CASE NO. TO-99-593**

Missouri Public  
Service Commission

**SURREBUTTAL TESTIMONY  
OF  
W. ROBERT COWDREY**

January 11, 2001

Exhibit No. 19  
Date 1-24-01 Case No. TO-99-593  
Reporter RC

1 Q. WILL YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

2 A. My name is W. Robert (Bob) Cowdrey. My business address is 5454 West 110<sup>th</sup>  
3 Street, Overland Park, Kansas 66211.

4 Q. ARE YOU THE SAME W. ROBERT COWDREY WHO FILED DIRECT  
5 AND REBUTTAL TESTIMONY IN THIS CASE?

6 Yes.

7 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

8 A. My testimony will list Sprint's concerns with the Small Company terminating  
9 recording and business relationship proposal and Sprint's recommended solutions.  
10 I will also respond to certain statements made in the rebuttal testimony of David  
11 Jones of MITG and Robert C. Schoonmaker of STCG.

12 Q. WHAT ARE YOUR CONCERNS ABOUT THE SMALL COMPANIES'  
13 TERMINATING RECORDINGS AND THEIR BUSINESS  
14 RELATIONSHIP PROPOSAL?

15  
16 A. There are several but, in summary, they boil down to:

17 1. There is no evidence presented in any of the pre-filed testimony that all  
18 the small companies are capable of making accurate terminating  
19 recordings, or that even a majority can or even want to implement such a  
20 plan. In fact, as I review the testimony of Mr. Schoonmaker and Mr.  
21 Jones, there are apparently some companies who do not desire to move to  
22 the proposed business relationship. As Mr. Schoonmaker notes on pages  
23 18 and 19 of his testimony, he recommends that the proposal be an  
24 alternative which companies can choose as they have the capability to  
25 implement the proposed procedures. In effect, he proposes that the

1 business relationship be OPTIONAL for the small companies, but  
2 MANDATORY for the former PTCs.  
3

4 2. What has occurred to date with the network test is merely a limited sample  
5 for some companies—and the results using their terminating recordings  
6 are still preliminary for that limited sample;  
7

8 3. There has been no discussion presented by the small company witnesses  
9 as to exactly what form and format their terminating records will take -  
10 therefore there is no basis from which to accurately assess if such a  
11 “billing” proposal is even workable or verifiable at any point in the near  
12 term;  
13

14 4. There is no incentive on the part of the small companies to accurately  
15 produce terminating records that may be validated and used to bill the  
16 responsible carrier who originates the traffic that terminates to their end  
17 offices—instead, they simply want to “turn on the meter” at their office  
18 and bill the tandem company for any and all traffic on the public switched  
19 network that traverses the common trunk groups and terminates to their  
20 switch.  
21

22 **Q. WHAT IS YOUR RECOMMENDED SOLUTION IN THIS MATTER?**

23 **A.** I believe the Commission should allow the continued use of originating records  
24 for inter-company compensation purposes and allow the companies to proceed

1 with the current effort to work collaboratively in the records reconciliation  
2 process until all parties are satisfied that the records/recording issues have been  
3 identified and resolved. Certainly, if the small companies desire to use their  
4 terminating recordings as an audit tool, Sprint would respond to any concerns  
5 raised by the small companies.

6 If, however, the Commission decides to adopt the small companies'  
7 proposal for a "new business relationship", Sprint feels that there must be equal  
8 incentive put in place for traffic identification by the small companies. Inherent  
9 in the current proposal by the small companies for use of their terminating  
10 recordings is the fact that they will simply bill the tandem company for all the  
11 residual or unidentified traffic terminating to their offices—regardless of the  
12 originating carrier actually responsible for that traffic. Under this plan, there is no  
13 incentive for the small company to assist the tandem owner in the identification of  
14 any unidentified, residual traffic. In fact, there is disincentive for the small  
15 companies since accurate identification of the unidentified traffic may actually  
16 cause the small companies to receive a lower rate than if the traffic remained  
17 unidentified.

18 Sprint feels that in order for the proper incentives to be in place, the small  
19 company and tandem owner should share the "risk" of unidentified traffic—if  
20 such traffic does exist. The small company should be accountable for a 50/50  
21 share of the unidentified traffic with the tandem owner. In this way, each party  
22 has a stake in the process and an equal incentive to work collaboratively in the  
23 identification of unidentified traffic. Further, if the Commission determines that  
24 the small company proposal has merit then it should be equally applicable to all

1 companies. It would be discriminatory to require certain companies to pay for  
2 unidentified traffic and not require all companies, both large and small LECs to  
3 pay for unidentified traffic.  
4

5 **Q. IF THE COMMISSION CHOOSES NOT TO CHANGE THE BUSINESS**  
6 **RELATIONSHIP BETWEEN THE SMALL COMPANIES AND THE**  
7 **FORMER PTCS, DO THE SMALL COMPANIES HAVE**  
8 **ALTERNATIVES TO ENSURE THAT THEY ARE COMPENSATED FOR**  
9 **ALL TRAFFIC.**

