LETTERS OF SUPPORT PART 3 OF 4

Note: The individuals who signed the following letters have expressed their personal support of the Grain Belt Express Project and not the support of the entire business or organization with which they are affiliated. Employers have been listed for identification purposes, as well as to show the wide diversity of support from Missouri residents.

Missouri Public Service Commission
200 Madison Street, PO Box 360
Jefferson City, MO 65102

Case Number: EA-2014-0207

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Name: Bill Moss

The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I am writing to express my support for the Grain Belt Express Clean Line. The United States has some of the best wind resources in the world, making it possible to obtain a sizable portion of our energy from a clean, domestic resource. However, there are thousands of megawatts of projects stranded in development that cannot be built due to insufficient transmission infrastructure. The challenge lies in connecting abundant, low-cost, renewable resources to communities that need the power with an efficient transmission solution.

Clean Line Energy is developing projects to address this challenge. The Grain Belt Express Clean Line will create thousands of temporary jobs, enable construction of more than 3,500 megawatts of low-cost, clean energy, and deliver enough electricity to power more than 1.4 million American homes.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

Subject: Support Grain Belt Express Clean Line

Dear Missouri Public Service Commissioners:

I am writing to express my support for the application of Grain Belt Express Clean Line LLC to operate as an electrical corporation in the state of Missouri and to build, own and operate the Grain Belt Express Clean Line.

The Grain Belt Express Clean Line is a high voltage direct current (HVDC) transmission line that will deliver low cost wind energy from western Kansas to population centers in Missouri and farther east. By connecting some of the best wind resources in the country to markets with greater demand for power, the Grain Belt Express Clean Line will enable over 3,500 megawatts of new wind energy projects to be built, which will likely send ripple effects through the growing wind energy supply chain in Missouri.

The Grain Belt Express Clean Line will create thousands of jobs, facilitate low cost clean energy, and deliver enough energy to power more than 1.4 million American homes. The transmission line will also increase much needed tax revenues for several Missouri counties.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move this project forward.

Sincerely,

The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.
