
- 15.3.8 If the customer orders extended set up, the same period of time must be ordered for all ports on the video conference.
- 15.3.9 Multipoint Video Service charges applicable to all ports will be billed to the conference originator.
- 15.3.10 When the customer opts for certification of equipment, such certification must be requested by the customer in advance of the first reserved conference date by calling the SWBT reservation center. Customer equipment in all locations which will participate in the conference will be certified. In order to ensure ongoing compatibility for future Multipoint Video conferences, the customer should notify the SWBT reservation center of any additional conference sites or modifications to previously certified equipment and arrange for certification of these sites and affected equipment.
- 15.3.11 Upon notification to SWBT's reservation center and subject to port availability, additional participants may be connected to a video conference in progress. Such participants must originate the connecting call; additional ports cannot be connected through calls originated by existing conference participants.
- 15.3.12 Multipoint Video conferences will be automatically disconnected based upon the scheduled duration. Subject to port availability and provided that SWBT's reservation center is notified prior to disconnection, a video conference may be allowed to continue beyond its originally scheduled duration.
- 15.3.13 Usage Packages
 - 15.3.13.1 The billing party for Multipoint Video Service may choose to subscribe to a usage package. Customers subscribing to usage packages will be required to sign a contract.

15.3 REGULATIONS (Continued)

15.3.13.2 The contract term for subscription to a usage package is 12, 24, or 36 months. If the customer chooses to discontinue subscription to the usage package prior to the expiration of the contract term, the customer shall pay a charge equal to the usage package rate in effect on the date of the contract times the number of months remaining in the term. This provision does not apply when the customer converts to a higher usage package as specified in 15.3.13.3, below.

15.3.13.3 The customer may convert to a higher usage package at any time during the contract term. Customers converting to a higher usage package will be required to sign a new contract. Billing under the newly selected package will commence at the beginning of the customer's next billing period at the rates in effect on the billing date and will continue for a new contract term.

15.3.13.4 Customers subscribing to usage packages are subject to port availability and the reservation requirements specified in 15.3.3, preceding.

15.3.13.5 In order to ensure that the port minutes of use are attributed to the proper usage package, the customer must provide the billing telephone number/account number with which the usage package is associated each time a conference is reserved. This information must be provided to the SWBT reservation attendant at the time the reservation is made.

15.3.14 Missouri School Discount Program

15.3.14.1 A discount from standard Multipoint Video Service rates is allowed in connection with service furnished through the Missouri School Discount Program, pursuant to the Video Instructional Development and Educational Opportunity Program, as enacted by the Missouri State Legislature. Application of this discount is specified in Paragraph 15.6.12, following.

15.3.14.2 An educational institution is defined as an accredited public or private school in the state of Missouri. Private schools must be accredited by either the Missouri Chapter of the National Federation of non-Public Schools Accrediting Association, Independent Schools Association of The Central States, North Central Association of Colleges and Schools, Accrediting Association of Bible Colleges, Distance Education and Training Council, and/or the University of Missouri - Columbia. Public schools must be accredited by the Department of Elementary and Secondary Education for the State of Missouri and/or the North Central Association of Colleges and Schools.

MULTIPOINT VIDEO SERVICE

15.3 REGULATIONS (Continued)

- 15.3.14.3 The qualifying discount is permitted only when the purpose of the videoconference is to provide educational and instructional programs and for the educational institution's administrative use.
- 15.3.14.4 In addition to meeting the qualification specified in Paragraph 15.3.14.2, preceding, an eligible customer must sign an affidavit certifying that the qualification is met. The affidavit will be retained on file with the Telephone Company. If a customer has previously provided a signed affidavit in conjunction with the application of this discount to other Telephone Company services, no additional affidavit will be required for Multipoint Video Service.

15.4 RESPONSIBILITY OF THE CUSTOMER

- 15.4.1 The customer is responsible for arranging video conference reservations through SWBT's reservation center and providing all necessary information as specified in 15.3.3, preceding.
- 15.4.2 The customer is responsible for canceling video conference reservations as needed. Conference reservations canceled or reduced less than 24 hours prior to the scheduled start time of the conference will be billed all Multipoint Video rates and charges which would have been applicable had the conference taken place as scheduled. When 24 hours prior to the scheduled start time falls outside of the reservation center's normal hours of operation, as specified in 15.3.3, the conference must be canceled by the end of the business day prior to the scheduled day of the conference in order to avoid billing.
- 15.4.3 The customer is responsible for ensuring the ongoing compatibility of conference equipment in all conference sites with SWBT's Multipoint Control Unit. The customer may choose to request such compatibility be initially certified by SWBT. Should the customer choose to have SWBT certify equipment compatibility, the customer is responsible for providing ongoing notification to SWBT of additional conference sites/equipment or modifications to previously certified equipment.

