1. Rate Application. Available to municipalities and other governmental agencies having appropriate contractual authority for installations having an aggregate rating of at least 10,000 lumens for the lighting of public streets and roads, public parks and other outdoor locations open to and reserved for general public use. No new installations will be made after the effective date hereof except a small number of additional lamps in a predominately incandescent lamp area.
2. Character of Service Supplied. Service supplied hereunder shall be by series incandescent lamps supplied by overhead circuit, subject to the following exceptions:
 - a. Where Company determines that it is not desirable to connect lamps to series lighting circuits, Company may, at its option, install multiple lamps. The multiple lamps used in such cases shall have approximately the same lumen rating as comparable series lamps.
 - b. Where customer elects to have service supplied hereunder by underground circuit, additional charges shall be made as shown on Sheet No. 50(M).
 - c. Wherever practical, Company may elect to substitute overhead circuits when major repair or replacement of substantial lengths of existing underground cable circuits becomes necessary, in which case appropriate adjustment in the circuit charge applicable to the replaced facilities will be made. If customer elects to require Company to use underground cable to effect such repairs or replacement, the circuit charge thereafter applicable to the replaced portions of cable shall be as shown on Sheet No. 50(M).
