**SECTION 1.0-DEFINITIONS**

For the purpose of this tariff, the following definitions will apply:

Access Service Request: The written request for access service executed by the Customer and the Company in the format devised by the Company. The signing of an Access Service Request by the Customer and acceptance by the Company initiates the respective obligations of the parties as set forth therein and pursuant to this Tariff, but the duration of the service is calculated from the Service Commencement Date. Any use of the Company's access service at any time without an executed Access Service Request is subject to the obligations, rates and charges as set forth in this Tariff (the Company may request such a Customer to submit an Access Service Request). N

Advance Payment: Part or all of a payment required before the start of service.

Automatic Number Identification ("ANI"): Allows the automatic transmission of a caller's billing account telephone number to a local exchange company, interexchange carrier or a third party Customer. The primary purpose of ANI is to allow for billing of toll calls.

Collocation: An arrangement whereby the Company's switching equipment is located in a local exchange Company's central office.

Company or Carrier: Refers to Big River Telephone Company, LLC, issuer of this tariff. C

Customer or Customer: The person, firm or corporation which orders service and is responsible for the payment of charges and compliance with the Company's regulations.

Deposit: Refers to a cash or equivalent of cash security held as a guarantee for payment of the charges.

DID Trunk: A form of local switched access that provides the ability for an outside party to call an internal extension directly without the intervention of the Company operator.

Direct Inward Dial (or "DID"): A service attribute that routes incoming calls directly to stations, by-passing a central answering point.

Direct Outward Dial (or "DOD"): A service attribute that allows individual station users to access and dial outside numbers directly.

End Office: With respect to each NPA-NXX code prefix assigned to the Company, the location of the Company's "end office" for purposes of this tariff shall be the point of interconnection associated with that NPA-NXX code in the Local Exchange Routing Guide ("LERG"), issued by Bellcore.

Exchange Telephone Company or Telephone Company: Denotes any individual, partnership, association, joint-stock company, trust, or corporation authorized by the appropriate regulatory bodies to engage in providing public switched communication service throughout an exchange area, and between exchange areas within the LATA.

MISSOURI PUBLIC SERVICE COMM

- 2.15.1** The Company does not publish a directory of Customer listings. The Company, however, does arrange for the Customer's main billing number to be placed in the directory or directories of the dominant local exchange carrier.
- 2.15.2** The rates and regulations specified herein for directory listings apply only to the alphabetical section of the directory. Listings are intended solely for the purpose of identifying a Customer's telephone number and as an aid to the use of telephone service.

**SECTION 4.0 - SERVICE CHARGES AND SURCHARGES** NOV 2 1998

**4.1 Service Order and Change Charges**

MO. PUBLIC SERVICE COMM

Non-recurring charges apply to processing Service Orders for new service, for changes in service, and for changes in the Customer's primary interexchange carrier (PIC) code.

**4.1.1 Service and Equipment Charge**

The Service and Equipment Charge is a nonrecurring charge associated with a given service which applies each time the service is provided. Where two or more of the Service and Equipment Charges listed below would occur on the same exchange access line on the same order, only one Service and Equipment Charge - the highest of the charges that would otherwise apply - is applied. Service and Equipment Charges are associated with the following:

- Exchange access line
- Temporary suspension of service at the Customer's request
- Restoral of service after a temporary denial for nonpayment

Service and Equipment Charges, where applicable are specified in this Tariff in the appropriate section for a given service.

**4.1.2 Moves**

When at the request of the Customer, the network facilities are required to be moved for a Customer-Provided Communications System, PBX, or key system, this move will be based on the cost of making the change.

**4.1.3 Restoration of Service**

A Service and Equipment Charge will apply for restoring service after it is temporarily suspended by the Company. This charge applies only after the suspension of service and not after the completion of a disconnection order. In addition to this charge, the Customer will be required to pay all charges due, including the charges for the period of denial.