MULTIPOINT VIDEO SERVICE

15.5 LIMITATION OF LIABILITY

- 15.5.1 The responsibility of SWBT shall be limited to the furnishing of network equipment suitable for Multipoint Video Service and the maintenance and operation of such equipment in a manner proper for such service. Subject to this responsibility and paragraph 15.5.3, SWBT shall not be responsible for the through-transmission of signals generated by customer provided equipment or systems or for the quality of, or defects in, such transmission or the reception of signals by such equipment or systems. SWBT shall not be responsible for installation, operation, or maintenance of any terminal equipment, data unit, or communications systems provided by a customer. SWBT is not responsible for adapting Multipoint Video Service to the technological requirements of any specific customer equipment.
- 15.5.2 When the services of other local exchange or interexchange carriers are used in establishing connections to Multipoint Video Service, SWBT is not liable for any act or omission attributable to the other carrier or carriers.
- 15.5.3 In cases where the customer opted to have SWBT certify compatibility of customer equipment with the Multipoint Control Unit in advance of the video conference, and the customer subsequently experiences unsatisfactory quality of audio or video transmission, (and no intervening customer equipment modifications have occurred) SWBT's liability shall be limited to a billing adjustment equal to the rate for that portion of the video conference affected by the poor transmission, for the affected sites.
- 15.5.4 SWBT shall not be liable for any unsatisfactory transmission quality when the customer has opted not to have SWBT certify in advance that equipment in all of the conference sites is compatible with the Multipoint Control Unit, or when previously certified equipment has been modified and no recertification has been requested.

MULTIPOINT VIDEO SERVICE

15.6 APPLICATION OF RATES AND CHARGES

- 15.6.1 All Multipoint Video rates and charges will be billed to the originator of the conference. Applicable local/toll charges and the charges associated with the service(s) each participant will use to access the Multipoint Control Unit will be subject to the billing arrangements between each individual participant and the local exchange or interexchange carrier providing the service.
- 15.6.2 The minimum billable period for Multipoint Video Service is 30 minutes or the actual amount of time reserved per port, whichever is greater. Beyond this minimum period, usage rates apply per minute of use or fraction thereof.
- 15.6.3 Conference reservations canceled or reduced without sufficient notice, as specified in 15.4.2, will be billed all Multipoint Video rates and charges which would have been applicable had the conference taken place as scheduled. Requests to increase previously scheduled conference time will be subject to port availability.
- 15.6.4 Each conference site participating in a Multipoint Video conference requires a port. Each port will be charged the appropriate Multipoint Video rates as specified in 15.7.
- 15.6.5 A set up charge will apply to each port regardless of whether all sites connect during the 15 minute set up period. Usage charges specified in 15.7.2 or 15.7.3 do not apply during the set up period.
- 15.6.6 In some cases, as determined by SWBT, customers may be asked to connect to the Multipoint Control Unit during the certification process. Multipoint Video set up and usage rates will not apply during these connections.
- 15.6.7 Conference extensions will be billed usage charges for each minute beyond the scheduled end time of the conference. These usage charges will apply to each port which remains connected.
- 15.6.8 Additional ports (above the number reserved) connected after the start of a conference will be billed a set-up charge and usage for the number of minutes connected. The 30 minute minimum reservation period will not apply to these additional ports; however, port availability must be confirmed through SWBT's reservation center prior to connection.
- 15.6.9 Total Multipoint Video rates and charges applicable to each video conference will be remitted on a single bill to the originator of the conference.

