SENIOR REGULATORY LAW JUDGE: John T. Clark

REPORT AND ORDER

I. Procedural History

Tariff Filings, Notice, and Intervention

On August 14, 2019, The Empire District Electric Company (Empire) filed tariff sheets designed to implement a general rate increase for utility service. The submitted tariff (Tracking No. YE-2020-0029) would have increased Empire's annual electric revenues by approximately \$26.5 million dollars (approximately 4.93 percent)¹. The tariff had an effective date of September 13, 2019. In order to allow sufficient time to study the effect of the tariff sheets and to determine if the rates established by those sheets are just, reasonable, and in the public interest, the tariff sheets were suspended until July 11, 2020. The Commission directed notice of the filings and set an intervention deadline. The Commission granted intervention requests from the following entities: the Missouri Department of Natural Resources - Division of Energy (DE), Midwest Energy Consumers Group (MECG), Natural Resources Defense Council (NRDC), Sierra Club, Renew Missouri Advocates (Renew Missouri), National Housing Trust (NHT), The Empire District Electric SERP Retirees (EDES), The Empire District Retired Members & Spouses Association (EDRA), and the International Brotherhood of Electrical Workers Local Unions No. 1464, and 1474 (IBEW).

The Commission adopted a test year encompassing the twelve months ending on March 31, 2019, updated through September 30, 2019, with a true-up period to include known and measurable information through January 31, 2020. On December 9, 2019, The Office of the Public Counsel (OPC) filed *Public Counsel's Motion to Modify Test Year*

¹ Ex. 4P, Richard Corrected Direct, Schedule SDR-9.

to Include Isolated Adjustments Related to Retirement of Asbury. OPC requested the Commission modify the ordered test year to include isolated adjustments for the retirement of the Asbury coal-fired power plant. OPC asked to include isolated adjustments to account for Empire moving Asbury's retirement from no later than June 2020, to no later than March 2020. The Commission denied OPC's request. March is outside the true-up cutoff period and the Commission determined that Asbury's retirement is best addressed in Empire's next rate case. Instead, the Commission ordered the parties to submit items for potential inclusion in an Accounting Authority Order (AAO) to capture the financial impacts of that retirement for consideration in Empire's next rate case.

Local Public Hearings

The Commission conducted local public hearings in Bolivar, Joplin, and Branson, Missouri.²

Global Stipulation and Agreement

On April 15, 2020, Empire, the Commission's Staff (Staff), MECG, EDESR, EDRA, NRDC, NHT, and Renew Missouri submitted their *Global Stipulation and Agreement* (Agreement). On April 16, 2020, OPC objected to the Agreement. Pursuant to Commission rule, the Agreement became the joint position statement of the signatory parties. However, no party is bound by the Agreement and all the issues addressed in the Agreement remain for determination after hearing.³

Evidentiary Hearing

On October 17, 2019, the Commission scheduled an evidentiary hearing for April 14-17, and 20-22, 2020. On March 13, 2020, Missouri Governor, Mike Parson, declared

² Transcript, Vols 3, 4, 6-8.

³ Commission Rule 20 CSR 4240-2.115(2)(D).

a state of emergency because of the -COVID-19 viral pandemic. On March 23, 2020, the Governor closed Missouri state buildings to all but essential employees. The Commission responded to the closure by preparing to conduct the evidentiary hearing electronically by videoconference.

On April 3, 2020, Staff submitted on behalf of the parties a *Progress Report and Request for Extension of Filing Dates*. In that pleading the parties agreed to waive cross examination of all witnesses and asked the Commission to cancel the evidentiary hearing and decide all issues on the record. The Commission suspended the hearing to allow for submission of the case on the record, and altered the procedural schedule to accommodate new filing dates and the Commission's questions for the parties.

Case Submission

The Commission admitted the testimony of 58 witnesses, received 321 exhibits into evidence, and took official notice of certain matters. Briefs were filed according to the modified procedural schedule. The final reply briefs were filed on May 18, 2020, and the case was deemed submitted for the Commission's decision on that date.⁴

II. General Matters

MECG Motion to Strike, and Empire's Objections to Evidence

MECG filed its *Motion to Strike Portions of OPC Surrebuttal Testimony* on April 12, 2020, asking the Commission to strike portions of OPC surrebuttal testimony on the basis that the testimony was not responsive to matters raised in rebuttal testimony. The Commission denies MECG's motion to strike testimony.

⁴ "The record of a case shall stand submitted for consideration by the commission after the recording of all evidence or, if applicable, after the filing of briefs or the presentation of oral argument." Commission Rule 20 CSR 4240-2.150(1).

On May 6, 2020, Empire filed its *Objections to Offers of Evidence*, objecting to specific testimony offered by OPC witnesses relating to the retirement of the Asbury power plant. The Commission has previously determined that the test year in this case would not be modified to include isolated adjustments related to the retirement of Asbury, and that isolated true-up adjustments for Asbury's retirement would not be included in this general rate proceeding.⁵ However, that determination does not make all testimony related to Asbury's retirement irrelevant to every issue before the Commission in this case. Because the testimony in question contains evidence relevant to pending issues, Empire's objections to specific OPC testimony are overruled and that testimony is admitted into the record.

General Findings of Fact

The Commission finds that any given witness's qualifications and overall credibility are not dispositive as to each portion of that witness's testimony. The Commission gives each item or portion of a witness's testimony individual weight based upon the detail, depth, knowledge, expertise, and credibility demonstrated with regard to that specific testimony. Consequently, the Commission will make additional specific weight and credibility decisions throughout this order as to specific items of testimony as are necessary.⁶ Any finding of fact reflecting that the Commission has made a determination between conflicting evidence is indicative that the Commission attributed greater weight

⁵ File No. ER-2019-0374, Order Denying Motion for Reconsideration, issued February 19, 2020.

⁶ Witness credibility is solely a matter for the fact-finder, "which is free to believe none, part, or all of the testimony". *State ex rel. Public Counsel v. Missouri Public Service Comm'n*, 289 S.W.3d 240, 247 (Mo. App. 2009).

to that evidence and found the source of that evidence more credible and more persuasive than that of the conflicting evidence.⁷

1. Empire is engaged in the business of the manufacture, transmission, and distribution of electricity. Empire provides electrical utility services in Missouri, Kansas, Arkansas, and Oklahoma. Empire's service area includes approximately 10,000 square miles in southwest Missouri and the adjacent corners of the three surrounding states, Kansas, Oklahoma, and Arkansas. Empire is regulated by the utility regulatory commissions in all four states and by the Federal Energy Regulatory Commission (FERC).⁸

2. OPC is a party to this case pursuant to Section 386.710(2), RSMo⁹, and by Commission Rule 20 CSR 4240-2.010(10).

3. Staff is a party to this case pursuant to Commission Rule 20 CSR 4240-2.010(10).

4. Empire provides electric generation, transmission, and distribution services to approximately 173,000 retail electric customers in portions of Arkansas, Kansas, Missouri, and Oklahoma. Empire provides electric service to approximately 155,000 customers in Missouri.¹⁰

5. Empire merged with Liberty Utilities on January 3, 2017. Empire and Liberty Utilities are subsidiaries of Liberty Utilities, Co (LUCo). LUCo is wholly owned by

⁷ An administrative agency, as fact finder, also receives deference when choosing between conflicting evidence. *State ex rel. Missouri Office of Public Counsel v. Public Service Comm'n of State*, 293 S.W.3d 63, 80 (Mo. App. 2009)

⁸ Ex. 1, Baker Direct, page 3.

⁹ Unless otherwise stated, all statutory citations are to the Revised Statutes of Missouri, as codified in the year 2016 and subsequently revised or supplemented.

¹⁰ Ex. 1, Baker Direct, page 3.

Algonquin Power & Utilities Company (APUC). Liberty Utilities provides gas, water and sewer service in Missouri and other jurisdictions.¹¹

6. To determine the appropriate level of utility rates, the Commission must calculate a revenue requirement for Empire. The revenue requirement is the incremental increase or decrease in revenues based on measurement of the utility's current total cost of service compared to its current revenue levels under existing rates the utility needs to provide safe and reliable service, as measured using Empire's existing rates and cost of service.¹²

7. To determine the appropriate revenue requirement for an investor owned utility, the first step is to calculate the cost of service (COS) for that utility¹³. The COS for a regulated utility can be defined by the following formula:¹⁴

Cost of Service = Cost of Providing Utility Service

or

$COS = O + (V-D)R$ where,

COS = Cost of Service

O = Operating Costs (Fuel, Payroll, Maintenance, etc.), Depreciation and Taxes

V = Gross Valuation of Property Required for Providing Service (including plant and additions or subtractions of other rate base items)

D = Accumulated Depreciation Representing Recovery of Gross Depreciable Plant Investment

¹¹ Ex. 101, Staff Direct Report, page 3.

¹² Ex. 100, Bolin Direct, page 4.

¹³ Ex. 100, Bolin Direct, pages 3-4.

¹⁴ Ex. 100, Bolin Direct, pages 3-4

$$V - D = \text{Rate Base (Gross Property Investment less Accumulated Depreciation = Net Property Investment)}$$

$$(V - D)R = \text{Return Allowed on Rate Base}$$

Once the cost of service is determined, a cost of capital analysis is done to determine the appropriate rate of return for the utility.¹⁵

8. The test year for this case is the twelve months ending March 31, 2019, updated through September 30, 2019.¹⁶

9. The Commission also selected a true-up period ending January 31, 2020, to account for any significant changes in Empire's cost of service that occurred after the end of the test year period but prior to the tariff operation of law date.¹⁷

10. A normalization adjustment is an adjustment made to reflect normal, on-going operations of the utility. Revenues or costs that were incurred in the test year that are determined to be atypical or abnormal will get specific rate treatment and generally require some type of adjustment to reflect normal or typical operations. The normalization process removes abnormal or unusual events from the cost of service calculations and replaces those events with normal levels of revenues or costs.¹⁸

11. An annualization adjustment is made to a cost or revenue shown on the utility's books to reflect a full year's impact of that cost or revenue.¹⁹

12. The calculated cost of service is then compared to net income available from existing rates to determine the revenue requirement, which is to determine the

¹⁵ Ex. 100, Bolin Direct, page 6.

¹⁷ Ex. 100, Bolin Direct, page 6

¹⁸ Ex. 101, Staff Direct Cost of Service Report, page 2.

¹⁹ Ex. 101, Staff Direct Cost of Service Report, page 2.

incremental change in Empire's rate revenues required to cover its operating costs and provide a fair return on investment used in providing utility service.²⁰

General Conclusions of Law

A. Empire is an "electrical corporation" and a "public utility" as defined in Sections 386.020(15) and 386.020(43), RSMo, respectively, and as such is subject to the personal jurisdiction, supervision, control and regulation of the Commission under Chapters 386 and 393 of the Missouri Revised Statutes.

B. The Commission's subject matter jurisdiction over Empire's rate increase request is established under Section 393.150, RSMo.

C. Sections 393.130 and 393.140, RSMo, mandate that the Commission ensure that all utilities are providing safe and adequate service and that all rates set by the Commission are just and reasonable.

D. Section 393.150.2, RSMo, makes clear that at any hearing involving a requested rate increase the burden of proof to show the proposed increase is just and reasonable rests on the corporation seeking the rate increase. As the party requesting the rate increase, Empire bears the burden of proving that its proposed rate increase is just and reasonable. In order to carry its burden of proof, Empire must meet the preponderance of the evidence standard.²¹ In order to meet this standard, Empire must

²⁰ Ex. 100, Bolin Direct, page 4.

²¹ *Bonney v. Environmental Engineering, Inc.*, 224 S.W.3d 109, 120 (Mo. App. 2007); *State ex rel. Amrine v. Roper*, 102 S.W.3d 541, 548 (Mo. banc 2003); *Rodriguez v. Suzuki Motor Corp.*, 936 S.W.2d 104, 110 (Mo. banc 1996), citing to, *Addington v. Texas*, 441 U.S. 418, 423, 99 S.Ct. 1804, 1808, 60 L.Ed.2d 323, 329 (1979).

convince the Commission it is “more likely than not” that Empire’s proposed rate increase is just and reasonable.²²

E. In determining whether the rates proposed by Empire are just and reasonable, the Commission must balance the interests of the investor and the consumer.²³ In discussing the need for a regulatory body to institute just and reasonable rates, the United States Supreme Court has held as follows:

Rates which are not sufficient to yield a reasonable return on the value of the property used at the time it is being used to render the services are unjust, unreasonable and confiscatory, and their enforcement deprives the public utility company of its property in violation of the Fourteenth Amendment.²⁴

In the same case, the Supreme Court provided the following guidance on what is a just and reasonable rate:

What annual rate will constitute just compensation depends upon many circumstances and must be determined by the exercise of a fair and enlightened judgment, having regard to all relevant facts. A public utility is entitled to such rates as will permit it to earn a return on the value of the property which it employs for the convenience of the public equal to that generally being made at the same time and in the same general part of the country on investments in other business undertakings which are attended by corresponding risks and uncertainties; but it has no constitutional right to profits such as are realized or anticipated in highly profitable enterprises or speculative ventures. The return should be reasonably sufficient to assure confidence in the financial soundness of the utility and should be adequate, under efficient and economical management, to maintain and support its credit and enable it to raise the money necessary for the proper discharge of its public duties. A rate of return may be reasonable at one time and become too high or too low by changes affecting opportunities for investment, the money market and business conditions generally.²⁵

²³ *Federal Power Commission v. Hope Natural Gas Co.*, 320 U.S. 591, 603, (1944).

²⁴ *Bluefield Water Works & Improvement Co. v. Public Service Commission of the State of West Virginia*, 262 U.S. 679, 690 (1923).

²⁵ *Bluefield*, at 692-93.

The Supreme Court has further indicated:

‘[R]egulation does not insure that the business shall produce net revenues.’ But such considerations aside, the investor interest has a legitimate concern with the financial integrity of the company whose rates are being regulated. From the investor or company point of view it is important that there be enough revenue not only for operating expenses but also for the capital costs of the business. These include service on the debt and dividends on the stock. By that standard the return to the equity owner should be commensurate with returns on investments in other enterprises having corresponding risks. That return, moreover, should be sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain its credit and to attract capital.²⁶

F. In undertaking the balancing required by the Constitution, the Commission is not bound to apply any particular formula or combination of formulas. Instead, the Supreme Court has said:

Agencies to whom this legislative power has been delegated are free, within the ambit of their statutory authority, to make the pragmatic adjustments which may be called for by particular circumstances.²⁷

Furthermore, in quoting the United States Supreme Court in *Hope Natural Gas*, the Missouri Court of Appeals said:

[T]he Commission [is] not bound to the use of any single formula or combination of formulae in determining rates. Its rate-making function, moreover, involves the making of ‘pragmatic adjustments.’ ... Under the statutory standard of ‘just and reasonable’ it is the result reached, not the method employed which is controlling. It is not theory but the impact of the rate order which counts.²⁸

G. The test year is a central component in the ratemaking process. Rates are usually established based upon a historical test year which focuses on four factors: (1) the rate of return the utility has an opportunity to earn; (2) the rate base upon which a

²⁶ *Federal Power Commission v. Hope Natural Gas Co.*, 320 U.S. 591, 603 (1944) (citations omitted).

²⁷ *Federal Power Commission v. Natural Gas Pipeline Co.* 315 U.S. 575, 586 (1942).

²⁸ *State ex rel. Associated Natural Gas Co. v. Pub. Serv. Comm’n*, 706 S.W. 2d 870, 873 (Mo. App. W.D. 1985).

return may be earned; (3) the depreciation costs of plant and equipment; and (4) allowable operating expenses.²⁹

H. A test year is used as the starting point for determining the basis for adjustments that are necessary to reflect annual revenues and operating costs in calculating any shortfall or excess of earnings by the utility. Adjustments, such as annualization and normalization adjustments, are made to the test year results when the unadjusted results do not fairly represent the utility's most current annual level of existing revenue and operating costs.³⁰

I. A historical test year is used because the past expenses of a utility can be used as a basis for determining what rate is reasonable to be charged in the future.³¹

J. The use of a true-up audit and hearing in ratemaking is a compromise between the use of a historical test year and the use of a projected or future test year.³² It involves adjustment of the historical test year figures for known and measurable subsequent or future changes.³³ However, the true-up is generally limited to only those accounts necessarily affected by some significant known and measurable change, such as a new labor contract, a new tax rate, or the completion of a new capital asset. The true-up is a device employed to reduce regulatory lag, which is "the lapse of time between a change in revenue requirement and the reflection of that change in rates."³⁴

III. Disputed Issues

1) Rate of Return—Return on Equity, Capital Structure, and Cost of Debt

Findings of Fact

13. The rate of return (ROR) is the overall cost of capital; that is, the cost of debt and the Commission-selected return on equity (ROE) weighted by the capital structure.³⁵

14. An authorized ROE is a Commission-determined return granted to monopoly industries, allowing them the opportunity to earn fair and reasonable compensation for their investments.³⁶

15. Cost of equity (COE) is a market-determined minimum return investors are willing to accept for their investment in a company, compared to returns on other available investments.³⁷

16. COE is not directly observable; it must be estimated based upon both quantitative and qualitative information.³⁸

17. A utility's COE is implied by the price investors are willing to pay for a share of stock.³⁹

18. COE and ROE are not equivalent, a COE is determined by what investors are willing to pay for a share of stock, while Commission authorized ROEs have been consistently higher than COEs.⁴⁰

³⁵ Ex. 101, Staff Direct Report, page 3.

³⁶ Ex. 101, Staff Direct Report, page 2.

³⁷ Ex. 101, Staff Direct Report, page 6.

³⁸ Ex. 10, Hevert Direct, page 15.

³⁹ Ex. 210, Murray Direct, page, 2

⁴⁰ Ex. 210, Murray Direct, page 2.

19. Three financial analysts offered recommendations regarding an appropriate ROE. Robert B. Hevert testified on behalf of Empire. Hevert is a Partner and Rates, Regulation & Planning Practice Leader at ScottMadden Management Consultants . Prior to that Hevert was Managing Partner of Sussex Economic Advisors, LLC. He holds a Bachelor of Science degree in Finance from the University of Delaware and a Master of Business Administration with a concentration in finance from the University of Massachusetts. He also holds the Chartered Financial Analyst designation.⁴¹ Hevert recommends a ROE of 9.95 percent with a range of 9.80 percent to 10.60 percent.⁴²

20. Peter Chari is employed as a Utilities Regulatory Auditor for the Financial Analysis Department of the Staff. He holds a Bachelor of Arts in Economics and a Master of Business Administration in Finance from North Central College. He was awarded the professional designation of Certified Rate of Return Analyst by the Society of Utility and Regulatory Financial Analysts.⁴³ Staff witness Chari recommends a ROE of 9.25 percent with a range of 9.05 percent to 9.80 percent.⁴⁴

21. David Murray is employed as a Utility Regulatory Manager for OPC. Prior to employment with the OPC, Murray was the Utility Regulatory Manager of the Financial Analysis Department for Staff from 2009 through June 30, 2019. Murray started work at the Commission as a Financial Analyst in June 2000. Prior to that, he was employed by the Missouri Department of Insurance in a regulatory position. He holds a Bachelor of Science degree in Business Administration with an emphasis in Finance and Banking, and Real Estate from the University of Missouri-Columbia and a Master's degree in

⁴¹ Ex. 36, Hevert Direct, Attachment A.

⁴² Ex. 36, Hevert Direct, page 2.

⁴³ Ex. 101, Staff Direct Report, Appendix 1.

⁴⁴ Ex. 101, Staff Direct Report, pages 18-19.

Business Administration from Lincoln University. In April 2007, he was awarded the professional designation of Certified Rate of Return Analyst by the Society of Utility and Regulatory Financial Analysts. He also holds the Chartered Financial Analyst designation.⁴⁵ Murray recommends a ROE of 9.25 percent with a range of 8.50 percent to 9.25 percent.⁴⁶

22. Common methods to determine a COE and an authorized ROE are the Discounted Cash Flow Models (DCF), Capital Asset Pricing Models (CAPM), risk premium models, and comparative earnings analyses.⁴⁷

23. Each methodology has certain inherent disadvantages that may lead to unreasonable estimates. DCF's main disadvantage revolves around estimation of growth rate, and CAPM's main issue of concern is estimation of market risk premiums ("MRP").⁴⁸

24. The constant growth DCF model assumes that an investor buys a stock for an expected total return rate, which is derived from cash flows received in the form of dividends plus appreciation in market price (the expected growth rate). The Constant Growth DCF model expresses the COE as the discount rate that sets the current price equal to expected cash flows.⁴⁹

25. The Bond Yield Plus Risk Premium approach assumes that investors require a risk premium over the cost of debt as compensation for assuming the greater risk of common equity investment. The model is expressed as a bond yield plus equity risk premium.⁵⁰

⁵⁰ Ex. 36, Hevert Direct, Glossary, page ii.

26. FERC determined that risk premium models (like the Bond Yield Plus Risk Premium) are less reliable than DCF and CAPM models.⁵¹

27. The CAPM is based on capital market theory that the total risk of a company consists of market (systematic) risk and business-specific (unsystematic) risk. Investors are only compensated for systematic risk because investors can avoid unsystematic risk by diversifying their portfolios. Systematic risks are unanticipated events in the economy, such as economic growth, changes in interest rates, demographic changes, etc., that affect almost all assets to some degree. The required risk premium for incurring the market risk as it relates to the investment is determined by adjusting the market risk premium by the beta of the stock or portfolio. The adjusted risk premium is then added to a risk-free rate to determine the COE.⁵²

28. Empire's witness Hevert used a Constant Growth DCF, a CAPM and Empirical CAPM (ECAPM), a Bond Yield Plus Risk Premium, and an Expected Earnings Analysis to determine Empire's recommended ROE.⁵³

29. Staff's witness Chari used Constant Growth DCF and CAPM models for COE estimation and recommended ROE.⁵⁴

30. OPC's witness Murray used a multi-stage DCF method, a CAPM model, and he performed simple and logical reasonableness checks of his COE estimates.⁵⁵

31. All three financial analysts used DCF and CAPM models.

⁵¹ Ex. 108, Chari Rebuttal, page 2.

⁵² Ex. 210, Murray Direct, page 37-38.

⁵³ Ex. 36, Hevert Direct, page 4.

⁵⁴ Ex. 108, Chari Rebuttal, page 4.

⁵⁵ Ex. 210, Murray Direct, page 19.

32. Gross Domestic Product (GDP) is the value of all finished goods and services produced within a country during a given period of time.⁵⁶

33. Utility growth rates are generally consistent with the GDP growth rate.⁵⁷

34. It is unlikely that utilities will grow at a higher rate than the overall economy, because it runs counter to basic economic principles that companies will grow at a rate consistent with the long-term growth rate of the overall economy over the long-term.⁵⁸

35. The long-term nominal GDP growth rate estimate is 4.1 percent (unadjusted for inflation).⁵⁹ A higher estimate of nominal GDP growth of 4.4 percent would also be reasonable.⁶⁰

36. The projected long-term nominal GDP growth rate is a reasonable restriction for determining growth rates used to estimate the COE for a regulated electric utility.⁶¹

37. Hevert's constant growth DCF model assumes that his electric proxy group's dividends will grow perpetually at an average of 5.80 percent, a growth rate that is about 170 basis points higher than the estimated long-term growth rate for the general economy.⁶²

38. The constant growth DCF model also assumes dividend payments. Staff found 84 companies that do not pay dividends within the S&P 500 company list that Hevert used. This inflated Hevert's MRPs, which resulted in an inflated COE.⁶³

⁵⁶ Ex. 36, Hevert Direct, Glossary, page ii.

⁵⁷ Ex. 101, Staff Direct Report, page 7.

⁵⁸ Ex. 108, Chari Rebuttal, page 7.

⁵⁹ Ex. 108, Chari Rebuttal, page 7.

⁶⁰ Ex. 101, Staff Direct Report, page 16.

⁶¹ Ex. 101, Staff Direct Report, page 16.

⁶² Ex. 108, Chari Rebuttal, page 7.

⁶³ Ex. 108, Chari Rebuttal, pages 9-10.

39. Hevert's recommended ROE of 9.95 percent is 56 basis points higher than the national average of authorized ROE.⁶⁴ The Commission finds this ROE would be excessive because his constant growth DCF results are based on unsustainable long-term growth rates, and both his DCF and CAPM include inflated MRPs.⁶⁵

40. Staff notes that if Hevert had calculated MRPs correctly his CAPM COE estimates would range from 6.02 percent to 7.60 percent, not 8.66 percent to 9.76 percent, and his ECAPM COE estimates would range from 6.88 percent to 8.50 percent, not 10.19 percent to 11.05 percent.⁶⁶ In addition, ECAPM is not known as a generally accepted method used by investors to estimate the COE to apply to expected cash flows/dividends from utility stocks.⁶⁷

41. The projected long-term nominal GDP growth rate is a reasonable restriction for determining growth rates used to estimate the COE for a regulated electric utility.⁶⁸

42. Staff's witness Chari used a more reasonable constant growth rate of 4.20 percent to 5.00 percent to determine a COE estimate of between 7.34 percent to 8.14 percent.⁶⁹

43. Staff determined that an authorized ROE of 9.25 percent would be appropriate⁷⁰

44. OPC's COE estimate is between 5.35 percent to 6.75 percent.⁷¹

⁶⁴ Ex. 108, Chari Rebuttal, pages 6-7.

⁶⁵ Ex. 108, Chari Rebuttal, pages 8-10.

⁶⁶ Ex. 108, Chari Rebuttal, page 9-10.

⁶⁷ Ex. 211, Murray Rebuttal, page 11.

⁶⁸ Ex. 101, Staff Direct Report, page 16.

⁶⁹ Ex. 101, Staff Direct Report, page 16.

⁷⁰ Ex. 108, Chari Rebuttal, page 19.

⁷¹ Ex. 210, Murray Direct, pages 39-40.

45. OPC's witness Murray used a growth rate range of 2.85 percent to 3 percent,⁷² which is also less than the nominal GDP growth rate.

46. Both Staff and OPC's financial analysts agree that a 9.25 percent authorized ROE is reasonable.⁷³ The Commission finds this ROE to be reasonable and based upon realistic economic growth.

47. The Commission has used the "zone of reasonableness standard" for setting an authorized ROE. The point from which the zone of reasonableness extends is a recent industry average of authorized ROE.⁷⁴

48. The 2019 national average of authorized ROE is 9.39 percent.⁷⁵

49. Capital structure represents how a company's assets are financed. Capital structure typically consists of common equity, long-term debt, and short-term debt.⁷⁶

50. Empire recommends the Commission adopt its true-up capital structure, which consists of 53.07 percent common equity and 46.93 long-term debt.⁷⁷

51. Staff recommends the Commission use Empire's capital structure, which consists of 52.43 percent common equity and 47.57 percent long-term debt.⁷⁸

52. OPC recommends the Commission use LUCo's adjusted capital structure consisting of 46 percent common equity and 54 percent long-term debt.⁷⁹

53. In File No. EM-2016-0213 the Commission evaluated a joint application requesting approval of an agreement and plan of merger in which Liberty Sub Corp would

⁷² Ex. 212, Murray Surrebuttal/True-Up Direct, page 25.

⁷⁶ Ex. 210, Murray Direct, page 5.

⁷⁷ Ex. 7, Richard True-up direct, page 21.

⁷⁸ Ex. 149, Staff's Recommended Allowed Rate of Return as of September 30, 2019, replacing table 1 of Staff's Direct Report.

⁷⁹ Ex. 212, Murray Surrebuttal/True-Up Direct, page 35.

merge with and into Empire and under which Liberty Utilities (Central) Co. would acquire all the common stock of Empire.

54. An unopposed Stipulation and Agreement was submitted In File No. EM-2016-0213 on August 23, 2016 (Merger Stipulation).

55. The Commission's *Order Approving Stipulations and Agreements and Authorizing Merger Transaction* issued on September 7, 2016, in File No. EM-2016-0213 approved the Merger Stipulation finding that under its terms, including the reasonable conditions imposed on the merger transactions contained therein, the merger transaction at issue was not detrimental to the public and should be approved. Condition 5 of the Merger Stipulation states that "If Empire's per books capital structure is different from that of the entity or entities in which Empire relies for its financing needs, Empire shall be required to provide evidence in subsequent rate cases as to why Empire's per book capital structure is the most economical for purposes of determining a fair and reasonable allowed rate of return for purposes of determining Empire's revenue requirement."⁸⁰

56. Staff and OPC relied on the conditions contained in the Merger Stipulation in File No. EM-2016-0213 to protect Empire and its customers from detriments that could occur due to Empire's financing needs being consolidated with the rest of APUC's regulated utilities.⁸¹

57. Empire creates consolidated financial statements that include all of its operations, including its gas distribution subsidiary, Empire Gas. Empire also creates

⁸⁰ Ex. 108, Chari Rebuttal, pages 13-14.

⁸¹ Ex. 212, Murray Surrebuttal and True-up Direct, page 35.

deconsolidated financial statements in which it breaks out Empire Gas' distribution operations from Empire's electric, water and non-regulated operations.⁸²

58. Initially both Empire's and Staff's per book capital balances for Empire were based upon Empire's deconsolidated financial statements.⁸³ As of September 30, 2019, based upon its per books balance sheet LUCo had 53.00 percent common equity and 47.00 percent long-term debt, and based upon its deconsolidated financial statements Empire had 52.90 percent common equity and 47.10 percent long-term debt.⁸⁴ Staff's witness, Mr. Chari, subsequently acknowledged that he had inadvertently utilized Empire's deconsolidated capital structure in his analysis, and he clarified that Empire's consolidated capital structure was actually 52.49 percent common equity and 47.51 percent long-term debt.⁸⁵

59. Based upon LUCo's per books balance sheet and Empire's financial statements Staff determined that Empire had the more economical structure based on the equity ratio. Staff witness Chari testified that the higher the equity ratio, the less economical the capital structure is because equity costs more than the other portions of the capital structure.⁸⁶

60. LUCo's per books balance sheet does not include off balance sheet debt supported by LUCo's assets.⁸⁷

61. Before APUC acquired Empire, Empire financed and operated itself and all its affiliates as one entity, that is Empire did not finance and operate Empire Gas as a

⁸² Ex. 211, Murray Rebuttal, page 7.

⁸³ Ex. 211, Murray Rebuttal, page 7.

⁸⁴ Ex. 108, Chari Rebuttal, page 14.

⁸⁵ Ex. 109 Chari Surrebuttal, pages 2 and 12.

⁸⁶ Ex. 108, Chari Rebuttal, page 14.

⁸⁷ Ex. 211, Murray Surrebuttal/True-Up Direct, pages 11-12.

stand-alone entity; therefore, the financial community assessed Empire's risk on a consolidated level, including that of Empire Gas.⁸⁸ Thus, Empire's consolidated financial statements should be used to calculate Empire's capital structure.⁸⁹

62. When Empire was a stand-alone company, it had its own financing functions and direct access to capital markets for short and long-term debt. Empire now relies on LUCo for all of its financing functions, which includes access to short-term debt and long-term debt.⁹⁰

63. LUCo has a \$500 million credit facility for its short-term debt. LUCo relies on APUC's financing subsidiary, Liberty Utilities Finance GP 1 (LUF), for its long-term debt financing needs. LUF issues debt directly to third-parties on behalf of LUCo and intermediate entities between LUCo and APUC. LUCo guarantees all debt issued by LUF, which includes debt that was issued for the sole purpose of buying equity in LUCo.⁹¹

64. LUCo unconditionally guarantees \$395 million in off balance sheet debt (\$135 million issued by Liberty American and \$260 million issued by LUF)⁹², which is not shown in its' per book value. This off balance sheet debt should be considered when determining whether LUCo's or Empire's capital structure is more economical.⁹³

65. The rating agencies recognize the \$395 million in guarantees as off balance sheet debt and adjust LUCo's debt to include it.⁹⁴

⁸⁸ Ex. 211, Murray Surrebuttal/True-Up Direct, pages 11-12.

⁸⁹ Ex. 211, Murray Surrebuttal/True-Up Direct, pages 11-12.

⁹⁰ Ex. 210, Murray Direct, pages 6 - 7.

⁹¹ Ex. 210, Murray Direct, pages 7, lines 6-11.

⁹² Ex. 212, Murray Surrebuttal/True-Up Direct, page 10, lines 6 – 10, 14-16.

⁹³ Ex. 212, Murray Surrebuttal/True-Up Direct, page 12.

⁹⁴ Ex. 212, Murray Surrebuttal/True-Up Direct, page 17.

