MISSOURI PUBLIC SERVICE COMMISSION

MISSOURI GAS ENERGY

CASE NO. GR-2004-0209

REBUTTAL TESTIMONY

OF

ALAN F. FISH

ON BEHALF OF MISSOURI GAS ENERGY

Jefferson City, Missouri

May 2004

**REBUTTAL TESTIMONY OF ALAN F. FISH
ON BEHALF OF
MISSOURI GAS ENERGY**

1 **Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?**

2 A. Yes. My name is Alan Fish, and my business address is Southern Union Company, 221 West
3 6th Street, Suite 1900, Austin, Texas, 78701.

4

5 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

6 A. I am employed by Southern Union Company ("Southern Union") as Director, Environmental
7 Services. This means that I serve as the environmental director for Southern Union's gas
8 distribution divisions, which include Missouri Gas Energy ("MGE" or "Company"), PG
9 Energy and New England Gas, and for all Southern Union subsidiaries.

10

11 **Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND**
12 **PROFESSIONAL EXPERIENCE.**

13 A. I received a Bachelor of Science degree with a major in Geology from Stephen F. Austin State
14 University in August, 1984. From 1989 through 1992, I served as a project coordinator in the
15 Petroleum Storage Tank Division of the Texas Water Commission (now known as the Texas
16 Commission on Environmental Quality) in Austin, Texas. From 1992 through June, 1995, I
17 was a Senior Project Manager/Associate Scientist for EnecoTech Environmental Consultants,
18 Inc. in Austin, Texas, specializing in a variety of environmental projects associated with the
19 oil and gas industry. In July, 1995, I joined Southern Union as Environmental Compliance
20 Specialist and was promoted to Manager then Director, Environmental Services for the

1 Company. This position is responsible for all environmental-related issues for Southern
2 Union. I am a Professional Geologist (Texas License # 740) and a licensed Corrective Action
3 Project Manager (CAPM) with the TCEQ (CAPM License # 00093).

4
5 **Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?**

6 A. The purpose of my testimony is to address the direct testimony of Public Counsel witness Kim
7 Bolin (at pages 9-12) concerning manufactured gas plant ("MGP") related expenditures in
8 Missouri. Specifically, I will 1) explain the kinds of MGP-related expenditures MGE has
9 incurred in the past; 2) demonstrate why MGE is certain to continue to incur MGP-related
10 expenditures in the future; and 3) provide an "order of magnitude" to demonstrate that MGE's
11 future MGP-related expenditures will be substantial.

12
13 **Q. PLEASE EXPLAIN WHAT KINDS OF MGP-RELATED EXPENDITURES MGE**
14 **HAS INCURRED IN THE PAST.**

15 A. During the twelve months ending June 30, 2003, MGE incurred approximately \$2,789,198.86
16 in MGP-related costs. The majority of these costs were spent on the remediation of MGP-
17 impacted soil of the MGP site located at 1st & Campbell (Station A) in Kansas City, MO.

18
19 Representatives of the Port Authority of Kansas City, MO, indicated its intention to demand
20 that MGE assume responsibility for the further assessment and potentially the removal (if
21 necessary) of all MGP-related material located on the Riverfront Development site. MGE
22 paid the Port Authority \$3.4 million in settlement of this demand and paid the state of

1 Missouri \$120,000 in settlement of Natural Resource Damage claims in 2003.

2
3 **Q. WHY IS MGE CERTAIN TO CONTINUE TO INCUR MGP-RELATED**
4 **EXPENDITURES IN THE FUTURE?**

5 A. The Missouri Department of Natural Resources ("MDNR") will require removal of source
6 material from Station A North, Station B (located at 223 Gillis in Kansas City, MO) and the
7 MGP structures located on the railroad right-of-way north of the Port Authority property
8 along the riverfront in Kansas City, MO. The following statement is included in the MDNR's
9 June 21, 2000 letter regarding Station A: "Source removal or in-situ remediation in the areas
10 of heaviest tar contamination appears to be necessary to prevent further contamination of
11 groundwater." The following statement is included in the MDNR's May 7, 2001 letter
12 regarding Station B: "As an initial direction toward a remedial strategy, I would suggest that
13 tar-saturated soil needs to be remediated (for example, excavation) due to its expected high
14 PAH content and the long-term risk it poses to groundwater."

15
16 On April 28, 2004 MDNR issued a letter to the Company stating that a work plan must be
17 submitted within 60 days to address a leaking underground storage site at 402 Cedar Street in
18 St. Joseph, MO. This facility is located on a former MGP site and the site investigation will
19 likely identify MGP-impacted material.

1 **Q. CAN YOU PROVIDE AN “ORDER OF MAGNITUDE” TO DEMONSTRATE THAT**
2 **MGE’S FUTURE MGP-RELATED EXPENDITURES WILL BE SUBSTANTIAL?**

3 A. Yes. MDNR is requesting additional assessment off site at Station A and Station B.
4 Additional remediation will be required and the future cost of this effort will likely be
5 between \$1 and \$10 million to achieve site closure on Station A and Station B. Additional
6 costs are likely to address off-site contamination.

7
8 The St. Joseph MGP site is currently being investigated due to the above-referenced
9 underground storage tank release. The costs of investigation and remediation of the MGP will
10 likely exceed \$1 million.

11
12 Other owned sites that are included on the MDNR’s list of sites to investigate include East 5th
13 Street in Joplin, MO, 23rd and Pleasant in Independence, MO There are other non-owned
14 MGP sites within MGE’s service territory for which MGE may have some potential liability.

15
16 MGE will continue to expend money on its owned and non-owned MGP sites, as necessary.
17 In addition, sites for which MDNR requires remediation to address MGP impact, MGE
18 anticipates spending in excess of one million dollars on investigation and remediation
19 activities necessary to obtain MDNR site closure.

20
21 **Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?**

22 A. Yes, it does.
