Docket Sheet MX-2026-0286

Re: Item No. 14 - Initial SOS Filing 20 CSR 4240-125.040

Manufactured housing is at the forefront of solving the current extreme affordable housing crisis, but unnecessary regulation hinders the industry from doing just that. Held to rigorous standards at both the Federal and State level, manufactured homes are the most regulated form of housing in today's market. In 2025, 1768 manufactured homes were shipped into Missouri, with the MO Public Service Commission only receiving 12 consumer complaints. That's an over 99% satisfaction rate with our homeowners. Endeavor Communities supports fair, clear and accurate enforcement of the federal standards with proven success. The following are some highlights of the proposed rules which the industry takes issue and seeks commission consideration.

Proposed Amendments:

(2) Installer Responsibilities and Limits.

4. The addition of fuel gas supply.

Fuel and gas supply connection experts have become increasingly specialized to the point where even gas companies aren't willing to do hook-ups. This is a highly skilled task with an enormous amount of risk and liability. We, as an industry, are currently facing an alarming shortage of certified installers because of the large responsibility they already take on. Endeavor Communities does not believe it is an appropriate ask to put such a hazardous burden on installers, nor would homeowners want someone who isn't knowledgeable being tasked with this responsibility.

10. Assuring all exterior and interior close-up work is completed.

This statement is too broad and undefined. For example, many items could be categorized into this ambiguous, umbrella statement that would be strictly cosmetic and wouldn't fall under the authority of the MO Public Service Commission's inspections.

Sincerely,
Ryan Smith
Endeavor Communities

Ryan Smith
Principal
