

SUMMIT NATURAL GAS  
CASE NO. GR-2014-0086  
DATA REQUEST NO. 1

TO MISSOURI OFFICE OF THE PUBLIC COUNSEL

DATE OF REQUEST: July 28, 2014

DATE DUE: August 4, 2014

REQUESTOR: Dean L. Cooper

OPC STAFF: Barbara A. Meisenheimer

**QUESTION:**

1. Do any of the supporting schedules and analysis from workpaper "HC BAM Summit Case Work Papers HC" include customer counts and volumes associated with the communities of:

- 1) Licking;
- 2) Houston;
- 3) Mountain View;
- 4) Buffalo; and,
- 5) Boliver.

If so, please provide the number of customers and the volumes included, and identify in which tabs they are included in "HC BAM Summit Case Work Papers HC".

**RESPONSE:**

Licking, Houston and Mountain View were included in the feasibility studies in Case No. GA-94-127. The workpaper worksheet with the tab label GA-94-127 GA-95-349 GA-2007-310 reflects the imputed customer counts and class volumes from Revised Schedule 1-1 from the testimony of Staff witness David Winter studies in Case No. GA-94-127. The Revised Schedule, which was marked as Exhibit 17, supported the stipulated volume of 1,797,000 in Case No. GA-94-127. The class customer counts and volumes were not broken out by service area in Revised Schedule 1-1. Case No. GA-2005-0349 and Case No. GA-2007-310 also related to Licking, Houston and Mountain View. I reviewed late filed Exhibit 3, the feasibility study in Case No. GA-2005-0349, but did not use the volumes as altered from the previous imputed volumes. I reviewed the Application and attached feasibility study in Case No. GA-2007-0310, but did not use the volumes as altered from the previous imputed volumes.

Summit Exhibit No. 21  
Date 8-20-14 Reporter KF  
File No. GR-2014-0086

The data request also seeks information on Boliver but I think this is a typographical error so the response reflects information on Bolivar.

Buffalo and Bolivar were addressed in Case No. GA-2010-0189. The workpaper worksheet with the tab label **GA-2010-0189** reflects the customer counts and class volumes from the feasibility study included as an attachment to the Application in Case No. GA-2010-0189.
