- Ameren Missouri established the RESRAM, which stands for Renewable Energy Standard Rate Adjustment Mechanism.
- Ameren Missouri customers receive a RESRAM line-item charge – **Renewable Energy Adjustment** on their energy statement each month.

- The RESRAM line item is adjusted on an annual basis and may appear as a charge or a credit.
- The RESRAM enables Ameren Missouri to recover the costs and return to customers the benefits associated with investments in renewable generation including wind and solar power to comply with Missouri's Renewable Energy Standard ("RES").
- The RES requires that by 2021, 15% of energy produced by Ameren Missouri come from renewable sources.
- The RES includes a provision that caps the impact of compliance on Ameren Missouri's retail rates at 1%.

- The charge or credit will be applied to customer bills on a monthly basis per kWh of usage.
- Monthly bill impacts for a customer with average total usage in each rate class based on rates in effect from February 2025 – January 2026 (actual impacts will vary depending on actual customer usage)

The High Prairie Renewable Energy Center entered service in late 2020, and the Atchison Renewable Energy Center entered service in early 2021. Additionally, the Huck Finn Solar Energy Center entered service in late 2024.
