Request No. 8521

Witness/Respondent: Shaen Rooney

Submitted by: John Robinett, John.Robinett@opc.mo.gov

REQUEST:

Were each of the studied unit(s) identified in the 1898 & Co. Report attached to Mr. Rooney's Direct Testimony available to Liberty?

RESPONSE:

Liberty did not investigate the availability of the specific units listed in the 1898 & Co. Report. Liberty's analysis focused on technology type and performance characteristics rather than individual units. Nonetheless, the units referenced in the report, as well as comparable units from other OEMs, were available in the market during the study period and would have been accessible to Liberty had the Company elected to pursue them.
