

EC-2026-0004

The main reason I want a protective order issued before I submit a copy of my bank statement, is therefore my information is protected and only given to appropriate parties in this matter. I don't trust Ameren with any of my documents, and I believe Ameren Missouri is going to alter them, just like they did in EC-2023-0395. Such as the payment agreement that was given in EC-2023-0395. Ameren Missouri then decided to provide an altered copy, written by [REDACTED] [REDACTED] with invalid coding definitions, invalid and bogus payment dates, no tracking cookies, no header, bogus email address, no date or time stamp, along with encryption details.

I have no doubt in my mind, the second I upload a physical copy of my statement, that Ameren Missouri is going to alter it, just like they do with ever document.

Instead of providing documents, they provide their nutcase mental theories. In which they provide a document with a series of words of how they think it should be written, over how it is actually worded. No more than forged by [REDACTED], their master manipulator of documents, and their counterfeit document specialist.

Also, the PSC is after the material facts resolving this matter. Not how many emails I've sent to Staff members, Ameren Missouri, or

the Regulatory Judges. If anything, it points a reputable pattern of neglect to answer questions directed to parties and then avoiding answering certain questions asked within those emails.

Besides that. Ameren has already started their counterfeit or forged documents, by posting a forged document without tracking cookies, an encryption detail or reference of AM OR PM to the document. Besides the point of that, it's not in email format like it should be when an actual document or notice is sent.

Give me my tracking cookies like I asked and my protective order to protect any highly confidential documents.

As an FYI, the Commission should re-read the R&O to reference exactly what I'm talking about.

While this matter is about new identifiable objects that need to be addressed. I will also be using some of Ameren's very own words and the Commissions own words against them. Plus in the long run, Ameren Missouri would feel better about themselves if they admitted the truth.