MULTIPOINT VIDEO SERVICE

15.6 APPLICATION OF RATES AND CHARGES (Continued)

15.6.10 Upon accruing 6,000 port minutes in cumulative billed usage, the customer will be entitled to a maximum one hour video conference, including up to five ports, without charge. This video conference may include the continuous presence feature. In order to establish eligibility, port minutes of use will be accumulated by billing telephone number/account number and are nontransferable between accounts. Eligibility for this conference covers Multipoint Video standard set up and usage rates only and does not entitle the customer to reduction of any applicable local/toll charges associated with other services used during the conference. Customers who subscribe to Multipoint Video Service usage packages are not eligible for the provisions of this paragraph.

15.6.11 Usage Packages

15.6.11.1 Multipoint Video Service usage packages include an allowance of port minutes. This usage package allowance applies per billing cycle.

15.6.11.2 All port minutes, including extended set up, used by conference participants are aggregated and debited against the usage package allowance. Total port minutes per conference will be accumulated to determine when the usage package allowance has been exhausted for the current billing cycle. Once the allowance is exhausted, usage rates per port minute of use as specified in 15.7.3, will apply for each subsequent conference/extended set up period completed during that billing cycle.

15.6.11.3 When the usage package allowance is exhausted in the middle of a conference, the remaining port minutes in excess of the allowance will be billed the effective minute of use rate per port minute of use as specified in 15.7.3.

15.6.11.4 A service charge will apply each time a customer establishes a usage package or changes from one usage package to another. (See paragraph 15.7.3, following.)

15.6.11.5 Multipoint Video Set-up charges as specified in 15.7.1, following, apply in addition to the Usage Package monthly rate.

15.6.11.6 Should the customer choose the Continuous Presence feature, charges specified in 15.7.4.2, following, will apply in addition to the Usage Package monthly rate.

- (1) Pursuant to Section 392.510, R.S. Mo. See Supplemental Schedule for current effective rates.
- (2) In addition to the rates applicable to all other services used during the Multipoint Video conference, such as toll charges.
- (3) Usage charges will apply for each port minute requested by the customer in excess of the standard 15 minute set-up. These charges apply in addition to the Multipoint Video Set-up charge specified in 15.7.1.
- (4) During the period of four months following the effective date of Original Sheet 12, customers will be allowed a one hour video conference, including up to five ports, free of charge. This conference may also include the continuous presence feature. The provisions of this paragraph apply to Multipoint Video rates and charges footnoted above only and do not entitle the customer to reduction of any applicable local/toll charges associated with other services used during the conference.
- (5) Minimum and maximum rates are interim pending final determination of transitionally competitive status by the Missouri Public Service Commission.

DISTANCE LEARNING SERVICE

16.1 DESCRIPTION AND APPLICATION OF SERVICE

16.1.1 Distance Learning Service (DLS) with Video

General

This section covers arrangements that are provided only to qualified customers located in an exchange area served by Southwestern Bell Telephone Company (SWBT), for use only by educational institutions in Missouri. Where a customer requests an arrangement terminating at a non-Southwestern Bell location, Southwestern Bell will provide its service to the meetpoint with the other Local Exchange Telephone Company. The portion of the arrangement in the non-Southwestern Bell exchange will be provided by the other LEC pursuant to that carrier's regulations, rates and charges which will be charged on a meetpoint billing basis.

This service is intended for the exclusive use and purchase by educational institutions, as defined herein, to improve the education system in Missouri and encourage economic development.

The rules and regulations of this tariff section are in addition to other rules and regulations as stated in this and other Telephone Company tariffs.

16.1.2 Definitions

For the purpose of this tariff, the following definitions shall apply:

Administrative Site - One site within a cluster of schools that is designated by the school district, college, university and/or other organized group of schools that is responsible for conference scheduling within the cluster, purchase and payment of ISDN PRI charges, allocation of ISDN PRI usage within the cluster, and purchase and payment of any Independent Telephone Company Connectivity charges.

BONDING - A standard for inverse multiplexing. It defines the protocol procedures to connect inverse multiplexers from different manufacturers. It takes its name from the organization that established the standard, the **Bandwidth ON Demand INteroperability Group**.

DISTANCE LEARNING SERVICE

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.2 Definitions (Continued)

Cluster - A group of at least three schools that are located within the same geographic area, share an educational community of interest, a desire to share classroom resources and have agreed through a mutual agreement, pact, or consortium arrangement to join together for purposes of purchasing DLS with Video via this tariff.

CODEC - Coder/decoder. A device used for converting an analog signal that represents the voice and video data into digital form (Coder) for transmission and subsequent reconstruction of the original analog data from the digital signal (Decoder).