66. LUCo uses the off balance sheet debt to fund equity infusion in LUCo, which is ultimately used to fund its regulated utilities.⁹⁵

67. Therefore since LUCo used the \$395 million debt to record a higher equity balance on LUCo's balance sheet, not only should this debt be added to the debt recorded on LUCo's balance sheet, but it should also be subtracted from LUCo's equity balance.⁹⁶

68. After adjusting for the \$395 million in off balance sheet debt, LUCo's common equity ratio is 46 percent,⁹⁷ which is a more economical capital structure than Empire's.⁹⁸

69. The Commission has a history of using LUCo's capital structure for LUCo's affiliate companies. The Commission approved LUCo's capital structure for two of Empire's affiliates, Liberty Utilities (Midstates Natural Gas) and Liberty Utilities LLC (Missouri Water), in File Nos. GR-2014-0152 and WR-2018-0170.⁹⁹

70. Empire is recommending a cost of debt of 4.85 percent, based on Empire's recorded cost of debt at January 1, 2020.¹⁰⁰

71. Staff adjusted its recommended cost of debt to reflect OPC witness Schallenberg's concern about LUCo's \$90 million dollar loan to Empire not being in compliance with the Affiliate Transaction Rule as the interest charged to Empire exceeds LUCo's short-term debt rate used to fund the loan. Staff adjusted its embedded cost of debt recommendation from 4.84 percent to 4.57 percent.¹⁰¹

⁹⁵ Ex. 210, Murray Direct, pages 10, Line 12.

⁹⁶ Ex. 210, Murray Direct, pages 10, Lines 15 - 17.

⁹⁷ Ex. 210, Murray Direct, pages 10, line 20.

⁹⁸ Ex. 210, Murray Direct, pages 10, line 24.

⁹⁹ Ex. 212, Murray Surrebuttal/True-Up Direct, page 20.

¹⁰⁰ Ex. 7, Richard True-up direct, page 21.

¹⁰¹ Ex. 130, Chari Surrebuttal, pages 13-14.

72. OPC's witness Murray matched the cost of debt to the capital structure that is actively managed for and used to obtain financing, which is LUCo's.¹⁰² This is appropriate because LUCo's cost of debt matches the financial risk embedded in LUCo's adjusted capital structure of 46 percent common equity and 54 percent long-term debt.¹⁰³

73. Empire's debt financing is now being provided by LUCo and LUF, therefore Empire's credit ratings are not a necessary component for it to access capital.¹⁰⁴

74. OPC's recommended cost of debt is 4.65 percent based on LUCo's consolidated cost of debt.¹⁰⁵ OPC's recommended cost of debt does not include any affiliate notes, hence no adjustments are necessary.¹⁰⁶

75. The Commission finds use of LUCo's cost of debt appropriate because it best aligns with the financial risk embedded in LUCo's capital structure.¹⁰⁷

Conclusions of Law

A. In determining the rate of return, the Commission must consider Empire's capital structure and cost of debt, the Commission must determine the weighted cost of each component of the utility's capital structure. One component at issue in this case is the estimated cost of common equity capital, or the ROE. Estimating the cost of common equity capital is a difficult task, as academic commentators have recognized.¹⁰⁸ Determining a rate of ROE is imprecise and involves balancing a utility's need to compensate investors against its need to keep prices low for consumers.¹⁰⁹

¹⁰⁸ See Phillips, *The Regulation of Public Utilities*, Public Utilities Reports, Inc., p. 394 (1993).

¹⁰⁹ *State ex rel. Pub. Counsel v. Pub. Serv. Comm'n*, 274 S.W.3d 569, 574 (Mo. Ct. App. 2009).

B. Missouri court decisions recognize that the Commission has flexibility in fixing the rate of return, subject to existing economic conditions.¹¹⁰ “The cases also recognize that the fixing of rates is a matter largely of prophecy and because of this, commissions in carrying out their functions, necessarily deal in what are called ‘zones of reasonableness’, the result of which is that they have some latitude in exercising this most difficult function.”¹¹¹ Moreover, the United States Supreme Court has instructed the judiciary not to interfere when the Commission's rate is within the zone of reasonableness.¹¹²

Decision

Three financial experts offered testimony in this rate case. Empire's witness Hevert's determination of a recommended ROE of 9.95 percent is excessive. His constant growth DCF ROE relied on an unreasonable assumption that utility growth would substantially exceed the long-term growth rate of the United States economy. This assumption is not credible even under periods of normal economic growth. Both his DCF and CAPM calculations utilized inflated MRPs. Further, his reliance on an ECAPM was not reasonable, as ECAPM is not known as a generally accepted method used by investors to estimate the COE to apply to expected cash flows/dividends from utility stocks.

¹¹⁰ *State ex rel. Laclede Gas Co. v. Public Service Commission*, 535 S.W.2d 561, 570-571 (Mo. App. 1976).

¹¹¹ *State ex rel. Laclede Gas Co. v. Public Service Commission*, 535 S.W.2d 561, 570-571 (Mo. App. 1976). In fact, for a court to find that the present rate results in confiscation of the company's private property that court would have to make a finding based on evidence that the present rate is outside of the zone of reasonableness, and that its effects would be such that the company would suffer financial disarray. *Id.*

¹¹² *State ex rel. Public Counsel v. Public Service Commission*, 274 S.W.3d 569, 574 (Mo. App. 2009). See, *In re Permian Basin Area Rate Cases*, 390 U.S. 747, 767, 88 S.Ct. 1344, 20 L.Ed.2d 312 (1968) (“courts are without authority to set aside any rate selected by the Commission [that] is within a ‘zone of reasonableness’ ”).

The remaining two financial analysts each independently arrived at a reasonable ROE for Empire of 9.25 percent, though 9.25 percent was at the top of OPC witness Murray's range and closer to the bottom of Staff witness Chari's range. Both analysts used reasonable growth rates and risk premiums in their analysis to determine their respective ROE recommendations. The Commission finds the testimony of Mr. Murray and Mr. Chari more credible than Mr. Hevert's, and their recommended 9.25 percent ROE to be appropriate.

If Empire's capital structure is different than that of the entity or entities it relies on for its financing needs, Condition 5 of the Merger Stipulation approved in File No. EM-2106-0213 requires Empire to provide evidence in its rate cases as to why its per book capital structure is the most economical for purposes of determining a fair and reasonable allowed rate of return. A primary reason the parties included this requirement was to protect Empire and its customers from detriments that could occur due to Empire's financing needs being consolidated with the rest of APUC's regulated utilities.

Although Empire and Staff arrived at similar positions and both found Empire's capital structure to be the most economical for purposes of complying with Condition 5 of the Merger Stipulation, both of their analysis are flawed and not reliable. Their capital structures were similar because they both inappropriately used LUCo's per book balance sheet capital structure that did not reflect LUCo's off balance sheet debt. Staff determined Empire's capital structure was appropriate based on Empire having the appearance of a more economical capital structure as determined by its per book value capital structure when compared to LUCo's.

The Commission finds OPC's witness Murray more persuasive than either Staff's or Empire's witnesses with regard to capital structure. He appropriately utilized Empire's

consolidated capital structure and included LUCo's off balance sheet debt in his capital structure calculations. LUCo's adjusted capital structure is appropriate to use for setting rates in this case because it is more economical than Empire's. Further, use of the affiliated utility's capital structure is not the capital structure the Commission has historically used for other Liberty Utilities companies. Based on this analysis and supported by the facts set out above, LUCo's adjusted capital structure of 46 percent common equity and 54 percent long-term debt is the appropriate capital structure to use in setting rates in this case.

Based upon its determination related to capital structure, the Commission further finds that the cost of long-term debt should be based on LUCo's consolidated embedded cost of long-term debt of 4.65 percent, because it best aligns with the financial risk embedded in LUCo's capital structure.

2) Rate Design, Other Tariff and Data Issues

- a) Should the GP and TEB rate schedules be fully consolidated?
- b) Should the CB and SH rate schedules be partially consolidated?
- c) Should "grandfathered" multifamily customers taking service through a single meter be given the option of being served on the CB/SH rate schedule?
- d) How should Empire's revenue requirement be allocated amongst Empire's customer rate classes (Class revenues responsibilities)?
- e) How should the rates for each customer class be designed?
- f) How should any revenue requirement increase or decrease be allocated to each rate class?
- g) How should production-related costs be allocated to each rate class?
- h) How should plant accounts 364, 366 and 368 be classified?
- i) How should primary and secondary distribution plant facility costs be allocated to each rate class?
- j) How should General plant facility costs be allocated to each rate class?

Findings of Fact

76. Empire's current rate structure includes base rates, a FAC (fuel adjustment clause) factor, Energy Efficiency Cost Recovery (EECR) charge, and a tax reform credit.

The base rates include monthly customer charges, energy charges, and demand charges. For some rate classes, the energy charges vary by season.¹¹³

77. Costs included in a customer charge are the costs necessary to make electric service available to the customer regardless of the level of electric service utilized. The costs can include monthly meter reading, billing, postage, customer accounting service expenses, as well as distribution.¹¹⁴

78. Energy charges are charges based on the amount of energy used by a customer. Unlike a customer charge, the energy charge will fluctuate based on the kilowatt hour (kWh) of usage and the rate per kWh. Blocks are used to identify when a specific rate per kWh will be charged for a certain level of usage. For instance, while one rate may be applied in a block for usage of 0-600 kWhs, a higher or lower rate may apply to the block of usage above 600 kWh.¹¹⁵

79. Empire's current rate design is that contained in the compliance tariffs filed on August 15, 2016, as substituted on August 26, 2016, and approved to become effective as of September 14, 2016 in its last rate case, File No. ER-2016-0023.¹¹⁶

80. A Class Cost of Service (CCOS) study is an analysis that apportions a utility's allowed costs to provide service among its various customer classes. The total cost allocated to a given class represents the costs that class would pay to produce an equal rate of return to other classes.¹¹⁷

¹¹³ Ex. 26, Lyons Direct, page 5.

¹¹⁴ Ex. 104, Staff Class Cost of Service Report, page 14.

¹¹⁵ Ex. 104, Staff Class Cost of Service Report, pages 14-15. Ex. 101, Staff Direct Report, page 33.

¹¹⁶ Order Approving Compliance Tariffs, issued in File No. ER-2016-0023 on September 6, 2016.

¹¹⁷ Ex. 208, Marke Rebuttal, page 2.

81. Three CCOS studies were prepared by Staff, Empire and MCEG.¹¹⁸ None of these CCOS studies are reliable due to the unavailability of reliable data needed to establish class and system peaks and billing determinants, and due to a large number of estimated bills.¹¹⁹ For example, Empire's peak data, which is the basis for the vast majority of the costs allocated in a CCOS, did not appear reasonable.¹²⁰

82. In the past Staff employed an in-house method to allocate costs but because of a lack of data Staff was unable to collect the information necessary for its direct filing.¹²¹

83. Using Staff's method a CCOS study can normally be assumed to be accurate to around 5 percent plus or minus of each studied class's revenue requirement. However, due to data reliability concerns and large percentages of estimated bills, that is not true in this case.¹²²

84. Staff recommends that the General Power (GP) and Total Electric Building (TEB) rate schedules be consolidated because there is no apparent cost-related distinction between them.¹²³

85. Empire recognizes that there are some benefits to consolidating the GP and TEB rate schedules, which they identified as¹²⁴:

- a. Schedules GP and TEB have identical customer charges and rate structures.
- b. Schedules GP and TEB have a similar cost of service.

¹¹⁸ Ex. 104, Staff Class Cost of Service Report; Ex.26, Direct Testimony of Timothy S. Lyons; Ex. 650, Direct Testimony of Kavita Maini.

¹¹⁹ Ex. 120, Kliethermes Rebuttal, pages 2-4, and Ex. 121, Lange Rebuttal, page 21.

¹²⁰ Ex. 104, Staff Class Cost of Service Report, page 25.

¹²¹ Ex. 104, Staff Class Cost of Service Report, page 26.

¹²² Ex. 136, Lange Surrebuttal, page 13.

¹²³ Ex. 104, Staff Class Cost of Service Report, pages 3 and 18.

¹²⁴ Ex. 28, Lyons Rebuttal CCOS, page 14.

- c. Consolidating rates and charges simplifies the Company's rate management and customer communication.

86. Empire's primary concern with the consolidation of GP and TEB rate schedules is customer bill impacts and whether some customers may experience significant bill increases as a result of the change due to the consolidation of GP and TEB rate schedules.¹²⁵

87. Staff recommends the Commercial (CB) and Space Heating (SH) rate schedules be partially consolidated except the charge for non-summer usage in excess of 700 kWh per customer per month.¹²⁶

88. Empire recognizes that there are some benefits to consolidating the CB and SH rate schedules, which they identified as¹²⁷:

- a. Schedules CB and SH have identical rate structures and customer charges.
- b. The cost of service differences between Schedules CB and SH can be recognized by maintaining distinct winter tail block rates.
- c. Potential bill impact concerns related to the proposed rate changes can be addressed by maintaining distinct winter tail block rates.
- d. Consolidating rates and charges simplifies the Company's rate management and customer communication.

89. Empire's primary concern with the partial consolidation of CB and SH rate schedules is the customer bill impacts and whether some customers may experience

¹²⁵ Ex. 28, Lyons Rebuttal CCOS, page 14.

¹²⁶ Ex. 121, Lange Rebuttal, page 22.

¹²⁷ Ex. 28, Lyons Rebuttal CCOS, pages 13 - 14.

significant bill increases as a result of the change due to the consolidation of CB and SH rate schedules.¹²⁸

90. Commission Rule 20 CSR 4240-20.050.2 requires that multiple-family dwellings (apartments) built after June 1, 1981, be separately metered. Multiple-family buildings built before June 1, 1981, are grandfathered and continue to be metered from one meter (master metered).¹²⁹

91. Staff has proposed that Empire's tariff be modified to allow master metered customers the option of being served on the CB tariff instead of the Residential tariff.¹³⁰

92. Multiple-family buildings built prior to June 1, 1981, that are master metered are served on the residential tariff and their bill calculated by multiplying the customer charge and KWh block by the number of dwelling units.¹³¹ Because the customer charge is multiplied by the number of dwelling units, the bill may contain customer charges for unoccupied dwelling units.

93. After Advanced Metering Infrastructure (AMI) is set up, Empire will be able to collect better customer usage data. Having this data will improve the quality of their load research and revenue data, which will allow them to implement rate schedules with time variant rate structures.¹³²

94. Staff's CCOS report showed the Residential class is contributing within 5 percent of its cost of service, however Staff has acknowledged that its CCOS in this case cannot be assumed to be accurate to within 5 percent plus or minus per class.¹³³

¹²⁸ Ex. 28, Lyons Rebuttal CCOS, page 13-14.

¹²⁹ Commission Rule 20 CSR 4240-20.050.2.

¹³⁰ Ex.104, Staff Class Cost of Service Report, page 34.

¹³¹ Ex.104, Staff Class Cost of Service Report, page 34.

¹³² Ex. 121, Lange Rebuttal, page 21.

¹³³ Ex.104, Staff Class Cost of Service Report, page 32; and Ex. 136, Lange Surrebuttal, page 13.

95. Allocation consists of assigning rate base and expense items to rate classes based on the factors that reflect their underlying cost of service.¹³⁴

96. In the past Staff employed an in-house method to allocate costs but because of a lack of data Staff was unable to collect the information necessary for its direct filing.¹³⁵

97. Staff proposed various rates for each customer class; some included maintaining the current rates.¹³⁶

98. An overall goal of rate design is to minimize inter-class subsidies. The revenue requirement should generally be allocated among the customer rate classes in a manner that reflects an aggregate movement toward the system ROR. This is accomplished by assigning a larger increase to classes that produce a lower ROR than the system ROR.¹³⁷

99. MCEG proposes that any rate decrease for the LP and, GP and SC-P rate classes be reflected by reducing both blocks of the energy charge of each class. All other charges (customer and demand charges) used for the collection of fixed costs would remain at current levels.¹³⁸ If a rate increase is ordered, MCEG proposes that energy charges should remain at current levels and the demand charges be proportionally increased to correct the over recovery of fixed costs from the energy charges.¹³⁹

100. Empire supports MCEG's recommendation to apply any rate increases for the LP rate class to the billing demand and facility charges and to apply any rate

¹³⁴ Ex. 26, Lyons Direct, page 10.

¹³⁵ Ex. 104, Staff Class Cost of Service Report, page 26.

¹³⁶ Ex. 104, Staff Class Cost of Service Report, pages 14-23.

¹³⁷ Ex. 26, Lyons Direct, page 28.

¹³⁸ Ex. 350, Maini Direct, page 36.

¹³⁹ Ex. 350, Maini Direct, page 36.

decreases to the energy charges. Empire supports MECG's recommendation to apply any rate decreases to the energy charges.¹⁴⁰

101. Empire anticipates filing its next rate case in the third quarter of 2020.¹⁴¹

102. The appropriate allocation method for production-related costs will vary case-to-case with utility characteristics and data availability.¹⁴²

103. Allocation consists of assigning rate base and expense items to rate classes based on the factors that reflect their underlying cost of service.¹⁴³

104. Customer use of utility-owned equipment is related to the voltage needs of the customer. Before allocating distribution plant costs to customer rate classes, the individual distribution plant accounts are classified between customer and demand related costs. Demand-related costs are divided between primary demand, reflecting customers served at primary voltage, and secondary demand, reflecting customers served at secondary voltage.¹⁴⁴

105. Distribution plant Accounts 364 through 370 involve both demand-related and customer-related costs. The customer-related component of distribution facilities - the number of poles, transformers, meters, and miles of conductor - are directly related to the number of customers on the utility's system, but the size of each of these items are associated with the level of energy that they deliver over time. The amounts in distribution system accounts need to be allocated between customer-related and demand-related classifications.¹⁴⁵

¹⁴⁰ Ex. 28, Lyons Rebuttal CCOS, page 10.

¹⁴¹ Ex. 1017, Richard Supplemental, page 12.

¹⁴² See Staff's Position Statement, P. 13, filed April 17, 2020.

¹⁴³ Ex. 26, Lyons Direct, page 10.

¹⁴⁴ Ex.104, Staff Class Cost of Service Report, page 27-28.

¹⁴⁵ Ex.104, Staff Class Cost of Service Report, page 28.

106. Empire used the Minimum-Size Method to calculate the customer related component of accounts 364, 366, and 368. The Minimum-size Method assumes that a minimum sized distribution system can be built to serve minimum demand requirements of customers. The minimum system costs are allocated to each rate class based on the number of customers. Distribution plant in excess of the minimum system reflect the cost of serving customer peak demands. Peak demand costs are also allocated to each rate class based on customer peak demands.¹⁴⁶

107. Staff used the Zero-Intercept Cost Minimum method to calculate the customer related component of Accounts 364, 366, and 368. The zero-intercept cost study tries to identify the portion of plant related to a hypothetical no-load state. It relates installed cost to current carrying capacity or demand rating, and creates a curve for various sizes of the equipment involved, using regression techniques, and extends the curve to a no-load intercept. The cost related to the zero-intercept is the customer related component.¹⁴⁷

108. For the remaining classification of Account 364, Staff relied on Empire's study provided within its workpapers.¹⁴⁸

109. Staff used Empire's cost of \$6.90 per foot to calculate the customer-related portion of plant Account 366. The remaining classification of Account 366 relied upon Empire's study provided within its workpapers.¹⁴⁹

110. For the remaining classification of Account 368, Staff relied on Empire's study provided within its workpapers.¹⁵⁰

¹⁴⁶ Ex. 26, Lyons Direct, pages 17-18.

¹⁴⁷ Ex.104, Staff Class Cost of Service Report, page 28.

¹⁴⁸ Ex.104, Staff Class Cost of Service Report, page 28.

¹⁴⁹ Ex.104, Staff Class Cost of Service Report, page 29.

¹⁵⁰ Ex.104, Staff Class Cost of Service Report, page 29.

111. Staff allocated the costs of the primary distribution facilities based on the sum of each class's coincident peak demands measured at primary voltage for each month of the test period. Staff only allocated distribution primary costs to those customers that used these facilities.¹⁵¹

112. Staff allocated the costs of the secondary distribution system, including line transformers, based on the sum of each class's coincident peak demands at secondary voltage.¹⁵²

113. Empire allocates general plant related costs based on the composite allocation of all labor-related production, transmission, distribution, customer accounts, and customer service O&M expenses. Empire states that this allocation methodology is well established in industry literature and is consistent with the Company's prior rate case filing.¹⁵³

114. Staff relies on the Regulatory Assistance Project (RAP), *Electric Cost Allocation for a New Era* to support its analysis of allocations. General plant costs support all of a utility's functions.¹⁵⁴

115. Staff maintains its class revenue responsibility and rate design variations as a reasonable outcome in this case, regardless of the unavailability of a typically reliable CCOS from any party.¹⁵⁵

¹⁵¹ Ex.104, Staff Class Cost of Service Report, page 29.

¹⁵² Ex.104, Staff Class Cost of Service Report, page 29.

¹⁵³ Ex. 26, Lyons Direct, page 27.

¹⁵⁴ Ex. 104, Staff Class Cost of Service Report, Appendix 3, page 42.

¹⁵⁵ Ex. 136, Lange Surrebuttal, page 13.

Conclusions of Law

C. Empire has the burden of proof to show that its proposed tariffs are just and reasonable, including the reasonableness of its rate design.¹⁵⁶ Just because a company derives a higher rate of return from one class than another does not necessarily render those rates unjust or unreasonable.¹⁵⁷

D. Commission rule 20 CSR 4240-20.050(2), states that each residential and commercial unit in a multiple-occupancy building, construction of which has begun after June 1, 1981, shall have installed a separate electric meter for each residential or commercial unit.

E. The Public Utility Regulatory Act of 1978, 16 U.S.C. 2601, requires that individual meters be installed in new buildings to encourage the conservation of energy by the occupants of those buildings. This is codified in Missouri law in the Commission's Rule 20 CSR 4240-20.050(2).

F. Empire's current tariff's Residential Service (RG) Schedule states that if the RG schedule is used for service through a single meter to multiple-family dwellings within a single building, each Customer charge and kWh block will be multiplied by the number of dwelling units served in calculating each month's bill. It also provides that service is furnished for the sole use of the Customer and will not be resold, redistributed or submetered, directly or indirectly.¹⁵⁸

¹⁵⁶ See, e.g., *State ex rel. Monsanto Company v. Public Service Commission*, 716 S.W.2d 791 (Mo. 1986) "Laclede filed the tariffs here in question using the existing rate design. In the suspension order and notice of proceedings dated January 18, 1983, the Commission noted that the Company bore the burden of proof before the Commission and ordered the Company 'to provide evidence and argument sufficient for the Commission to determine . . . the reasonableness of the Company's rate design.'" *Id.* at 795. See also *In re Empire District Electric Company*, 13 Mo P.S.C. 3d 350, Commission File No. ER-2004-0570, Report and Order (March 10, 2005).

¹⁵⁸ PSC Mo. No. 5, Sec. 1, 19th Revised Sheet No 1.

Decision

There are potential advantages to consolidating the GP and TEB rate schedules and to partially consolidating the CB and SH rate schedules, but at this time the billing impact of those changes is unknown. Staff's assertions that the billing impacts would be mitigated are based upon Staff's revenue requirement and CCOS study. However, Staff has similarly indicated that none of the CCOS studies submitted in this case are reliable for ratemaking. Therefore, the Commission finds that it is not appropriate to consolidate rate schedules at this time based on the questionable accuracy of the CCOS studies. Since Empire has indicated that it will file a rate case in the third quarter of 2020, the Commission will order Empire to submit an impact analysis regarding the alignment of the CB and SH, and GP and TEB rate schedules in its next rate case.

Some apartment buildings built before June 1, 1981, receive service from Empire through a single meter. Those buildings' bills are generated by multiplying the customer charge and kWh blocks by the number of dwelling units in the building. This simulates the charges that would be paid in a building with individual meters for each dwelling unit. Empire's tariff states that service is furnished for the sole use of the customer and will not be resold or redistributed. This means that no portion of the bill can be collected by the building owner/landlord from tenants for utilities, and the property owner/landlord will pay a monthly customer charge on unoccupied dwelling units. There may be advantages to these customers having the option of being billed under the CB tariff. The Commission will order Empire to modify its tariff to permit master-metered customers the option of being served on the CB tariff instead of the Residential tariff.

The quality of the CCOS studies used by the parties in this rate case is such that those studies are not sufficiently accurate for the purpose of significantly altering Empire's

current rate design. The large number of estimated bills and the lack of confidence in any CCOS study make it difficult to determine the appropriate rate design revenue requirement allocations. Therefore, the Commission finds that it is not appropriate to make any changes to the revenue requirement allocations at this time. The issue of the appropriate residential customer charge was resolved by the parties and is not an issue in dispute in this proceeding. The current residential customer charge will remain in effect. Based on this analysis, and supported by the facts set out above, the Commission determines that Empire has not met its burden to establish that its proposed changes to rate design are reasonable. Staff's CCOS is not reliable, so there is insufficient evidence to justify changing the current allocations for class revenue responsibilities. The Commission finds that it is appropriate to apply any revenue increase or decrease to the energy charge and not the customer charge. Any increase or decrease should be applied to each energy block in proportion to the revenue generated by that block. Additionally, the Commission determines that any decrease for the LP and GP rate classes shall reduce the energy blocks of each class.

Both Staff and Empire described their methods of classifying accounts 364, 366, and 368. Empire appears to want the Commission to endorse a methodology for classifying these accounts and allocating primary and secondary distribution as well as general plant facility costs. The Commission agrees with Staff that no specific allocation method should be ordered or endorsed because the appropriate method will vary from case to case based on the utility's characteristics and available data. However, because of the concerns about the reliability of the data involved, the Commission determines that Empire has not met its burden of proof and will adopt the account classifications and the

allocation of primary and secondary plant facility costs as well as general plant facility costs as determined by Staff.

3) Jurisdictional Allocation Factors

Findings of Fact

116. Jurisdiction allocation factors are used to allocate demand-related and energy-related costs between each of the retail jurisdictions served by Empire; Missouri, Arkansas, Oklahoma, and Kansas, as well as the wholesale jurisdiction in Missouri and Kansas.¹⁵⁹

117. Generation units and transmission lines are planned, designed, and constructed to meet a utility's anticipated system peak demands, plus required reserves. Accordingly, the contribution of each of Empire's three jurisdictions: Missouri Retail Operations, Non-Missouri Retail Operations, and Wholesale Operations, coincident to the system peak demand, i.e., each jurisdiction's demand at the time of the system peak, is the appropriate basis on which to allocate these facilities. Thus, the term coincident peak refers to the load, generally in kW's or megawatts (MW), in each of the jurisdictions that coincides with Empire's overall system peak recorded for the time period in the corresponding analysis.¹⁶⁰

118. Demand refers to the rate at which energy is delivered to a system to match the customer's load requirements. Staff utilized a twelve coincident peak methodology to determine demand allocation.¹⁶¹ Use of a twelve coincident peak method is appropriate

¹⁵⁹ Ex. 101, Staff Direct Report, pages 32-33.

¹⁶⁰ Ex. 101, Staff Direct Report, page 33.

¹⁶¹ Ex. 101, Staff Direct Report, page 33.

for an electric utility, such as Empire, that experiences similar system peak demands in both summer and winter months.¹⁶²

119. Staff calculated the demand allocation factor for Missouri at .8393, for non-Missouri at .1065, and for wholesale operations at .0542.¹⁶³

120. Energy allocation includes variable expenses, like fuel, that are allocated to jurisdictions based upon energy consumption. The energy allocation factor is a ratio of normalized annual kWh used by each jurisdiction as compared to Empire's normalized total usage. There are adjustments for anticipated growth, annualization, and non-normal weather.¹⁶⁴

121. Staff calculated the energy allocation factor for Missouri at .8240, for non-Missouri at .1109, and for wholesale operations at .0651.¹⁶⁵

122. Empire criticized Staff for annualizing retail energy kWh for Missouri and Arkansas as well as the Wholesale jurisdiction, but not for Kansas and Oklahoma. Staff responded that Non-Missouri Retail Operations is comprised of the sum of the other states in which Empire provides retail electric service other than Missouri, and the energy allocation factors for each jurisdiction is the ratio of the normalized annual kWh usage of a particular jurisdiction to the total normalized Empire kWh usage.¹⁶⁶

123. Empire appears to have applied multiple methods when determining jurisdictional allocations, but provided no persuasive explanation as to why those allocations are correct.¹⁶⁷

¹⁶² Ex. 101, Staff Direct Report, page 33.

¹⁶³ Ex. 101, Staff Direct Report, page 34.

¹⁶⁴ Ex. 101, Staff Direct Report, page 34.

¹⁶⁵ Ex. 101, Staff Direct Report, page 34.

¹⁶⁶ Ex. 128, Bax Surrebuttal, page 2.

¹⁶⁷ Ex. 57, Jurisdictional Allocators Workpaper.

124. Although now owned by Liberty Utilities, Empire still serves the same states it did prior to the acquisition.

Conclusions of Law

No additional Conclusions of Law are required for this issue

Decision

The Commission finds that Staff's jurisdictional allocations are the appropriate factors to be used to calculate Empire's cost of service.

4) WNR and SRLE Adjustment Mechanisms

Findings of Fact

125. Empire proposes to implement a weather normalization rider (WNR) to adjust customer bills to reflect normal weather conditions. For weather periods that are milder than normal, a WNR charge would be applied to the bill. For weather periods that are harsher than normal, a credit would be applied to the bill. Empire asserts this rider would prevent over or under-collection by the Company during abnormal weather conditions.¹⁶⁸ Empire has requested the WNR as a Revenue Stabilization Mechanism (RSM) under Section 386.266.3 RSMo.¹⁶⁹

126. In the alternative Staff has proposed its Sales Reconciliation to Levelized Expectations (SRLE), a rate mechanism designed to account for weather and conservation for customers served on the Residential, CB, and SH rate schedules. This tariff mechanism is similar to the Volumetric Indifference Reconciliation to Normal (VIRN) approved as part of a stipulation and agreement in Ameren Missouri's last gas rate case (File No. GR-2019-0077). Staff asserts its SRLE reconciles revenues above 400 kWh per

¹⁶⁸ Ex. 4, Richard Corrected Direct, Schedule SDR-9, page 5.

¹⁶⁹ Ex.104, Staff Class Cost of Service Report, page 3.

month per customer by creating a third residential block within Empire's billing system at this break point where usage from 401-600 kWh would be charged at the same rate as the first 400 kWh, but maintains Empire's exposure to changes in revenue below 400kWh per month per customer.¹⁷⁰

127. Under Empire's proposed WNR, customers would not be able to know what they would be billed for energy prior to using that energy.¹⁷¹ The WNR would not create a specific rate that is applicable to all customers; it would instead modify a customer's billable usage after that usage had been incurred.¹⁷²

128. Empire's proposed WNR does not explicitly adjust for conservation.¹⁷³ Under the proposed WNR, all usage above a base usage would be considered to be weather sensitive usage.¹⁷⁴ Thus, its design would result in a customer who engaged in conservation efforts having to repay the Company for that customer's reductions in usage from year to year, as adjusted for the number of heating and cooling degree days.¹⁷⁵

129. Staff contends that usage of approximately 400 kWh per customer per month appears unlikely to be impacted by either weather or conservation in the immediate future.¹⁷⁶

130. Implementation of Staff's SRLE, or any rate stabilization mechanism for Empire, would be further complicated by large customers within the CB and SH class that would be more appropriately served under a different rate schedule.¹⁷⁷

¹⁷⁰ Ex.104, Staff Class Cost of Service Report, pages 3-5.

¹⁷¹ Ex. 123, Stahlman Rebuttal CCOS, page 3.

¹⁷² Ex. 123, Stahlman Rebuttal CCOS, page 3.

¹⁷³ Ex. 136, Lange Surrebuttal, page 5.

¹⁷⁴ Ex. 204, Mantle Rebuttal, page 5

¹⁷⁵ Ex. 160, Kliethermes Supplemental, page 2.

¹⁷⁶ Ex.104, Staff Class Cost of Service Report, page 4.

¹⁷⁷ Ex.104, Staff Class Cost of Service Report, page 10.

131. The SRLE would eliminate the throughput disincentive related to any energy efficiency programs implemented by Empire.¹⁷⁸

132. Empire has earned a fair ROE without a WNR in recent periods.¹⁷⁹

133. The Commission has previously approved a WNAR (the WNR counterpart for gas utilities, a Weather Normalization Adjustment Rider) for Liberty-Midstates Natural Gas division in Missouri.¹⁸⁰

134. The weather normalization process for electric utilities is much more complex than for gas utilities, and WNARs for gas utilities are already complex, data intensive, and dependent on billing cycle stability.¹⁸¹ In addition, Empire's proposed WNR is further complicated because it calls for customer specific rate adjustments, compared to the WNAR approved for Liberty-Midstates Natural Gas which has one rate applied to all customers in a class.¹⁸²

135. Empire's proposed WNR is complicated and would likely confuse its customers.¹⁸³ Section 386.266.5 RSMo requires the WNR amount to be separately disclosed on each customer's bill. For customers to understand their bills they would have to understand the concept of heating and cooling degree days, and that "normal" weather used in the WNR charge is different than the normal weather on many websites.

