
Public Comment on Rule Making 20 CSR 4240-10.035

Residential Advanced Metering Opt-Out

The current wording in the proposed rule is too ambiguous the rule is stated as Traditional meter as afore stated this is

to vague the type of meter needs to specificity Analog Meter as it is the only category of meter that has no harmful health effects.

The purpose of the rule was also to reduce opt out cost, however the priority is to preserve what is considered a

Medical opt out which is indicative that the meter would not render any physical biological harm affects; Analog.