Continuous Presence - An optional feature that provides for the video signal to be mixed and presented as a four-window signal on the monitor(s). The monitor appears to be divided into four equal sections with one site in each window, thereby allowing multiple conference sites/participants to be seen simultaneously.

Educational Institution - An educational institution shall be defined as an accredited public or private school in the state of Missouri. Private schools must be accredited by either the Missouri Chapter of the National Federation of Non-Public Schools Accrediting Association, Independent Schools Association of The Central States, North Central Association of Colleges and Schools, Accrediting Association of Bible Colleges, Distance Education and Training Council, and/or the University of Missouri - Columbia. Public schools must be accredited by the Department of Elementary and Secondary Education for the State of Missouri and/or the North Central Association of Colleges and Schools.

H.320 Standard - A group of standards covering the communications, audio and video procedures of videoconferencing systems.

ISDN - Integrated Services Digital Network. A network architecture which allows the simultaneous transmission of information over a single facility incorporating the use of bearer channels (B channels) and a data channel (D channel).

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.2 Definitions (Continued)

ISDN Primary Rate Interface (PRI) - The term Primary Rate Interface denotes the connection of a 1.544 Mbps digital facility to the ISDN-PRI capable central office switch. The twenty-four channels are typically divided into twenty-three "B" channels plus one "D" channel. Software in the ISDN-PRI equipped central office switch defines the type of services that will be carried within the 1.544 Mbps digital facility.

Local Access and Transport Area (LATA) - Denotes a geographical area established for the administration of communications service. It encompasses designated local operating telephone company exchanges which are grouped to serve common social, economic and miscellaneous purposes.

Multipoint Control Unit (MCU) - A central office based unit which provides bridging of three or more video calls using the same bandwidth.

School Site - A building or buildings used predominantly by one education institution or district in its educational efforts.

T1 Port - A port for termination of a T1 facility. The T1 port allows for one connection to one DLS with Video conference.

Digital Link Services Tariff
Section 16
Original Sheet 4

DISTANCE LEARNING SERVICE

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.3 Provision of Service

- A. Distance Learning Service (DLS) with Video is an intraLATA T1-based videoconferencing service that will serve the education community in Missouri. It will provide the customer with continuous presence or full screen/non-continuous DS1 quality video utilizing a Multipoint Control Unit (MCU) located in a Southwestern Bell central office. Continuous presence will be provided at speeds up to 768 Kbps or as facilities permit. Each customer location will be connected to the MCU via a T1 circuit.

The MCU does not support two channel calls (H.320 Px56/64 bonding) on the dedicated T1 circuits from the school site to the MCU in the central office. This means that switched connections from MicroLink I, DigiLine, SmartTrunk or SelectVideo Plus cannot participate on a conference if the bonding is done in the Codec. However, if these switched services are used in conjunction with an Inverse Multiplexer that conforms to the BONDING Standard, then the customer can establish conferences which include the dedicated T1 circuits. For these conferences, all customer provided Codecs must support the H.320 6BHO standards to operate at 112/128 Kbps.

Only one continuous presence conference may take place at any one given time. If the need arises for more than one continuous presence conference to take place at any one given time, that need will be addressed on an ICB basis.

- B. A cluster of schools shall be determined by the appropriate school administration(s) or district(s) in conjunction with Southwestern Bell Telephone Company. All sites within a cluster must be located within a single LATA. Facilities that SWBT is permitted to provide to serve any member of a cluster located outside of the LATA will be provisioned on a ICB basis.
- C. The customer's network will be restricted to members of its own cluster, with the exception that a multi-rate primary rate ISDN PRI circuit, per customer, may be connected to a port on the MCU. This PRI port will allow incoming and outgoing calls from outside the customer's restricted network. Rates as found in Section 13 of the Digital Link Service Tariff for SelectVideo Plus, Option 1 will apply for any outgoing calls.

DISTANCE LEARNING SERVICE

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.3 Provision of Service (Continued)

D. Connectivity may be made to sites in Independent Telephone Companies. One charge will apply for Independent Telephone Company Connectivity for each school site located in Independent Telephone Company territory that wants to connect to a cluster located in SWBT territory. The designated administrative site for the cluster will be responsible for purchase and payment of this rate element. Rates and charges are as found in 16.2.2 B. following. In addition, the customer will be responsible for paying any applicable charges imposed by the Independent Telephone Company for the use of its facilities on a meetpoint billed basis.

