Cathy - Thanks for the offer, but this was not as difficult as I thought it might be since none of the Public Comments forms entered into the complaint and certificate cases needed to be transferred to the new 393 company case. I have all of the e-mails I received (I didn't receive any letters by regular mail) ready to attach to a Public Comments form that I will be completing and entering for the new 393 case. However, I am not going to do that until I check with Jim Merciel and Martin Hummel on Monday to see if they have any additional e-mails or letters that I need to include. DaleJ

This is Cathy replying in RED:

Simple solution - I have hard copies of all letters/comments. I can either re-submit everything in this case, or individuals will be more than happy to submit the same with a different date - the content remains the same and still applies!  
 Cathy

What you suggest is a good idea and that is what we are going to do. However, we are not quite sure how that can be accomplished for those Public Comments "files" that have already been entered into our system and associated with another case. We will be checking with our I.S. Dept about that sometime next week. Those e-mails that I or others in the W/S Dept have received directly and that have not yet been entered into our system at all, will be entered either separately or collectively as Public Comments and will be associated with the new case. I hope to get that done sometime next week also. Let me know if you have any other questions.

Hello Dale,

Now that the 393 case # WO-2007-0277 has been opened, can all the public issues/comments from neighbors that you and/or the Commission received directly about the 393 be posted to this case?

Regards,  
 Cindy Fortney

I hope to have time to talk with the Staff attorney about this today, regarding how/whether to "post" the correspondence I've received and whether that will be done in the certificate case or the complaint case. One of the issues in this regard is a question of how/whether the "393 issues" really have anything to do with either case. I will keep you updated on this.

## Exhibit #2- page 3

Hi Dale,

I noticed that 9 public comments have been posted in the last day or two with regard to our cases and specifically about the utility being regulated or not. These comments are from June - Oct. and just now being posted. I don't see any comments that were sent to you recently about the 393's and these are pressing issues as people are voicing their opinion against the 393's and/or would like a public hearing and more information about them. Will these comments sent to you since our last meeting in Jeff City be posted and public before any further decision is made about the 393's?

Regards,  
Cindy Fortney

**Subject:** Big Island Chapter 393 Companies - Public Comments

FYI - Earlier this morning I entered a Public Comments form (P200701822) into our electronic information and filing system for Case No. WO-2007-0277 (the case related to the sale of the Folsom Ridge/BIHOA water and sewer facilities to the recently formed Chapter 393 nonprofit water and sewer companies), and I attached to that form the document that is attached to this message. Please feel free to contact me if you have any questions about this matter.
