Subject: RE: Ucity light

The charge for setting a pole depends on size and location, but the cost is around \$1200-1400. The charge for stringing wire over to the light is \$4.16 per foot. There is also a cost to connect spans to the energized system of \$62.00. So one pole and one span of wire would be about \$2000. I suggest that you call the AmerenUE Construction Hotline if you want a quote at 314-992-6619.

I would have to defer to Les on that.
Les, can you answer Mariela's question?

Thanks,

Are you referring to a completely new one? Or are you talking about replacing the concrete one mentioned below with a wood pole placed elsewhere?

Mark,

Can you let me know how much it will cost to install a wooden pole street light in the City? We are considering installing a new one in an area where is needed. Please let me know at your earliest convenience.

Thank you,

Mariela

I havent been able to check the possibility of eliminating the light. I will get back to you ASAP

Thanks,

Ps- I am still back and forth regarding Ames Place – will let you know as well.