MISSOURI PUBLIC SERVICE COMM

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded-up to the next whole unit.
- 5.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 5.2.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 5.2.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 5.2.5 All times refer to local time.

MISSOURI PUBLIC SERVICE COMM

**5.3 Distance Calculations**

Where charges for a service are specified based upon distance, the following rules apply:

**5.3.1** Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

**5.3.2** The airline distance between any two rate centers is determined as follows:

Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

Step 2: Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.

Step 3: Square each difference obtained in step (b) above.

Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.

Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

**5.3.3** The formula for distance calculations is:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

MOBILE SERVICE COMM

**5.5 Basic Local Exchange Service**

Basic Local Exchange Service provides the Customer with a single, analog, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Basic Local Exchange Service lines are provided for the connection of Customer-provided wiring, telephones, facsimile machines or other station equipment. An optional per line Hunting feature is available for multi-line Customers which routes a call to the next idle line in a prearranged group when the called line is busy.

Local exchange service lines and trunks are provided on a single party (individual) basis only. No multi-party lines are provided. Service is available on a flat rate or message rate basis depending on the service plan selected by the Customer. Not all service plans will be available in all areas.

Recurring charges are billed monthly in advance. Usage charges, if applicable are billed in arrears. Usage charges may apply for calls placed from the Customer's line. No usage charges will apply to calls received by the Customer. Non-recurring charges for installation or rearrangement of service are billed on the next month's bill immediately following work performed by the Company.

Rates and charges include Touchtone service for each line.

**5.5.1 Rate Groups**

Exchange rates are divided by Rate Groups. The number of exchange access arrangements included within the primary service area of each exchange or zone determines the Rate Group and rates for each exchange or zone. The Company adopts the Rate Groups as defined in the Southwestern Bell Telephone Company Local Exchange Tariff P.S.C. Mo.-No. 24.

**5.11 Direct Inward Dialing (DID) Service**

MO. PUBLIC SERVICE COMM

Direct Inward Dialing ("DID") permits calls incoming to a PBX system or other Customer Premises Equipment to be routed to a specific station without the assistance of an attendant. DID calls are routed directly to the station associated with the called number. DID service as offered by the Company provides the necessary trunks, telephone numbers, and out-pulsing of digits to enable DID service at a Customer's location. DID service requires special PBX software and hardware not provided by the Company. Such hardware and software is the responsibility of the Customer.

DID numbers are provided on a consecutive-number basis.

Rates and charges for DID numbers apply on a per trunk group basis. The rate and charge for an initial block of DID numbers, whether in quantities of 100 or in quantities of 10, will apply once for each quantity. All subsequent number blocks will be at the rates and charges specified for additional quantities.

**5.12 Optional Calling Features**

MO. PUBLIC SERVICE COMMISSION

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability. Certain features may not be available with all classes of service. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all some uses in some cases.

**5.12.1 Feature Descriptions**

- .1 Call Waiting - Alerts a Customer using his telephone that another caller is trying to reach him. Where facilities permit, Call Waiting subscribers may deactivate Call Waiting for the duration of one call by dialing a code. Call Waiting is automatically reactivated for the next originating or terminating call.
- .2 Call Forwarding - Enables the Customer to transfer all incoming calls to another telephone number within the exchange or on the long distance telecommunications network. The Call Forwarding Customer is responsible for the payment of charges (e.g., toll charges) for each call between his Call Forwarding equipped telephone and the telephone to which the call is being forwarded.
- .3 Three-Way Calling - Enables a Customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation.
- .4 Speed Calling - Enables a Customer to place calls to other telephone numbers by dialing a code rather than the complete telephone number. The 8-code capacity and/or the 30-code capacity may be provided on the same line, however, duplicate code capacities may not be provided. The combination of code capacities is not available on multiline hunting lines.
- .5 Call Return - Enables the Customer to automatically redial the telephone number of the last incoming call. If that telephone number is busy, the Company's equipment will keep trying to call the number being redialed for a maximum of thirty(30) minutes. The Customer will be signaled with a distinctive ring when the call can be completed.
- .6 Auto Redial - Enables the Customer to automatically redial the last outgoing telephone number. When the recalled telephone number is busy, the Company's equipment will keep trying to call the number being redialed for a maximum of thirty (30) minutes. The Customer will be signaled with a distinctive ring when the call can be completed.