136. Also, customers will be confused if the WNR charge for one month is different from the WNR charge for a different month yet the "difference from normal weather" is identical.¹⁸⁴

¹⁷⁸ Ex.104, Staff Class Cost of Service Report, page 12

¹⁷⁹ Ex. 203C, Mantle Direct, pages 4-5 and Ex. 204, Mantle Rebuttal, pages 2-3.

¹⁸⁰Ex. 123, Stahlman Rebuttal CCOS, page 2.

¹⁸¹ Ex. 160, Kliethermes Supplemental, page 2.

¹⁸² Ex. 123, Stahlman Rebuttal CCOS, page 2.

¹⁸³ Ex. 204, Mantle Rebuttal, pages 4-5.

¹⁸⁴ Ex. 204, Mantle Rebuttal, page 5.

137. In addition to being unnecessarily complex, Empire's proposed WNR would be impossible to implement.¹⁸⁵

138. Under Empire's proposed WNR if an additional person joined the household increasing household electrical usage, that additional usage would be normalized as if caused by weather.¹⁸⁶

139. Empire has also not considered many technical aspects of its proposed WNR, including how or whether the WNR would be applied to estimated bills.¹⁸⁷

140. Empire supports Staff's SRLE with four modifications: (1) adjust for the partial loss of new customer and sales revenues; (2) adjust for customer migration from CB or SH to GP; (3) implement the SRLE on a temporary basis; and (4) implement the SRLE on a calendar basis beginning January 1, 2020.¹⁸⁸

141. Both Empire and Staff's weather normalization models are likely flawed. As many as 15 percent of Empire's residential customers received an estimated bill in 2018 and as many as 26 percent received an estimated bill in December 2019. Staff used a test period of August 2018 through July 2019 for weather normalization. The large percentage of estimated usage caused errors in both Staff's and the Company's weather normalization models.¹⁸⁹

142. Additionally, both Staff's and Empire's weather analysis were impacted by a lack of data used to scale the daily weather adjustments to an overall revenue month.¹⁹⁰

143. Staff's SRLE does not just compensate Empire for the rise and fall of revenue due to weather and conservation. The SRLE attributes any rise and fall of

¹⁸⁵ Ex. 123, Stahlman Rebuttal CCOS, page 2

¹⁸⁶ Ex. 204, Mantle Rebuttal, page 5.

¹⁸⁷ Ex. 204, Mantle Rebuttal, page 5.

¹⁸⁸ Ex. 29, Lyons Surrebuttal and True-Up, pages 5-6.

¹⁸⁹ Ex. 120, Kliethermes Rebuttal, pages 2-4; Ex. 160 Kliethermes Supplemental, pp. 2-3.

¹⁹⁰ Ex. 118, Stahlman Rebuttal, page 2.

revenue to weather or conservation, without considering the cause. The SRLE mechanism assumes a broad interpretation of conservation that includes any energy efficiency measures whether funded by ratepayers or not, as well as any other factor causing changes to the cost of energy sold. This unreasonably broad interpretation of “conservation” would include any customer decisions or actions that reduce or increase energy consumption.¹⁹¹ For example, if a member of a household moved out causing a reduction in usage, the SRLE would attribute that reduction to conservation. Similarly, increases in residential class usage resulting from the current “stay at home” orders in many locations related to COVID-19 would also be attributed to conservation and eligible for SRLE adjustments.¹⁹²

144. OPC believes that the SRLE is likely unlawful as the Commission has not previously promulgated a rule to implement the SRLE.¹⁹³ OPC suggests the Commission promulgate a rule to allow for implementation of a SRLE mechanism.¹⁹⁴

Conclusions of Law

G. Section 386.266.3 RSMo provides that any electrical corporation may make an application to the Commission to approve rate schedules authorizing periodic rate adjustments, outside of general rate proceedings, to adjust rates of customers in eligible customer classes to account for the impact on utility revenues of increases or decreases in residential and commercial customer usage due to variations in either weather, conservation, or both.

¹⁹¹ Ex. 160, Kliethermes Supplemental, page 4.

¹⁹² Ex. 160, Kliethermes Supplemental, pages 7-8.

¹⁹³ Section 386.266.13 RSMo.

¹⁹⁴ EX. 204, Mantle Rebuttal, page 7.

H. Section 386.266.13 RSMo says that the Commission shall have previously promulgated rules to implement the application process for any rate adjustment mechanism under subsections 1 to 3 of this section prior to the commission issuing an order for any such rate adjustment.

Decision

Empire's proposed WNR is complex and would likely confuse customers as it is required to be disclosed separately on each customer's bill, is customer specific, and relies on a determination of normal weather that is not readily accessible. Because weather normalization models are data intensive and dependent on billing cycle stability, the large number of estimated bills in this case skews the results of both Staff's and Empire's weather normalization models. Because the weather modeling is inaccurate, there is potential for over or under-recovery, which is what the WNR is meant to avoid.

Further, the proposed WNR appears to be in violation of Section 386.266.3 RSMo, which requires "rate schedules". The WNR would not create a specific rate that is applicable to all customers under Empire's proposed WNR. Customers would not be able to know what they would be billed for energy prior to using that energy, but would instead have their billable usage modified after that usage had been incurred. The Commission finds that Empire's WNR should be rejected.

Staff contends the Commission's approval of a VIRN for Ameren Missouri in its last gas rate case is somehow supportive of approval of a SRLE in this case. However, that VIRN was approved as part of a settlement agreement and was based upon the facts specific to that case and the operations of the natural gas company in question. In this case, the Commission must analyze the SRLE as proposed in this case, based upon the facts presented in this case, and the operations of Empire.

Staff's SRLE proposal suffers from some of the same data problems as the WNR and does not comply with Section 386.266.3 RSMo. The large number of estimated bills and lack of billing data likely caused flaws in Staff's modeling. Additionally, Staff's proposed SRLE does not comply with Section 386.266.3 RSMo, because it would allow for adjustments due to the impact on revenues of increases or decreases in residential and commercial customer usage not exclusively due to variations in either weather, conservation, or both. While Empire's WNR does not directly account for conservation, Staff's proposed SRLE mechanism attributes any rise or fall of revenue to weather or conservation, regardless of the cause. Usage changes due to customers simply using less energy or customers moving in and out of Empire's service territory would be treated as resulting from conservation and weather. Staff's proposed SRLE is rejected.

Empire's proposed modifications to Staff's SRLE would not alleviate the billing data issues or bring it into compliance with Section 386.226.3 RSMo. Empire's proposed modified SRLE is rejected.

OPC argued it would be unlawful for the Commission to authorize a SRLE, either as proposed by Staff or Empire, based upon its interpretation of Section 386.266 RSMo as requiring the Commission to promulgate implementation rules prior to approving such a mechanism. Because the Commission has determined that both proposed WNR and SRLEs should be rejected on other grounds, a decision on this point is not necessary.

5) FAC

Findings of Fact

145. The Commission first authorized a Fuel Adjustment Clause (FAC) for Empire in its Report and Order in Empire's 2008 rate case (File No. ER-2008-0093) and

it has been continued with modifications in subsequent Empire rate cases.¹⁹⁵ Empire requested the continuation of its FAC pursuant to Section 386.266.1, RSMo.¹⁹⁶ To continue its FAC, Empire is required to file a new general electric rate case every four years.¹⁹⁷

146. In this rate case, Empire seeks to continue its FAC with an updated base cost of energy. The difference between actually incurred fuel costs and the base fuel costs included in rates in this case will be billed or credited to each customer based on the customer's monthly energy usage.¹⁹⁸ The continuation of the FAC will permit Empire to adjust customers' bills twice each year, on June 1st and December 1st, based on the varying costs of fuel used to generate electricity at Empire's generating units and electric energy Empire purchases on behalf of its customers.¹⁹⁹

147. Energy expenses represent a significant portion of the overall costs to operate an electric utility. Empire is mostly a price taker and not a price setter regarding variable energy costs.²⁰⁰

148. Empire's actual total energy costs continue to be relatively large, volatile, and beyond the control of the Company.²⁰¹

149. Even if fuel analysts use production cost models to help calculate an FAC base factor, there are still many assumptions that have to be made, and it is difficult to model the marketplace due to the complex interactions of many factors including resource

¹⁹⁵ Ex. 101, Staff Direct Report, page 91.

¹⁹⁶ Ex. 4, Richard Corrected Direct, page 29.

¹⁹⁷ Section 386.266.5(3) RSMo.

¹⁹⁸ Ex. 4, Richard Corrected Direct, pages 30-31.

¹⁹⁹ Ex. 4, Richard Corrected Direct, pages 31-32, and Schedule SDR-11.

²⁰⁰ Ex. 15, Tarter Rebuttal, page 5.

²⁰¹ Ex. 101, Staff Direct Report, page 95.

costs, unit outages and market prices. One of the primary reasons for having an FAC is that future FAC eligible costs cannot be predicted with certainty.²⁰²

150. The existing FAC base factor, that has been in effect since September 14, 2016, is \$0.02415 per kWh.²⁰³

151. Empire initially requested that the FAC base factor be increased three percent to \$0.02488 per kWh (inclusive of 100 percent recovery of transmission expenses).²⁰⁴ Empire updated its requested FAC base factor (inclusive of 100 percent recovery of transmission expenses) to \$0.02416 per kWh.²⁰⁵

152. Empire incurs Midcontinent Independent System Operator (MISO) transmission costs for 100 MWs of the Plum Point Power Plant in Arkansas. Empire owns a 50 MW share of that plant and has a purchased power contract for the capacity and generation of another 50 MW. Since the purchased power contract is for 50 percent of its total capacity of the Plum Point Power Plant, Empire is currently able to include 50 percent of its MISO costs in its FAC.²⁰⁶

153. Staff calculated Empire's percentage of Southwest Power Pool (SPP) transmission service costs at 32.04 percent with some exclusions,²⁰⁷ which is near the 34 percent currently authorized by the Commission.

154. Empire's current FAC includes 50 percent of MISO non-administrative costs and 34 percent of SPP non-administrative costs. However, no transmission revenues are included in Empire's FAC.²⁰⁸

²⁰² Ex. 1011, Tarter Supplemental, page 8.

²⁰³ Ex. 18, Doll Supplemental Direct, page 4; and Ex. 104, Staff Class Cost of Service, Appendix 2

²⁰⁴ Ex. 14, Tarter Direct, pages 4-5.

²⁰⁵ Ex. 18, Doll Supplemental Direct, page 4.

²⁰⁶ Ex. 204, Mantle Rebuttal, pages 8, 12.

²⁰⁷ Ex. 104, Staff's Class Cost of Service Report, page 39.

²⁰⁸ Ex. 17, Doll Direct, page 7, and Schedule AJD-2, pages 4-5.

155. Those percentages were established in File Nos. ER-2014-0258 and ER-2014-035, and in Empire's most recent rate case, File No. ER-2016-0023, those same percentages were maintained.²⁰⁹

156. Empire proposes including 100 percent of transmission costs in the FAC base factor calculation.²¹⁰ Empire justifies the inclusion of all transmission costs by noting the time it has spent participating in working groups to ensure that customers have access to reliable cost effective energy, and claiming that those efforts have yielded adjusted production cost savings, lower resource adequacy requirements, and the ability to reliably accommodate lower cost generation delivery with increasing efficiency. SPP and MISO have been coordinating on seams efforts but they have completed no projects from that effort.²¹¹

157. The base factor in Empire's FAC should be set based on the base energy cost included in the revenue requirement set in this case.²¹²

158. Empire's FAC tariff involves the accumulation of net energy costs over a six-month period and comparing that cost accumulation to the FAC base factor. Ninety-five percent of this over/under recovery balance is then credited/billed to Empire's customers over a six-month billing period that immediately follows the six-month accumulation period.²¹³

159. Staff identified four accumulation periods that were under-recovered and three that were over-recovered.²¹⁴

²⁰⁹ Ex. 17, Doll Direct, Schedule AJD-2, page 2.

²¹⁰ Ex. 15, Tarter Rebuttal, pages 7-8; and Ex. 17, Doll Direct, page 7.

²¹¹ Ex. 17, Doll Direct, page 7 - 9.

²¹² Ex. 101, Staff Direct Report, page 96.

²¹³ Ex. 4, Richard Corrected Direct, page 31.

²¹⁴ Ex. 161, Mastrogiannis Supplemental, page 3.

160. Staff recommends that the Commission continue to include the current percentages of MISO and SPP non-administrative costs, which are reflective of Empire's transmission costs associated with true purchased power and off-system sales, to be recovered in Empire's FAC.²¹⁵

161. Staff recommends the Commission approve the continuation of Empire's FAC²¹⁶ using a trued-up base factor (inclusive of only transmission costs and revenues Empire incurs for Purchased Power and Off-System Sales) of \$0.02333 per kWh.²¹⁷

162. OPC supports keeping the percent of the transmission costs the same as in Empire's current FAC, but also asks to modify the FAC to include the transmission revenues associated with the applicable transmission costs as well. OPC contends that transmission costs and revenues should match the circumstances impacting the transmission costs and revenues when rates from this case become effective.²¹⁸

163. The Commission has previously only approved appropriate transmission costs in the FAC in Empire's rate cases, along with Evergy Missouri West and Evergy Missouri Metro rate cases, and not transmission revenues.²¹⁹

164. Changing the percentage of transmission costs and revenues Empire includes in its FAC is inconsistent with both prior Commission rulings and with the transmission percentage used by other Missouri investor-owned electric utilities with FACs.²²⁰

165. Empire's current sharing mechanism is a 95/5 ratio²²¹.

²¹⁵ Ex. Mastrogiannis Surrebuttal/True-up Direct, page 2

²¹⁶ Ex. 101, Staff Direct Report, page 92.

²¹⁷ Ex. 137, Mastrogiannis Surrebuttal True-Up Direct, page 2.

²¹⁸ Ex 203, Mantle Direct, page 16.

²¹⁹ Ex. 112, Mastrogiannis Rebuttal, page 4-5.

²²⁰ Ex. 112, Mastrogiannis Rebuttal, page 3.

²²¹ Ex. 112, Mastrogiannis Rebuttal, page 2.

166. Staff recommends continuing that sharing mechanism, where customers would be responsible for, or receive the benefit of, 95 percent of any change in fuel and purchased power costs as defined in the FAC tariff from the base amount included in rates.²²²

167. Empire is proposing to continue the current 95/5 sharing mechanism.²²³

168. OPC proposes changing the FAC sharing mechanism to an 85/15 ratio. OPC believes that a change of the sharing mechanism benefits the public interest by placing a greater incentive on Empire to manage its normalized fuel costs. OPC acknowledges that with an 85/15 sharing mechanism Empire would bear an increased risk, but argues Empire has the ability to influence FAC costs and the customers do not.²²⁴

169. The base fuel factor is only an estimate, and setting the base fuel factor in a rate case requires many assumptions and modeling challenges. Additionally, FAC eligible costs cannot be forecasted with certainty, which is one of the primary reasons for having a FAC in the first place.²²⁵

170. Over the last 11 years, OPC calculates that Empire has collected 99.9 percent of the FAC costs allocated to Missouri's customers, failing to collect less than \$1.5 million of those costs.²²⁶ Empire calculates that over a three-year period it collected about 99.6 percent of the actual FAC costs and had to absorb about \$1.3 million of those costs. Over that same period if the sharing mechanism was 85/15 Empire states it would

²²² Ex. 112, Mastrogianis Rebuttal, pages 2-3.

²²³ Ex. 14, Tarter Direct, page 3.

²²⁴ Ex. 203, Mantle Direct, pages 7 and 12.

²²⁵ Ex. 1011, Tarter Supplemental, page 8.

²²⁶ Ex. 205, Mantle Surrebuttal, page 8.

have collected about 98.9 percent of the actual FAC costs and had to absorb almost \$4 million of those costs..²²⁷

171. OPC argues that 85/15 was the appropriate sharing mechanism based upon Senate Bill 564 (now codified as Section 393.1400 RSMo.), which allows for an 85 percent recovery related to plant in service (PISA) depreciation.²²⁸

172. OPC states that the Legislature's selection of an 85 percent mechanism for PISA provides a more reasonable alternative to the 95/5 incentive mechanism previously adopted by the Commission for Empire's FAC.²²⁹

173. OPC also urges the Commission to change Empire's sharing ratio to 85/15 because of Empire's past hedging practices.²³⁰ In File No. EO-2017-0065, a prudence review of Empire's FAC costs, OPC presented evidence that from the time Empire was granted a FAC through the filing of surrebuttal testimony in that case Empire's hedging policy resulted in losses of over \$95 million.²³¹

174. Hedging losses are a cost that flows through Empire's FAC for recovery from its customers.²³²

175. The Commission did not find Empire's hedging practices or losses were imprudent in File No. EO-2017-0065.²³³ That decision was affirmed by the Missouri Court of Appeals in Case No. WD81627.²³⁴

²²⁷ Ex. 15, Tarter Rebuttal, page 6.

²²⁸ Ex. 203, Mantle Direct, page 13.

²²⁹ Ex. 203, Mantle Direct, page 13.

²³⁰ Ex. 205, Mantle Surrebuttal, page 4.

²³¹ Ex. 205, Mantle Surrebuttal, page 3.

²³² Ex. 205, Mantle Surrebuttal, page 3.

²³³ Ex. 205, Mantle Surrebuttal, page 4-5.

²³⁴ Ex. 17, Doll Direct, page 13.

176. In File No. EO-2017-0065, the Commission considered the value of hedging as analogous to the cost and value of buying earthquake insurance. The Commission stated: “The risk reduction offered by insurance has a value, although that value may not be fully realized until there is an earthquake, just as the value of hedging may not be fully realized until a combination of factors results in a price spike in the natural gas market.”²³⁵

177. After the prudence review in File No. EO-2017-0065 Empire changed its hedging policies.²³⁶ Empire submitted an updated Energy Risk Management Policy dated December 20, 2019. Section four of the Energy Risk Management Policy regarding Empire’s hedging strategy has been streamlined and some of the advanced procurement methods have been eliminated.²³⁷

178. OPC speculates that Empire would have reduced hedging losses if it had been required to absorb 15 percent of the hedging losses,²³⁸ but provides no evidentiary support that Empire would not have had the hedging losses with an 85/15 FAC sharing mechanism.

179. The FAC statute requires utilities to undergo prudency reviews every 18 months and refund imprudently incurred costs plus interest.²³⁹

180. Staff, through its review in this case, and previous reviews in Empire FAC prudency review cases has not found evidence that the current 95/5 sharing mechanism was inadequate and should be changed.²⁴⁰

²³⁵ File No. EO-2017-0065, Amended Report and Order, page 20, issued March 10, 2018.

²³⁶ Ex.205, Mantle Surrebuttal, page 4-5.

²³⁷ Ex. 215, Riley Rebuttal, page 3.

²³⁸ Ex. 205, Mantle Surrebuttal, page 5.

²³⁹ Section 386.266.5(4), RSMo.

²⁴⁰ Ex. 112, Mastrogiannis Rebuttal, page 3.

181. Changing the FAC sharing percentage is inconsistent with both prior Commission rulings and with the transmission percentage used by other Missouri investor-owned electric utilities with FACs.²⁴¹

182. Empire's current agreement with the Missouri Joint Municipal Electric Utility Commission (MJMEUC) is a 5-year agreement for Empire to sell energy and capacity to the cities of Monett, and Mount Vernon, Missouri.²⁴²

183. Empire's energy sold to MJMEUC under the agreement will be billed to the cities by MJMEUC resulting in a reduced portion of Empire's total fuel expense assigned and billed to Empire's retail customers. Empire will also sell energy back to the SPP on behalf of MJMEUC.²⁴³

184. Empire contends, and Staff's concurs, that the language describing the Off-System Sales Revenue (OSSR) portion of Empire's FAC tariff does not allow revenues from the MJMEUC contract, which is a full and partial requirement sales contract, to flow through the FAC, because the OSSR tariff language excludes revenue from full and partial requirement sales to municipalities.²⁴⁴

185. Empire was not opposed to modifying the FAC to allow revenue from the MJMEUC contract to flow through the FAC, so long as any such tariff modification is tethered to the establishment of an AAO or some other sort of vehicle that would allow Empire to create a regulatory asset for the difference in jurisdictional allocations as a result of the contract.²⁴⁵

²⁴¹ Ex. 112, Mastrogianis Rebuttal, page2-3, and Schedule BM-r1

²⁴² Ex. 20, Doll Rebuttal, page 7.

²⁴³ Ex. 20, Doll Rebuttal, pages 7-8.

²⁴⁴ Ex. 137, Mastrogianis Surrebutal True-Up direct, pages 3-4, and Ex. 20 Doll Rebuttal, pages 7-8.

²⁴⁵ Ex. 20, Doll Rebuttal, page 8.

186. Staff was opposed to this modification of the AAO. However, Staff recommends that the Commission order Empire to file additional reporting requirements with its FAC monthly reports and Fuel Adjustment Rate filing workpapers. These additional reporting requirements will demonstrate that the energy purchased from Empire related to the MJMEUC contracts will be billed to the cities via MJMEUC and will thereby reduce a portion of the fuel expense that is allocated and billed to Empire's retail customers. This reduced portion of fuel expense will clearly illustrate that the energy purchased for these specific cities via MJMEUC is not flowing through the FAC in order to be collected from all Empire's retail customers.²⁴⁶

187. OPC agreed with the FAC language that has been in effect along with Empire's proposed changes in this case regarding revenues from MJMEUC contracts. OPC asks that the Commission require, as a part of Empire's monthly FAC filing, a detailed listing of the costs incurred due to the MJMEUC contract.²⁴⁷

188. OPC asked the Commission to prohibit Empire from passing short-term capacity contracts through the FAC by removing from its FAC tariff sheets its ability to recover any costs of capacity, regardless of the length of the contract.²⁴⁸

189. Staff has expressed concerns that the timing of the retirement of Asbury, the addition of a new capacity agreement with a customer, and the new generation resources not being available could lead to a SPP resource adequacy shortfall, which could require Empire to enter into potentially expensive short-term capacity contracts.²⁴⁹

²⁴⁶ Ex. 137, Mastrogiannis Surrebutal True-Up direct, page 4.

²⁴⁷ Ex. 203, Mantle Direct, page 3.

²⁴⁸ Ex. 205, Mantle Surrebutal, page 20.

²⁴⁹ Ex. 111, Luebbert Rebuttal, page 3.

Conclusions of Law

I. The Commission may approve rate schedules for an FAC and may include “features designed to provide the electrical corporation with incentives to improve the efficiency and cost-effectiveness of its fuel and purchased-power procurement activities”.²⁵⁰

J. Commission Rule 20 CSR 4240-3.161(3) establishes minimum filing requirements for an electric utility that wishes to continue its fuel adjustment clause in a rate case subsequent to the rate case in which the fuel adjustment clause was established. Empire has met those filing requirements.

K. FACs are subject to prudence reviews at least every eighteen-months, requiring a refund of any imprudently incurred costs plus interest at the utility’s short-term borrowing rate.²⁵¹

L. Utilities with an FAC are required to file a general rate case with a new rates effective date no later than four years after the effective date of the Commission’s order implementing the FAC.²⁵²

M. Only transmission costs associated with prudently incurred fuel and purchased-power costs may be flowed through an FAC between rate cases.²⁵³

N. Section 393.1400 RSMo, which includes a provision allowing plant in-service accounting, allows 85 percent of the depreciation expense and return to be included for recovery in the electric utility’s rate base in its next general rate case.

²⁵⁰ Section 386.266.1, RSMo.

²⁵¹ Section 386.266.5(4), RSMo.

²⁵² Section 386.266.5(3), RSMo.

²⁵³ Section 386.266.1, RSMo.

O. Under Section 386.266.5, RSMo, the Commission cannot revise Empire's FAC without considering all relevant factors, that may affect the costs or overall rates and charges of the corporation.

Decision

Empire has requested to continue its FAC with an updated base cost of energy, to continue the current 95/5 sharing mechanism, and to modify its current FAC to include 100 percent of transmission costs in the FAC base factor calculation. Because Empire's actual total energy costs continue to be relatively large, volatile, and beyond the control of the Company, the Commission will approve continuation of its FAC.

As to the appropriate sharing mechanism, OPC has proposed changing the FAC incentive ratio for Empire from 95/5 to 85/15. OPC argues that changing the sharing percentages to 85/15 will provide more incentive for Empire to keep net fuel costs as low as possible. Staff and Empire argue that the current sharing mechanism has not been shown to be ineffective and should stay the same. The state legislature gave the Commission the discretion to create the FAC incentives and it is within the Commission's discretion to reevaluate that sharing mechanism. The facts in this case, however, do not show that there is any reason to adjust the sharing mechanism.

The Commission has found on several occasions, and finds here that the 95/5 sharing ratio provides Empire sufficient incentive to operate at optimal efficiency and still provides an opportunity for Empire to earn a fair return on its investment. The evidence in this case also showed that Empire continues to operate efficiently. Staff's witness testified that the 95/5 ratio was an appropriate incentive based on finding no pattern of imprudence during the previous FAC prudence reviews. Additionally, no evidence was presented that Empire acted imprudently or manipulated its FAC to the detriment of

ratepayers. OPC's evidence showed changing the sharing mechanism to 85/15 would provide more pressure on Empire, but not that more pressure is needed. Therefore, the Commission determines that based on the facts in this case, the 95/5 sharing mechanism in Empire's FAC provides the appropriate incentive to properly manage its net energy costs.

OPC's claim that the legislature has provided guidance on the appropriate incentive mechanism sharing percentages by including 15 percent of capital investments in the PISA statute is also not persuasive. The legislature's creation of an unrelated sharing mechanism in another utility statute does not imply the legislature intends those percentages to carry over to the FAC.

The Commission's decision in this case should not be taken as stating that there may never be a change to the sharing percentage or that the Commission will always maintain the status quo. However, in this case the evidence does not support a change in the sharing percentage.

Regarding transmission costs, the Commission is not changing the costs that flow through the FAC. The percentage of transmission costs included in the FAC will remain the same as they are now, which is 34 percent for SPP costs, 50 percent for MISO transmission costs, and no allowance for transmission revenues. This is consistent with Missouri law and prior Commission rulings, which allow only transportation costs related to purchased power to flow through the FAC.

The Commission finds that Staff's trued-up base factor calculation of \$0.02333 per kWh, which incorporates the appropriate percentages of SPP and MISO non-administrative transmission costs, is the appropriate base factor for Empire's FAC.

The Commission disagrees with OPC's contention that revenue from the MJMEUC contract should flow through Empire's FAC. Empire's current FAC tariff language does

not allow revenues from its MJMEUC contract to flow through its FAC. The Commission further finds that the FAC tariff should not be revised to allow revenue from MJMEUC contracts to flow through the FAC.

OPC alternately recommended that Empire be required, as a part of its monthly FAC filing, to provide a detailed listing of the costs incurred due to the MJMEUC contract. The Commission finds OPC's request to be reasonable. The Commission will order additional reporting for Empire to file with its FAC monthly reports and Fuel Adjustment Rate filing workpapers, including a detailed listing of all costs incurred due to the MJMEUC contracts and the revenues that Empire receives from MJMEUC.

Additionally, OPC's recommendation that Empire's FAC be modified to prohibit inclusion of any capacity contracts is not appropriate. There has been no demonstration that Empire will be unable to meet SPP resource adequacy requirements. Any concerns about the appropriateness of short-term capacity cost can be reviewed as part of the FAC prudence review, and the Commission will direct its Staff to do so. Thus, the Commission finds no reason to change Empire's FAC to disallow the pass through of short-term capacity costs.

6) Credit Card Fees

Findings of Fact

190. Currently, each Empire customer who pays their utility bill with a credit card is charged a transaction fee.²⁵⁴ The fee is \$2.25 per residential payment and is imposed by a third party that processes the card payments.²⁵⁵

²⁵⁴ Ex. 101, Staff Direct Report, page 82.

²⁵⁵ Ex. 101, Staff Direct Report, page 103 and Ex. 1, Baker Direct, page 9.

191. For Empire, payment of bills by credit card has increased 36 percent in the last two years from 379,329 transactions in 2016 to 511,195 in 2018.²⁵⁶ Payment by credit card is the second most utilized payment option for Empire customers,²⁵⁷ with 25 percent of Empire's customers paying with credit or debit cards.²⁵⁸

192. Empire proposes the elimination of credit card convenience fees for individual customers, with Empire instead recovering the costs associated with processing online card payments in its overall cost of service.²⁵⁹

193. The fees associated with credit card transactions are similar to bank fees Empire incurs that are already included in the cost of service paid by all customers.²⁶⁰

194. Empire has not projected the number of customers that may pay bills by credit card if no convenience fee is charged to them, but based on current participation, Staff anticipates that the total number of customers paying with credit cards will increase if there is no convenience fee.²⁶¹

195. Empire states that it is important from a customer service perspective to provide its customers the choice to pay online, reducing the amount of customer service representative hours needed to receive and process in-person payments from customers.²⁶²

196. If the Commission approves including credit card fees in Empire's revenue requirement, Staff recommends that the Company be ordered to:²⁶³

²⁵⁶ Ex. 1, Baker Direct, page 9.

²⁵⁷ Ex. 101, Staff Direct Report, page 104.

²⁵⁸ Ex. 200, Conner Direct, page 9.

²⁵⁹ Ex. 2, Baker Rebuttal, page 3.

²⁶⁰ Ex. 1, Baker Direct, page 10.

²⁶¹ Ex. 101, Staff Direct Report, page 104.

²⁶² Ex. 1, Baker Direct, page 10.

²⁶³ Ex. 101, Staff Direct Report, page 105

- a. Track performance and savings to the Company and its customers from this initiative.
- b. Monitor the level of customers using the credit card option, whether the number of payments by credit card increases, and whether eliminating a fee to pay by credit card results in savings to the customer and/or to the Company.
- c. State how the Company will inform customers that there is no fee to pay their bill by credit card.

197. The Commission has previously approved requests to eliminate credit card convenience fees with the utility absorbing credit card processing services in the cost of service.²⁶⁴

198. OPC opposes the elimination of credit card fees. If all Empire's customers are required to pay for credit card fees, they will not only be paying for their own payment method, but also for those who choose to pay with credit or debit cards.²⁶⁵ OPC asserts that the 25 percent of Empire's customers who are using credit cards to pay their electric bills will receive a net economic benefit, to the detriment of Empire's customers who cannot use a credit card to pay their electric bills.²⁶⁶

199. Empire proposes that \$1,297,266 be included in rates for credit card processing fees based on the true-up period.²⁶⁷

²⁶⁴ Ex. 101, Staff Direct Report, page 105, referencing File Nos. GR-2017-0215 & GR-2017-0216.

²⁶⁵ Ex. 200, Conner Direct, page 9.

²⁶⁶ Ex. 201, Conner Rebuttal, page 3.

²⁶⁷ Ex. 7, Richard True-Up Direct, page13.

200. Staff proposes that \$1,165,283 be included in rates for credit card fees based on the test period.²⁶⁸ This amount is based on Staff's jurisdictional allocation factor of 89.09 percent applied to costs booked in Account 903, including credit card fees.²⁶⁹

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The 36 percent increase in the use of credit card payments in just the last two years illustrates that more customers want to pay their utility bills online using a credit or debit card. As bank fees are already recovered in the cost of service, credit card transaction fees should be similarly treated. OPC's argument that 75 percent of Empire's customers who do not use credit cards will pay for the 25 percent who do is not persuasive given that the number of payments by credit card are increasing and the elimination of the credit card transaction fee effectively removes a barrier to more customers paying by credit card. The Commission finds that credit card fees should be included in the Company's revenue requirement so that individual fees are no longer required.

The Commission finds that the appropriate amount of credit card fees to include in Empire's revenue requirement is \$1,165,283 based on the test year period.

The Commission additionally finds it reasonable to order Empire to perform the following tasks: (1) track performance and savings to the Company and its customers from this initiative; (2) monitor the level of customers using the credit card option, whether the number of payments by credit card increases, and whether eliminating a fee to pay

²⁶⁸ Ex. 148, Bolin Additional Evidence.

²⁶⁹ Ex. 129, Bolin Surrebuttal True-Up, page 5 and Ex. 148, Bolin Additional Evidence.

by credit card results in savings to the customer, to the Company, or to both; and (3) state how the Company will inform customers that there is no fee to pay their bill by credit card.

7) Rate Case Expense

Findings of Fact

201. Rate case expense is defined as all incremental costs incurred by a utility directly related to an application to change its general rate levels. These applications are usually initiated by the utility, but rate case expenses may also be incurred as a result of the filing of an earnings complaint case by another party. The largest amounts of rate case expenses usually consist of costs associated with use of outside witnesses, consultants, and external attorneys hired by the utility to participate in the rate case process.²⁷⁰

202. OPC recommends allowable rate case expenses be normalized over three years, because Empire generally files rate cases every three years.²⁷¹

203. Staff recommends allowable discretionary rate case expenses be normalized over two years.²⁷²

204. Empire proposes including an annualized amount of prudent rate case expense and amortizing it over a period of two years.²⁷³

205. Empire has incurred expenses for outside consultants in this rate case.²⁷⁴

206. Empire is required to submit a depreciation study every five years. Empire submitted a depreciation study in File No. ER-2016-0023, Empire's last rate case, which

²⁷⁰ Ex. 101, Staff Direct Report, page 74.

