Subject: RE: October 3 CEP OC Presentation

To all --> I will take the lead on updating the Unit 2 slide pack given that John and Brent have significant work to do on Unit 1 (see below).

Cyndi --> Please break the single slide pack into the following 4 pieces --> Unit 2 and Common, Unit 1, LaCygne and Wind. This is the way we have been handling it previously (except for U1 separate slide pack now) and I don't want to change this approach. Also please send only the applicable slide packs to the applicable personnel. I can help you with the distribution.

Brent and John --> As you and John will cover Unit 1 at the Wednesday EOC meeting, this slide pack needs significant work and in its present form would prove to be very embarrassing to present to the EOC. The format does not make sense and you 2 need to get it straightened out on Monday. I want to review the revised draft of this Tuesday a.m.

Regards,

Dave

OK Doug. I will keep you posted on events. Take care,
Dave

Dave,
Big loss for them, guess it's best if they didn't make a run at you since you would not accept at any level due to the working conditions. I find it strange that KornFerry has gone radio silence on me? Not sure if any dots were connected there or not?

Good luck on your move and let me know if you take on the CEO position. I think the CEO position would be good for you so long as you could include the hands on that you like. Anything is possible these days.

Regards to Carol.

Stay warm and keep in touch.

By the way Albert B. resurfaced last week asking TAQA for a position in project development.

Doug

Doug,

I met with both Chesser and Downey yesterday. No counteroffers. I guess they know it is over. I am very excited about working on the largest new coal-fired complex in the U.S. Should be a lot of fun.

Stay in touch and be safe over there.

Dave

Dave,

How was your Monday? Radio silence on this end.
Doug
