STAFF RECOMMENDATION

COMES NOW the Staff of the Missouri Public Service Commission ("Staff"), by and through counsel, and for its *Staff Recommendation*, states as follows:

1. On May 28, 2026, Missouri-American Water Company ("MAWC") filed an application requesting the Commission grant it Certificates of Convenience and Necessity (CCNs) to acquire, own, install, construct, operate, control, manage, and maintain water and sewer systems in multiple Missouri counties. The requested CCNs update and clarify MAWC's existing service areas.

2. On July 1, 2026, the Commission issued an order directing Staff to file a recommendation no later than July 10, 2026.

3. As detailed in the attached Memorandum, Staff recommends that the Commission grant the request of MAWC for an expansion of a number of its existing Certificates of Convenience and Necessity.

WHEREFORE, Staff respectfully submits this Staff Recommendation for the Commission's information and consideration and requests the Commission grant MAWC's

requests for expanding its Certificates of Convenience and Necessity in and around twenty-two counties in Missouri.

Respectfully Submitted,

/s/ Casi Aslin

Casi Aslin

Deputy Counsel

Missouri Bar No. 67934

Attorney for the Staff of the

Missouri Public Service Commission

MEMORANDUM

TO: Missouri Public Service Commission
Official Case File: Case No. WA-2026-0339

FROM: Daronn A. Williams, Associate Engineer
Water, Sewer, Gas & Steam Department
Industry Analysis Division

/s/ Daronn A. Williams 07/10/2026
Case Manager Date

SUBJECT: Staff's Recommendation to Approve Certificate of Convenience and Necessity

DATE: July 10, 2026

CASE BACKGROUND

On May 28, 2026, Missouri-American Water Company ("MAWC" or "Company") submitted its *Application and Motion for Waivers* ("Application") requesting a Certificate of Convenience and Necessity ("CCN") from the Missouri Public Service Commission ("Commission" or "PSC") to modify existing CCNs of water systems and/or sewer systems in various areas in Missouri, specifically in or around the following locations and service areas:

- Anna Meadows Subdivision located in Lincoln County (water and sewer)
- City of Brunswick located in Chariton County (water)
- City of Eureka located in St. Louis County (sewer)
- Radcliffe Place Subdivision located in St. Louis County (sewer)
- Pevely Farms Subdivision located in St. Louis County (water and sewer)
- City of Jefferson City located in Cole County (water)
- Wardsville located in Cole County (water)
- City of Joplin located in Jasper County and Newton County (water)
- City of Lawson located in Ray County (water and sewer)
- City of Mexico located in Audrain County (water)
- City of St. Joseph located in Buchanan County (water)
- City of Warrensburg located in Johnson County (water)
- Garden City Service Area located in Cass County (water and sewer)
- Hickory Hills & Temple Terrace located in Greene County (water and sewer)
- Incline Village Subdivision located in Greene County (water and sewer)
- City of Ironton located in Iron County (water and sewer)
- Jaxson Estates Subdivision located in Christian County (water and sewer)
- Lake Carmel Subdivision located in Cole County (water)
- City of Orrick located in Ray County (water and sewer)

- Pom-Osa Heights Subdivision located in Greene County (water)
- Rankin Acres Subdivision located in Greene County (water)
- Redfield Subdivision located in Cole County (water)
- Rogue Creek Subdivision located in Christian County (water and sewer)
- Saddlebrooke Village Subdivision located in Christian County and Taney County (water and sewer)
- Spokane Subdivision located in Christian County (water)
- City of Stewartville located in DeKalb County (water)
- Stonebridge Subdivision located in Stone County and Taney County (water and sewer)
- Table Rock Estates Subdivision located in Stone County (water)
- Timber Springs Subdivision located in Clinton County (sewer)
- Clinton Estates Subdivision located in Clinton County (sewer)
- City of Trimble located in Clinton County (sewer)
- Centennial Acres Subdivision located in Clinton County (sewer)
- White Branch community located in Christian County (water)
- City of Wood Heights located in Clinton County (water)
- Woodland Manor Subdivision located in Greene County (water)
- Homestead Estates located in St. Louis County (sewer)
- Cedar Hill located in Jefferson County (sewer)
- Benton County (sewer)
- Cole County (sewer)
- Platte County (water and sewer)
- St. Charles County (water)
- St. Louis County (water)
- Jefferson County (water)

On May 29, 2026, the Commission issued its *Order Directing Notice, Setting Intervention Deadline, and Directing the Commission's Staff to File a Pleading* ("Orders"). In the Orders, among other things, the Commission set June 29, 2026, as the date by which any requests to intervene in this case should be filed. As of the date of this memorandum, no party has sought to intervene. The Commission also directed Staff to file a pleading addressing the Company's requested waivers and a date for a report and recommendation in this case by June 10, 2026.