²⁷¹ Ex. 200, Conner Direct, page 6.

²⁷² Ex. 101, Staff Direct Report, page 73.

²⁷³ Ex. 7, Richard True-Up Direct, pp. 13, 16-17; and Ex. 59 Rate Case Expense Workpaper of Sheri Richard.

²⁷⁴ Ex. 101, Staff Direct Report, page 73.

is within five years of this rate case.²⁷⁵ It is appropriate to include a normalized amount, one-fifth of the study cost, in rate case expense in this case.²⁷⁶

207. Empire must perform a line loss study at least every four years. Empire performed a line loss study in 2018, which is within four years of this rate case.²⁷⁷ It is appropriate to include a normalized amount, one-fourth of the study cost, in rate case expense in this case.²⁷⁸ Neither OPC nor Empire oppose a four-year normalization for the line loss study.²⁷⁹

208. Staff recommends assigning Empire's discretionary rate case expenses to both ratepayers and shareholders based upon a 50/50 split, full recovery of the depreciation study over five years, and full recovery of the line loss study over four years.²⁸⁰ Staff calculated \$71,676 in trued-up rate case expense normalized over two years.²⁸¹

209. Rate case expense can benefit both ratepayers and shareholders. Through a rate case, the ratepayer is receiving the opportunity to be provided safe and adequate service at a just and reasonable rate and the shareholder is receiving an opportunity to receive an adequate return on investment.²⁸²

210. Rate case expense sharing creates an incentive and eliminates a disincentive on the utility's part to control rate case expenses to reasonable levels.²⁸³

²⁷⁵ Ex. 101, Staff Direct Report, page 73.

²⁷⁶ Ex. 140, Niemeier Surrebuttal/True-Up, pages 8-9.

²⁷⁷ Ex. 140, Niemeier Surrebuttal/True-up, page 9.

²⁷⁸ Ex. 140, Niemeier Surrebuttal/True-up, page 9.

²⁷⁹ Ex. 201, Connor Rebuttal, page 2, and Ex. 6, Richars Surrebuttal, page 7.

²⁸⁰ Ex. 101, Staff Direct Report, page 74.

²⁸¹ Ex. 156, Bolin Supplemental, page 4 and Ex. 140, Niemeier Surrebuttal True-Up, pages 8-9.

²⁸² Ex. 101, Staff Direct Report, page 74.

²⁸³ Ex. 101, Staff Direct Report, page 74.

211. Utility management has a high degree of control over rate case expense. Generally, the utility determines when, and how often, a rate case is filed. Attorneys, consultants, and other services can either be provided by in-house personnel or can be acquired from an outside party. Rate case expenses subject to a sharing mechanism do not include internal labor costs. Those are included in the cost of service through the payroll and are paid by ratepayers.²⁸⁴

212. Empire says that applying a sharing mechanism to all consultant costs is inappropriate because it does not have an in-house rate design or cost of service department and must contract out for these services. Larger utilities have those in-house services and may recover those costs through rates.²⁸⁵

213. Empire argues that the filing of this rate case was not discretionary. According to Section 386.266.5(3), RSMo, Empire had to file a rate case with the effective date of new rates to be no later than four years after the effective date of the Commission order implementing its FAC, September 9, 2016.²⁸⁶

214. A FAC is a voluntary mechanism that Empire chose to request and chooses to seek continuation of in this case.²⁸⁷

215. Empire also argues that the concept of sharing rate case expense with shareholders is incorrect. Empire asserts that rate case expense is a cost of supplying service to its customers and therefore should be included in its cost of service.²⁸⁸

²⁸⁴ Ex. 101, Staff Direct Report, page 74.

²⁸⁵ Ex. 5, Richard Rebuttal, page 34.

²⁸⁶ Ex. 5, Richard Rebuttal, page 33-34.

²⁸⁷ Ex. 129, Bolin Surrebuttal/True-up, pages 5-6

²⁸⁸ Ex. 5, Richard Rebuttal, page 34.

216. Not all rate case expense is a necessary cost of supplying service to customers. Some rate case expense produces direct benefits to shareholders that are not shared with customers, such as hiring an outside technical expert seeking a higher ROE.²⁸⁹

217. Empire's shareholders stood to benefit from many of the issues raised and litigated by Empire in this case. In this case, Empire has requested a rate of return of 9.95 percent,²⁹⁰ the continuation of its FAC,²⁹¹ elimination of credit card transaction fees,²⁹² a weather normalization mechanism²⁹³, LED lighting trackers,²⁹⁴ inclusion of various incentive compensation packages,²⁹⁵ and other items that Empire wants included in its cost of service.

Conclusions of Law

P. The Commission has broad discretion to determine which expenses a utility may recover from ratepayers. The Missouri Supreme Court has stated that the Commission's statutory power and authority to set rates "necessarily includes the power and authority to determine what items are properly includable in a utility's operating expenses and to determine and decide what treatment should be accorded such expense items."²⁹⁶ The Commission's authority extends to allocating an expense between certain

classes or groups of ratepayers²⁹⁷ and to requiring company shareholders to bear expenses the Commission finds to be unreasonable or unnecessary.²⁹⁸

Q. Subsection 20 CSR 4240-3.160(1)(A) requires that a depreciation study be submitted with a general rate increase request unless Staff received these items during the three years prior to the rate increase request or before five years have elapsed since last receiving said items.

R. To be able to continue or modify a rate adjustment mechanism, such as an FAC, 20 CSR 4240-20.090 (13)(B) requires a utility to have conducted a new line loss study. The end of the twelve month period of actual data collected for use in that study must be no earlier than four years before the date the utility files the general rate proceeding seeking to continue or modify that rate adjustment mechanism.

S. To be able to continue utilizing an FAC, Subsection 386.266.5(3), RSMo requires Empire to “file a general rate case with the effective date of new rates to be no later than four years after the effective date” of the Commission’s order implementing a FAC for Empire. Empire’s last request for an overall increase in rates for electric service was docketed as File No. ER-2016-0023 and the Commission order authorizing the continuation of Empire’s current FAC was effective September 9, 2016. A FAC is a voluntary mechanism.²⁹⁹

T. The Commission has previously found rate case expense sharing was just and reasonable. In a 1986 decision, *In the Matter of Arkansas Power and Light Company*, the Commission adopted Public Counsel’s proposed disallowance of one-half of rate case

²⁹⁷ *State ex rel. City of W. Plains v. Pub. Serv. Comm'n*, 310 S.W.2d at 934.

²⁹⁸ *State ex rel. KCP & L Greater Missouri Operations Co. v. Missouri Pub. Serv. Comm'n*, 408 S.W.3d at 164-165.

²⁹⁹ *State ex rel. KCP & L Greater Missouri Operations Co. v. Missouri Pub. Serv. Comm'n*, 408 S.W.3d at 164-165.

expense.³⁰⁰ The Commission also acknowledged this authority in a number of other cases.³⁰¹

U. The Commission has the legal authority to apportion rate case expense between ratepayers and shareholders. In File No. ER-2014-0370, involving Kansas City Power and Light Company's request for a rate increase the Commission determined that rate case expense should be shared between the ratepayers and shareholders.³⁰² That decision was upheld by the Western District Court of Appeals, which found that "the remedy crafted by the [Commission] was a reasonable exercise of the [Commission's] discretion and expertise in determining just and reasonable expenses to be borne by ratepayers."³⁰³

Decision

In many ways rate case expense is like other common operational expenses that a utility must incur to provide utility services to customers. Since customers benefit from having just and reasonable rates, it is appropriate for customers to bear some portion of the utility's cost of prosecuting a rate case. However, rate case expense is also different from most other types of utility operational expenses in that 1) the rate case process is adversarial in nature, with the utility on one side and its customers on the other; 2) rate case expense produces some direct benefits to shareholders that are not shared with customers, such as seeking a higher ROE; 3) requiring all rate case expense to be paid

³⁰⁰ Report and Order, File No. ER-85-265, 28 Mo. P.S.C. (N.S.) 435, 447 (1986),

³⁰¹ See, *In the Matter of Kansas City Power & Light Company*, Report and Order, File Nos. EO-85-185 and EO-85-224, 28 Mo. P.S.C. (N.S.) 229, 263 (1986), and *In the Matter of Missouri Gas Energy*, Report and Order, File No. GR-2009-0355, 19 Mo. P.S.C. 3d 245, 303 (2010).

³⁰² *In the Matter of Kansas City Power & Light Company's Request for Authority to Implement a General Rate Increase for Electric Service*, Report and Order, File No. ER-2014-0370, issued September 2, 2015.

³⁰³ *In Matter of Kansas City Power & Light Co.'s Request for Auth. to Implement a Gen. Rate Increase for Elec. Serv. v. Missouri Pub. Serv. Comm'n*, 509 S.W.3d 757, 779 (Mo. Ct. App. 2016), reh'g and/or transfer denied (Nov. 1, 2016), transfer denied (Feb. 28, 2017).

by ratepayers provides the utility with an inequitable financial advantage over other case participants; and 4) full reimbursement of all rate case expense does nothing to encourage reasonable levels of cost containment.³⁰⁴

The evidence shows that Empire's shareholders stood to benefit from many of the issues raised and litigated by Empire in this case. In this case, Empire has requested a rate of return of 9.95 percent, the continuation of its FAC, elimination of credit card transaction fees, a weather normalization mechanism, LED lighting trackers, inclusion of various incentive compensation packages, and other items that Empire wants included in its cost of service. It was Empire's decision and entirely within Empire's power to pursue these issues, hire outside consultants to support issues, and to file this rate case.

Empire also argues that there should be no rate case expense sharing because Empire was required to file a rate case pursuant to Section 386.266.5(3), RSMo. This is a requirement tied to the implementation and continuation of Empire's FAC and the FAC is a risk management mechanism that primarily benefits Empire. Empire knew when it requested a FAC that it would have to file a rate case in four years.

Therefore, it is just and reasonable that the shareholders and the ratepayers, who both benefited from the rate case, share in the rate case expense. The Commission finds that in order to set just and reasonable rates under the facts in this case, the Commission will require Empire's shareholders to cover a portion of Empire's rate case expense. The Commission will assign Empire's discretionary rate case expense to both ratepayers and shareholders based upon a 50/50 split.

The Commission finds Staff's recommendation to normalize discretionary rate case expense over two years to be appropriate. Empire's proposal to amortize rate case

³⁰⁴ Amended Report and Order, File No. GR-2017-0215, page 52, issued March 7, 2018.

expense would be treating it differently than other classes of expenses. OPC's recommendation of a three year normalization is inappropriate given Empire's intention to file its next rate case within a year.

Because conducting a depreciation study and line loss study are required by Commission rule, it is appropriate that ratepayers bare their full cost. However, since they are not required to be performed annually, it is not appropriate to include their full cost in rates in this case. The Commission finds that Empire should be allowed full recovery of the depreciation study over five years and full recovery of the line loss study over four years, because that is the period set out in the rule for their frequency.

The Commission determines that the appropriate amount of rate case expenses to include in Empire's revenue requirement is \$71,676 annually, for two years. That amount includes the normalized cost of the depreciation study from the prior rate case, and the normalized cost of the line loss study.

8) Management expense

Findings of Fact

218. OPC asks the Commission to disallow officer (\$34,618) and management (\$3,673,266) expenses for Empire for a total amount of \$3,707,884, through the test year period.³⁰⁵

219. OPC states that Empire lacks formal policies and procedures regarding travel expenses, and these amounts should be removed to protect ratepayers from reimbursing Empire for expenses that do not help the company provide safe and adequate service to its customers. OPC calculated disallowances for local meals,

³⁰⁵ Ex. 202, Conner Surrebuttal True-Up, page 4.

excessive charges for travel, and gifts and celebrations for the company and employees.³⁰⁶

220. Among other officer expense charges that OPC identified as being partially allocated to Empire's rate payers are trips to Bermuda (\$904.32), Australia (\$268.77), and London and Peru (\$2,268.09) totaling \$3,441.17.³⁰⁷ Empire states that the Bermuda trip was never allocated to Empire or included in its cost of service.³⁰⁸

221. OPC differentiated between officer expenses and management expenses and between meals and other officer expenses. While OPC reviewed officer expense account charges, it did not review any manager expenses. OPC simply applied its percentage disallowance of officer meals and other expenses to management expense charges without any review of manager expense account charges.³⁰⁹ OPC's disallowance of other officer expenses at the end of the test year was \$31,914 of which \$904 were related to the Bermuda trip.³¹⁰ These disallowances were for officer expense account charges that included excessive meal charges, alcohol, gifts, celebrations, unsupported expense claims and other charges that do not provide benefits to Empire rate payers.³¹¹

222. OPC disallowed \$2,704 in officer meals through the test year.³¹² Lunchtime may be the only time available for some internal meetings, and most of the people attending those meetings are not paid for the additional hours. Providing a meal incentivizes attendance and allows for additional productive time.³¹³

³⁰⁶ Ex. 200, Conner Direct, page 8.

³⁰⁷ Ex. 299, Conner Supplemental testimony, page 4.

³¹² Ex. 202, Conner Surrebuttal, ACC-S-1.

³¹³ Ex. 5, Richard Rebuttal, page 30.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Some management expenses that do not benefit ratepayers should be disallowed. Empire's justifications for providing meals to compensate for unpaid hours and incentivize attendance seems reasonable. The Commission finds that other officer expenses for trips to Australia, London, and Peru should be disallowed as they have no reasonable connection to providing safe and adequate service to ratepayers. Since the Bermuda trip was not included in Empire's cost of service, no adjustment is necessary. The additional other officer expense disallowances recommended by OPC also appear reasonable in that the charges provide no benefits to ratepayers.

The Commission does not find credible OPC's contention that if an average amount of corporate officer expenses are found to be excessive and should be disallowed that an identical percentage of all lower level manager expenses should be assumed to also be excessive. An analysis of at least a sample of management expense reports would be necessary to support any relationship of application of officer expense disallowance percentages to management. Therefore, the Commission disallows \$31,010 of other officer expense charges and allows the remaining \$3,676,874 to be recovered in Empire's cost of service.

9) Allowance for Funds Used During Construction

Findings of Fact

223. On June 1, 2018, Empire borrowed \$90 million from LUCo to refinance Empire's \$90 million of first mortgage bonds. The terms of Empire's \$90 million

promissory note were a 15-year term at a 4.53 percent interest rate and a \$450,000 origination fee along with a “make whole” provision.³¹⁴

224. LUCo drew \$90 million from its credit facility under short-term conditions in order to lend Empire \$90 million.³¹⁵

225. LUCo was not charged a \$450,000 origination fee as part of issuing the \$90 million from its credit facility. Hence, LUCo charged Empire for issuance costs for long-term debt that was never issued but were instead borrowed from the LUCo credit facility.³¹⁶

226. Empire did not solicit any bids for the refinancing of the \$90 million first mortgage bond. Instead LUCo based the rate for this promissory note upon the most recent competitively bid private long-term debt placement by a LUCo affiliate, Liberty Utilities’ Finance GP1 (LUF), in March 2017.³¹⁷

227. On March 24, 2017, LUF (LUCo’s debt financing platform) issued \$750 million of Series E debt, which consisted of six tranches³¹⁸:

- a. Tranche 1- \$100 million (3-year maturity, 2.78 percent coupon),
- b. Tranche 2 - \$80 million (5-year maturity, 3.30 percent coupon),
- c. Tranche 3 - \$70 million (7-year maturity, 3.69 percent coupon),
- d. Tranche 4 - \$250 million (10-year maturity, 3.94 percent coupon),
- e. Tranche 5 - \$21 million (20-year maturity, 4.54 percent coupon), and
- f. Tranche 6 - \$229 million (30-year maturity, 4.89 percent coupon).

³¹⁴ Ex. 220, Schallenberg Direct, page 12.

³¹⁵ Ex. 220, Schallenberg Direct, page 14, and Ex. 43, Timpe Rebuttal, page 3.

³¹⁶ Ex. 220, Schallenberg Direct, page 15.

³¹⁷ Ex. 129, Bolin Surrebuttal True-Up, page 11.

³¹⁸ Ex. 299-17, OPC Reply to Testimony Responding to Commission Questions of David Murray, page 3

228. The weighted average cost of the six tranches was 4.00 percent and the weighted average maturity was 14.75 years. If Empire had been assigned an implied 15-year tenor based on March 24, 2017 debt, the cost of this debt, which would have been based on applying 50 percent weight to Tranche 4 and 50 percent weight to Tranche 5, would be 4.24 percent.³¹⁹

229. Empire states that there was a need to replace maturing long-term debt with new long-term debt and that LUCo's financing approach allows all of its subsidiaries to benefit from access to a larger pool of potential lenders.³²⁰

230. Empire stresses that refinancing \$90 million of maturing long-term bonds with short-term debt violates basic principles of financing which seek to match the term of borrowing with the expected life of the asset and its cash flow recovery. Empire states that short-term borrowing such as commercial paper carries a lower interest rate than long-term borrowing, but there are additional risks and interest rate volatility.³²¹

231. Staff's assessment indicated that with Empire's current credit rating it could have obtained long-term debt at 3.4 percent, which is lower than the 4.53 percent LUCo is charging Empire.³²² However, there is no objective way to estimate what Empire's cost of debt may have been without competitive bidding because it no longer directly issues debt to third-party investors.³²³

³¹⁹ Ex. 299-17, OPC Reply to Testimony Responding to Commission Questions of David Murray, page 3.

³²⁰ Ex. 44, Cochrane Surrebuttal, pages 8-9.

³²¹ Ex. 44, Cochrane Surrebuttal, page 11.

³²² Ex. 130, Chari Surrebuttal, page 11, and Ex. 156, Bolin Supplemental, page 6.

³²³ Ex. 210, Murray Direct, page 8.

232. Under the Commission's applicable Affiliate Transactions Rule, Empire should not be charged more than the fully distributed cost or fair market value, whichever is less.³²⁴

233. The average cost of LUCo's short-term debt for the 12-month period ending January 31, 2020, is 2.15 percent.³²⁵

234. Short-term debt is usually a component of a utility's capital structure. However, if it is fully supporting construction work in progress (CWIP), then it is typically excluded from the rate making capital structure, and, instead, is reflected in the Allowance for Funds used During Construction (AFUDC) rate.³²⁶

235. AFUDC rate includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used.³²⁷

236. The formula and inputs for calculating the AFUDC rate are³²⁸:

$$A_i = s(S/W) + d(D/D + P + C)(1-S/W)$$

$$A_e = [1-S/W][p(P/D+P+C)+c(C/D+P+C)]$$

A_i = Gross allowance for borrowed funds used during construction rate.

A_e = Allowance for other funds used during construction rate.

S = Average short-term debt.

s = Short-term debt interest rate.

D = Long-term debt.

d = Long-term debt interest rate.

P = Preferred stock.

p = Preferred stock cost rate.

C = Common equity.

c = Common equity cost rate.

³²⁴ Ex. 211, Murray Rebuttal page 9.

³²⁵ Ex. 156, Bolin Supplemental, page 5.

³²⁶ Ex. 210, Murray Direct, page 5.

³²⁷ Ex. 60, Electric Plant Instructions.

³²⁸ Ex. 60, Electric Plant Instructions.

W = Average balance in construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment and fabrication, less asset retirement costs related to plant under construction.

237. Empire's position is the AFUDC rate must be calculated based on the "actual book value", as prescribed in the FERC Uniform System of Account (USOA), which is outlined in Electronic Code of Federal Regulations: Title 18, Chapter 1, Subchapter C, Part 101.³²⁹

238. The USOA formula is logical and reasonable for companies financially managed as stand-alone companies because their capital structures are actively managed for purposes of maintaining reasonable capital balances, which includes the use of short-term debt as bridge financing to fund CWIP.³³⁰

239. Empire is no longer financially managed as a stand-alone entity, so the dividend payout ratio is different. Over the last two quarters, Empire has retained all of its earnings rather than distributing dividends to LUCo. This distorts how AFUDC is determined.³³¹

240. If Empire would have still paid the dividends to outside shareholders, it would be required to issue short-term debt to help fund its capital expenditures. This would result in a lower capitalization rate for purposes of determining AFUDC.³³²

241. OPC supports either funding all of Empire's CWIP at the short-term debt rate or including the short-term debt in the Rate of Return.³³³

³²⁹ Ex. 60, Electric Plant Instructions; and Empire's Statement of Position, page 13.

³³⁰ Ex. 210, Murray Direct, page 15, lines 15-16.

³³¹ Ex. 210, Murray Direct, page 15.

³³² Ex. 210, Murray Direct, page 15.

³³³ Ex. 210, Murray Direct, page 15.

242. OPC also supports removing the \$450,000 origination fee and excess interest rate from Empire's \$90 million promissory note from rate base; however, there is no direct testimony to support this.

Conclusions of Law

V. Commission Rule 20 CSR 4240-20.015 (1)(B) defines an affiliate transaction as:

Affiliate transaction means any transaction for the provision, purchase or sale of any information, asset, product or service, or portion of any product or service, between a regulated electrical corporation and an affiliated entity, ...

W. Commission Rule 20 CSR 4240-20.015 (2)(A) States that:

A regulated electrical corporation shall not provide a financial advantage to an affiliated entity. For the purposes of this rule, a regulated electrical corporation shall be deemed to provide a financial advantage to an affiliated entity if—

1. It compensates an affiliated entity for goods or services above the lesser of—
 - A. The fair market price; or
 - B. The fully distributed cost to the regulated electrical corporation to provide the goods or services for itself; or
2. It transfers information, assets, goods or services of any kind to an affiliated entity below the greater of—
 - A. The fair market price; or
 - B. The fully distributed cost to the regulated electrical corporation.

X. Commission Rule 20 CSR 4240-20.015 (2)(B) states that:

Except as necessary to provide corporate support functions, the regulated electrical corporation shall conduct its business in such a way as not to provide any preferential service, information or treatment to an affiliated entity over another party at any time.

Y. Commission Rule 20 CSR 4240-20.015 (3)(A) sets forth evidentiary standards for affiliate transactions :

When a regulated electrical corporation purchases information, assets, goods or services from an affiliated entity, the regulated electrical corporation shall either obtain competitive bids for such information, assets, goods or services or demonstrate why competitive bids were neither necessary nor appropriate.

Z. The Commission's affiliate transaction regulations require that Empire utilize a Cost Allocation Manual (CAM) with regard to its transactions with affiliated companies.³³⁴

AA. In File No. EM-2016-0213, the Commission approved a stipulation and agreement in which the joint applicants agree they would not obtain Empire financing services from an affiliate, unless such services comply with Missouri's Affiliate Transaction Rules.

BB. The presumption of prudence does not apply to affiliate transactions. The affiliate transaction rules were enacted in an effort to prevent regulated utilities from subsidizing their non-regulated activities. To presume that a regulated utility's costs in a transaction with an affiliate were incurred prudently is inconsistent with these rules.³³⁵

Decision

The Commission finds the \$90 million promissory note does not comply with the Commission's Affiliate Transactions Rules. By refinancing the first mortgage bonds at a higher rate of interest than the short-term debt rate of its source, LUCo received a financial advantage. Empire executed a 15-year promissory note with LUCo at an interest rate of 4.53 percent and with a \$450,000 origination fee and "make whole" provision. There is no way to determine what the market interest rate would have been had Empire issued long term debt, because there were no competitive bids to determine market value. However, in financing the \$90 million through its credit facility, LUCo incurred a lower rate of debt than what it charged Empire and no origination fee. Therefore Empire did not pay the fully distributed cost for the loan given that there were no competitive bids to determine

³³⁴ 20 CSR 4240-20.015.2(E) and .3(D).

³³⁵ *Office of the Public Counsel v Mo.PSC* 409 S.W.3d 371 (Mo. 2013).

the market value. Given the Commission's decision on the appropriate capital structure in issue one, the \$90 million loan will not impact the revenue requirement through the Rate of Return.

In addition, the Commission finds credible evidence that the \$90 million does impact the rate base through the AFUDC calculation. Therefore, for the purpose of the AFUDC calculation, the \$90 million note should be treated as short-term debt. The Commission finds that the appropriate cost of debt for Empire's \$90 million note should have been 2.15 percent and not 4.53 percent. The Commission does not find Empire's argument persuasive that the AFUDC calculation should be based on the "actual book balances" in situations where Empire's financing was not in compliance with the Affiliate Transaction Rules. The Commission also does not find OPC's argument persuasive that Empire should be required to apply its cost of short-term debt to 100 percent of its CWIP balances to determine the AFUDC rate to calculate additions to the rate base.

In this Report and Order, the Commission followed OPC's recommendation to base Empire's capital structure on LUCo's capital structure, which the Commission finds is the appropriate way to address the impact of this affiliate transaction on the rate base. However, the Commission additionally finds that to the degree that any of the \$450,000 origination fee from Empire's \$90 million promissory note was included in the AFUDC calculation; it should be removed from rate base.

10) Cash Working Capital

Findings of Fact

243. Cash working capital (CWC) refers to the net funds required by Empire to finance goods and services used to provide service to customers.³³⁶

³³⁶ Ex. 26, Lyons Direct, page 44.

244. Empire determined the CWC requirement using a lead-lag study, which compares the net difference between the revenue lag and expense lead.³³⁷

245. The revenue lag represents the number of days from the time customers receive their electric service to the time customers pay for electric service, while the expense lead represents the number of days from the time the Company receives goods and services used to provide electric service to the time payments are made for those goods and services. Together, the revenue lag and expense leads are used to measure the lead-lag days.³³⁸

246. If Empire has income tax expense, then its lead days for income tax expense would be applied to the approved level consistent with the IRS's payment schedule.³³⁹ Empire has income tax expense included in its cost of service.³⁴⁰ Empire calculated lead days for federal and state income taxes based on the number of days from the midpoint of the applicable tax period to the payment IRS dates.³⁴¹ Empire's tax paying affiliate does make quarterly payments to the IRS.³⁴² Empire determined that the appropriate number of expense lag days for its income tax lag was 39.38 days.³⁴³

247. OPC argued that an expense lag of 365 days should be used to measure income tax lag due to Empire's lack of income tax liability.³⁴⁴

248. The appropriate number of lag days is 39.38 because the Internal Revenue Code requires that corporate income taxes be paid on a quarterly basis.³⁴⁵

³³⁷ Ex. 26, Lyons Direct, page 44.

³³⁸ Ex. 26, Lyons Direct, page 44.

³³⁹ Ex. 27, Lyons Rebuttal, page 4.

³⁴⁰ Ex. 124, Staff True-Up Accounting Schedule 9, page 5.

³⁴¹ Ex. 26, Lyons Direct, page 50.

³⁴² Ex. 1018, Richard Responsive Supplemental Testimony, page 4.

³⁴³ Ex. 26, Lyons Direct, Schedule TSL-SR1.

³⁴⁴ Ex. 216, Riley Surrebuttal, pages 3-5.

³⁴⁵ Section 6655 Internal Revenue Code.

249. Empire calculated lead days associated with cash vouchers based on a stratified sample of invoices paid with different weights for lead days in each stratum determined by a proportion of the total stratum transactions. Empire calculated 29.21 as the appropriate number of expense lag days for cash vouchers.³⁴⁶

250. Staff did not base its calculation on the number of transactions in each stratum, but instead accounted for the dollar amount of invoices in each class because lag is calculated based upon a dollar amount. Staff calculated 35.14 as the appropriate number of expense lag days for cash vouchers.³⁴⁷

251. Staff's cash voucher lag is consistent with previous Empire rate cases. The cash voucher lag from Empire's most recent rate case, File No. ER-2016-0023 was 35.28 days.³⁴⁸

252. Empire included bad debt expense in CWC, and calculated 42.13 as the appropriate number of lag days.³⁴⁹ Empire's calculation reflects a collection lag from the time a customer bill is considered uncollectible and charged to bad debt expense to the time payment is received from customers.³⁵⁰

253. CWC measures the timing of a utility's cash flow that includes the revenues received from the customers and all of the payments made by the utility, because bad debt is a non-cash item Empire does not make payments to a supplier or other outside entity for bad debt, so the appropriate number of lag days is zero.³⁵¹

³⁴⁶ Ex. 27, Lyons Rebuttal, page 5-6.

³⁴⁷ Ex. 132, Giacone Surrebuttal, pages 5-6.

³⁴⁸ Ex. 132, Giacone Surrebuttal, page 8.

³⁴⁹ Ex. 26, Lyons Direct, Schedule TSL-SR1.

³⁵⁰ Ex. 27, Lyons Rebuttal, page 7.

³⁵¹ Ex. 132, Giacone Surrebuttal, page 4.

254. Empire's vacation leave policy covers a calendar year and employees are granted their leave on January 1st of each year, which they can use throughout that calendar year. However, the policy allows for a deferral of up to five days of vacation to the following calendar year, to be used within the first quarter.³⁵²

255. Empire assumes the traditional approach, that most employees take their vacation uniformly throughout the year. Employees receive their vacation allotment on January 1st and take their vacation by December 31st. This approach assumes that vacation is taken at the midpoint of the year. Thus, the appropriate number of lead days to use for vacation pay is 182.50 days.³⁵³

256. Staff argued that an adjustment to the traditional approach for vacation day lag was needed to account for the five days of vacation Empire employees can carry over to the following year.³⁵⁴ While Staff proposed a numerical adjustment in its stated position on this issue, it did not offer any supportive evidence into the record.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that the appropriate expense lag days for income tax is 39.38 days.

The Commission finds that the appropriate expense lag days for cash vouchers is 35.14 days.

³⁵² Ex. 132, Giacone Surrebuttal, page 2.

³⁵³ Ex. 27, Lyons Rebuttal, page 7.

³⁵⁴ Ex. 132, Giacone Surrebuttal, page 3.

The Commission finds that bad debt expense is a component of CWC, and the appropriate expense lag days for bad debt is zero days, because no cash is expended for bad debt.

The Commission finds that the appropriate number of expense lag days for employee vacation is 182.5 days.

11) Accumulated Deferred Income Tax

Findings of Fact

257. Empire's Accumulated Deferred income taxes (ADIT) represents, a net prepayment of income taxes by customers prior to tax payment by Empire.³⁵⁵

258. Empire may deduct depreciation expense on an accelerated basis for income tax purposes, the amount of depreciation expense used as a deduction for income tax purposes by Empire is considerably higher than the amount of depreciation expense used for ratemaking purposes. This results in what is referred to as a “book-tax timing difference,” and creates a deferral of income tax reserves to the future. The net credit balance in the ADIT accounts reserve represents a source of cost-free funds to Empire. Therefore, Empire’s rate base is reduced by the ADIT balance to avoid having customers pay a return on funds that are provided cost-free.³⁵⁶

259. The net operating loss (NOL) is the result of Empire’s use of the 50 percent first-year bonus depreciation that was available to utilities prior to the 2017 Tax Cuts and Jobs Act.³⁵⁷

³⁵⁵ Ex. 101, Staff Direct Report, page 24.

³⁵⁶ Ex. 101, Staff Direct Report, pages 24-25.

³⁵⁷ Ex. 5, Richard Rebuttal, page 8.

260. If the use of accelerated tax depreciation reduces current income tax expense to a negative number, a NOL results. NOLs are carried forward to possibly offset future current income tax expense and cash outflows.³⁵⁸

261. The IRS has issued private letter rulings providing that an NOL deferred tax asset resulting from accelerated tax depreciation should be offset against a plant deferred tax liability also resulting from accelerated tax depreciation for ratemaking purposes.³⁵⁹

262. OPC's argument that Empire is not entitled to a reduction for a NOL because Empire is included in the consolidated income tax return filed by the Liberty Utilities, denies Empire a reduction it would otherwise be allowed as a stand-alone company.³⁶⁰

263. General ledger account 190.125 (Financial Accounting Standard (FAS) 123) is the deferred tax asset for stock-based compensation. Normalized payroll did not include any stock-based compensation, so any deferred tax impact of stock-based compensation expense should not be included in ADIT balances for rate base.³⁶¹

264. Empire provided no persuasive evidence as to why FAS 123 should be included in ADIT.³⁶²

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Empire's use of accelerated tax depreciation reduced Empire's income tax expense to a negative number, which resulted in an NOL. The NOL offsets the ADIT

³⁵⁸ Ex. 5, Richard Rebuttal, page 8.

³⁵⁹ Ex. 5, Richard Rebuttal, page 9.

³⁶⁰ Ex. 216, Riley Surrebuttal, page 3.

³⁶¹ Ex. 131, Foster Surrebuttal True-Up, page 2.