E. DLS with Video provides the required transport, network channel terminating equipment and associated software.

F. DLS with Video is available as follows:

1. Continuous Presence Mode

Continuous Presence Mode is an optional type of video conference that allows all sites in the conference to view four specific sites prearranged in a quadrant screen display. This mode is usually configured with five sites but can include additional sites. The fifth site, along with all additional sites scheduled in the conference, will view the four prearranged sites that have been selected as the "Video Mix" sites. Also, all sites can hear each other and be heard by every site within the conference.

2. Voice Activated Mode

Voice Activated Mode is a standard type of multipoint video conference where a video switching method automatically selects the current broadcaster based on the audio (voice) activity level from each site on the conference, e.g., the loudest audio signal is designated as the dominant audio.

G. DLS with Video will be provisioned using a DS1 circuit. The DS1 circuit will terminate on the customer's premises at the Demarcation Point as it is defined in Section 2 of this tariff.

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.4 Customer Responsibilities

- A. The subscriber to DLS with Video is responsible for the video hardware and software at all school sites in the cluster, including but not limited to, CODECs, cameras, monitors, control system, and physical classroom preparation. The CODECs provided by the customer must meet ITU-T H.320 video standards.
- B. One administrative (school) site must be designated by the school district or cluster of schools, must be a subscriber to DLS with Video and must be located within SWBT territory. The designated administrative site will be responsible for the following:
 - 1) Purchase and payment of charges associated with usage for the ISDN Primary Rate Interface (PRI),
 - 2) The allocation of usage for the ISDN PRI among schools within its cluster, and
 - 3) The purchase and payment of charges for any Independent Telephone Company Connectivity charges.

C. Scheduling

Scheduling of videoconferences will be done through the SWBT Video Control Center. The designated administrative site will be responsible for arranging all conference scheduling within the cluster and providing the scheduling requirements to SWBT. To help avoid scheduling conflicts, the designated administrative site is encouraged to provide the scheduling requirements to SWBT, in writing, 30 days prior to the scheduled conferences. Those requirements include the following:

- Number of required conference ports (legs),
- Transmission speed (i.e., bit rate) per port. All ports must be at the same rate,
- Date, start time and duration of the conference (minimum duration of 30 minutes),
- Number of audio-input only legs (used with continuous presence),
- Type of channel aggregation (i.e., multi-rate, BONDING or 2x64 for each end point of the call),
- Type of conference control (e.g., voice activated switching, continuous presence),
- Customer billing information (e.g., billing telephone number or account number).

DISTANCE LEARNING SERVICE

16.1 DESCRIPTION AND APPLICATION OF SERVICE (Continued)

16.1.4 Customer Responsibilities (Continued)

C. Scheduling (Continued)

The customer will be provided a designated 1-800 number for any scheduling change requirements.

Although videoconferences may be conducted at any time, the SWBT Video Control Center will not be available on weekends, SWBT designated holidays or outside of its normal hours of operation (at least 7 a.m. to 5 p.m. central time). Availability may be verified by calling the Video Control Center during its normal hours of operation.

16.1.5 Authorized Use

DLS with Video may be used for the transmission of communications (audio and video) for other purposes in conjunction with the customer's rental or lease of its educational facilities where the service terminates and where the customer's video studio equipment is located. Use of DLS with Video for such purposes is allowed upon payment to Southwestern Bell Telephone Company of the hourly charge set out in 16.2.2. D.

16.1.6 Resale of Use to Others

DLS with Video shall not be used for any purpose for which payment or other consideration, direct or indirect, shall be received by the customer, except as outlined in 16.1.5 above.

DISTANCE LEARNING SERVICE

16.2 RATE REGULATIONS

16.2.1 General

- A. A T1 port charge applies per port for the communications path between a customer designated premises and the serving wire center for that premises within a cluster. One port charge applies per customer designated premises at which the channel is terminated. Rates and charges are as found in 16.2.2.A. following.

B. PRI Port Charge

A PRI port charge applies per PRI connected to a port on the MCU in the central office. Rates and charges are as found in 16.2.2.A. following.