On May 29, 2026, MAWC filed a *Motion to Consolidate*. On June 16, 2026, the Commission issued its *Order Consolidating Cases*, granting consolidation of the water and sewer Case Nos., WA-2026-0339 and SA-2026-0340, respectively, with WA-2026-0339 being the lead case.

On June 1, 2026, the Commission issued its *Order Directing Response* (“Second Order”). The Second Order mentioned that the Regulatory Law Judge became aware of accompanying tariff revisions with the Application, Tracking Nos. JW-2026-0149 and JS-2026-0150, each bearing an effective date of June 27, 2026. In the Second Order, the Commission set June 4, 2026, as the date by which the Commission’s Staff shall file a pleading stating whether these tariff revisions should be suspended pending an outcome in this CCN case, and as the date any other party may respond to the Second Order. As of the date of this memorandum, no party has responded to the Second Order.

On June 4, 2026, Staff filed a pleading recommending the tariff revisions be suspended pending an outcome in this CCN case. On June 5, 2026, the Commission issued its *Order Suspending Tariff*, suspending the tariff sheets submitted by MAWC on May 28, 2026, assigned Tracking Nos. JW-2026-0149 and JS-2026-0150, until December 17, 2026, or until further order of the Commission.

On June 10, 2026, Staff filed a status report stating that Staff expects to file its Recommendation no later than July 10, 2026.

BACKGROUND OF MAWC

MAWC is an existing water and sewer corporation and public utility subject to the jurisdiction of the Commission. MAWC is currently providing water service to approximately 486,000 customers and sewer service to more than 24,500 customers in several service areas throughout Missouri.

MAWC is a subsidiary of American Water Works Company, Inc. (“American Water”), and is affiliated with other American Water companies that undertake some of the tasks associated with utility service, such as customer billing, and share technical resources.

REQUESTED CHANGES TO SERVICE AREA AND LEGAL DESCRIPTIONS

During the review of MAWC’s last rate case, Case No. WR-2024-0320, Staff and MAWC agreed that many of its maps in the current tariff were illegible, didn’t show a defined boundary area, lacked pertinent roads and/or highways in or near the service area labeled large and clear enough to read, or had heading issues. Some of these hand-drawn maps may have been legible when first created, but they appear to have been scanned multiple times or with poor resolution equipment.

In addition, it was determined that many of the legal descriptions were illegible, included items that may change over time and items not easily available to the public (such as lot numbers, lot lines, parcel numbers, owner’s names, subdivision lines, surveyor’s record

page numbers, plat book page numbers, etc.), described multiple areas when one contiguous area could be described, or had heading title issues. Because of these insufficiencies, MAWC has agreed, and worked extensively with Staff, to modify multiple service area maps and legal descriptions. Throughout the preparation of this filing, MAWC has asserted numerous times it can and will provide water and/or sewer services to all future customers in any newly defined service territory. In some rural areas, MAWC has proposed to modify boundary lines for several service territories to align with section, quarter section and quarter-quarter section lines, natural features like creeks or rivers, and near-by highways to simplify the mapping and description of these service areas.

This CCN application was submitted to the Commission as a condition in the Partial Stipulation and Agreement (“Agreement”), specifically, Paragraph 20, filed on February 28, 2025, in the aforementioned rate case. Staff and the Company also took advantage of this opportunity to group several service areas that were near each other to simplify the Company’s tariff books.

Per 20 CSR 4240-50.060 and 20 CSR 4240-60.050, CCNs generally require a legible map of the proposed service area of appropriate scale that meets the following requirements:

- Be created using professional mapping software, or be based on a color aerial or satellite photograph.
- Include a defined boundary of the entire service area encompassing all customers.
- Show nearby roads and highways with large and legible labels.
- Include a legend of map features for features shown on the map.
- Include all features of the water or sewer system within the service area.

