

BEFORE THE MISSOURI PUBLIC SERVICE COMMISSION

FILE NO. EA-2026-0343

MOTION TO INTERVENE

I am Harley Whitt, pursuant to the rules of the Missouri Public Service Commission respectfully move to intervene in File No. EA-2026-0343 regarding the proposed Buchanan Bluffs Energy Center.

I am a local resident and partner in Amos Construction LLC, a local small business located at 12490 St Rt E, Agency Missouri. Our business provides critical, 24/7 on-call emergency response services to multiple rural water districts in the region.

The proposed project involves a planned seven-year construction phase that will significantly increase heavy traffic on Highway E and surrounding routes. This prolonged congestion and deterioration of highway quality directly threaten our ability to maintain prompt 24/7 response times for emergency water district repairs.

As a small business partner and resident, I have substantial concerns regarding the potential impact on local utility costs and local economic stability.

Additionally, I have concerns regarding potential long-term health effects, substantial water usage, increased noise levels, environmental concerns, and broader community strain resulting from the project.

My specific business operations, reliance on local highway infrastructure for emergency services, and residential property interests will be directly affected by the Commission's determination in this matter. These unique interests are distinct from those of the general public.

Respectfully submitted,

Harley Whitt

Amos Construction, LLC

12490 State Route E, SE

Agency M) 64401