³⁶² Ex. 5, Richard Rebuttal, page 7.

liabilities. This is appropriate since the NOL did not reduce current income tax payments and did not provide the company with a no-cost source of capital. OPC's argument that Empire's NOL should be disregarded because Empire is included in Liberty Utilities' consolidated tax return fails to explain how the deferred NOL income tax benefit of accelerated depreciation should be accounted for and deprives Empire of what it would otherwise be allowed as a stand-alone company. The Commission finds that Empire's booked accumulated deferred federal income tax should include a reduction for the NOL.

Empire provides no persuasive evidence as to why FAS 123 should be included in ADIT, but merely argues that if the underlying stock-based compensation is included by the Commission in normalized payroll levels, the FAS 123 deferred tax asset should also be included in the ADIT balances. The Commission finds that the FAS 123 deferred tax asset for stock-based compensation should not be included in ADIT balances for rate base since it accepts Staff's normalized payroll levels that exclude stock-based compensation.

12) Tax Cut and Jobs Act of 2017 federal income tax rate reduction from 35% to 21% impact for the period January 1 to August 30, 2018

Findings of Fact

265. The Commission opened File Nos. ER-2018-0228 and ER-2018-0366 to consider the impact of the Tax Cuts and Jobs Act of 2017 (TCJA) and to appropriately adjust the Company's rates following the passage of Section 393.137 RSMo. The Commission directed Empire to establish a regulatory liability to address the impact of the TCJA on Empire's rates from the date of the tax rate reduction to the effective date of

lower base rates for Empire (January 1, 2018 - August 30, 2018), also known as the stub period.³⁶³

266. The Commission ordered Empire to defer approximately \$11.7 million of stub period tax savings benefits (stub period revenue) on its balance sheet as a regulatory liability.³⁶⁴

267. The Commission did not address any ratemaking treatment regarding the stub period revenue in File No. ER-2018-0366, including whether the stub period revenue can or should be returned to the ratepayers, but postponed that decision to be addressed in this general rate case.³⁶⁵

268. Staff's proposal that the Commission amortize the regulatory liability over five years and not include the unamortized balance of the stub period revenue regulatory liability in rate base³⁶⁶ is reasonable and aligns with the intent of the legislature in enacting Section 393.137 RSMo.

269. Empire's argument that it would be inequitable to return the stub period revenue to the ratepayers, and that it earned less than its allowed return during the stub period³⁶⁷ is both irrelevant and is credibly contradicted by OPC's witness, whose analysis of the Empire's financial surveillance reports for the 12-month period ending September 30, 2018, indicate that Empire was substantially exceeding its authorized ROE.³⁶⁸

270. OPC states that the \$11.7 million represents interest free money to Empire and that the Commission usually adjusts a company's rate base for its use of interest free

³⁶³ Ex. 4, Richard Corrected Direct, page 13.

³⁶⁴ Ex. 101, Staff Direct Report, page 55.

³⁶⁵ Ex. 4, Richard Corrected Direct, page 13.

³⁶⁶ Ex. 101, Staff Direct Report, page 56.

³⁶⁷ Ex. Ex. 4, Richard Corrected Direct, page 13.

³⁶⁸ Ex. 214, Riley Direct, page 5.

money from its retail customers. OPC suggests that any unamortized balance should be an offset from rate base.³⁶⁹

271. The stub period revenue represents a tax benefit received by Empire over a relatively short period of time; recognizing that benefit over a finite five-year period is more appropriate than including this amount in rates as a long-term reduction to rate base.³⁷⁰

272. Amortizing the stub period revenue over five years with no rate base offset for the unamortized amount is consistent with prior rate treatment of many extraordinary deferrals granted by the Commission in that it effectively “shares” the financial impact of the extraordinary event in question between the utility and its customers. Passing on to customers the dollar value of the TCJA tax benefits in rates over time through an amortization, but excluding the unamortized amount from rate base, appropriately shares the benefit of unanticipated windfalls such as the stub period revenue between a utility and its customers.³⁷¹

273. The amortization of the TCJA stub period revenue over five years reduces Empire’s total amortization expense by \$2,345,691.³⁷²

274. Staff’s position to amortize over five years with no rate base offset for the unamortized amount is the most fair and equitable treatment of the impact of the TCJA for ratemaking purposes.³⁷³

³⁶⁹ Ex. 215, Riley Rebuttal, page 2.

³⁷⁰ Ex. 154, Oligschlaeger Surrebuttal, page 6.

³⁷¹ Ex. 154, Oligschlaeger Surrebuttal, page 6.

³⁷² Ex. 102, Staff Direct Accounting Schedules.

³⁷³ Ex. 154, Oligschlaeger Surrebuttal, page 6.

Conclusions of Law

CC. Section 393.137.3, RSMo, states in part:

If the rates of any electrical corporation to which this section applies have not already been adjusted to reflect the effects of the federal 2017 Tax Cut and Jobs Act, ... the commission shall have one time authority ... to adjust such electrical corporation's rates prospectively so that the income tax component of the revenue requirement used to set such an electrical corporation's rates is based upon the provisions of such federal act without considering any other factor as otherwise required by section 393.270. The commission shall also require electrical corporations ... to defer to a regulatory asset the financial impact of such federal act on the electrical corporation for the period of January 1, 2018, through the date the electrical corporation's rates are adjusted on a one-time basis as provided for in the immediately preceding sentence. The amounts deferred under this subsection shall be included in the revenue requirement used to set the electrical corporation's rates in its subsequent general rate proceeding through an amortization over a period determined by the commission.

DD. The Commission ordered Empire in File No. ER-2018-0366, to record a \$11.7 million regulatory liability, representing the financial impact of the Tax Cut and Jobs Act of 2017 on Empire for the stub period, January 1, 2018 through August 30, 2018.

Decision

Section 393.137.3, RSMo required Empire to defer the stub period revenue amount of \$11.7 million. The statute also requires the Commission to include the deferred stub period revenue in its revenue requirement in Empire's subsequent rate case and amortize those amounts over a period determined by the Commission.

Empire's assertions that being ordered to return the stub period revenue would constitute retroactive ratemaking or that the amounts should not be returned because they were lawfully collected under Empire's approved tariff are overcome by the clear language of the statute; which specifically references the stub period: "the period of January 1, 2018, through the date the electrical corporation's rates are adjusted on a one-

time basis.” The stub period revenue is to be included in the revenue requirement and amortized over a period of time.

Likewise, OPC’s argument that the stub period revenue should be immediately returned to the customers through a rate base adjustment is not contemplated by the statute. The Commission finds that the stub period revenue, the TCJA \$11.7 million regulatory liability established in File No. ER-2018-0366, shall be amortized as a reduction to Empire’s total amortization expense over five years with no rate base offset for the unamortized amount.

13) Asbury and AAO

Findings of Fact

172. For ratemaking purposes, a “Test Year” uses the test year income statement as a starting point for determining a utility’s existing annual revenues, operating costs, and net operating income. An “Update” is a period used to consider factors that occur subsequent to the test year through a specific date. Updating a case does not change the test year, but rather, adjusts the test year to reflect audited results associated with factors considered through the update period. It represents the last date through which historical data is available to be audited.³⁷⁴

173. In a rate case, a “True-Up” can be used when significant changes in a utility’s cost of service occur after the end of the update period for the test year but prior to the operation-of-law date.³⁷⁵

174. In this case, the Commission issued an order that established the test year as the 12 months ending March 31, 2019, with an update period through September 30,

³⁷⁴ Ex. 101, Staff’s Direct Report, pages 1-3.

³⁷⁵ Ex. 101, Staff’s Direct Report, page 2.

2019. The order also allowed for items to be trued-up through January 31, 2020, based off of known and measurable information.³⁷⁶

175. The Commission denied a motion by OPC to modify the test year to include isolated adjustments for the retirement of the Asbury coal-fired power plant.³⁷⁷

176. Asbury was an approximately 200 MW cyclone steam generator commissioned in 1970, which burned a blend of low-sulfur Wyoming coal and local bituminous coal. In 2014, Empire retrofitted Asbury with an air quality control system, which was intended to extend the expected retirement date of the plant from 2030 to June 2035.³⁷⁸

177. In June 2019, Empire addressed the Asbury plant in its Triennial Integrated Resource Plan (IRP). Empire's IRP modeling showed that in 2018, Asbury had a 48 percent average capacity factor and because of the additional capital investment necessary to meet environmental regulations relating to Asbury's coal ash handling system and the energy market created by the SPP³⁷⁹ integrated marketplace, the Asbury plant was not a cost-effective resource.³⁸⁰

178. Empire planned to close the Asbury plant no later than June 2020 in order to avoid the additional investment that would be required to comply with environmental regulations governing coal ash. Asbury would not have been allowed to operate beyond

³⁷⁶ See Commission's October 17, 2019 Order Setting Procedural Schedule and Other Procedural Requirements.

³⁷⁷ Order Denying Public Counsel's Motion to Modify the Test Year, and Order to File Suggestions for Inclusion in an Accounting Authority Order. January 28, 2020.

³⁷⁸ Ex. 203, Mantle Direct, pages 21-22.

³⁷⁹ SPP is a regional transmission organization that provides electric transmission services on behalf of its transmission-owner members pursuant to its regional tariff. *E. Texas Elec. Coop., v. F.E.R.C.*, 331 F.3d 131, 133 (D.C. Cir. 2003).

³⁸⁰ Ex. 41, Wilson Direct, page 6; See also, Empire's 2019 IRP filed June 28, 2019, in File No. EO-2019-0049.

that time without making considerable investments or incurring significant costs to dispose of the coal ash.³⁸¹

179. Empire identified certain Asbury assets to be reused and/or repurposed for the operations and maintenance (O&M) of other generation units, including basing the O&M of its future wind farms at the Asbury facility.³⁸² Empire also continued to evaluate the ultimate plan for the remaining Asbury assets.³⁸³

180. In January 2020, Empire indicated it was exploring options for the continued use of buildings and equipment at the Asbury location but had insufficient data.³⁸⁴

181. Black and Veatch was engaged to perform a multi-part study for Empire with regard to the closure of Asbury. The goal of Phase 1 of the study was to develop an initial Plant Retirement Plan that would be used to support the preferred plan for the plant's final disposition by analyzing multiple options. As of May 6, 2020, Empire was still in the process of working through the final stages of Phase 1. Phase 2 will be the creation of the final plan based on Empire's decision on the ultimate disposition of the facility.³⁸⁵

182. Asbury last generated power in December 2019.³⁸⁶ However, Asbury's assets (excluding those used elsewhere) were removed from service for accounting purposes as of March 1, 2020; the same day Asbury was de-designated from the SPP Market.³⁸⁷

³⁸¹ Ex. 4, Richard Corrected Direct, page 25.

³⁸² Ex. 217, Robinett Direct, page 6.

³⁸³ Ex. 1012, Wilson Supplemental, page 1.

³⁸⁴ Ex. 217, Robinett Direct, Schedule JAR-D-2, page 5.

³⁸⁵ Ex. 1012, Wilson Supplemental, page 2.

³⁸⁶ Ex. 219, Robinett Surrebuttal/True-Up, page 1.

³⁸⁷ Ex. 1012, Wilson Supplemental, pages 1-2.

183. The closure of Asbury was expected to impact Empire's O&M expense, including reducing costs to maintain the plant, such as materials expense as well as labor costs associated with the plant.³⁸⁸

184. However, since Asbury's planned retirement was after January 31, 2020, all of the impacts of the retirement could not be known or measurable before the end of the true-up period, including the changes in O&M charges.³⁸⁹

185. After the retirement, Asbury would still require O&M related to continued retirement activities. The appropriate level of O&M for Asbury is further complicated by Empire's potential use of the facilities for other future generation facilities.³⁹⁰

186. Empire proposed the Commission approve an AAO for items related to the Asbury closure.³⁹¹

187. An AAO occurs when the Commission authorizes a utility to account for particular financial items in a different manner than what is normally required under the FERC USOA.³⁹² Although the USOA's general guidance is that net income should reflect all items of profit and loss during a period,³⁹³ instruction number seven of the USOA allows for special treatment of certain items related to an extraordinary event that is significant and different from the ordinary and typical activities of a company.³⁹⁴

188. An AAO permits deferral from one period to another. The items deferred are booked as a regulatory asset or liability in the appropriate USOA accounts. During a

³⁸⁸ Ex. 1012, Wilson Supplemental, pages 1-2 26.

³⁸⁹ Ex. 4, Richard Corrected Direct, page. 2; and Ex. 1017, Richard Supplemental Testimony, page 20.

³⁹⁰ Ex. 217, Robinett Direct, page 7.

³⁹³ 18 C.F.R. Part 101, General Instruction 7.

³⁹⁴ Ex. 1017, Richard Supplemental Testimony, page 20-21.

subsequent rate case, the Commission determines what portion, if any, of the deferred amounts will be addressed in rates.³⁹⁵

189. Although the retirement of plant assets in general may be common, the retirement of a generating station can in some limited circumstances be considered extraordinary. This is due to the high dollar value of the generating units and the rarity of the retirement of units of this nature.³⁹⁶

190. For many years, Asbury was the primary baseload generating unit owned by Empire. The retirement of a unit of this size was unprecedented for Empire, especially since the retirement occurred well before the end of Asbury's estimated depreciable life.³⁹⁷ The unrecovered original book cost for Asbury is estimated to be around \$200 million.³⁹⁸

191. Empire acknowledged its decision to retire Asbury was not usual in nature or a frequent occurrence.³⁹⁹

192. The Asbury retirement is expected to have a financial impact of at least five percent of the Empire's annual net income.⁴⁰⁰

193. An AAO could be issued directing Empire to record for consideration in its next rate case all impacts of the retirement of Asbury, including the return on and of the rate base associated with Asbury, depreciation, and any reduction in O&M expense.⁴⁰¹

³⁹⁵ Ex. 129, Bolin Surrebuttal True-Up, page 2; and Ex. 1017, Richard Supplemental Testimony, page 20.

³⁹⁶ Ex. 162, Oligschlaeger, Supplemental, page 7.

³⁹⁷ Ex. 162, Oligschlaeger, Supplemental, page 7-8.

³⁹⁸ Ex. 217, Robinett Direct, page 2.

³⁹⁹ Ex. 1017, Richard Supplemental Testimony, page. 21.

⁴⁰⁰ Ex. 162, Oligschlaeger, Supplemental, pages 6-7.

⁴⁰¹ Ex. 1017, Richard Supplemental Testimony, page 20; and Ex. 162, Oligschlaeger, Supplemental Testimony, pages 8-9.

194. Although deferral through an AAO may require customers to wait to receive the benefits of the Asbury retirement in rates, the deferral approach can capture all the savings, including savings that occur prior to when rates will go into effect in this case.⁴⁰²

195. Empire anticipates filing its next rate case in the third quarter of 2020 to request recovery for wind generation acquisitions.⁴⁰³

Conclusions of Law

EE. A regulated utility's rates are established prospectively in periodic ratemaking proceedings, based on the utility's revenues and expenses during an earlier test year.⁴⁰⁴ The use of a test year is the accepted way to establish future rates. The test year is a tool to find the relationship between investment, revenues, and expenses with certain adjustments made to the test year figures.⁴⁰⁵

FF. The criteria for determining whether an event outside the test year should be included is whether the proposed adjustment: 1) is known and measurable; 2) promotes the proper relationship of investment, revenues and expenses; and, 3) is representative of the conditions anticipated during the time the rates will be in effect.⁴⁰⁶

GG. When setting rates, the choice of method to adjust the test year for known and measurable changes is a factual determination within the Commission's expert discretion. The Commission is not required to recognize and incorporate all known and measurable events outside the test year so long as the results are rates that are just and reasonable.⁴⁰⁷

⁴⁰² Ex. 162, Oligschlaeger, Supplemental Testimony, pages 9-10.

⁴⁰³ Ex. 1017, Richard Supplemental, page 12. Maini Direct, page 35.

HH. SPP identifies generation owned, purchased or leased as a Network Resource if it is designated to serve load under SPP's Open Access Transmission Tariff.⁴⁰⁸

II. Before a generating resource can terminate its designation as a Network Resource, SPP's Regional Tariff requires a request be submitted to terminate the designation status. The request must indicate the date and time that the termination is to be effective.⁴⁰⁹

JJ. The Commission has the discretion to prescribe uniform methods of keeping accounts, records and books to be observed by electrical corporations and may prescribe, by order, forms of accounts and records to be kept.⁴¹⁰

KK. Except as otherwise provided, electric utilities shall keep accounts in conformity with the USOA.⁴¹¹

LL. The USOA, Instruction No. 7 states that although net income should reflect all items of profit and loss during the period, an exception is made for extraordinary items, which are those items related to the effects of events and transactions which have occurred during the current period and which are of unusual nature and infrequent occurrence. They will be events and transactions of significant effect which are abnormal and significantly different from the ordinary and typical activities of the company, and which would not be reasonably expected to recur in the foreseeable future⁴¹².

⁴¹¹ [20 CSR 4240-20.030](#).

⁴¹² 18 C.F.R. Part 101, General Instruction No. 7.

MM. Although the ability to use a deferral mechanism is a policy decision within the Commission's discretion, the Commission has generally followed the guidance in the USOA that costs should not be deferred to another accounting period except for "extraordinary items."⁴¹³

NN. The purpose of an AAO is to defer and track certain extraordinary revenues or costs for consideration in a future rate case. The existence of an AAO does not guarantee any particular treatment of the deferred items in ratemaking.⁴¹⁴

OO. The Commission has authority to defer extraordinary costs of a utility for consideration in a later period. In doing so, it is not engaging in single-issue rate making.⁴¹⁵

Decision

When the Commission established the test year for this case, it evaluated the treatment options for Asbury, which no party disputed would be retired before the rates for this case went into effect. The Commission specifically rejected OPC's request to include isolated adjustments for the Asbury retirement in the true-up period. The Commission limited the scope of the true-up due to concerns that all the impacts of the Asbury retirement would not be known and measurable within the time available. In addition, the planned reuse of portions of the Asbury facilities made the isolated adjustments OPC requested unfeasible.

OPC contends that it is unlawful and unreasonable to include in rates the costs associated with the Asbury plant. Instead, OPC proposes that going forward, the Commission remove the costs associated with operating Asbury, including depreciation

⁴¹³ *Kan. City Power v. Public Serv. Comm*, 509 S.W.3d 757 at 770.(Mo.App. W.D. 2016).

⁴¹⁴ *Missouri Gas Energy v. Pub. Serv. Com'n of Mo.*, 978 S.W. 2d 434 (Mo. App. W.D. 1998).

⁴¹⁵ *State ex rel. Office of Pub. Counsel v. Pub. Serv. Com'n of Mo.* 858 S.W. 2d 806 (Mo. App. W.D. 1993).

expense and O&M cost. For various reasons, the Commission disagrees with OPC's position.

When OPC filed its direct testimony on January 15, 2020, OPC initially argued that with a March 1, 2020 retirement date, Asbury's depreciation expense and O&M cost should be removed from Empire's cost of service since the new rates are expected to go into effect in July 2020, months after Asbury's retirement. OPC was concerned that ratepayers would be paying for plant that was no longer providing them benefits.

After discovering Asbury last generated power in December 2019 (prior to the January 31, 2020 true-up cutoff date), OPC again requested the Commission treat Asbury's retirement in this case and include it in the true-up. While OPC may be correct that Asbury last generated power in December 2019, OPC incorrectly assumes that this is when Asbury must cease being an asset. Asbury was still designated a generating Network Resource by SPP - meaning the RTO recognized Asbury as a unit capable of meeting load requirement - until it was "de-designated" after March 1, 2020. Under the RTO's tariffs, SPP's acceptance was required before Asbury's designation could be terminated.⁴¹⁶ It would be reasonable to find that the retirement of Asbury could not occur before its status as a generator designated to serve load changed within SPP.

However, even if OPC is correct and the retirement of Asbury should be set as the day it last generated power in December 2019, the retirement still occurred after March 31, 2019, the end of the test year. OPC ignores the essential reason the Commission initially rejected its request to true-up isolated adjustments for Asbury. When determining if events outside the test year should be included, the Commission considers whether the

⁴¹⁶ See Southwest Power Pool, Inc., Open Access Transmission Tariff, Sixth Revised Volume No. 1, Part III, Section 30.3. <https://spp.etariff.biz:8443/viewer/viewer.aspx>

proposed adjustments are known and measurable and are representative of the conditions anticipated during the time rates will be in effect.⁴¹⁷

Regardless of whether Asbury retired on December 12, 2019, or after March 1, 2020, the impacts of the Asbury retirement are not known or measurable. OPC's witness was only able to provide an estimated range for O&M expenses to be removed from rates, since, as he acknowledged, savings would be decreased by the O&M costs for the retirement process.⁴¹⁸ While OPC acknowledges Empire will incur O&M costs for the retirement they also recommend Empire recover no O&M costs for Asbury.⁴¹⁹ OPC's proposal to remove all O&M costs for Asbury does not represent the anticipated conditions when the new rates are in effect since Empire will be incurring costs while it repurposes some of Asbury's facilities and also performing retirement activities.

Some of Asbury's facilities will be used as the base for O&M operations for Empire's planned wind farms and Empire is still evaluating if it will reuse other existing facilities. Although Asbury may not be generating electricity, some of its facilities may still be used and useful. However, since Phase 1 of the Plant Retirement Plan was still ongoing as of May 6, 2020, it is impossible to accurately determine in this case the proper level of ongoing expense, including which Asbury plants will continue to have depreciation expense and which will not. OPC recommends the Commission remove all Asbury-related expenses and revenues from rates in this case and then set up a deferral account to track retirement and possible dismantlement costs for future consideration.⁴²⁰ OPC's proposal will require Empire to wait until rates are set in the next rate case before the Company

⁴¹⁷ *State ex rel GTE North Inc. v Missouri Public Service Com'n* 835 S.W.2d 356, 368 (Mo. App. W.D. 1992).

⁴¹⁸ Ex. 217, Robinett Direct, page 7.

⁴¹⁹ Ex. 217, Robinett Direct, page 7.

⁴²⁰ Ex. 219 Robinett Surrebuttal/True-Up, page 2.

can possibly recover its ongoing retirement costs. It will also involve a limited deferral. Since OPC would only exclude costs beginning with new rates in July, it removes the possibility customers could recoup costs from the time of retirement until July.

The courts have found that, “[w]hether a cost should be afforded different treatment and merits a deferral directly impacts the PSC’s chosen methodology for setting rates and is necessarily a discretionary judgment that is within the expertise of the PSC....”⁴²¹It is both lawful and reasonable for costs related to Asbury to be included in rates. While Empire should not be allowed to have a generating plant sit idle indefinitely while recovering costs in rates, that is not the current situation. The transitional period in which some Asbury facilities are being retired and other assets may be repurposed occurred after the January 31, 2020 true-up cutoff and will continue after this report and order is issued. For this reason, the impacts of Asbury’s retirements should be considered in their entirety in the next rate case and not as isolated adjustments in this case.

Excluding the Asbury retirement from the true-up adjustments does not mean the Commission intends to grant Empire a windfall. Although the inclusion in rates of all costs related to a fully operational Asbury plant may not be an accurate representation of Empire’s operating expense, an AAO could be issued directing Empire to record for consideration in its next rate case all impacts of the retirement of Asbury, including the return on and of the rate base associated with Asbury, depreciation, and any reduction in O&M expense. The Commission could then make a determination on the treatment for Asbury’s retirement in the next rate case.

⁴²¹ *Kan. City Power & Light Co.’s Request for Auth. To Implement a General Rate Increase for Elc. Serv. V. MO. Pub. Serv. Comm’n*, 509 S.W.3d 757, 770 (Mo.App. 2016).

Empire's customers will not be disadvantaged by the deferral of the impacts of the Asbury retirement, compared to the option of reflecting the net savings from the retirement in rates set in this case. The difference between the deferral and immediate rate recognition scenarios is primarily one of timing. While customers will have to wait until rates for Empire's next rate case are set to receive the direct benefits of the Asbury retirement in rates if the impacts are deferred, the full amount of those net savings will still be captured and available to flow to customers in the next rate case, which Empire plans to file soon. The evidence shows that the retirement of the Asbury power plant is extraordinary, unusual, unique, and not recurring. The Commission finds that it is appropriate to issue an AAO to allow the Commission to defer a final decision until more is known about the financial impact of the retirement.

The signatories to the Agreement agreed that any order establishing an AAO for Asbury should direct Empire to establish a regulatory asset/liability, beginning January 1, 2020, to reflect the impact of the closure of Asbury and require Empire to separately track and quantify the changes from the base amounts, as reflected in Appendix D to the Agreement, of the following categories of rate base and expense⁴²²:

- a. Rate of return on Asbury Plant,
- b. Accumulated Depreciation,
- c. Accumulated and Excess Deferred Income Tax,
- d. Fuel inventories assigned to the Asbury Plant,
- e. Depreciation expense,
- f. All Non-fuel/ non-labor operating and maintenance expenses,
- g. All labor charges for maintaining and operating the Asbury Plant,

⁴²² Ex 750, Global Stipulation and Agreement.

- h. Property taxes assigned to the Asbury Plant,
- i. Any costs associated with the retirement of the Asbury Plant, including dismantlement and decommissioning - Non-Empire labor excluded.

OPC's witness also proposed the following items be included in an AAO:⁴²³

- a. Cash working capital and income tax gross up associated with Asbury.
- b. Any fuel or SPP revenues or expenses associated with Asbury that do not flow through the FAC.
- c. Revenue from scrap value or value of items sold.

Having found that the retirement of the Asbury power plant is extraordinary, the Commission will direct Empire to establish an AAO to defer costs and revenues associated with its retirement. OPC argues that the appropriate time to start the deferral is, "sometime before the earliest proposed retirement date of December 12, 2019."⁴²⁴

Beginning the deferral on January 1, 2020, should provide parties the opportunity to argue various positions in the next rate case as to retirement events while preserving accounting of the amounts for consideration regardless of the Commission's determination as to the retirement.

In comparison, starting the deferral on an earlier date, such as the middle of a month, may cause difficulties distinguishing costs for auditing purposes. This may outweigh any benefits in quantifying those costs or revenues. Therefore, the deferral will begin January 1, 2020, until the Commission makes a decision regarding the AAO deferrals in Empire's next rate case. The Commission orders Empire to record as

⁴²³ Ex. 299-11, Robinett Testimony In Response To Commission Questions, page 1; and Office of Public Council's Response to Commission's Order Denying Public Counsel's Motion to Modify the Test Year, and Order to File Suggestions for Inclusion in an Accounting Authority (April 3, 2020).

⁴²⁴ Ex. 299, Robinett Reply to Testimony Responding to Commission Questions, pages 9-10.

regulatory assets and regulatory liabilities the revenues and expenses in the categories identified by the signatories to the Agreement and proposed by OPC.

Empire's Objection to Offers of Evidence

On May 6, 2020, Empire filed its *Objections to Offers of Evidence*, objecting to specific testimony offered by OPC witnesses relating to the retirement of Asbury. Empire requested the Commission exclude certain portions of OPC's surrebuttal testimony or provide the Company and other parties the opportunity to submit additional testimony should the Commission overrule its objection and admit OPC's surrebuttal testimony. The Commission did not rule on Empire's motion until this Report and Order wherein the motion is overruled. OPC's surrebuttal testimony pertaining to Asbury was admitted into the record. The Commission has addressed the Asbury issue identified in this case concerning whether it is lawful and reasonable to include costs for Asbury in rates. While the analysis on that issue addresses OPC's position, the testimony presented by OPC was not sufficient to persuade the Commission that adjustments for Asbury's retirement are appropriate in this case. Even though Empire was not given an opportunity to present additional testimony, it is unlikely that any further testimony from Empire or any other party would impact the Commission's decision, which is consistent with Empire's position. To the extent that Empire or other parties seek to admit testimony responsive to OPC's statements about events surrounding the retirement of Asbury or how costs and revenues for the Asbury assets should ultimately be treated, this case is not the proper place for those filings. Those issues can be addressed by the parties in Empire's next rate case.

14) Fuel Inventories

Findings of Fact

275. To determine the amount of coal inventory, the average daily burn by unit must be calculated. The average daily burn by unit is derived by dividing the annualized tons burned by the difference between 365 days and the number of annual planned outage days. Then, the average daily burn is multiplied by an appropriate number of days of inventory for each plant resulting in a burn inventory.⁴²⁵

276. Staff used a 60-day calculation to establish Empire's rate base investment in the coal inventory maintained both at KCPL's Iatan Generating Stations (Empire owns 12 percent of Iatan 1 and 2) and Plum Point Energy Station (Empire owns 7.52 percent of Plum Point).⁴²⁶

277. Empire acknowledged that Asbury has not operated as much as it did in the past, but this lower level of operation is already reflected in the average daily burn that Staff used in its calculation.⁴²⁷

278. Based upon information as of the end of the true-up period of January 31, 2020, and a retirement date of March 1, 2020, Staff determined that appropriate level of coal inventory was 18 days for Asbury.⁴²⁸

279. Empire set the number of burn days inventory for the Asbury 1 unit at 60 days consistent with past rate cases and inventory levels of other Empire coal units.⁴²⁹

280. OPC argues that the appropriate number of burn days for Asbury is zero.

⁴²⁵ Ex. 101, Staff Direct Report, pages 23-24.

⁴²⁶ Ex. 101, Staff Direct Report, page 24.

⁴²⁷ Ex. 15, Tarter Rebuttal, 15-16.

⁴²⁸ Ex. 138, McMellen Surrebuttal True-Up, pages 2-3.

⁴²⁹ Ex. 101, Staff Direct Report, page 24.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that the appropriate number of burn days to use for Asbury coal inventory is 60 days. The Commission is not persuaded that any consideration of the impact of Asbury's anticipated retirement date of March 1, 2020 should be included in the calculation of Asbury fuel inventory since it is beyond the end of the true-up period in this rate case. Fuel inventories will be further addressed in Empire's next rate case to be filed in the third quarter of 2020. The financial impact of Asbury's retirement, including fuel inventories, will be addressed in that case through an AAO ordered by the Commission in this Report and Order. The treatment of Asbury's retirement through an AAO will allow fuel inventory changes to be captured and treated with other Asbury retirement related issues that impact Empire's rates.

15) Operation and Maintenance Normalization

Findings of Fact

281. A utility's O&M expenses are a major component of the revenue requirement.⁴³⁰

282. The O&M expense in this issue refers to non-labor O&M costs for each of Empire's generating units.⁴³¹

283. Empire calculated O&M costs in the amount of \$32,731,672 using actual test year amounts normalized for boiler plant maintenance.⁴³²

⁴³⁰ Ex. 4, Richard Corrected Direct, page 8.

⁴³¹ Ex. 5, Richard Rebuttal, page 18.

⁴³² Ex. 62, Operation and Expense Workpapers, and Ex. 7 Richard True-up Direct, page 15.

284. Staff calculated O&M costs in the amount of \$28,877,386 prior to the application of jurisdictional allocation factors.⁴³³

285. While Staff recorded Empire's plant major overhaul schedule incorrectly, Staff reviewed the maintenance accounts and analyzed each plant separately to determine the trend, so mistakenly recording the major overhaul schedule did not affect Staff's final analysis or O&M expense recommendation.⁴³⁴

286. Staff used a five-year average to normalize O&M expenses for Asbury, State Line Combined Cycle, State Line Common, State Line 1, and Energy Center and Ozark Beach. Staff used a six-year average to normalize O&M expenses for latan 1 and a three-year average to normalize O&M expenses for Riverton.⁴³⁵

287. O&M expenses tend to fluctuate from year to year, because unscheduled outages occur at irregular and unpredictable times, and major planned outages do not occur annually.⁴³⁶

288. It is not appropriate to adjust actual utility expenses for ratemaking purposes based on overall economic indexes (inflation) that are not company or utility-specific. Those indicators are more reflective of the economic conditions in the United States.⁴³⁷

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission determines that the use of an average of historical O&M expenses to normalize O&M expenses provides the most reliable result because of the

⁴³³ Ex. 124, Staff True-up Accounting Schedules

⁴³⁴ Ex. 143, Sarver Surrebuttal True-Up, page 6.

⁴³⁵ Ex. 143, Sarver Surrebuttal True-Up, page 6-7

⁴³⁶ Ex. 101, Staff Direct Report, page 70.

⁴³⁷ Ex. 143, Sarver Surrebuttal True-Up, page 7.

yearly fluctuation of O&M costs. These fluctuations in costs are related to both unscheduled outages that are irregular and unpredictable and major planned outages that do not occur annually. The Commission therefore finds that \$28,877,386 is the appropriate amount of O&M expense to include in Empire's revenue requirement before jurisdictional allocation factors are applied. The Commission does not find that it is appropriate to adjust the O&M expense amount for inflation. The Commission finds that the appropriate normalized average of years for Riverton is three years, for State Line Combined Cycle Unit and for the Common Unit and State Line Unit 1 unit the appropriate normalized average of years is five years.

