

BEFORE THE MISSOURI PUBLIC SERVICE COMMISSION

File No.: EC-2026-0218

Complainants: Brett Felber & Lisa Lambert

Respondent: Ameren Missouri (d/b/a Union Electric Company)

FILED
April 27, 2026
Missouri Public
Service Commission

EXHIBIT A

AUTHENTIC EMAIL HEADER RECORD, TIMESTAMP VARIANCE, AND FORMAT DISCREPANCY

I. PURPOSE OF EXHIBIT

This exhibit establishes:

1. The exact system-recorded delivery time of the subject email
2. A timestamp discrepancy between original metadata and Respondent’s version
3. A format inconsistency demonstrating that Respondent’s record is not a true raw header

II. SOURCE AND AUTHENTICATION

This exhibit is derived from the Gmail “Original Message” view, which contains:

- Server-generated SMTP routing data
- Immutable timestamps
- Authentication results (SPF, DKIM, DMARC)

This data is machine-generated, not user-editable, and forensically reliable.

III. VERIFIED MESSAGE DETAILS

Message ID:

From: Ameren

To: [REDACTED]

Subject: Ameren Missouri Service Disconnected

IV. ACTUAL DELIVERY TIME

Created at: Wed, Apr 8, 2026 at 11:51 AM (Delivered after 1 second)

Received: Wed, 08 Apr 2026 09:51:08 -0700 (PDT)

V. KEY DISCREPANCY NO. 1 – TIMESTAMP VARIANCE

Authenticated Header: 09:51:08

Ameren Version: 09:51:07

VI. DATE FORMAT DIFFERENCE

Gmail: Wed, Apr 8, 2026 (RFC 5322)

Ameren: 2026-04-08 (ISO 8601)

VII. TECHNICAL ANALYSIS

RFC 5322 format is native to SMTP and includes day-of-week and textual month.

ISO 8601 format is database-oriented and not used in raw headers.

VIII. AUTHENTICATION RESULTS

SPF: PASS (IP: 198.37.152.25)

DKIM: PASS (alerts.ameren.com)

DMARC: PASS

IX. EVIDENTIARY IMPACT

Discrepancies demonstrate Ameren's version is not a verbatim header and appears derived.

X. LEGAL SIGNIFICANCE

Under FRE 901, the Gmail header is reliable machine-generated evidence.

XI. DECLARATION

I declare under penalty of perjury that the foregoing is true and correct.