The following is a description of the requested CCN modification for each area:

- A. Anna Meadows (Sewer) – MAWC seeks a revised CCN to slightly expand this service area to the South to follow the centerline of Big Creek to simplify the map and legal description.
- B. Benton County (Sewer) – MAWC seeks a revised CCN to modestly expand this service area and align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- C. Cedar Hill (Sewer) – MAWC seeks a revised CCN to modestly expand this service area and align the territory boundary with section, quarter section and

quarter-quarter section lines to simplify the mapping and description of this service area.

- D. City of Brunswick and Vicinity (Water) – MAWC seeks a revised CCN to add a map and legal description for this service area. The current tariff does not have a map or detailed legal description for this service area.
- E. City of Eureka, Radcliffe Place, and Pevely Farms (Sewer) – MAWC operates these three sewer systems located in St. Louis County, pursuant to a three different CCNs granted by the Commission. Due to the proximity of these sewer systems, and to simplify the CCN mapping and descriptions, MAWC seeks a revised CCN to combine all three systems into a single map and legal description in its tariff book.
- F. City of Jefferson City, Wardsville, Callaway County and Cole County, and Vicinities (Water) – MAWC operates three water systems in and around Jefferson City in portions of Cole and Callaway Counties. Due to the proximity of these water systems, and to simplify the CCN mapping and descriptions, MAWC seeks a revised CCN to combine all three systems into a single map and legal description in its tariff book. This change does not result in an increase in the service area.
- G. City of Joplin and Vicinity (Water) – MAWC operates a water system in and around the city of Joplin, in Jasper and Newton Counties, pursuant to multiple CCNs granted by the Commission. The current tariff contains multiple maps that are difficult to read, and legal descriptions requiring revisions. MAWC seeks a revised CCN to combine these different service areas into a single map and legal description in its tariff book for clarity and simplification.
- H. City of Lawson (Sewer) – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding area in anticipation for future growth.
- I. City of Mexico and Vicinity (Water) – MAWC seeks a revised CCN to add a map and a detailed legal description for this service area. The current tariff does not have a map or detailed legal description for this service area.
- J. City of St Joseph and Vicinity (Water) – The current tariff contains multiple maps that are difficult to read and legal descriptions requiring revisions for this service area. MAWC seeks a revised CCN to combine these different service areas into a single map and legal description in its tariff book for clarity and simplification.
- K. City of Warrensburg and Vicinity (Water) – MAWC operates two water systems (the original Warrensburg water system and the East Warrensburg system) in this area,

located in Johnson County. The current tariff contains multiple maps that are difficult to read and legal descriptions requiring revisions. Due to the proximity of these water systems, and to simplify the CCN mapping and descriptions, MAWC proposes to combine both systems into a single map and legal description in its tariff book.

- L. Cole County (Sewer) – MAWC seeks a revised CCN to simplify the map and legal description of this service area. The current map and legal description include the City of Jefferson within its boundary and then adds language to exclude it. The proposed map and legal description simplify this by not including the City of Jefferson and avoiding confusing or extraneous language.
- M. Garden City (Sewer) – MAWC seeks a revised CCN to modestly expand this service area and align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- N. Hickory Hills & Temple Terrace (Sewer) – MAWC seeks a revised CCN to modify the existing service area encapsulate more of the surrounding area in anticipation for future growth.
- O. Homestead Estates (Sewer) – MAWC seeks a revised CCN to modestly expand this service area and align the territory boundary to follow the centerline of Bonhomme Creek, section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- P. Incline Village (Sewer) – MAWC seeks a revised CCN to modestly expand this service area and align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- Q. Incline Village Subdivision & Vicinity (Water) – MAWC seeks a revised CCN to replace the map and legal description for this service area with a modernized map and legal description that has more detail and greater clarity.
- R. Ironton (Sewer) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- S. Ironton Service Area (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.

- T. Jaxson Estates (Sewer) – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding subdivision in anticipation for future growth and to align the territory boundary with near-by section lines and a highway boundary to simplify the mapping and description of this service area.
- U. Jaxson Estates Service Area (Water) – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding subdivision in anticipation for future growth and to align the territory boundary with near-by section lines and a highway boundary to simplify the mapping and description of this service area.
- V. Lake Carmel Service Area, Cole County (Water) – encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- W. Lawson Service Area (Water) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- X. Lincoln County (Anna Meadows) & Vicinity (Water) – MAWC seeks a revised CCN to slightly expand this service area to the South to encapsulate more of the surrounding area in anticipation for future growth and replace its existing map with a modernized map with more detail and greater clarity.
- Y. Orrick (Sewer) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- Z. Orrick Service Area (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- AA. Platte County (Sewer) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- BB. Platte County and Vicinity (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- CC. Pom-Osa Heights Service Area (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.