16) Pension and post-employment benefits (OPEB) (FAS 87 and FAS 106)

Findings of Fact

289. Empire provided two actuarial valuations to Staff, one based on acquisition accounting and one, for regulatory purposes, calculated as if the acquisition did not occur.⁴³⁸

290. The Merger Stipulation in File No. EM-2016-0213, states in paragraph three that "The Joint Applicants will ensure that the merger will be rate-neutral for Empire's customers." The use of regulatory accounting for ongoing Pension and OPEB balances is necessary to comply with the Commission's order in that case.⁴³⁹

291. Acquisition accounting requires that some unamortized balances in the plans be immediately recognized as part of the business combination. Since amortization of these balances is a component of pension and OPEB expense, eliminating them from

⁴³⁸ Ex. 12, Fallert Rebuttal, page 2.

⁴³⁹ Ex. 13, Fallert True-Up Direct, pages 2-3.

the rate calculation would have an impact on customer rates, which would not comply with the Commission's order in File No. EM-2016-0213.⁴⁴⁰

292. Staff used acquisition accounting amounts for the year 2018 in its direct filing.⁴⁴¹

293. Staff's pension expense adjustment incorporates all of the components of financial and regulatory pension expense including those components recorded by Empire in account 426, allowing Empire full recovery of its pension costs.⁴⁴²

294. The Financial Accounting Standards Board (FASB) Accounting Standards Update No. 2017-07, 14 Compensation-Retirement Benefits, is the rule Empire relies on. It requires that the non-service cost components of pension and OPEB expense be reported outside of the subtotal of income from operations. Empire determined that account 426500, Other Income Deductions, would be the correct place to record these expenses in compliance with this rule.⁴⁴³

295. Paragraph 10 of the stipulation and agreement approved in Empire's last general rate case, File No. ER-2016-0023 states: "The prepaid pension asset balance as of March 31, 2016 is \$23,314,960, Missouri jurisdictional."⁴⁴⁴ Empire's calculation of prepaid pension starts with that balance and adds activity to arrive at a prepaid pension balance of \$26,269,345.

296. Some management employees receive benefits under Empire's Supplemental Employee Retirement Program (SERP). The IRS designated this program

⁴⁴⁰ Ex. 13, Fallert True-Up Direct, page 3.

⁴⁴¹ Ex. 12, Fallert Rebuttal, page 2.

⁴⁴² Ex. 143, Sarver Surrebuttal True-Up, page 2.

⁴⁴³ Ex. 1013, Fallert Supplemental, page 3.

⁴⁴⁴ Order Approving Stipulation and Agreement, Attachment A, File No. ER-2016-0023, issued August 10, 2016.

as a non-qualified plan. In a non-qualified plan, the expense is not pre-funded, so the payment basis is appropriate.⁴⁴⁵

297. Empire recommends expense basis as a preferable approach to calculate SERP because: (1) the expense amount is independently determined by the company's actuary; (2) it is consistent with the calculation of similar items (qualified pensions and OPEBs); and, (3) the recognition of SERP on an expense basis, rather than a payment basis, more closely matches the benefits provided to customers.⁴⁴⁶

298. Empire's Rabbi Trust analysis for the cases modeled, indicates that the cost to ratepayers of reimbursing benefits as they are paid (payment basis) was lower than the cost of prefunding (expense basis).⁴⁴⁷

299. Staff's allocation of total SERP cost to Missouri expense is based on the percentage of total ongoing FAS 87 pension cost to the portion of this cost allocated to Missouri expense. This applies an allocation percentage developed for a qualified pension expense and not a non-qualified SERP expense. The appropriate SERP allocation percentage is 82.15 percent.⁴⁴⁸

300. In December 2018, \$639,992 was reclassified from account 182353 to account 254101. Staff's true up calculation included the impact of this entry on account 254101 but did not include the impact on account 182353.⁴⁴⁹

301. Empire's true-up filing includes a total tracker balance of \$12,260,836, which is \$226,954 more than Staff's direct filing balance of \$12,033,882. Empire's witness

⁴⁴⁵ Ex. 101, Staff Direct Report, page 69.

⁴⁴⁶ Ex. 12, Fallert Rebuttal, page 5.

⁴⁴⁷ Ex. 94, Rabbi Trust Analysis.

⁴⁴⁸ Ex. 12, Fallert Rebuttal, pages 5-6.

⁴⁴⁹ Ex. 11, Fallert Direct, Schedule JAF-2.

attributes the increase to activity between September 30, 2019, and January 31, 2020, errors in Staff's balance for account 182359, and a double-count of adjustments to remove FAS 88 settlements (acquisition accounting basis) in Staff's direct filing.⁴⁵⁰

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds most persuasive Empire's position that the regulatory accounting actuary report contains the appropriate data for determining Empire's pension and OPEB costs. However, Staff's jurisdictional allocation factors should be applied to pension and OPEB costs where applicable.

Accordingly, as pension and OPEB amounts that were previously charged to account 926 are now being charged by Empire to account 426, the Commission finds that these amounts charged to FERC account 426 should be included in pension and OPEB expenses.

The Commission finds that the payment basis is appropriate to calculate SERP costs because SERP costs are not pre-funded and Empire's own analysis indicates that costs to ratepayers to reimburse the SERP benefits are lower under the payment basis. The appropriate allocation percentage is 82.15 percent.

The Commission finds that the appropriate rate base and tracker amortization balances for accounts 182353 and 254101 are \$12,260,836.

Based upon Empire's calculation of activity occurring since the Commission approved a stipulation and agreement in Empire's last rate case, File No. ER-2016-0023, setting the prepaid pension asset balance as of March 31, 2016, the Commission finds

⁴⁵⁰ Ex. 13, Fallert True-Up Direct, page 5.

that the balance of the prepaid pension is \$26,269,345 as of the end of the true-up period ending January 31, 2020.

17) Affiliate Transactions

Findings of Fact

302. Affiliated transactions are exchanges of good and services between a regulated utility and another entity sharing common ownership with the utility. Affiliated transactions are of concern to the Commission because of the prospect of a regulated entity's customers providing a "cross-subsidy" to the non-regulated operations of the firm owning both entities, by either paying excessive prices or receiving insufficient revenues for affiliated goods and services. The danger of cross-subsidy arises in affiliated transactions because such exchanges of goods and services are by definition not "arms-length" in nature; hence they are not conducted by two independent third parties each looking out for its own best interest.⁴⁵¹

303. Empire is part of a multi-layered corporate structure. It is directly owned by LUCo, which in turn is owned by a string of affiliated companies, and ultimately by APUC. Empire receives a variety of corporate, administrative and support services from a number of upstream affiliated entities, as well as support services from Liberty Utilities Service Corp (LUSC).⁴⁵²

304. Liberty Utilities, through LUSC and Liberty Utilities (Canada) Corp., provides some services on a shared basis to Empire where there is an opportunity to realize economies of scale or other efficiencies. These services are provided and charged

⁴⁵¹ Ex. 114, Oligschlaeger Rebuttal, pages 1-2.

⁴⁵² Ex. 114, Oligschlaeger Rebuttal, page 3.

based on a direct charge or a defined cost allocation methodology as set forth in APUC's Cost Allocation Manual (CAM).⁴⁵³

305. APUC's CAM is based on the National Association of Regulatory Utility Commissions (NARUC) Guidelines for Cost Allocations and Affiliate Transactions. The fundamental premise of those guidelines and the CAM is to directly charge costs as much as possible and to use reasonable allocation factors where allocation of indirect costs is necessary and direct charging is not possible.⁴⁵⁴

306. All costs incurred that are directly related to a specific affiliate company or business unit are directly charged to that company or business unit. Costs that are not directly related to a specific utility are indirectly allocated between the regulated and unregulated business units using two Corporate Allocation Methods for business services and corporate services as described in the CAM.⁴⁵⁵

307. Empire states that APUC's CAM satisfies the Commission's affiliate transaction rules, and that the Missouri Appendix satisfies the requirements of Commission Rules 20 CSR 4240-20.015 by providing the criteria, guidelines, and procedures the Missouri Regulated Utilities will follow when engaging in affiliate transactions.⁴⁵⁶

308. In File No. AO-2017-0360, Empire requested that its CAM be approved by the Commission. That case is currently suspended, as well as other cases involving other utilities' CAMs, pending the outcome of File No. AW-2018-0394, in which the Commission

⁴⁵³ Ex. 24, Schwartz Direct, page 3.

⁴⁵⁴ Ex. 24, Schwartz Direct, page 4.

⁴⁵⁵ Ex. 101, Staff Direct Report, page 30.

⁴⁵⁶ Ex. 24, Schwartz Direct, page 8.

is considering changes to the Affiliate Transactions Rules for electric and other major utilities.⁴⁵⁷

309. APUC provides benefits to its subsidiaries by providing financing, financial control, legal, executive and strategic management and related services. The services provided by APUC are necessary for all affiliates to have access to capital markets for funding of capital projects and operations.⁴⁵⁸

310. OPC alleges that Empire has no employees and is operated by a non-regulated services company without Commission approval.⁴⁵⁹

311. LUSC employs most of the U.S.-based utility employees, who are assigned to specific utilities.⁴⁶⁰

312. Staff is not aware of any statute, rule or other requirement that obligated Empire to obtain advance approval from the Commission for the employee transfer to LUSC.⁴⁶¹

313. In File No. EM-2016-0213, Empire provided testimony that LUSC is the legal employer of all United States based utility employees. Thus, Empire's employees are employed by a service company instead of directly by the Empire.⁴⁶² The parties to that case were on notice that Empire's employees would be employed by LUSC.

314. The transfer of employees from Empire to LUSC did not necessarily mean that there was any fundamental change in either the nature of the services provided or an increase in its cost to Empire. When Aquila United, Inc. merged with Kansas City

⁴⁵⁷ Ex. 114, Oligschlaeger Rebuttal, pages 3-4.

⁴⁵⁸ Ex. 24, Schwartz Direct, page 10.

⁴⁵⁹ Ex. 220, Schallenberg Direct, page 6.

⁴⁶⁰ Ex. 101, Staff Direct Report, page 30.

⁴⁶¹ Ex. 114, Oligschlaeger Rebuttal, page 8.

⁴⁶² Ex. 25, Schwartz Rebuttal, page 6.

Power & Light Company, in subsequent rate cases all labor expense was allocated to Kansas City Power & Light Company employees.⁴⁶³

315. Empire is still to a large degree receiving the same services from the same employee positions as it did prior to the LUSC transfer. Accordingly, there should be no appreciable difference in cost between Empire's current receipt of such services from LUSC and Empire having in-house employees perform the services.⁴⁶⁴

316. Providing corporate services to a number of affiliates on a centralized basis, as is done for Empire by the APUC upstream affiliates, is expected to be inherently more cost-effective than having each affiliate, including regulated utilities, provide the services for themselves.⁴⁶⁵

317. For affiliate transactions between regulated and service companies, APUC upstream affiliate charges are calculated at cost, with no profit margin included in the charges to affiliates.⁴⁶⁶

318. Staff supports the concept of centralized provision of services to utilities in the situation where multiple affiliated entities exist under the corporate umbrella, as is the case with Empire.⁴⁶⁷

319. OPC also asserts that Liberty and APUC filed a FERC Form 60, and the costs on the form 60 reports do not match the amounts on Empire's affiliate transaction reports filed with the Commission.⁴⁶⁸

⁴⁶³ Ex. 114, Oligschlaeger Rebuttal, page 9.

⁴⁶⁴ Ex. 114, Oligschlaeger Rebuttal, page 9.

⁴⁶⁵ Ex. 114, Oligschlaeger Rebuttal, page 6.

⁴⁶⁶ Ex. 114, Oligschlaeger Rebuttal, page 6.

⁴⁶⁷ Ex. 114, Oligschlaeger Rebuttal, page 6.

⁴⁶⁸ Ex. 220, Schallenberg Direct, page 8-9.

320. Empire states that there are timing differences between the filings causing different amounts to appear, there are currency conversion rate differences between the two filings, and Empire's Affiliate Transaction Report includes payroll funding and benefits not reflected in the FERC Form 60.⁴⁶⁹

321. OPC alleges that Empire receives allocated cost assignments from LUSC and that because Empire did not competitively bid the goods or services or demonstrate that competitive bidding was neither necessary nor appropriate for these affiliate transactions, it has no ability to determine fair market price, or the fully distributed cost for it to produce the good or service for itself.⁴⁷⁰

322. OPC states that not only do all of Empire's affiliate transactions violate the Commission's affiliate transactions rules but they also violated the conditions of the Merger Stipulation.⁴⁷¹ OPC reviewed Empire's 2018 Affiliate Transactions Report,⁴⁷² but OPC points to no specific costs and provides no examples of incurred costs that were imprudent, or violate the Commission's Affiliate Transactions Rules, except for a \$90 million affiliate promissory note.

323. OPC contends that a material adjustment should be made to disallow affiliate transactions expenses, but it only provides general and broad allegations of violations of the Affiliate Transactions Rules and does not offer any detailed calculation of what that amount might be.⁴⁷³

⁴⁶⁹ Ex. 25, Schwartz Rebuttal, pages 8-9.

⁴⁷⁰ Ex. 220, Schallenberg Direct, page 6.

⁴⁷¹ Ex. 220, Schallenberg Direct, page 9.

⁴⁷² EX. 220c, Schallenberg Direct, Schedule RES-D-6.

⁴⁷³ Ex. 114, Oligschlaeger Rebuttal, page 4.

324. Staff disagrees with OPC's assumption that all affiliate transactions present the same level of regulatory concerns, and should be handled in the same manner for ratemaking purposes.⁴⁷⁴

325. Staff differentiates affiliated transactions into three primary categories:

- a. An exchange of goods and services between a regulated entity and unregulated affiliate.
- b. An exchange of goods and services between two regulated affiliates.
- c. Services provided to a regulated affiliate by a nonregulated affiliated service company

326. The first category of affiliated transactions presents greater regulatory concern than the other two categories because the parent company can derive greater profits if a regulated utility overpays for a good or service from an unregulated affiliate⁴⁷⁵

327. Empire's affiliate transactions are almost entirely between Empire and its affiliated service companies.⁴⁷⁶

328. Staff conducted an audit of Empire in the course of this case, including a review of the costs allocated to it from upstream affiliates and found most of those costs to be reasonable. Based on the review, Staff made some adjustments to some of the cost allocations and had a concern with Empire's allocation methodologies.⁴⁷⁷

329. The regulatory concerns when reviewing affiliate transactions include whether the allocated costs reasonably relate to the regulated operations of the utility and are incurred to benefit the utility and its customers, and are not excessive given their intended benefit.⁴⁷⁸

⁴⁷⁴ Ex. 114, Oligschlaeger Rebuttal, page 5.

⁴⁷⁵ Ex. 114, Oligschlaeger Rebuttal, page 5.

⁴⁷⁶ Ex. 114, Oligschlaeger Rebuttal, page 6.

⁴⁷⁷ Ex. 101, Staff Direct Report, pages 29-32.

⁴⁷⁸ Ex. 114, Oligschlaeger Rebuttal, page 7.

330. Affiliate transaction rules may be considered to go beyond the parameters of Staff's standard corporate allocations review, if they are interpreted as requiring that market values be determined for all goods and services obtained by utilities from nonregulated service company affiliates.⁴⁷⁹

331. The inherent cost efficiencies embedded within the shared services model employed for Empire, and also commonly found with other utilities, is that transfer of services at cost is generally a reasonable alternative to employment of competitive bidding or other market pricing methodology for services received by regulated utilities from service company affiliates.⁴⁸⁰

332. There have been a reduction in costs in certain functions that Empire previously provided on a stand-alone basis due to transfer of staff to shared service functions. Examples provided by Empire include:⁴⁸¹

- a. For Treasury services, in 2016 prior to its acquisition Empire incurred over \$400,000. After the acquisition, the Treasury function became part of the LABS shared services and in 2018 Empire incurred less than \$200,000 for Treasury services.
- b. For Internal Audit prior to the acquisition, Empire incurred nearly \$500,000 for its auditing function, when compared to less than \$125,000 after the acquisition.
- c. Human Resources functions were transitioned to shared services functions after the acquisition and had incurred approximately \$440,000 in 2018, when compared to \$700,000 in 2016.

⁴⁷⁹ Ex. 114, Oligschlaeger Rebuttal, page 7.

⁴⁸⁰ Ex. 114, Oligschlaeger Rebuttal, pages 7-8.

⁴⁸¹ Ex. 24, Schwartz Direct, page 11.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that the affiliate transactions presented under this case, with the exception of the \$90 million promissory note as addressed in issue nine, were prudent and complied with the requirements of Commission Rule 20 CSR 4240-20.015. The Commission does not rely on a presumption of prudence in making this decision. OPC points to no specific costs and provides no examples of incurred costs that were imprudent, or that violate the Commission's Affiliate Transactions Rules, except for a \$90 million affiliate promissory note. Therefore, the Commission sees no need for any adjustments to Empire's revenue requirement aside from those identified in issue nine.

The Commission also finds that Empire's interactions with its affiliates should be reviewed as part of the next rate case. Staff should conduct an audit of the various types of affiliate transactions as part of this review and provide testimony to support its findings.

18) Riverton 12 O&M Tracker

Findings of Fact

333. A tracker for Riverton's O&M costs was established in File No. ER-2014-0351. In File No. ER-2016-0023 the tracker was continued because Riverton 12 was converted from a simple cycle to a combined cycle unit so there was no operational history by which to determine an appropriate level of Riverton O&M costs.⁴⁸²

334. The Riverton 12 Tracker was established to normalize or smooth costs of the Riverton 12 long-term maintenance agreement.⁴⁸³

⁴⁸² Ex. 101, Staff Direct Report, page 71.

⁴⁸³ Ex. 5, Richard Rebuttal, page 4.

335. Operating expenses associated with the Riverton 12 long-term maintenance agreement have increased by \$4,789,471 since the tracker was established in Empire's last rate case.⁴⁸⁴

336. Conditions have not changed since the tracker was initiated. Because of the implementation of the SPP Integrated Market, the hours of unit operation have continued to vary from year to year, and the unit starts and trips are inconsistent from year to year. The tracker normalizes those fluctuations and smooths costs.⁴⁸⁵

337. Empire's position is that due to the continued uncertainty of operations and the potential for significant variations in the equivalent operating hours (EOH) charges, the extension of the tracker should be granted in order to continue to protect customers by smoothing the long term maintenance agreement (LTSA) costs.⁴⁸⁶

338. Empire calculated the balance of the Riverton 12 O&M tracker at \$13,717,733 as of January 31, 2020, amortized over five years at \$2,743,547.⁴⁸⁷

339. Staff calculated the balance of the Riverton 12 O&M tracker at \$14,258,325 as of January 31, 2020, amortized over five years at \$2,851,665.⁴⁸⁸

340. Staff used a three-year average to calculate O&M expenses for Riverton 12 since it was converted to a combined cycle unit on May 1, 2016. The three-year average O&M expense is \$8,133,625 trued-up to January 31, 2020 (before jurisdictional allocation).⁴⁸⁹

⁴⁸⁴ Ex. 4, Richard Corrected Direct, pages 24 and 28.

⁴⁸⁵ Ex. 5, Richard Rebuttal, page 5.

⁴⁸⁶ Ex. 5, Richard Rebuttal, page 5.

⁴⁸⁷ Ex. 63 Riverton Workpapers, and Ex. 7, Richard True-Up Direct, page 13

⁴⁸⁸ Ex. 124, Staff's True-Up Accounting Schedules, and Ex. 143, Sarver Surrebuttal True-Up page 9.

⁴⁸⁹ Ex. 143, Sarver Surrebuttal True-Up, page 7.

341. Empire calculated the O&M expenses for Riverton 12 as of January 31, 2020, at \$8,349,230 using actual rather than averaged amounts.⁴⁹⁰

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Based upon the implementation of the SPP Integrated Market, the fluctuation in the hours of unit operation, and the availability of only three years of O&M information from the time Riverton 12 was converted from a simple cycle to a combined cycle unit, the Commission finds that the Riverton 12 tracker should continue. The Commission determines that the appropriate balance for the Riverton 12 O&M tracker is \$14,258,325, which should be amortized over five years at \$2,851,665.

The Commission finds that the appropriate amount of O&M expenses to include in the cost of service is \$8,133,625, prior to the applying jurisdictional allocations.

19) Software Maintenance Expense

Findings of Fact

342. Empire has contracts, operating licenses, and agreements with vendors that provide maintenance, upgrades to software, and support for its computer software.⁴⁹¹

343. Empire calculated software maintenance expense of \$924,820.⁴⁹² Empire notes that Staff excluded a vendor and that Staff's results should be trued-up to January 31, 2020.⁴⁹³

⁴⁹⁰ Ex. 64, Riverton Expense True-Up.

⁴⁹¹ Ex. 101, Staff Direct Report, page 80.

⁴⁹² Ex. 65, Software Normalized Amount.

⁴⁹³ Ex. 5, Richard Rebuttal, page 36.

344. Staff determined a software maintenance expense level of \$836,858, after adjusting its calculations to include an excluded vendor. Staff annualized the expense for each of the suppliers based on the current rate for each as recorded on the General Ledger as of September 30, 2019. This is not an item that requires true-up.⁴⁹⁴

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that the appropriate normalized level of for software maintenance expense is \$836,858.

20) Advertising Expense

Findings of Fact

345. Staff classifies advertising into five categories: general, safety, institutional, promotional, and political. Institutional and political advertising are always disallowed by Staff. General and safety advertising are always allowed by Staff. Promotional advertising can be allowed to the extent that the utility can provide cost justification for the advertisement.⁴⁹⁵

346. \$30,211 of advertising expense was appropriately disallowed from Empire's initial request. Staff provided explanations as to why each item was disallowed. Staff disallowed \$1,972 in institutional/goodwill advertising. Institutional/goodwill advertising promotes the company's public image and does not benefit customers. Staff also disallowed \$1,800 in invoices that, although paid in the test year, were invoiced in 2017.

⁴⁹⁴ Ex. 143, Sarver Surrebuttal True-Up, page 9, and Ex. 101, Staff Direct Report, page 80.

⁴⁹⁵ Ex. 101, Staff Direct Report, page 80.

Staff further disallowed \$770 in invoices recorded to below the line accounts 182303 and 182318.⁴⁹⁶

347. Empire calculated \$155,552 in allowable advertising expense. While Empire made some disallowances, no explanation was provided as to why the disallowances were made.⁴⁹⁷

348. Empire stated that while it did not oppose Staff's adjustments those adjustments should be reduced because the proposed adjustment is on a total company level and the advertising benefits all jurisdictions and should be allocated accordingly.⁴⁹⁸

349. Empire also took issue with some adjustments being disallowed based upon product code assignment, or the description being vague, or an insufficient description on the invoice.⁴⁹⁹

350. Staff used multiple methods to determine whether an advertising invoice was allowed or disallowed. Each advertisement the Company submitted was reviewed to determine its primary message and whether it was recoverable under the categories established in the Commission's ruling in *In re Kansas City Power and Light*. Empire did not provide a copy of the advertisement with the invoice in some instances, so Staff relied on the product code assigned to the advertisement in the general ledger.⁵⁰⁰

Conclusions of Law

PP. In the Report and Order in File Nos. EO-85-185 and EO-85-224, Regarding KCP&L Request for a Rate Increase, the Commission discontinued the New York rule regarding advertising and adopted four advertising categories supported by Staff:

⁴⁹⁶ Ex. 140, Niemeier Surrebuttal True-Up, page 5.

⁴⁹⁷ Ex. 66, Advertising Expense Workpapers.

⁴⁹⁸ Ex. 5, Richard Rebuttal, page 23.

⁴⁹⁹ Ex. 5, Richard Rebuttal, page 23.

⁵⁰⁰ Ex. 140, Niemeier Surrebuttal True-Up, page 3.

1. General - informational advertising that is useful in the provision of adequate service
2. Safety - advertising which conveys the ways to safely use electricity and to avoid accidents
3. Promotional - advertising used to encourage or promote the use of electricity
4. Institutional - advertising used to improve the company's public image

The EO-85-185 and EO-85-224 Report and Order states that Staff proposes to allow the costs of all general advertising and reasonable amounts of safety advertising, and the costs associated with promotional advertising if the benefits derived were shown to exceed the costs. It was Staff's further proposal to disallow costs associated with institutional advertising. The Commission added a fifth category of political advertising.⁵⁰¹

5. Political advertising - does not benefit the ratepayers and is not properly charged to them.

Decision

Staff's disallowances regarding advertising are consistent with how the Commission has previously ruled regarding advertising disallowances. The Commission found Staff's analysis most credible. Staff explained the amounts disallowed by category, and gave an overview of its methodology. Staff additionally justified its reasons for relying on invoice category codes for some advertising where Empire failed to provide a copy of the advertisement. The Commission finds that the appropriate amount of advertising to include is \$129,196.

⁵⁰¹ In re Kansas City Power and Light Company, 75 P.U.R.4th.

21) Customer Service

Findings of Fact

351. In the Liberty-Empire merger case, File No. EM-2016-0213, the Commission approved the Merger Stipulation in which Empire and Liberty stated they would strive to meet or exceed the customer service levels currently provided to their customers. The Merger Stipulation also provided that Staff and Empire would meet on a periodic basis to review contact center and other service quality performance. In both 2017 and 2018, Empire's performance fell below pre-merger levels.⁵⁰²

352. By Empire's admission it missed its customer service target by 2 percent in 2017, and in 2018, Empire was 16 percent below targeted levels of performance.⁵⁰³ As of August 2019, Empire was 6 percent below the target.⁵⁰⁴

353. Statistics provided by Empire for September 2019 show an abandoned call rate of 4 percent and an average speed of answer of 44 seconds. Empire has an abandoned call rate goal of 5 percent or less and a goal for answering all calls within 30 seconds.⁵⁰⁵

354. Empire's customer service efforts were hampered by an almost 60 percent turnover in contact center employees, largely due to retirements. Empire currently has increased its staffing above pre-merger levels in the contact center.⁵⁰⁶

355. Turnover attributable to a merger is a common consequence of mergers.⁵⁰⁷

⁵⁰² Ex. 101, Staff Direct Report, page 101.

⁵⁰³ Ex. 1, Baker Direct, page 12.

⁵⁰⁴ Ex. 1, Baker Direct, page 13.

⁵⁰⁵ Ex. 101, Staff Direct Report, page 101.

⁵⁰⁶ Ex. 1, Baker Direct, pages 12-13.

⁵⁰⁷ Ex. 101, Staff Direct Report, page 102.

356. Empire is taking appropriate actions to address the unacceptable contact center performance that began in 2017, subsequent to the merger with Liberty Utilities.⁵⁰⁸ However, it is necessary to institute greater oversight regarding customer-service and reporting requirements to prevent situations like this from arising in the future.⁵⁰⁹

357. At the Local Public Hearings conducted in Bolivar, Joplin, and Branson, the most frequent complaint regarding Empire's service involved the number of estimated bills, and the difficulty in addressing estimated bills with Empire.⁵¹⁰

358. Since the acquisition, Empire's number of estimated bills has increased significantly reaching as high as 25,578 in December of 2019. In the six months before the merger with Liberty Utilities in July of 2017, Empire estimated fewer than 1,000 of its customers' bills each month. Between 2017 and 2018, there was a 654 percent increase in estimated bills and a 293 percent increase between 2017 and 2019. Empire has been able to reduce the estimated bills to 5,658 in January 2020 and 1,179 in February 2020.⁵¹¹

359. Empire attributed these high levels of estimated bills to many meter readers leaving their positions for other positions in the company following the announcement about the plan to move to AMI. However, in late 2018, Empire was successful with union contract negotiations, which allowed for the use of contractors for meter reading, which allowed for a reduction in estimated meter reads. Unfortunately, beginning in August 2019, the Meter Reading department had four readers on medical leave at the same time for several months. This, coupled with other factors, led to the Company again experiencing an increase in estimated bills.⁵¹²

⁵⁰⁸ Ex. 101, Staff Direct Report, page 102.

⁵⁰⁹ Ex. 207, Marke Rebuttal, page 8.

⁵¹⁰ Local Public Hearing transcripts.-Tr. Vol. 3, 4, 5.

⁵¹¹ Ex. 207, Marke Rebuttal, page 6.

⁵¹² Ex. 3, Baker Surrebuttal, pages 8-9.

360. While the estimated meter reads in the first two months of 2020 continue to be higher than early 2017, they have drastically improved from late 2019. Empire's goal is to read every meter every month. In an effort to meet this goal, Empire has reallocated meter readers to cover service areas that had vacant positions. Additionally, they have allowed employees to work additional overtime. Empire has worked with its meter-reading contractor. The contractor hired an extra person to help keep their routes on schedule, and the contractor will continue to work with the Company to provide additional solutions as needed.⁵¹³

Conclusions of Law

QQ. Commission Rule 20 CSR 4240-13.040 establishes procedures to follow when customers make inquiries of utilities so customer inquiries are handled in a reasonable manner.

- (1) A utility shall adopt procedures which shall ensure the prompt receipt, thorough investigation and, where possible, mutually acceptable resolution of customer inquiries. The utility shall submit the procedures to the commission for approval and the utility shall notify the commission and the public counsel of any substantive changes in these procedures prior to implementation.
- (2) A utility shall establish personnel procedures which, at a minimum, ensure that—(A) At all times during normal business hours qualified personnel shall be available and prepared to receive and respond to all customer inquiries, service requests, safety concerns, and complaints.

Decision

The Commission is concerned about Empire's customer service. Much of that concern related to the large number of estimated bills received by Empire's customers and the customer service they receive when trying to understand and resolve issues with

⁵¹³ Ex. 3, Baker Surrebuttal, page 9.

estimated bills. Estimated bills have had an effect on customer's perceptions of Empire's customer service. When the large number of estimated bills is combined with the high turnover rate in Empire's contact center, it is a formula for poor customer service. Much of this is likely attributable to the merger, and the Commission is hopeful that this drop in customer service is just temporary.

While the Commission finds that Empire is taking steps to improve its customer service, the Commission believes it is important to monitor Empire's progress related to meter reading and billing. Accordingly, the Commission will order Empire to do the following tasks (originally agreed to by Empire as part of the Agreement) for the years 2020, 2021, and 2022 related to meter reading and billing:

1. Incorporate data into its monthly reports to Commission Staff;
2. Initiate quarterly reports to the Commission Staff and OPC regarding the number of estimated meter readings;
3. Initiate quarterly reports to the Commission Staff and OPC regarding the number of estimated meter readings exceeding three consecutive estimates;
4. Initiate quarterly reports to the Commission Staff and OPC regarding the number of bills with a billing period outside of 26 to 35 days; and
5. Initiate quarterly reports to the Commission Staff and OPC regarding the Company and contract meter reader staffing levels;
6. Evaluate the authorized meter reader staffing level and take action to maintain adequate meter reader staffing levels in order to minimize the number of estimated bills.
7. Company will meet with Staff and OPC to discuss bill redesign possibilities for the future.
8. Ensure that all customers who receive estimated bills for three consecutive months receive the appropriate communication regarding estimated bills and their option to report usage as required by Service and Billing Practices, Rule 20 CSR 4240-13.020(3).

9. Ensure that all customers who receive an adjusted bill due to underestimated usage are offered the appropriate amount of time to pay the amount due on past actual usage as required by Service and Billing Practices, Rule 20 CSR 4240-13.025(1)(C).
10. Evaluate meter-reading practices and take action to ensure that billing periods stay within the required 26 to 35 days, unless permitted by those exceptions listed in the Commission's rules.
11. File notice within this case by September 1, 2020, containing an explanation of the actions the Company has taken to implement the above recommendations related to billing and bill estimates.

22) Material and Supplies

Findings of Fact

361. Material and Supplies (M&S) are Empire's investment in inventory for items such as spare parts, electric cables, poles, meters, and other items used in daily operations and maintenance activities to maintain Empire's production facilities and electric system. Empire holds a variety of M&S in inventory so the items can be readily available when needed in performing its utility operations.

362. Empire calculates that the appropriate amount of M&S to be included in cost of service is \$33,031,612, which represents a 13-month average as of January 31, 2020, for electric inventory only.⁵¹⁴

363. Staff calculates that the appropriate amount of M&S to be included in cost of service is \$32,773,580.⁵¹⁵ This reflects the 13-month average of costs as provided by Empire as of January 31, 2020, after applying the Missouri jurisdictional allocation factor.⁵¹⁶

⁵¹⁴ Ex. 10, Palumbo True-Up Direct, page 2, and Ex. 67, Materials and Supplies Workpaper.

⁵¹⁵ Ex. 124, Staff True-up Accounting Schedules, Schedule 02.

⁵¹⁶ Ex. 140, Niemeier Surrebuttal/True-up, page 6.

