Hi Latrell Germany,

Unfortunately, the Low Income Home Energy Assistance Program (LIHEAP) only helps with home heating and cooling bills. However, your local assistance office may run other programs that may assist you.

If you still haven't found help, try calling 211 or visiting the website www.211.org. Available 24/7 in all states, including District of Columbia and Puerto Rico, this is a service that provides referrals for all types of assistance (food, housing, employment, energy, health care, etc). It is accessible by dialing 2-1-1.