- DD. Rankin Acres Service Area, Greene County (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- EE. Redfield Service Area, Cole County (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- FF. Rogue Creek (Sewer) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- GG. Rogue Creek Service Area (Water) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- HH. Saddlebrooke Village (Sewer) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- II. Saddlebrooke Village Service Area, Christian & Taney County (Water) – MAWC seeks a revised CCN to revise its map, so it is easier to read, and revise its legal description, so it's more detailed.
- JJ. Spokane Highlands Service Area, Christian County (Water) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area
- KK. St. Charles County and Vicinity (Water) – The current tariff contains multiple maps that are difficult to read and legal descriptions requiring revisions for this service area. MAWC seeks a revised CCN to combine these different service areas into a single map and legal description in its tariff book for clarity and simplification.
- LL. St. Louis County and Jefferson County (Water) – MAWC operates three water systems in this area (the St. Louis County and Jefferson County system, the Eureka water system, and the Pevely Farms water system), pursuant to various CCNs granted by the Commission. The current tariff contains multiple maps that are difficult to read and legal descriptions requiring revisions. Due to the proximity of these water systems, and to simplify the CCN mapping and descriptions, MAWC

seeks a revised CCN to combine all three systems into a single map and legal description in its tariff book. No additional customers will be served nor additional territory will be gained from this modification.

- MM. Stewartsville Service Area (Water) – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- NN. Stonebridge Service Area, Stone & Taney County (Water) – MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- OO. Stonebridge Village (Sewer) – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- PP. Table Rock Estates Service Area (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- QQ. Timber Springs, Clinton Estates, Trimble, and Centennial Acres Service Area (Sewer) – MAWC operates three sewer systems in this area, located in Clinton County. MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- RR. White Branch Service Area, Benton County (Water) - MAWC seeks a revised CCN to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.
- SS. Wood Heights Service Area (Water) – MAWC seeks a revised CCN to replace its existing map with a modernized map with more detail and greater clarity.
- TT. Woodland Manor Service Area – Water – MAWC seeks a revised CCN to expand this service area to encapsulate more of the surrounding area in anticipation for future growth and to align the territory boundary with section, quarter section and quarter-quarter section lines to simplify the mapping and description of this service area.

STAFF'S INVESTIGATION

This CCN request is to modify and expand the existing service area for multiple water and sewer plants. The Company is already serving these customers. There will be no new or expanded treatment facility construction and no capital investment directly made by MAWC for the proposed changes to the service areas listed. Rate base will not be directly affected, and there will be no changes in depreciation of plant accounts necessary. An audit was therefore not conducted by Staff.

Technical, Managerial, and Financial Capacity and Tartan Energy Criteria

Staff utilizes the concepts of Technical, Managerial, and Financial capacities ("TMF") in studying applications involving existing water and/or sewer systems. Staff has reviewed and stated its position on the TMF capacities regarding each of MAWC's affiliates in previous CCN and transfer of assets cases before the Commission. Staff's position on MAWC's ability to meet TMF criteria remains positive regarding those affiliates, and similarly takes the position that MAWC has adequate TMF capacity in this case. It is Staff's position that MAWC has the ability to secure funding, to oversee construction of any necessary upgrades or repairs, and the ability to successfully manage operations of the systems listed in this memorandum.

When considering a request for a new CCN, the Commission applies criteria originally developed in a CCN case filed by the Tartan Energy Company and referred to now as the "Tartan criteria." The Tartan criteria contemplate 1) the need for service; 2) applicant's qualifications; 3) the applicant's financial ability; 4) the economic feasibility; and, 5) promotion of the public interest. Similar to the TMF capacities, Staff investigated these criteria and that investigation relates to this proposed acquisition. The results of Staff's investigation are outlined below:

(1) Need for Service

There is a need for service. MAWC is already providing water and/or sewer service to the residential customers within their current CCN boundaries. These customers have both a desire and need for service.