364. Empire calculates that the appropriate amount to remove from inventory as it relates to Non-Electric items is \$67,179, which also represents a 13-month average as of January 31, 2020.⁵¹⁷

365. Staff calculates the appropriate balance to remove from inventory as it relates to Non-Electric items is \$76,714, before Missouri jurisdictional allocations.⁵¹⁸

366. Clearing accounts are temporary accounts that will be transferred to another account for miscellaneous expenses that need to be allocated to several accounts, such as vehicle maintenance and cell phone expenses. Clearing accounts are not materials or supplies. Staff did not include clearing accounts in its 13-month average.⁵¹⁹

367. Empire says that clearing accounts should be included in the average because the balances fluctuate during the test year.⁵²⁰

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds the evidence presented by Staff most persuasive. The appropriate balance to be included for materials and supplies to be included in the cost of service is \$32,773,580, and the appropriate amount to exclude is \$76,714. Missouri jurisdictional allocations should be applied to these amounts.

⁵¹⁷ Ex. 10, Palumbo True-Up Direct, page 2, and Ex. 68, Removal of Non-Electric Inventory Workpaper.

⁵¹⁸ Ex. 140, Niemeier Surrebuttal/True-Up, page 6, and Ex. 68, Removal of Non-Electric Inventory Workpaper.

⁵¹⁹ Ex. 140, Niemeier Surrebuttal True-Up, page 6, and Ex. 124, Staff True-Up Accounting Schedules.

⁵²⁰ Ex. 9, Palumbo Rebuttal, page 2.

23) Asset Retirement Obligations

Findings of Fact

368. Asset Retirement Obligations (ARO) are obligations associated with a tangible long-lived asset that result from the acquisition, construction, development, or normal operation of a long-lived asset in which the timing or method of settlement is conditional on a future event. An ARO exists when the obligation to perform the asset retirement activity is unconditional even though there may be uncertainty about whether and how and when the obligation will be settled.⁵²¹

369. An ARO is a financial requirement to record currently the costs associated with the future retirement/remediation of a long-lived asset. Therefore, the utility is required to book for financial purposes the current costs to retire a long-lived asset at a date in the future. These costs are then collected over the useful life of the asset.⁵²²

370. AROs represent one component of costs that are considered in determining the cost of removal component of utility depreciation rates.⁵²³

371. During the negotiation of this rate case, it was discovered that \$9.2 million of claimed ARO costs were already incurred by Empire.⁵²⁴

372. What Staff had previously understood to be accrued liabilities booked by Empire for future costs were actually recent cash expenditures. Therefore, Staff changed its position on the rate case treatment of these costs.⁵²⁵

373. Staff is generally opposed to rate recovery of AROs. AROs represent one component of costs that are considered in determining the cost of removal component of

⁵²¹ Ex. 4, Richard Corrected Direct, pages 14-15.

⁵²² Ex. 354, Meyer Supplemental Surrebuttal, page 2.

⁵²³ Ex. 154, Oligschlaeger Sur-Surrebuttal, page 2.

⁵²⁴ Ex. 354, Meyer Supplemental Surrebuttal, page 3.

⁵²⁵ Ex. 154, Oligschlaeger Sur-Surrebuttal, page 2.

utility depreciation rates. Cost of removal is allowed to be collected in rates on an ongoing basis in order for the utilities to recover over time the estimated costs of “removing” assets once they are retired and no longer needed to provide service to customers. Allowing rate treatment of AROs would very likely result in double recovery in rates by the utility of certain costs related to retirement of assets.⁵²⁶

374. The ARO balance Empire asks the Commission include in rate base is for costs paid to remove asbestos at the Asbury and Riverton generating units, as well as, costs paid to settle obligations for the coal ash ponds at Asbury, Iatan, and Riverton. Empire has not previously recovered these amounts in rates.⁵²⁷

375. Staff has verified that the amounts sought in rates by Empire as AROs represent recent cash expenditures, and that the costs were both prudent and necessary.⁵²⁸

376. The costs for removal of asbestos at Asbury should be treated as cost of removal and charged against the Asbury accumulated depreciation reserve. Similar treatment should be afforded the costs for working on the Iatan and Asbury ash ponds. For the Riverton ash pond, which has already been retired, the costs were captured in a regulatory asset to be amortized in the next rate case.⁵²⁹

Conclusions of Law

No additional Conclusions of Law are required for this issue.

⁵²⁶ Ex. 154, Oligschlaeger Sur-Surrebuttal, page 2.

⁵²⁷ Ex. 6, Richard Surrebuttal, pages 3-4 and 6.

⁵²⁸ Ex. 154, Oligschlaeger Sur-Surrebuttal, page 2.

⁵²⁹ Ex.354, Meyer Supplemental Surrebuttal, page 3.

Decision

The Commission has not generally allowed for the recovery of ARO's because without a legal obligation, these future costs were not known and measureable. However, the evidence in this case shows that the costs at issue to remove asbestos at the Asbury and Riverton generating units, as well as, costs paid to settle obligations for the coal ash ponds at Asbury, Iatan, and Riverton are not ARO's. Instead, these costs have already been paid by Empire, but not yet recovered in rates. The cost of removal of asbestos at Asbury and costs associated with the operation of certain ash ponds at Asbury and Iatan shall be charged to the accumulated depreciation reserve of each respective generation facility. However, for the Riverton ash pond, which has already been retired, the costs shall be captured in a regulatory asset to be considered in Empire's next rate case.

24) LED Replacement Tracker

Findings of Fact

377. Empire currently has tariffs for municipal street lighting and its private lighting service.⁵³⁰

378. Empire's municipal LED tariff was implemented after a pilot program was conducted to determine the benefits of LED lights compared to high-pressure sodium fixtures.⁵³¹

379. Empire is requesting two deferrals, one to capture the costs associated with the mercury vapor lights replacement program and to track the difference between estimated and actual revenues and costs of the LED light fixtures for municipal lighting

⁵³⁰ Ex. 33, McGarrah Direct, pages 2 and 7.

⁵³¹ Ex. 33, McGarrah Direct, page 3.

customers, and the other to defer and track the same revenues and costs from private lighting customers switching to LED Lighting.⁵³²

380. LED lights are more efficient, use less energy, last longer, are more durable, and have the ability to operate at lower temperatures than other lighting sources.⁵³³

381. Empire states that replacing all the mercury vapor lights at once is more efficient and less expensive than replacing the lights individually through attrition. A technician would drive a truck out to each of the 8,500 lights to inspect and determine what type of light is out, whether the failure is a bulb or the fixture and whether the parts are available.⁵³⁴

382. Empire proposes to switch all 8,500 municipal mercury vapor lights to LED lights over a 12-18 month time period even if the lights are still in working condition.⁵³⁵ Empire can control the timing of the replacement of mercury vapor lights.⁵³⁶

383. A tracker is a rate mechanism under which the amount of a particular cost of service item incurred by a utility is tracked and compared to the amount of that item currently included in a utility's rates. Any over-recovery or under-recovery of the item in rates compared to actual expenditures is booked to a regulatory asset or liability account, and would be eligible to be included in the utility's rates set in its next general rate proceeding through an amortization to expense.⁵³⁷

384. Use of trackers may be justified when the costs are material in nature and the applicable costs:

⁵³² Ex. 106, Bolin Rebuttal, page 6.

⁵³³ Ex. 33, McGarrah Direct, page 4.

⁵³⁴ Ex. 33, McGarrah Direct, pages 6-7.

⁵³⁵ Ex. 106, Bolin Rebuttal, pages 9-10.

⁵³⁶ Ex. 106, Bolin Rebuttal, page 9.

⁵³⁷ Ex. 106, Bolin Rebuttal, page 6.

- a. Demonstrate significant fluctuation and up-and-down volatility over time, and for which accurate estimation is difficult;
- b. Are new costs for which there is little or no historical experience, and for which accurate estimation is accordingly difficult; and
- c. Are imposed upon utilities by Commission rule.⁵³⁸

385. Empire is currently collecting in its cost of service depreciation expense and a return on the mercury vapor lights it wishes to replace.⁵³⁹

386. If Empire replaces all the mercury vapor lights following the conclusion of this rate case, it would continue to receive rate recovery of depreciation expense and return for those mercury vapor lights until its next rate case which would offset some of the depreciation expense and return Empire would defer for new LED lights.⁵⁴⁰

387. Under a deferral, Empire would get to collect the return and depreciation expense on the new assets that is not currently included in the revenue requirement.⁵⁴¹

388. Empire witness McGarrah estimated that the cost to install a municipal LED light of minimum size at \$372.88, and the cost to install a private light at approximately \$240, depending on light size.⁵⁴²

389. Staff witness Bolin testified that if Empire replaced all 8,500 municipal mercury vapor lights within a one year time frame, the maximum annual cost of replacement would be approximately \$448,195, which is not a material cost for Empire.⁵⁴³

⁵³⁸ Ex. 106, Bolin Rebuttal, page 7.

⁵³⁹ Ex. 106, Bolin Rebuttal, page 10.

⁵⁴⁰ Ex. 106, Bolin Rebuttal, page 10.

⁵⁴¹ Ex. 106, Bolin Rebuttal, page 10.

⁵⁴² Ex. 35, McGarrah Surrebuttal, pages 4 and 5.

⁵⁴³ Ex. 129, Bolin Rebuttal, page 9.

390. If the Company converts all 8,500 mercury vapor lights to LED lighting the annual amount of lost revenue from the municipal lighting customers is estimated to be \$127,415, which is also not a material amount to Empire.⁵⁴⁴

391. Staff witness Bolin testified that Empire currently has 5,400 mercury vapor lights in its Missouri private lighting service class. If it replaced all 5,400 of those lights within a one-year time frame, the most the annual cost of replacing the private mercury vapor lights with LED lights would be is approximately \$282,333, which is not a material cost for Empire.⁵⁴⁵ If the company converts all 5,400 mercury vapor lights in its Missouri private lighting service class to LED lighting, the annual amount of lost revenue from the private lighting customers is estimated to be \$79,056, which is not a material amount to Empire.⁵⁴⁶

392. While most of Empire's mercury vapor lights are 30 to 40 years old, they have not failed,⁵⁴⁷ and replacement bulbs are still available (although fixtures are not).⁵⁴⁸

Conclusions of Law

RR. The Commission may "prescribe uniform methods of keeping accounts, records and books to be observed by electrical corporations[.]"⁵⁴⁹ Additionally, the Commission may "prescribe by order the accounts in which particular outlays and receipts shall be entered, charged or credited."⁵⁵⁰

⁵⁴⁴ Ex. 129, Bolin Rebuttal, page 9.

⁵⁴⁵ Ex. 106, Bolin Surrebuttal/True-up, page 8.

⁵⁴⁶ Ex. 106, Bolin Surrebuttal/True-up, page 8.

⁵⁴⁷ Ex. 35, McGarrah Surrebuttal, page 4.

⁵⁴⁸ Ex. 35, McGarrah Surrebuttal, page 2.

⁵⁴⁹ Section 393.140(4), RSMo.

⁵⁵⁰ Section 393.140(8), RSMo.

Decision

Empire failed to present adequate or credible evidence to support its request for LED replacement trackers for either municipal lighting or its private lighting service. Staff presented credible evidence that neither the municipal nor the private LED replacement costs were sufficiently material to Empire to justify the extraordinary remedy of a tracker. Additionally, there was no credible evidence that replacement costs fluctuated, were difficult to estimate, or were imposed by a Commission rule.

The Commission is also not convinced that changing from one kind of light to another is a cost for which Empire lacks historical experience, and Empire presented no evidence otherwise. While the Commission recognizes the benefits of such lighting retrofit programs because LED lights are more efficient, use less energy, and last longer, the requirements for establishing a tracker have not been met with the facts presented in this case. The Commission denies Empire's requests for LED replacement trackers.

25) May 2011 Tornado Unamortized AAO Balance

Findings of Fact

393. An AAO is an accounting mechanism that permits deferral of costs from one period to another. The items deferred are booked as an asset rather than an expense, thus improving the financial picture of the utility in question during the deferral period. During a subsequent rate case, the Commission determines what portion, if any, of the deferred amounts will be recovered in rates.⁵⁵¹

394. In File No. EU-2011-0387, the Commission authorized Empire to defer incremental O&M expenses incurred for the repair, restoration and rebuild activities associated with the May 22, 2011 tornado in Joplin. Empire was also allowed to defer

⁵⁵¹ Ex. 129, Bolin Surrebuttal True-Up, page 2.

depreciation expense and carrying costs associated with the tornado-related capital expenditures.⁵⁵²

395. The Commission ordered the Company to begin amortizing the deferral over a ten-year period to start at the earlier of (1) the effective date of new rates implemented in its next general rate case (File No. ER-2012-0345) or next rate complaint case; or (2) June 1, 2013.⁵⁵³

396. The AAO permits Empire to accrue a carrying charge equal to its AFUDC rate on its tornado capital additions during the deferral period to offset the lack of a current return on its tornado-related capital additions.⁵⁵⁴

397. The unamortized AAO balance as of January 31, 2020 is \$1,274,630.⁵⁵⁵

398. In File No. WR-95-145, the Commission noted that including the unamortized balance of a flooding disaster in rate base would shield the shareholders from the risk of a natural disaster while imposing the risk entirely on the ratepayers.⁵⁵⁶

399. Excluding the unamortized balance from Empire's rate base denies it a return on the investment it made to restore electric service, results in an immediate understatement of Empire's cost of service to Missouri retail customers and is at odds with the Commission's order authorizing the deferral.⁵⁵⁷

Conclusions of Law

No additional Conclusions of Law are required for this issue.

⁵⁵² Ex. 129, Bolin Surrebuttal True-Up, pages 2-3; and Ex. 101, Staff Direct Report, page 53.

⁵⁵³ Ex. 129, Bolin Surrebuttal True-Up, page 3, and Ex. 101, Staff Direct Report, page 53.

⁵⁵⁴ Ex. 129, Bolin Surrebuttal True-Up, page 3.

⁵⁵⁵ Ex. 129, Bolin Surrebuttal True-Up, page 3; and Ex. 70, Tornado Regulatory Asset Workpaper.

⁵⁵⁶ Ex. 129, Bolin Surrebuttal True-Up, page 4.

⁵⁵⁷ Ex. 5, Richard, Rebuttal, page 7.

Decision

The magnitude of the destruction from the Joplin Tornado was something Empire could neither have prevented nor predicted. After the tornado, Empire made significant investments to restore electric systems to its Missouri retail customers quickly and efficiently. The Commission at that time authorized the deferral of expenses to restore, repair, and rebuild. The Commission finds that it is appropriate that the unamortized AAO Balance for the May 2011 Joplin Tornado be included in rate base.

26) Depreciation and Amortization Expense

Findings of Fact

400. Empire is not requesting to change currently ordered depreciation rates in this case.⁵⁵⁸

401. No new depreciation study was completed for this rate case, and Staff has no objections to the current depreciation study submitted in File No. ER-2016-0023 on October 16, 2015, which meets the requirement of 20 CSR 4240-3.160(1)(A).

402. Staff calculated that the appropriate amount of depreciation expense as of January 31, 2020, is \$71,423,882 and the appropriate amount of amortization of electric plant is \$3,387,871.⁵⁵⁹

403. Empire calculated that the appropriate amount of depreciation expense as of January 2020, is \$71,515,922⁵⁶⁰ and the appropriate amount of amortization of electric plant is \$3,821,588.⁵⁶¹

⁵⁵⁸ Ex. 101, Staff Direct Report, page 89.

⁵⁵⁹ Ex. 124, Staff True-Up Accounting Schedules.

⁵⁶⁰ Ex. 71, Annualized Depreciation Expense.

⁵⁶¹ Ex. 72, Annualized Amortization Expense.

404. The depreciation amount booked to the clearing account for transportation equipment should be removed from depreciation expense. Those expenditures are charged to construction projects that will eventually be plant in service, so the costs will be recovered through depreciation over the life of the assets.⁵⁶²

405. Staff did not provide any evidence as to why it used a depreciation rate of 2.5 percent for FERC accounts 371 and 373 in its True-Up Accounting Schedules.⁵⁶³

406. The depreciation rate approved by the Commission in File No. ER-2016-0023 for account 371 is 4.67 percent and for account 373 is 3.33 percent.⁵⁶⁴

Conclusions of Law

SS. Section 20 CSR 4240-3.160(1)(A) requires that a depreciation study, database and property unit catalog be submitted with a general rate increase request unless Staff received these items during the three (3) years prior to the rate increase request or before five (5) years have elapsed since last receiving said items.

Decision

The Commission finds that the appropriate level of depreciation expense to include in the cost of service is \$71,423,882 and the appropriate amount of amortization of electric plant is \$3,387,871, applying Staff's jurisdictional allocations except for any adjustments that may be required to correct the depreciation rates for account 371 and account 373. Further, the Commission finds that the depreciation amount booked to the clearing account for transportation equipment should be removed from depreciation expense. The Commission determines that the depreciation rates approved in File No. ER-2016-0023 for account 371 of 4.67 percent and for account 373 of 3.33 percent should be maintained.

⁵⁶² Ex. 101, Staff Direct Report, page 90.

⁵⁶³ Ex. 124, Staff True-Up Accounting Schedules.

⁵⁶⁴ Ex. 5, Richard, Rebuttal, page 32.

While Staff agrees that these are the appropriate depreciation rates for accounts 371 and 373, its True-Up Accounting Schedule 5 applies a 2.5 percent depreciation rate to these accounts. Any correction to the True-Up Accounting Schedule should be reflected in the total depreciation expense amount.

27) Iatan/Plum Point Carrying Costs

Findings of Fact

407. In File No. EO-2005-0263, the Commission approved Empire's regulatory plan deferring certain carrying costs associated with the Iatan 1 Air Quality Control Systems (AQCS) investment past its in-service date into Account 182308.⁵⁶⁵ The deferral of carrying costs after a project's in-service date is also known as "construction accounting."⁵⁶⁶

408. In the *Report and Order* in KCPL's File No. ER-2010-0355, the Commission disallowed certain costs that had been booked to the Iatan 1 accounts. The effect of these two disallowances reduced the balance of the Iatan 1 AQCS plant balance for all owners, including Empire.⁵⁶⁷

409. In Empire's next general rate proceeding, File No. ER-2012-0345, Staff removed any construction accounting allowances associated with the portion of Iatan 1 AQCS approved disallowances that were allocated to Empire from its rate base and expense amortization calculations.⁵⁶⁸

⁵⁶⁵ Ex. 101, Staff Direct Report, page 25.

⁵⁶⁶ Ex. 101, Staff Direct Report, page 25.

⁵⁶⁷ Ex. 101, Staff Direct Report, pages 25-26.

⁵⁶⁸ Ex. 101, Staff Direct Report, page 26.

410. In File No. EO-2005-0263, the Commission approved Empire deferring certain “carrying costs” associated with the Iatan 2 generation unit investment past its in-service date in to Account 182332.⁵⁶⁹

411. Staff removed any construction accounting allowances associated with the portion of Iatan 2 disallowances that were allocated to Empire from its rate base and expense amortization calculations. Staff also reduced the balance of Iatan 2 carrying costs by Empire’s deferral of fuel and purchased power expense savings it had incurred due to the addition of Iatan 2 to its generating system from the unit’s in-service date through June 30, 2012.⁵⁷⁰

412. In File No. ER- 2010-0130, the Commission approved Empire deferring certain “carrying costs” associated with the Plum Point generating unit investment past its in-service date into Account 182331.⁵⁷¹

413. Based on the results of its Construction Audit and Prudence Review for Plum Point (submitted in File No. ER-2011-0004), Staff recommended one disallowance to Empire’s Plum Point plant balances.⁵⁷²

414. Staff used the September 30, 2015 balance (\$109,533) from the most recent rate proceeding, File No. ER-2016-0023, and the annual amortization expense included in Staff’s Accounting Schedules in File No. ER-2012-0345, to determine the unamortized balance to include in rate base.⁵⁷³

⁵⁶⁹ Ex. 101, Staff Direct Report, page 26.

⁵⁷⁰ Ex. 101, Staff Direct Report page 26.

⁵⁷¹ Ex. 101, Staff Direct Report, page 26.

⁵⁷² Ex. 101, Staff Direct Report, page 26.

⁵⁷³ Ex. 101, Staff Direct Report, pages 26-27.

415. Staff's direct filing calculated Iatan/Plum Point carrying costs through the update period in this case, September 30, 2019. Staff true-up the balances through January 31, 2020.⁵⁷⁴

416. The appropriate level of unamortized Iatan 1 and Iatan 2 carrying costs at January 31, 2020, is Staff's determination of \$3,939,778 and \$2,148,142 respectively.⁵⁷⁵

417. The appropriate level of amortization for the Iatan/Plum Point carrying costs is Staff's determination of \$100,923.⁵⁷⁶

418. Staff's calculation used the September 30, 2015 balance from the most recent rate proceeding, File No. ER-2016-0023, and the annual amortization expense included in Staff's Accounting Schedules in File No. ER-2012-0345, to determine the unamortized balance as of September 30, 2019, those amounts were then true-up through January 31, 2020.⁵⁷⁷

419. In Empire's File No. ER-2012-0345, Staff recommended amortization of these carrying costs into the cost of service using a composite amortization rate derived from dividing the total depreciation expense for each plant by the total plant balance for each plant. Staff used these composite rates and calculated amortization amounts of \$84,729 for Iatan 1 AQCS, \$44,828 for Iatan 2, and \$1,987 for Plum Point. Staff used the same amortization amounts in this case.⁵⁷⁸

Conclusions of Law

No additional Conclusions of Law are required for this issue.

⁵⁷⁴ Ex. 101, Staff Direct Report, pages 26-27 and Ex. 124, Staff True-Up Accounting Schedules.

⁵⁷⁵ Ex. 124, Staff True-Up Accounting Schedules.

⁵⁷⁶ Ex. 124, Staff True-Up Accounting Schedules.

⁵⁷⁷ Ex. 101, Staff Direct Report, page 25-27, and Ex. 124, Staff True-Up Accounting Schedules.

⁵⁷⁸ Ex. 101, Staff Direct Report, page 54.

Decision

The Commission finds that the appropriate amount of carrying costs to include in rate base as of January 31, 2020, is \$3,939,778 for latan 1, \$2,148,142 for latan 2, and \$100,923 for Plum Point. These amounts reflect construction disallowances ordered in previous cases before this Commission. The appropriate level of amortization expense for the carrying costs are \$84,729 for latan 1, \$44,828 for latan 2 and \$1,987 for Plum Point.

28) Incentive Compensation

Findings of Fact

420. As a stand-alone company Empire had one incentive plan called the Management Incentive Compensation Program, which offered awards to senior officers for achievement of certain pre-set goals.⁵⁷⁹

421. Post-merger there are four employee incentive plans: the Long Term Incentive Plan (LTIP), and three different short-term incentive plans, the Empire Legacy Bonus/Incentive Plan, the Shared Bonus Plan (SBP) and the Short Term Incentive Plan (STIP). As part of the merger, employees who had Director and above within their title were moved to the Liberty Utilities STIP. The Empire Information Technology team was moved to the Liberty Utilities SBP and STIP.⁵⁸⁰

422. Staff corrected its initial employee incentive adjustments in its surrebuttal true-up testimony after receiving corrected responses to discovery requests from Empire.⁵⁸¹

⁵⁷⁹ Ex. 101, Staff Direct Report, page 66.

⁵⁸⁰ Ex. 101, Staff Direct Report, page 66.

⁵⁸¹ Ex. 139, Newkirk Surrebuttal True-Up, page 3.

423. Empires provided Staff with both personal objective achievement percentages and target bonus percentages for all employees with incentive pay for both Empire and its subsidiaries. This enabled Staff to use actual data instead of averages when recreating the incentive pay calculations for each employee.⁵⁸²

424. The appropriate level of incentive compensation to include in the cost of service is \$1,245,016, the amount determined by Staff.⁵⁸³

425. Empire calculated \$4,078,229 as incentive compensation to include in the cost of service.⁵⁸⁴

426. The Commission's long-standing precedent has disallowed recovery of employee incentive compensation that is based on shareholder earnings without directly and proportionately benefitting customers.⁵⁸⁵

427. Staff's analysis of Empire's STIP and SBP led to disallowances to eliminate 50 percent of employee incentives associated with the "Our Efficiencies" objective of the parent scorecard. These costs should be assigned to shareholders.⁵⁸⁶

428. Staff also reviewed each divisional scorecard to disallow any incentive metric associated with the performance measure of meeting earnings per share targets or enhancing the value of a utility's stock price.⁵⁸⁷

429. Staff has eliminated stock options associated with Empire's LTIP recognized as an expense in this case consistent with the Commission's *Report and Order* in File No. ER-2006-0315.⁵⁸⁸

⁵⁸² Ex. 113, Newkirk Rebuttal, page 2.

⁵⁸³ Ex. 124, Staff True-Up Direct Accounting Schedules.

⁵⁸⁴ Ex. 75, Empire response to DR 0033.1.

⁵⁸⁵ Ex. 139, Newkirk Surrebuttal True-Up, page 3.

⁵⁸⁶ Ex. 101, Staff Direct Report, page 68.

⁵⁸⁷ Ex. 101, Staff Direct Report, page 68.

⁵⁸⁸ Ex. 101, Staff Direct Report, page 68.

430. Customers do not appear to receive any real, tangible or measurable benefit from employee incentives awarded based on the company's increased earnings that would outweigh the costs to ratepayers.⁵⁸⁹

431. Incentive goals that boost the value of Empire's stock price benefit Empire's shareholders and not the ratepayers, and those incentives appropriately should not be included in rates.⁵⁹⁰

Conclusions of Law

TT. The Commission has not generally allowed the recovery of incentive compensation tied to financial metrics in rates because "[t]hose financial incentives seek to reward the company's employees for making their best efforts to improve the company's bottom line. Improvements to the company's bottom line chiefly benefit the company's shareholders, not its ratepayers. Indeed some actions that might benefit a company's bottom line, such as a large rate increase, or the elimination of customer service personnel, might have an adverse effect on ratepayers."⁵⁹¹

UU. The Commission's historical decisions are represented in its Report and Order in KCPL's rate case in File No. ER-2007-0291. Beginning on page 49 of that Report and Order the Commission said:

KCPL has the right to tie compensation to [earnings per share]. However, because maximizing [earnings per share] could compromise service to ratepayers, such as by reducing maintenance, the ratepayers should not have to bear that expense. What is more, because KCPL is owned by Great Plains Energy, Inc., and because GPE has an unregulated asset, Strategic Energy L.L.C., KCPL could achieve a high [earnings per share] by ignoring

⁵⁸⁹ Ex. 139, Newkirk Surrebuttal True-Up, page 3.

⁵⁹⁰ Ex. 101, Staff Direct Report, page 66.

⁵⁹¹ *In the Matter of Missouri Gas Energy's Tariffs to Implement a General Rate Increase for Natural Gas Service*, File No. GR-2004-0209, Report and Order (issued September 21, 2004), p. 43. See also similar conclusions in *In the Matter of the Application of Kansas City Power & Light Company for Approval to Make Certain Changes in its Charges for Electric Service to implement Its Regulatory Plan*, File No. ER-2007-0291, Report and Order (issued December 6, 2007), p. 49 (the Commission denied Kansas City Power & Light's request to recover compensation tied to earnings per share).

its Missouri ratepayers in favor of devoting its resources to Strategic Energy. Even KCPL admits it is hard to prove a relationship between earnings per share and customer benefits. Nevertheless, if the method KCPL chooses to compensate employees shows no tangible benefit to Missouri ratepayers, then those costs should be borne by shareholders, and not included in cost of service. [footnotes omitted]

Decision

The Commission has traditionally not allowed earnings based compensation to be recovered in rates because those incentives predominantly benefit shareholders and not ratepayers. Incentivizing employees to improve Empire's bottom line aligns the employee interests with the shareholders and not ratepayers. Staff appropriately disallowed the short-term incentive plans because of its earnings per share target, the Long Term Incentive Plan because it is a stock compensation plan, and the Stock Option expenses. The Commission agrees with Staff that those incentive plans are primarily for the benefit of the shareholders and not for the benefit of the ratepayers. The Commission finds that \$1,245,016 is the appropriate amount of incentive compensation to include in Empire's cost of service.

29) Customer Demand-Side Management Program (DSM)

Findings of Fact

432. Empire's Account 182318 contains costs of the Company's customer demand-side management (DSM) programs.⁵⁹²

433. Empire states that the rate base amount for the customer DSM program as of January 31, 2020 is \$4,269,460 and the appropriate level of amortization expense related to the DSM program is \$1,422,715.⁵⁹³

⁵⁹² Ex. 101, Staff Direct Report, page 52.

⁵⁹³ Ex. 76, DSM Workpaper.

434. Staff amortized Empire's costs before its Regulatory Plan ended on June 15, 2011, over ten years. Staff amortized costs incurred after that over a period of six years, consistent with the Commission's Report and Order in File No. ER-2014-0351.⁵⁹⁴

435. Staff removed the amortization of program expenditures from 2007 and 2011 that expired in December 2017, and the amortization of the expenditures from 2008 and 2012 that expired in December 2018, as well as the balance for the years 2009 and 2013 that became fully amortized as of December 2019.⁵⁹⁵

436. After surrebuttal was filed Staff discovered an error in the formula of the supporting workpaper for the calculation of the regulatory asset balance. Staff's corrected workpaper contains the calculations that support its position.⁵⁹⁶

437. The appropriate rate base amount for the customer DSM program trued-up as of January 31, 2020 is \$4,267,998 based on Staff's calculations, and the appropriate level of amortization expense related to the customer DSM program is \$1,447,308.⁵⁹⁷

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that the appropriate rate base amount for the customer DSM programs is \$4,267,998, and the appropriate level of amortization expense related to the customer DSM program is \$1,447,308.

⁵⁹⁴ Ex. 101, Staff Direct Report, page 52.

⁵⁹⁵ Ex. 101, Staff Direct Report, page 52, and Ex. 139, Newkirk Surrebuttal True-Up, page 4.

⁵⁹⁶ Ex. 152, Newkirk Additional Evidence.

⁵⁹⁷ Ex. 152, Newkirk Additional Evidence.

30) Bad Debt Expense

Findings of Fact

438. Bad debt expense is the portion of retail revenue that Empire is unable to collect from retail customers due to non-payment of bills.⁵⁹⁸

439. The final bill is due 21 days from the statement mailing date. If unpaid, on the second day after the due date, a collection notice is sent advising the customer the account will be turned over to a collection agency if unpaid or suitable arrangements are not made within 10 days. After the 10 days, any accounts that remain unpaid are written off and sent to a collection agency.⁵⁹⁹

440. Empire's bad debt expense fluctuates from year to year.⁶⁰⁰

441. Staff looked at Empire's most recent five years bad debt write-offs that were never collected, and calculated the average uncollectable rate of 0.4016 percent bad debt to revenue. This was applied to Staff's annualized and adjusted test year retail rate revenues to find Empire's normalized bad debt expense.⁶⁰¹

442. Staff calculated the appropriate level of bad debt expense to include in rates trued-up to January 31, 2020 is \$1,910,437.⁶⁰²

443. Empire agrees with Staff's methodology for determining the bad debt percentage, but disagrees with the adjusted level of revenues to which Staff applied that percentage.⁶⁰³

Conclusions of Law

No additional Conclusions of Law are required for this issue.

⁵⁹⁸ Ex. 101, Staff direct Report, page 79.

⁵⁹⁹ Ex. 101, Staff direct Report, page 79.

⁶⁰⁰ Ex. 101, Staff direct Report, page 79.

⁶⁰¹ Ex. 101, Staff direct Report, page 79.

⁶⁰² Ex. 124, Staff's True-Up Accounting Schedules.

⁶⁰³ Ex. 5, Richard Rebuttal, page 21.

Decision

Both Empire and Staff arrived at similar uncollectable expense ratios. It appears the main discrepancy between the parties' bad debt expense calculations is dependent upon the level of revenue. The Commission finds that a five-year average is the most appropriate method to calculate the uncollectable rate, and that Staff's annualized and adjusted test year retail rate revenues are reasonable. Therefore, the Commission determines that the appropriate level of Bad Debt Expense to include in Empire's cost of service is \$1,910,437.

31) Retail Revenue

Findings of Fact

444. Operating revenues are composed of retail rate revenue and other operating revenue. Retail rate revenue is defined as test year rate revenues consisting solely of the revenues derived from the current rates Empire charges for providing electric service to its Missouri retail customers (i.e., native load and customer charges).⁶⁰⁴

445. Revenues from the FAC represent collections or refunds of prior period fuel costs and are excluded in determining the annualized level of ongoing rate revenues.⁶⁰⁵

446. Staff eliminated unbilled revenue from its determination of revenue requirement to ensure only 365 days of revenue are included and to reflect revenues on an "as billed" basis.⁶⁰⁶ The recording of unbilled revenue on the books of Empire recognizes sales of electricity that have occurred but have not yet been billed to the customer.⁶⁰⁷ It is necessary to remove unbilled revenue in order to reach an accurate

⁶⁰⁴ Ex. 101, Staff Direct Report, page 35.