C. Service Connection Charges

Service Connection Charges, as found in Section 19 of General Exchange Tariff, do not apply to DLS with Video.

D. Contract Periods

DLS with Video will be available for either a 1, 3 or 5 year contract period basis. At the conclusion of the contract period, the customer must elect one of the following options:

- Renew the contract at the terms, conditions and rates that are tariffed or otherwise available at the time.
- Discontinue the service.

When a service is discontinued prior to the expiration of the contract period, the applicable charge will be the total monthly charges for the remainder of the contract period.

E. Suspension of Service

Customer initiated suspension of service is not available with DLS with Video.

16.2 RATE REGULATIONS (Continued)

16.2.1 General (Continued)

F. Prepayment Option

A prepayment option is available based on the Discount Rate specified in Section 17, Paragraph 17.6.5 of the General Exchange Tariff. The prepayment option is applicable only to DLS with Video purchased from this tariff. This option is not available with services purchased from other tariffs for use in conjunction with DLS with Video, i.e., SelectVideo Plus, Option 1.

G. Additional Rates and Regulations

Rates and regulations for DLS with Video are in addition to applicable rates and regulations in other tariffs for services used in conjunction with DLS with Video.

H. Authorized Use in Conjunction with Lease or Rental of Customer's Facilities

The charge for authorized use in conjunction with the lease or rental of the customer's facilities will be applied on an hourly basis for each hour of network usage for each channel termination in use.

ACCESS ADVANTAGE PLUS SERVICE

18.1 DESCRIPTION

Access Advantage Plus Service is a Southwestern Bell Telephone Company (SWBT) service that provides a customer a channelized high capacity (1.544 Mbps) facility between a customer premise and its serving office for connection to other services provided by SWBT. These services include Integrated Voice Access Lines and Access Advantage Plus Trunks as described in 18.2 following, Plexar services, Private Line and Digital Link services. Access Advantage Plus Service allows a customer to intergrade voice and data services on a single 1.544 Mbps. Facility.

This service is competitively classified in the following exchanges:

Business:
St. Louis
Kansas City

18.2 DEFINITIONS

Channelized - Denotes the multiplexing of the 1.544 Mbps. facility into 24 voice grade channels for connection to other services.

(AT) Access Advantage Plus Cross-Connect - Denotes the DSO connection between two or more
(AT) Access Advantage Plus Services in the same or different serving offices. These cross connects
are made on an individual channel basis. When the Transport element is purchased from FCC
Tariff 73 (see below), the cross connects are also provided from that Tariff.

(AT) Access Advantage Plus Transport - Denotes the channelized 1.544 Mbps. facility between a
(AT) customer premise and the serving office for that location. When purchased from this Tariff, this
element is available for use only with SWBT connecting services as specified in 18.1 preceding.
Alternatively, this element may be purchased from FCC Tariff 73, subject to availability.

18.3 REGULATIONS

- A. The rules and regulations in this section are in addition to other rules and regulations as contained in this and other SWBT tariffs.
- B. Access Advantage Plus Service is intended for use by a specific customer at a designated location only. Any major changes requested by the customer to the service arrangement (e.g. change in service location) may result in a change of rates and charges.
- C. Customers purchasing this service and the connecting services must be end users purchasing the services for their own use, and not for sharing of the services.
- D. Provision of this service or of any specific element associated with this tariff is subject to the availability and operational limitations of the equipment and associated facilities.
- E. A variety of equipment and facilities may be used to provide this service. SWBT reserves the right to determine which shall be used and to make modifications at its option.

18.4 SERVICE AVAILABILITY

Access Advantage Plus Service is available on a statewide basis subject to the availability of facilities, to customers in Local Access and Transport Areas (LATAs) served by SWBT. If the Access Advantage Plus customer also has SWBT provided DS3 service, the customer may utilize one DS1s worth of the DS3 bandwidth for each Access Advantage Plus Service purchased (in lieu of a dedicated DS1).