(2) Applicant's Qualifications

MAWC is an existing water and sewer corporation and public utility subject to the jurisdiction of the Commission. MAWC is currently providing water service to approximately 486,000 customers and sewer service to more than 24,500 customers in several service areas throughout Missouri. MAWC is a subsidiary of American Water and is affiliated with other American Water companies that

undertake some of the tasks associated with utility service, such as customer billing and technical resources.

(3) Applicant's Financial Ability

There will be no new or expanded treatment facility construction and no capital investment directly made by MAWC for the proposed changes to the service areas listed.

(4) Economic Feasibility

The changes to the CCNs, as described above, are minor changes to service areas and corrections to illegible documents. It is Staff's position that the requests are economically feasible. In addition, these changes to the service areas will not result in immediate new customers, nor will they require infrastructure investments or recovery of costs.

(5) Promotion of the Public Interest

As the Commission determined when applying the Tartan criteria to a CCN case, positive findings with respect to the other four standards above will in most instances support a finding that an application for a CCN will promote the public interest. Also, the granting of this requested CCN will result in tariff maps and legal descriptions that are more accurate, clear and beneficial to the public. For the reasons outlined throughout this memorandum, Staff asserts that MAWC's request for a CCN for the proposed modified service areas will promote the public interest.

Tariff and Rate Impact

Should the Commission approve the Company request for a CCN, MAWC will need to revise several tariff sheets in tariff books PSC MO No. 13 (water) and PSC MO No. 26 (sewer) to include modified legal descriptions and maps for each affected service area. In MAWC's application for this CCN, modified legal descriptions and maps for each affected service area were included. None of the legal descriptions or maps warranted additional revisions.

Service rates and rules will not be changed or modified as a result of the approval of this CCN. These existing rates and rules are found in tariff books PSC MO No. 13 (water) and PSC MO No. 26 (sewer).

A map and a legal description for each of the proposed service areas, similar to those filed with the Application, will need to be included in MAWC's water tariff, PSC MO No. 13, and sewer tariff, PSC MO No. 26. Also, any applicable tariff sheets affected by this CCN will need

to be revised and submitted along with the aforementioned service area maps and legal descriptions.

Financial Analysis

The applicant represented in the filing that there is no need for external financing, are no financial obligations, or capital expenditures associated with this transaction. Further, there is no construction, and there will be no financing of construction, no change in expected revenues and expected expenses during construction, and no change in rate base during construction.¹

Based on the Company's statements in the Application, Staff finds that there are no financial capability concerns related to the requested CCNs.

OTHER ISSUES

MAWC is a corporation that is in "good standing" with the Missouri Secretary of State. MAWC is current with annual report filings with the Commission through calendar year 2026, as documented on the Commission's Electronic Filing and Information System ("EFIS"). MAWC is current on its annual assessment quarterly payments through the second quarter of fiscal year 2026.

MAWC has other pending cases before the Commission, but none that would impact this decision.

SUMMARY AND CONCLUSIONS

Staff finds the revisions of the CCNs are necessary or convenient for the public service. Staff recommends the Commission grant the CCNs as requested. Staff's position is that MAWC is essentially requesting to modify and expand the existing service area for multiple water and sewer plants and providing service in the expanded service areas are feasible and will promote the public interest. The Company is already serving these customers. Existing rates and rules will apply to all customers in the modified or expanded service areas. There will be no new or expanded treatment facility construction and no capital investment directly made by MAWC for the proposed changes to the service areas listed.

¹ Paragraph 8 of the Application

Staff's Recommendations

Based upon the foregoing, Staff recommends that the Commission:

1. Approve a new CCN, as requested in the Application, for each of the affected service areas;
2. Require MAWC to file the appropriate revised tariff sheets for tariff books PSC MO No. 13 and PSC MO No. 26, as 30-day filings, within ten (10) days after the effective date of an order from the Commission approving this CCN, with a legal description and a map for each of the affected service areas, applicable to water and sewer service, respectively;
3. Require MAWC to provide the Staff of the Water, Sewer, Gas and Steam Department with updated GIS shapefiles for each affected service area within 90 days after the effective date of an order from the Commission approving this CCN; and
4. Make no finding that would preclude the Commission from considering the ratemaking treatment to be afforded any matters pertaining utility plant constructed within the modified or expanded service areas, or providing service in these service areas, in any later proceeding. Staff will submit a further recommendation regarding tariff sheets to be filed by MAWC in this matter.