**5.12.1 Feature Descriptions, (Cont'd.)**

- .7 Priority Call - Provides the Customer with a distinctive ring or Call Waiting tone (if the Customer has subscribed to Call Waiting), when the Customer is called from preselected telephone numbers. The Customer can construct or modify the telephone number screening list by dialing a unique code.
- .8 Call Blocker - Enables the Customer to block calls from preselected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the Customer builds a screening list. To block an unknown number after receiving a call, the Customer enters a code to add the number to their screening list. Customers whose telephone numbers are blocked are directed to a Company recorded announcement.
- .9 Call Trace - Enables the Customer to initiate a trace of the origin of the last incoming call by dialing an activation code. If a trace is successful, the Company's equipment will record the incoming call detail (not the conversation). The results of the trace will not be provided to the Customer directly.
- .10 Selective Call Forwarding - Enables the Customer to forward incoming calls from preselected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list by dialing an activation code. Selective Call Forwarding customers are responsible for the payment of charges (e.g., toll charges) for each call between their line and the telephone numbers to which the call is being forwarded.
- .11 Simultaneous Call Forwarding - Provides the Customer that also subscribes to an appropriate call forwarding service with the ability to forward multiple incoming calls simultaneously to another telephone number designated by the Customer. The Simultaneous Call Forwarding Customer is responsible for the payment of charges (e.g., toll charges) for each call between the Simultaneous Call Forwarding equipped telephone and the line to which the call is being forwarded. This service cannot be used to avoid toll.

The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. MO. PUBLIC SERVICE COMM

Remote Call Forwarding (RCF) is a service whereby a call placed from a station to an RCF telephone number in one exchange is automatically forwarded by the Company's central office equipment to another station designated by the RCF Customer. This service is offered subject to availability of suitable facilities.

The Company does not guarantee identification of the originating telephone number to the RCF Customer. Service is only available where the terminating station line has incoming-call dial capability. RCF is not offered where the terminating station line services a pay telephone. RCF is not suitable for satisfactory transmission of data.

No assurance can be given that transmission will be fully satisfactory during operation of RCF. In the event of poor transmission, the liability of the Company will not exceed the amount of the applicable charge, if any for the call.

**5.16.1 Rates and Charges**

The following charges are for the RCF feature only and are in addition to applicable charges for the service with which it is used. Appropriate message charges apply.

Where Customers have fifteen or more unique RCF features on a billing account, a credit of twenty-five percent (25%) will be applied per billing cycle to the monthly rate for each such unique service feature, including the first fifteen. For purposes of qualifying such credit, a unique feature is defined by calling scope, jurisdiction and business/residence classification: e.g., Residence, Intrastate, IntraLATA or Business, measured Local. Unique features may not be combined to qualify for this credit; e.g. local features may not be combined with toll features.

Directory Assistance provides for the identification of telephone directory numbers via an operator or automated platform. Customers are provided with a maximum of two (2) listings per each call to Directory Assistance. A Directory Assistance charge applies per local directory assistance call subject to the allowances listed below.

Information for nonpublished Customers will not be provided. Each request for listing information is considered one listing request. Allowances for listing requests apply only:

- to sent-paid direct dialed calls to Directory Assistance. These calls will be allowed a maximum of two listing requests per call.
- when the listing is new and not printed in the most recent white pages Directory, or when the listing is not found by the Directory Assistance Operator. Nonpublished and nonlisted telephone number requests will not be given and do not count toward a Customer's allowance.
