Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Mr. Dave Mount

I voted for the Missouri Clean Energy Initiative (Proposition C) in November 2008, to clean up the air we breathe, to create new jobs for our state, and to reduce Missouri's dependence on fossil fuels such as coal.

Please pass rules that implement Prop C as the voters intended. We need to find a way to develop the best renewable energy source, hydro-power, in ways that cause the minimum trouble from the natives. We need in-state development of renewable energy. We need to ensure that utilities maximize their use of renewable energy while impacting electric bills as little as possible. We need to encourage a good balance of small, medium, and large solar energy projects.

All utilities must be included.

I inquired about paying more to buy "green power" and was dismayed to learn that the folks at my electric company had no idea what I was talking about.

Thank you for your help with this really important project.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Ms. Linda Yow

Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

FILED
April 5, 2010
Missouri Public
Service Commission

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Ms. Lucy Allen