(AT)

(AT)

18.5 RESPONSIBILITY OF THE CUSTOMER

- A. The customer, upon request of SWBT, shall furnish such information as may be required to permit SWBT to design and maintain the service it offers and to assure that the service arrangement is in compliance with the provisions contained herein.
- B. It shall be the responsibility of the customer to ensure the continuing compatibility of customer-provided equipment or systems that are used in conjunction with this service, and the operating characteristics of such equipment or systems shall be such as not to interfere with any services offered by SWBT.
- C. The customer shall be responsible for the payment of a Customer Owned Equipment Trouble Isolation Charge also known as a Maintenance of Service Charge, as specified in the General Exchange Tariff, for each repair visit to the premises of a customer where the service trouble results from the use of equipment or systems provided by the customer.

A. General

1. Access Advantage Plus Service may be ordered on a month-to-month basis or under the Term Pricing Plan (TPP). The TPP provides the customer the option of choosing either a one, two or three year initial service period.
2. TPP rates will be exempt from SWBT-initiated rate increases throughout the selected service period. Should SWBT increase its rates during the selected service period, the customer would continue to pay the rates in effect at the time the customer elected to establish service under TPP.
3. Any decrease in TPP monthly recurring rates will be passed on to customers who participate in an applicable TPP.

B. Terms and Conditions

1. The customer must specify the length of the initial service period at the time service is ordered.
2. Integrated Voice Access Lines and Access Advantage Plus Trunks must have the same TPP service period as the associated Access Advantage Plus Transport elements.
3. Access Advantage Plus Transport elements may have different TPP service periods even when ordered at the same time by the same customer.

ACCESS ADVANTAGE PLUS SERVICE

18.8 TERM PRICING PLAN (TPP) (cont'd)

C. Changes to TPPs

1. Prior to the expiration of the initial service period or extended service period, as described in 18.8.D.(Renewal) following, the customer may convert existing TPP services to a new TPP initial service period without incurring termination charges, provided the new initial service period is equal to or greater than the original initial service period.

Example: A customer with an existing two year TPP could convert to a new two or three year TPP at any time without incurring any termination charge.

2. If a customer requests an existing TPP to be converted to a month-to-month basis at any time prior to the expiration of the initial service period or extended service period, the request will be treated as a disconnect and new connect of service, and termination charges will apply.

(AT)
|
(AT)

3. Customers may convert their Access Advantage Plus Transport to Transport provided from FCC Tariff 73 without incurring termination charges, provided the new service period is equal to or greater than the original service period.

D. Renewal

1. The customer may elect to renew the TPP initial service period for one additional 12 month service period (extended service period) at the rates currently listed for the original initial service period.
2. The customer must provide SWBT with a written notice of intent to renew an existing TPP initial service period no later than 90 days prior to the expiration of the initial service period.
3. If the customer elects not to renew the TPP or does not notify SWBT of its intent to renew, the service will then automatically be billed under the tariffed month-to-month rates in effect at the time the TPP initial service period expires.
4. At the end of an extended service period, the customer's service will automatically be billed under the tariffed month-to-month rates in effect at the time the extended service period expires unless the customer negotiates a new TPP initial service period or terminates service.

(CT) ACCESS ADVANTAGE PLUS SERVICE

18.8 TERM PRICING PLAN (TPP) - (Continued)

E. Upgrade in Service

- (CT)
1. A customer may upgrade a TPP (e.g. add additional Access Advantage Plus Transport elements) without incurring termination charges provided all of the following conditions are met:
 - the new service arrangement is provided to the same customer at the same location as the discontinued service, and
 - the customer's request for disconnection of the existing service and request for new service are received at the same time.
 2. If the order to upgrade service does not meet the conditions above, it will be treated as a discontinuance of the existing service and establishment of a new service. All termination charges will then apply.
 3. The monthly rates for the new service will be those in effect at the time the service is changed and applicable nonrecurring charges will apply to the new service.

F. Moves to a New Location

A customer with an existing TPP may request a move of the service to a new location, or a move and an upgrade, or a move and change of service. Nonrecurring charges will apply; termination charges will not apply.

G. Nonrecurring Charges

1. The nonrecurring charges as found in 18.9 following will apply for new service ordered under TPP.
2. If the customer chooses to convert existing service provided on a monthly rate basis to a TPP, no nonrecurring charges will apply.
3. If the customer chooses to convert existing service provided on TPP to a monthly rate basis or to another TPP, nonrecurring charges will apply and termination charges may be applicable.