⁶⁰⁵ Ex. 101, Staff Direct Report, page 35.

⁶⁰⁶ Ex. 101, Staff Direct Report, page 49.

⁶⁰⁷ Ex. 101, Staff Direct Report, page 49.

revenue requirement based on electricity sales actually collected from Missouri customers.⁶⁰⁸

447. Staff removed the FAC revenues from the test year revenues.⁶⁰⁹

448. Franchise taxes are removed from revenue requirement because city franchise tax is not a revenue source for Empire.⁶¹⁰ It is a municipal tax Empire is obligated to collect and remit to the various municipalities where the Company provides electric service. Generally, there is no impact on Empire's earnings related to the collection of city franchise taxes because this revenue is offset by an equal amount of expense.⁶¹¹

449. Empire's states that Staff's process violated the fundamental matching principle in ratemaking in regards to adjustments made to FAC revenues, unbilled revenue and franchise tax revenue.⁶¹²

450. In order to have appropriate matching when normalizing or annualizing revenues or expenses, a common date is used across the board. However, in the case of complete disallowance, the amount is not trued-up past the test year because it is not necessary in order to set an account to zero. No matter what balances would be reflected in the update period or true-up period, it is the test year that is adjusted in the EMS run. So for that reason, as done by Staff, a negative adjustment should be made equal to test year amounts in order to remove these revenues from the revenue accounts.⁶¹³

⁶⁰⁸ Ex. 101, Staff Direct Report, pages 49-50.

⁶⁰⁹ Ex. 101, Staff Direct Report, page 49.

⁶¹⁰ Ex. 8, Palumbo Direct, pages. 3-4, and Ex. 101, Staff Direct Report, page 50.

⁶¹¹ Ex. 8, Palumbo Direct, pages. 3-4; and Ex. 101, Staff Direct Report, page 50.

⁶¹² Ex. 5, Richard Rebuttal, page 12.

⁶¹³ Ex. 139, Newkirk Surrebuttal True-Up, pages 1-2.

451. The appropriate adjustments to be removed from retail revenues are the total amounts recorded in the general ledger for the test year: ⁶¹⁴ unbilled revenues, \$6,391,485; franchise tax revenues, \$9,923,350; and FAC revenues, \$17,047,207. Since these accounts are only pass-through accounts, Staff's adjustment will zero out each account and have no effect on the cost of service.⁶¹⁵

452. Staff adjusted actual billing determinants to equal the normalized and annualized monthly kWh using the relationship between actual average usage per customer and normalized and annualized average usage per customer. Staff also used the relationship between percentage of usage priced in the first rate block and the second rate block to distribute normalized and annualized monthly kWh to the rate blocks for rate classes Residential Service (RG), Commercial Service (CB) and Small Heating Service (SH). This calculation resulted in normalized usage by rate block, which was then converted to total normalized and annualized revenues by multiplying rate block usage by the appropriate rates. The GP and Total Electric Building Service (TEB) class billing units were similarly adjusted; however, the rate classes were subdivided by voltage with separate normalization and annualization adjustments being applied to each voltage level.⁶¹⁶

453. The appropriate level of billing determinants to be used in the calculation of retail rate revenue for the test year are included in the true-up workpapers of Michelle Bocklage⁶¹⁷ and Byron Murray⁶¹⁸, and the level of retail revenue is provided in Staff's True-Up Accounting Schedules.⁶¹⁹

⁶¹⁴ Ex. 124, Staff True-Up Accounting Schedules, Schedule 10, page 1

⁶¹⁵ Ex. 101, Staff Direct Report, pages 49-51, and Ex. 139, Newkirk Surrebuttal True-up, pages. 1-2.

⁶¹⁶ Ex. 101, Staff Direct Report, page 37.

⁶¹⁷ Ex. 147, Bocklage Supporting Evidence.

⁶¹⁸ Ex. 151, Murray Supporting Evidence.

⁶¹⁹ Ex. 124, Staff True-Up Accounting Schedules.

454. The billing adjustments should be trued up to January 31, 2020; with the exception of retail revenue for unbilled revenue, franchise tax revenue, and FAC revenue. The excepted amounts should not be trued up but should be left at test year amounts.⁶²⁰

Conclusions of Law

No additional conclusions of law are necessary.

Decision

The difference between Empire's and Staff's position on these issues is based on Empire's use of balances trued-up through January 31, 2020, while Staff used test year amounts through September 30, 2019. According to Empire, updating these amounts is necessary in order to maintain a proper matching of the rate components. The Commission was persuaded by Staff's explanation that unbilled revenues, franchise tax revenue, and FAC revenues, are pass-through accounts and Staff's adjustment will zero out each account so that it has no effect on cost of service. Thus, with the exceptions of retail revenue for unbilled revenue, franchise tax revenue and FAC revenue, billing adjustments should be trued-up to January 31, 2020, in order to maintain the appropriate matching. However, the adjustments to retail revenue for unbilled revenue, franchise tax revenue and FAC revenue should not be trued up but should be left at test year amounts.

The Commission was also persuaded that Staff's adjustments represent the appropriate amounts to be removed from retail revenues. Those amounts are: unbilled revenues, \$6,391,485; franchise tax revenues, \$9,923,350; and FAC revenues,

⁶²⁰ Ex. 139, Newkirk Surrebuttal True-up, page 2.

\$17,047,207.⁶²¹ These are the total amounts recorded in the general ledger for the test year.⁶²²

The Commission further determines that the appropriate level of billing determinants to be used in the calculation of retail rate revenue for the test year are included in the true-up workpapers of Michelle Bocklage⁶²³ and Byron Murray,⁶²⁴ and the appropriate level of retail revenue is provided in Staff's True-Up Accounting Schedules.⁶²⁵

32) Other Revenue

Findings of Fact

455. Other operating revenue includes revenues from such items as forfeited discounts, reconnect charges, rent from electric property, and other miscellaneous charges.⁶²⁶

456. Coal fly ash is a byproduct created as a result of the burning of coal in generating stations to produce electricity. Fly ash has a number of possible industrial uses, primarily as an ingredient in concrete products. Over the past several years, Empire has been selling its fly ash to several different industrial companies to be used in concrete. By recycling fly ash, Empire receives revenue and provides positive environmental benefits.⁶²⁷

457. Empire's miscellaneous other revenues consist of forfeited discounts, rents from property, reconnect, and surge arrester fees. Staff's analysis reflected a review of

⁶²¹ Ex. 101, Staff Direct Report, pages 49-51, and Ex. 139, Newkirk Surrebuttal, pages 1-2.

⁶²² Ex. 101, Staff Direct Report, pages 49-51, and Ex. 139, Newkirk Surrebuttal, pages. 1-2.

⁶²³ Ex. 147, Bocklage Supporting Evidence.

⁶²⁴ Ex. 151, Murray Supporting Evidence.

⁶²⁵ Ex. 124, Staff True-Up Accounting Schedules.

⁶²⁶ Ex. 101, Staff Direct Report, page 35.

⁶²⁷ Ex. 101, Staff Direct Report, pages 50-51.

these revenue levels over a three-year period ending September 30, 2019. Based upon Staff's review, the miscellaneous revenue levels at a 12-month period ending September 30, 2019, appear reasonable for inclusion in customer cost of service.⁶²⁸

458. Empire agreed with or did not oppose adjustments proposed by Staff in their Direct Report for rent revenue, fly ash revenues, and miscellaneous revenues.⁶²⁹ Empire updated its rent revenues balance to September 30, 2019, as recommended by Staff witness Caroline Newkirk in Staff's Direct Report.⁶³⁰ The other electric revenues were normalized to a three-year average as of September 30, 2019, while the fly ash revenues were adjusted.⁶³¹

459. With the additional data provided as a part of true-up, Staff adjusted its date ranges to full calendar years instead of the mid-year ranges, which were previously used. Staff used the 12-month period ending December 31st for 2017, 2018, and 2019 to analyze trends in the "other revenue" data. After analyzing the trends in the data, Staff decided to use a three-year average for rent revenue, fly ash revenue, and other electric revenue.⁶³² Empire showed that the appropriate normalized amount of rent revenues is \$1,026,462,⁶³³ other electric revenues is \$354,638,⁶³⁴ and fly ash revenues that should be included in the cost of service is \$36,107.⁶³⁵

Conclusions of Law

No additional conclusions of law are needed.

⁶²⁸ Ex. 101, Staff Direct Report, page 51.

⁶²⁹ Ex. 5, Richard Rebuttal, page 37.

⁶³⁰ Ex. 7, Richard True-Up Direct, pages 9 and 11; and Ex. 81, Rent Revenues Workpaper,

⁶³¹ Ex. 7, Richard True-Up Direct, pages 9 and 11, Ex. 82, Other Revenues Workpaper, and Ex. 83, Fly Ash Revenues Workpaper.

⁶³² Ex. 139, Newkirk Surrebuttal/True-up, page 4.

⁶³³ Ex. 81, Rent Revenues Workpaper.

⁶³⁴ Ex. 82, Other Revenues Workpaper,

⁶³⁵ Ex. 83, Fly Ash Revenues Workpaper.

Decision

The Commission finds that Empire's approach is more consistent with the approach used in other calculations. Empire did not oppose Staff's adjustments for rent revenues, other electric revenues, or fly ash revenues as outlined in Staff's Direct Report. Empire appropriately updated the rent revenues balance to September 30, 2019, and normalized the other revenues to a three-year average as of September 30, 2019 as initially suggested by Staff. Empire provided the workpapers of its witness showing that the appropriate normalized amount of rent revenues is \$1,026,462, other electric revenues is \$354,638, and the level of fly ash revenues that should be included in the cost of service is \$36,107.

33) Tax Cut and Jobs Act Revenue

Findings of Fact

460. Test year rate revenues do not reflect the full amount of the reduction to Empire's rates ordered by the Commission in File No. ER-2018-0366, from the TCJA.⁶³⁶

461. Test year revenues were overstated by the difference between the amount that was actually billed to customers during the test year and the amount that would have been billed if the federal tax rate reduction had been in effect throughout the entire test year.⁶³⁷

462. Staff proposes an adjustment to remove the income tax impact to revenues for each rate class by multiplying the actual test year kWh for the months of April 2018 through August 2018 by the appropriate class' tax credit as established in File No. ER-2018-0366.⁶³⁸

⁶³⁶ Ex. 101, Staff Direct Report, page 49.

⁶³⁷ Ex. 101, Staff Direct Report, page 49.

⁶³⁸ Ex. 101, Staff Direct Report, page 49.

463. The appropriate amount of TCJA revenue to remove from test year revenues is \$7,760,076,⁶³⁹ which represents the sum of the adjustment to all Empire rate classes.⁶⁴⁰

Conclusions of Law

No additional conclusions of law are necessary.

Decision

The evidence shows that test year revenues, beginning April 1, 2018, were overstated because the TCJA was not recognized in Empire electric rates until September 1, 2018. The Commission determines that the test year revenue amounts were overstated by \$7,760,076, which should be removed from test year revenues to properly reflect the current income tax rate for the entire test year. The Commission agrees with Staff's recommended adjustment to remove the income tax impact to revenues for each rate class by multiplying the actual test year kWh for the months of April 2018 through August 2018 by the appropriate class' tax credit. The Commission has already found in issue 12 that the amounts deferred for the stub period shall be amortized as a reduction to Empire's total amortization expense over five years with no rate base offset for the unamortized amount.

34) Property Insurance

Findings of Fact

464. Insurance expense is the cost of protection obtained from third parties by utilities against the risk of financial loss associated with unanticipated events or occurrences.⁶⁴¹

⁶³⁹ Ex. 102, Staff Direct Accounting Schedules, and Ex. 124, Staff True-Up Accounting Schedules.

⁶⁴⁰ Ex. 102, Staff Direct Accounting Schedules, and Ex. 124, Staff True-Up Accounting Schedules.

⁶⁴¹ Staff's Cost of Service Report, Ex. 101, pages 77-78.

465. Utilities, like non-regulated entities, routinely incur insurance expense to minimize their liability, and potentially that of their customers, associated with unanticipated losses.⁶⁴²

466. Staff annualized Empire's insurance expense.⁶⁴³

467. Staff made an adjustment to its direct filing to include increases to Empire's portion of the 2019-2020 property insurance premium by \$934,813.⁶⁴⁴

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds Staff's determination of property insurance expense to be included in Empire's cost of service on a Missouri jurisdictional basis appropriate.

⁶⁴² Staff's Cost of Service Report, Ex. 101, pages 77-78.

⁶⁴³ Staff's Cost of Service Report, Ex. 101, page 78.

⁶⁴⁴ Ex. 125, Arabian Surrebuttal True-Up, page 3.

35) Injuries and Damages

Findings of Fact

468. Empire maintains workers' compensation insurance for the benefit of its employees.⁶⁴⁵

469. The workers' compensation adjustment proposed by Staff annualizes this expense based upon the premiums in effect at July 2019 to reflect an ongoing and normal expense level for Empire.⁶⁴⁶

470. From time to time, claimants sue Empire seeking payment of damages. If Empire loses the lawsuit, Empire will likely make a payout to the aggrieved party. Alternatively, it may choose to enter in to an out-of-court settlement, also resulting in a payout.⁶⁴⁷

471. To determine a normalized level of this expense, Staff used a five-year average of actual injuries and damages and workers' compensation payments in its cost of service report, instead of relying upon accounting estimates. Staff applied an allocation of 50 percent to the five-year average of actual payments made for injuries and damages⁶⁴⁸.

472. The allocation of 50 percent represents the electric expense portion of the payments. The remaining 50 percent of the payments are allocated to the Company's construction, water operations and below-the-line activities.⁶⁴⁹

⁶⁴⁵ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁴⁶ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁴⁷ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁴⁸ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁴⁹ Ex. 101, Staff Cost of Service Report, page 81.

473. Below the line refers to line items in the income statement that do not directly impact a company's reported profits.⁶⁵⁰

474. A five-year average of actual payments was used to normalize this expense, because Staff's analysis shows a considerable fluctuation in the annual amount of payments from one year to the next.⁶⁵¹

475. The appropriate amount of injuries and damages expense to include in the cost of service is \$312,562 (total company).⁶⁵²

476. Empire annualized its' insurance expense based on new insurance premiums that went into effect after the test year. This adjustment also normalized the test year level of injuries and damages claims and workers' compensation payments by utilizing a five-year average of actual payments.⁶⁵³

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Both Empire and Staff agree on the total company injuries and damages expense to be included in the cost of service. The Commission finds that \$312,562 is the appropriate amount of injuries and damages expense, total company, to include in the cost of service.

⁶⁵⁰ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁵¹ Ex. 101, Staff Cost of Service Report, page 81.

⁶⁵² Ex. 86, Richard workpaper.

⁶⁵³ Ex. 7, Richard True-Up Direct, page 16.

36) Payroll and Overtime

Findings of Fact

477. Staff made adjustments to Empire's test year payroll expense to reflect annualized levels of payroll, payroll taxes, and 401(k) benefit costs as of January 31, 2020, as detailed in Staff's Direct Cost of Service Report and True-Up testimony.⁶⁵⁴

478. Staff's test year total payroll includes all the components of payroll expense (regular payroll, overtime payroll and incentive compensation).⁶⁵⁵ Staff calculated regular payroll and overtime separately from incentive compensation. Staff independently calculated an annualized level of incentive compensation to include in the cost of service, and therefore made an adjustment to add this number into the cost of service.⁶⁵⁶

479. Staff made several adjustments to its initial filing to correct employee counts through the true-up period, January 31, 2020.⁶⁵⁷

480. Staff made adjustments to remove all incentive compensation that occurred in the test year. Staff then made a further adjustment adding the appropriate amount of incentive compensation back into the cost of service.⁶⁵⁸

481. Staff calculated a reasonable overtime payroll level for Empire by multiplying an overtime percentage computed for the non-union and union employees based on a two-year average of overtime hours that actually occurred by the current rate paid for overtime as of September 30, 2019, then divided that amount by Staff's pro forma base payroll amount.⁶⁵⁹

⁶⁵⁴ Ex. 125, Arabian Surrebuttal True-Up, page 3; and Ex. 101, Staff Cost of Service Report, page 62.

⁶⁵⁵ Ex. 129, Bolin Surrebuttal, page 4.

⁶⁵⁶ Ex. 129, Bolin Surrebuttal, page 4.

⁶⁵⁷ Ex. 125 Arabian Surrebuttal True-Up, pages. 2-3.

⁶⁵⁸ Ex. 129, Bolin Surrebuttal, page 4.

⁶⁵⁹ Ex. 101, Staff Direct Report, page 62.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that Staff's methodology to determine the appropriate test year amount updated through the true-up period of January 31, 2020 for total payroll, including overtime expense, to be appropriate for inclusion in Empire's cost of service.

37) Retention Bonuses

Findings of Fact

482. There is a very high demand for employees that have the unique skillset of journeyman lineman, who support efforts of increased reliability, infrastructure upgrades, and increased responsiveness to customer requests. As a result of the increased competition, utilities, including Empire, have struggled to hire and retain the desired number of journeyman lineman.⁶⁶⁰

483. As a result of this high demand, utility contract companies are now willing to offer high premium pay and other benefits, including daily per diems in an effort to meet their workforce needs. In most cases, employees have been able to double and even triple their compensation.⁶⁶¹

484. Empire's planned to offer monthly retention bonuses of \$1,500 until the increased competitive job market for lineman subsides. Empire plans to also promote this incentive externally to attract lineman. Empire also plans on offering this retention bonus to retain existing staff with lineman skills currently in other roles,⁶⁶²

⁶⁶⁰ Ex. 39, Westfall Direct, page 12.

⁶⁶¹ Ex. 39, Westfall Direct, page 12.

⁶⁶² Ex. 39, Westfall Direct, page 13.

485. Empire has requested to include an annualized amount of retention bonuses paid to linemen and other qualified employees that started after the test year in rates.⁶⁶³

486. Prior to implementing the lineman retention program starting with the September 2019 pay period, Empire lost 16 journeymen linemen between March and August of 2019.⁶⁶⁴

487. Now that the retention program has been implemented, Empire states that retention efforts have been successful. Empire has been able to keep qualified personnel, having only lost two lineman since the roll out of the retention program. It has also assisted with Empire's recruitment efforts to replace the employees it had lost.⁶⁶⁵

488. Empire urges the Commission to include \$1,021,080, for journeyman lineman retention bonuses in its cost of service.⁶⁶⁶

489. Staff included amounts considered to be known and measurable in its direct case as of September 30, 2019, the end of the update period. This predates the retention program, which had not yet been implemented.⁶⁶⁷

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Empire has described the shortage of journeyman lineman, and has explained that it has had difficulty in attracting and retaining qualified employees for this position. The Commission finds Empire's testimony regarding the shortage of journeyman lineman

⁶⁶³ Ex. 7, Richards True-Up Direct, pages 13 and 21.

⁶⁶⁴ Ex. 40, Westfall True-Up Direct, page 3.

⁶⁶⁵ Ex. 40, Westfall True-Up Direct, page 3.

⁶⁶⁶ Ex. 88, Retention Workpaper and Ex. 7, Richards True-Up Direct, page 13.

⁶⁶⁷ Ex. 125, Arabian Surrebuttal True-Up, page 2.

credible. Hiring and retaining qualified linemen is important to Empire being able to provide safe and adequate service. Accordingly, the Commission finds that \$1,021,080, should be included in Empire's cost of service for its lineman retention program.

38) Employee Benefits

Findings of Fact

490. Empire offers its employees dental, vision, healthcare, and life insurance benefits, which are included in Account 926.⁶⁶⁸

491. Staff analyzed Empire's employee benefit costs included in its general ledger. Staff annualized each expense by examining the individual costs over a 36-month period to determine the appropriate amount to include for each expense. A three-year average through the update period was performed to annualize these expenses ending September 30, 2019.⁶⁶⁹

492. Empire trued up the test year medical, dental, and vision claim expense accounts to the balances at January 31, 2020.⁶⁷⁰

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Based on the evidence, the Commission finds that Staff's three-year average to annualize employee benefits through September 30, 2019 is the appropriate method to use to determine the level of employee benefits to include in the cost of service.

⁶⁶⁸ Ex. 101, Staff Direct Report, page 63.

⁶⁶⁹ Ex. 101, Staff Direct Report, page 63, Ex. 102, Staff Direct Accounting Schedules, and Ex. 124, Staff True-Up Accounting Schedules.

⁶⁷⁰ Ex. 7, Richard True-Up Direct, page 15, and Ex. 89, Medical Dental Vision Workpaper

39) Property Taxes

Findings of Fact

493. Utility companies are required to file a valuation of their utility property with their respective taxing authorities at the beginning of each assessment year, which is January 1st. Based on the information provided by the utility, the taxing authority will in turn send the company its “assessed values” for every category of the company’s property.⁶⁷¹

494. The taxing authority issues a property tax bill to the utility late in the year which is due no later than December 31st.⁶⁷²

495. Staff’s calculation is based upon the last known actual amount of property taxes paid by Empire and the plant-in-service associated with the property tax payment.⁶⁷³

496. To appropriately calculate the overall property tax amount for Empire, the amount of Empire’s share of the Plum Point plant was subtracted from total plant in service. The owners of Plum Point have agreed to make an annual Payment In Lieu of Taxes (PILOT) instead of paying property taxes. The set amount of PILOT taxes that Empire has agreed to pay for Plum Point was then added to the annualized property tax calculation to determine the total property tax adjustment.⁶⁷⁴

497. The appropriate amount of property tax expense is \$25,138,294. Staff determined this annualized level by applying Empire’s tax rate to plant in service balances

⁶⁷¹ Ex. 101, Staff’s Cost of Service Report, pages 78-79.

⁶⁷² Ex. 127, Surrebuttal/True-Up Testimony of Courtney Barron, page 2.

⁶⁷³ Ex. 127, Surrebuttal/True-Up Testimony of Courtney Barron, page 2.

⁶⁷⁴ Ex. 101, Staff’s Cost of Service Report, pages 78-79.

as of December 31, 2019, which are the most current known and measurable balances used in the property tax assessment process.⁶⁷⁵

498. The proper method to calculate the property tax to be included in cost of service is Staff's method. Staff calculated the property rate by dividing the 2019 property taxes paid by the December 31, 2018 total property. This property tax rate was then applied to the total property as of December 31, 2019 to determine annualized property tax. Not included in the property tax calculation is the 2019 Plum Point PILOT paid, Staff added this to the annualized property tax to determine the total annualized property tax.⁶⁷⁶

499. Staff updated property tax expense to reflect plant-in-service as of December 31, 2019. The ratio of property taxes paid at year-end 2019 to the balance of plant-in service as of January 1, 2019 was applied by Staff to the December 31, 2019 plant-in-service balance.⁶⁷⁷

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that \$25,138,294 (after the jurisdictional allocation factor is applied) is the appropriate amount of property tax to include in the cost of service. The Commission additionally finds that Staff's method of calculating property tax is reasonable.

⁶⁷⁵Ex. 101, Staff's Cost of Service Report, pages 78-79; Ex. 127, Barron Surrebuttal/True-up , pages. 1-3; and Ex. 124, Staff True-up Accounting Schedules.

⁶⁷⁶ Ex. 101, Staff's Direct Report, pages 78-79; Ex. 127, Barron Surrebuttal/True-up T, pages 1-3.

⁶⁷⁷ Ex. 127, Barron Surrebuttal/True-up, page 3.

40) Dues and Donations

Findings of Fact

500. Edison Electric Institute (EEI) is an association of investor-owned electric utilities and industrial affiliates, whose primary function is to represent the interests of its members in the legislative and regulatory arenas, which includes lobbying activities.⁶⁷⁸

501. Staff excluded EEI dues totaling \$179,693, because Empire failed to quantify the benefit of its participation in this organization to the ratepayers and shareholders.⁶⁷⁹

502. In addition, Staff disallowed other dues and donations, which included those related to country clubs, national and state level chamber of commerce, and alumni associations. Allowing Empire to recover these expenses through rates would cause ratepayers to involuntarily contribute to these organizations.⁶⁸⁰

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that dues and donations to EEI and the other dues and donations identified by Staff in its Direct Report, which included those related to country clubs, national and state level chamber of commerce, and alumni associations, should be excluded from the cost of service because there is no direct benefit to ratepayers.

⁶⁷⁸ Ex. 127, Barron Surrebuttal/True-up, page 3.

⁶⁷⁹ Ex. 101, Staff's Direct Report, page 77.

⁶⁸⁰ Ex. 101, Staff's Direct Report, page 76.

41) Outside Services

Findings of Fact

503. Various outside (independent) contractors and vendors provide legal, auditing, and other services to Empire to carry out its operational activities as needed.⁶⁸¹

504. Staff reviewed Empire's outside services expenses booked to Accounts 923045 and 923047 for the test year through the update period ending September 30, 2019. Staff normalized the amounts of outside services by calculating a five-year average of incurred costs for these accounts in the amount of \$2,326,254.⁶⁸²

505. Staff subtracted the five-year average of incurred costs from the test year total to determine the adjustment. This adjustment does not include outside services related to rate case expense. Outside services incurred for rate case purposes are booked in a separate account.⁶⁸³

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

The Commission finds that \$2,326,254 is the appropriate amount of outside services to be included in the cost of service from Accounts 923045 and 923047. The Commission further determines that Staff's jurisdictional allocations should be applied.

⁶⁸¹ Ex. 101, Staff Direct Report, page 82.

⁶⁸² Ex. 101, Staff Direct Report, p. 82.

⁶⁸³ Ex. 101, Staff Direct Report, page 82.

42) Common Property Removed from Plant and Accumulated Depreciation

Findings of Fact

506. Empire records its water, non-utility operating, Empire District Gas, fibercom, MO water, and MO Midstates gas general plant in service balances on its electric books.⁶⁸⁴

507. Some common plant assets on Empire's books are related to non-electric service and should be removed.⁶⁸⁵

508. Staff applied an allocation factor to the entire general plant balances, FERC Accounts 389-398, instead of applying the allocation factor only to those specific assets within the plant accounts that are shared. Those accounts do not just include electric plant but also include common plant that serves other regulated and unregulated business.⁶⁸⁶

509. Empire made adjustments to remove a portion of common plant utilized by other businesses, which includes buildings such as the Joplin Corporate Office, the Joplin Kodiak Operations office and the Ozark Call Center. Then it applied a jurisdictional allocation factor to all remaining general plant.⁶⁸⁷

510. Prior to the application of the jurisdiction factors the total company amounts are \$5,724,752 for removal of common property from plant in service, and \$3,330,005, for accumulated depreciation as of the end of the true-up period ending January 31, 2020.⁶⁸⁸

Conclusions of Law

No additional Conclusions of Law are required for this issue.

⁶⁸⁴ Ex. 101, Staff Direct Report, page 19.

⁶⁸⁵ Ex. 4, Richard Corrected Direct, page 11.

⁶⁸⁶ Ex. 5, Richard Rebuttal, page 3.

⁶⁸⁷ Ex. 5, Richard Rebuttal, page 3.

⁶⁸⁸ Ex. 93, Common Property True-Up Workpaper.

Decision

The Commission finds that Empire's method of calculating removal of common property from plant in service and the corresponding accumulated depreciation is the appropriate method. Staff erred because FERC Accounts 389-398 are not all common plant. Therefore, the Commission concludes that \$5,724,752 is the correct amount for removal of common property from plant in service, and \$3,330,005, is the correct corresponding amount for accumulated depreciation. Staff's jurisdictional allocation factors should be applied to those amounts.

43) File No. EM-2016-0213 Commission-ordered conditions

Some parties have questioned Empire's compliance with conditions A.4, A.5, A.6, and G.3 contained in the Merger Stipulation approved by the Commission in File No. EM-2016-0213. Compliance with conditions A.4, A.5, and A.6, regarding cost of capital, capital structure, and affiliate transactions, are addressed elsewhere in this Report and Order. Consequently, because those issues have already been addressed, no additional findings of fact or conclusions of law are necessary, and no relief need be granted beyond what has been determined in other issues.

Empire's compliance with condition G.3, involving access to records, has not been otherwise addressed and the Commission will address that condition here.

Findings of Fact

511. In the Merger Stipulation approved by the Commission in File No. EM-2016-0123, the parties were aware of the potential impact APUC's business and financing strategies might have on Empire's capital structure, and cost of capital.⁶⁸⁹

⁶⁸⁹ Ex. 210, Murray Direct, page 20.

512. The Merger Stipulation contained conditions regarding records access that the joint applicants, Empire and Liberty, agreed to follow.⁶⁹⁰

513. Condition G.3 of the Access to Records Conditions states: Empire shall provide Staff and OPC access to and copies of, if requested by Staff or OPC, the complete Liberty Utilities Co, LU Central and Empire Board of Directors' meeting minutes, including all agendas and related information distributed in advance of the meeting, presentations and handouts, provided that privileged information shall continue to be subject to protection from disclosure and Empire shall continue to have the right to object to the provision of such information on relevancy grounds.⁶⁹¹

514. OPC's witness Murray states that there were discovery problems related to withholding of APUC and LUCo materials, such as Board of Director documents and affiliate financing transaction materials.⁶⁹²

515. Staff was provided access to Board of Director documents in response to data request No. 0009.⁶⁹³

516. OPC requested all affiliate loan agreements for all of the companies that may be involved in raising financing to capitalize LUCo's capital structure. Empire objected that the information was irrelevant.⁶⁹⁴

517. OPC requested information on how recent economic and capital market events may impact APUC's investment plans for Empire and/or financing plans. Empire objected that the information was irrelevant because it was outside the test year.⁶⁹⁵

⁶⁹⁰ Order Approving Stipulations and Agreements and Authorizing Merger Transaction, Issued September 7, 2016.

⁶⁹¹ Order Approving Stipulations and Agreements and Authorizing Merger Transaction, Appendix to Attachment A, Issued September 7, 2016.

⁶⁹² Ex. 211, Murray Rebuttal, page 6.

⁶⁹³ Ex. 153, Empire response to Staff data request 0009.

⁶⁹⁴ Ex. 212, Murray Surrebuttal True-Up, page 14.

⁶⁹⁵ Ex. 212, Murray Surrebuttal True-Up, page 8.

518. No party in this case sought to compel discovery.

Conclusions of Law

No additional Conclusions of Law are required for this issue.

Decision

Condition G.3 of the Merger Stipulation, Access to Records Conditions, states that Empire shall provide Staff and OPC access to the complete LUCo and Empire Directors' meeting minutes. It also states that Empire may object for relevancy. OPC's witness Murray testified regarding the information Empire objected to for relevancy. Empire is within its right to object under condition G.3 for relevancy. If OPC believed that the requested information was relevant it should have asked the Commission to compel Empire to produce that information. It did not. The Commission received no motions to compel discovery in this case. The Commission finds that Empire complied with condition G.3, because it provided board of director information to Staff in response to Staff's request, and timely objected to OPC's requests based upon relevancy.

Decision Summary

In making this decision as described above, the Commission has considered the positions and arguments of all of the parties. Failure to specifically address a piece of evidence, position or argument of any party does not indicate that the Commission has failed to consider relevant evidence, but indicates rather that the material was not dispositive of this decision.

Additionally, Empire provides safe and adequate service, and the Commission concludes, based upon its review of the whole record, that the rates approved as a result of this order support the provision of safe and adequate service. The revenue

requirement authorized by the Commission is no more than what is sufficient to keep Empire's utility plants in proper repair for effective public service and provide to Empire's investors an opportunity to earn a reasonable return upon funds invested.

By statute, orders of the Commission become effective in thirty days, unless the Commission establishes a different effective date.⁶⁹⁶ In order that this case can proceed expeditiously, the Commission will make this order effective on July 11, 2020 to match the date to which Empire tariff has been suspended.

THE COMMISSION ORDERS THAT:

1. The Motion to Strike Portions of OPC Surrebuttal Testimony filed by Missouri Industrial Energy Consumers on April 10, 2020, is denied.

2. The Objections to Offers of Evidence filed by The Empire District Electric Company on May 6, 2020, are denied.

3. The tariff sheets submitted on August 14, 2019, by The Empire District Electric Company, assigned Tariff No. YE-2020-0029 are rejected.

4. The Empire District Electric Company is authorized to file tariff sheets sufficient to recover revenues approved in compliance with this order.

5. The Empire District Electric Company shall file any information required by Section 393.275.1, RSMo, and Commission Rule 20 CSR 4240-10.060 no later than August 3, 2020.

6. The Empire District Electric Company shall record as a regulatory asset/liability the costs and revenues identified in the body of this order as of January 1, 2020, related to the closure of the Asbury Power Plant. The regulatory

⁶⁹⁶ Section 386.490.3, RSMo.

asset/liability should quantify separately dollars related to the categories of costs and revenues.

7. The Empire District Electric Company shall comply with all directives, conditions and reporting requirements as more fully described in the body of this order.

8. This Report and Order shall become effective on July 11, 2020.