JUL - 7 1999

18.8 TERM PRICING PLAN (TPP) - (Continued)

H. Termination Charges

MO. PUBLIC SERVICE COMMISSION

1. Customers requesting to discontinue services provided under a TPP prior to the expiration of the Initial Service Period or Extended Service Period will incur termination charges. Payment of the termination charge does not release the customer from other previous amounts owed to SWBT.
2. The termination charge for the Initial Service Period shall be the lesser of:
 - The difference between the Initial Service Period rates and charges for the completed months of the initial service term at the time of termination and the rates and charges for the next lower service term(1) actually completed plus interest charges based on the annuity factor discount rate, as stated in Section 17 of the General Exchange Tariff, in effect at the time of termination; or
 - The monthly payments remaining on the service term.

Example: If the customer completes 27 months of a 36 month (3 year) service term, the first calculation of a termination charge will equal the difference between 27 months of rates and charges at the 3 year service term and 27 months of rates and charges at the 2 year service term (which is the next lower service term actually completed) plus interest at the annuity factor discount rate in effect at the time of termination. The second calculation will be the sum of the 9 remaining monthly payments of the 3-year service term. The termination charge is the lesser of the two calculations.
3. The termination charges for the Extended Service Period shall be the lesser of:
 - The difference between the extended service period rates and the month-to-month rates for the months actually completed plus interest charges based on the annuity factor discount rate in effect at the time of termination; or
 - The monthly payments remaining on the service term.
4. If special construction was applied to the service being terminated, any termination charges associated with the special construction will also apply.

Missouri Public Service Commission

ACCESS ADVANTAGE PLUS SERVICE

JUL - 7 1999

18.10 PROMOTIONS

MO. PUBLIC SERVICE COMM

(CT)
(CT)

This section provides for promotions that will be available under the Access Advantage Plus tariff and, unless otherwise stated, the Rules and Regulations for Access Advantage Plus will apply. The rules and regulations are in addition to other rules and regulations as contained in this and other SWBT tariffs.

18.10.1 Access Advantage Plus

(CT)

Access Advantage Plus offers business customers the opportunity to receive a discount as a credit on their monthly bill if they purchase Access Advantage Plus Transport and 10 Integrated Voice Access Lines (IVALs) on a three year Term Pricing Plan (TPP) along with specified options. The 10 IVALs must be subscribed to Caller ID Name & Number and an Optional Calling Plan (OCP). This promotion will be available from June 11, 1999 through September 7, 1999.

18.10.2 General

- A. Access Advantage Plus can only be ordered on a 3 year TPP.
- B. Customers who subscribe to the TPP option will have their Installation Charges for IVALs, Caller ID Name & Number Delivery and OCP waived.
- C. Customers may add additional IVALs with Caller ID Name & Number Delivery and OCP to their existing TPP at a (the same) discount for the duration of the service agreement within the 89 day promotional period.

18.10.3 Upgrade to new Term Pricing Plan

(CT)
(CT)

A customer may upgrade their current Access Advantage Plus TPP to a new Access Advantage Plus TPP equal to or greater in length than the original service agreement as stated in 18.8.C, however, the promotional discount will only apply for the first 36 months from the beginning of the original TPP. Rates and charges in effect at the time of the upgrade will be applied to the new TPP.

ACCESS ADVANTAGE PLUS SERVICE

**Missouri Public
Service Commission**

(FC) 18.11 ACCESS ADVANTAGE PLUS OPTIONS – (Continued)

REC'D JUN 05 2000

(FC) 18.11.2 Term Pricing Plan (TPP) – (Continued)

E. Customers may add additional optional services to their existing TPP at the same discounts and reductions for the duration of the service agreement within the promotional period.

F. A customer may upgrade their current Access Advantage Plus Options TPP to a new Access Advantage Plus Options TPP equal to or greater than the original service agreement without incurring termination charges. Rates and charges in effect at the time will be applied to the new TPP.

(FC) 18.11.3 Termination Charges

- A. Customers requesting to discontinue services provided under the TPP, agreement or contract, prior to the expiration of the agreement may be subject to termination charges.
- B. Payment of the applicable termination charge will not release the customer from other charges previously incurred and owed to SWBT.
- C. The termination charge shall be the lesser of the difference between the rates and charges paid for the completed months of the service term at the time of termination and the tariff month-to-month rates and charges for such months plus interest charges based on the approved discount rate in effect at the time of termination; or the remaining monthly payments on the service term.