10 **A.** Yes. The small companies that have turned up their terminating measurement  
11 capability can continue to use their records as an audit tool to ensure they are  
12 getting full compensation. Similar to SWB, Sprint has also purchased the  
13 AcceSS7 Business Intelligence network monitoring system and is currently  
14 installing it in Missouri. Although the AcceSS7 system implemented by Sprint  
15 won't be designed to produce billing records, it will be used to validate Sprint's  
16 billing to ensure it receives all the needed billing records from the responsible  
17 originating carriers. Sprint is willing to work with any of its subtending small  
18 companies to help identify any originating carriers not sending records and to  
19 assist them in obtaining contact information to begin billing these carriers. It is  
20 very likely that if the small companies aren't receiving records, then Sprint isn't  
21 receiving records either since it also has indirect connections with many carriers.  
22

23 **Q. IS THE BUSINESS RELATIONSHIP PROPOSED BY THE SMALL**  
24 **COMPANIES, THE INDUSTRY STANDARD?**

1 A. No, after surveying the eighteen states in which Sprint operates as an ILEC, I  
2 remain convinced that the small company business relationship is non-standard  
3 for the compensation of intraLATA access minutes. In fact, I did not uncover a  
4 state where the small company proposal was standard for any type of traffic.  
5

6 **Q. ARE THERE OTHER SOLUTIONS ON THE HORIZON FOR THE**  
7 **BILLING OF INTRALATA ACCESS MINUTES?**

8 A. Yes. After reading Ms. Allison's rebuttal testimony, I contacted our internal OBF  
9 contact. She concurred in all of Ms. Allison's statements concerning the  
10 modifications to the industry standard for billing intraLATA toll records. Since  
11 this issue is being dealt with at the national level by OBF and the industry, there is  
12 no need for Missouri to adopt any stopgap measure such as those proposed by the  
13 small companies.  
14

15 **Q. IN MR. SCHOONMAKER'S REBUTTAL TESTIMONY, AT PAGES 5-6,**  
16 **HE DISCUSSES THE NETWORK TEST AND THE PRELIMINARY**  
17 **RESULTS FOR ROCKPORT AND KINGDOM, THE SAMPLE**  
18 **COMPANIES WITH EXCHANGES THAT SUBTEND SPRINT'S**  
19 **TANDEM. WHAT ARE THE CURRENT RESULTS OF THAT TEST?**

20 A. As indicated in my pre-filed rebuttal testimony, Sprint has forwarded additional  
21 records for purposes of the network test reconciliation process. According to Mr.  
22 Schoonmaker's Schedule RCS-4, Rockport recorded 750 calls during the One  
23 Hour Test Period on July 17, 2000 between the hours of 1:00 and 2:00 p.m.  
24 Sprint's updated record counts indicate that 716 records were sent to Rockport for

1 this same time period. This translates to 95.5% of the terminating records  
2 matched by Sprint. Certainly other carriers also terminated calls to Rockport;  
3 however, those records must be sent by those other carriers to Rockport.  
4

5 **Q. IS IT APPROPRIATE TO USE THE 1 HOUR COMPARISON RATHER**  
6 **THAN THE 48 HOUR COMPARISON WHEN REVIEWING THE**  
7 **RECORD STUDY TEST RESULTS?**

8 **A.** Yes. As agreed to by the record study participants, Sprint concentrated its  
9 resources on ensuring an accurate and complete one hour test for the  
10 reconciliation. The results for this sample time period are appropriate for  
11 purposes of this case.  
12

13 **Q. MR. SCHOONMAKER NOTES ON PAGES 6-7 OF HIS REBUTTAL**  
14 **TESTIMONY THAT THE SITUATION WHERE THE TERMINATING**  
15 **RECORDINGS MADE BY KINGDOM DO NOT MATCH THE**  
16 **ORIGINATING RECORDS PRODUCED BY SPRINT REQUIRES**  
17 **ADDITIONAL INVESTIGATION. CAN YOU COMMENT?**

18 **A.** I concur with Mr. Schoonmaker. The occurrence where the terminating records  
19 made by Kingdom do not match by 17% or more does, indeed, warrant further  
20 investigation. If the records are indeed correct and it is found that some calls  
21 were not recorded by Kingdom, I believe the reliability of the small company  
22 terminating recording process may be questionable.  
23

1 Q. AT PAGE 4 OF HIS REBUTTAL TESTIMONY MR. SCHOONMAKER  
2 REFERENCES COMMENTS IN YOUR DIRECT TESTIMONY  
3 REGARDING THE COMPLEXITY OF RECONCILING THE BILLING  
4 RECORDS FOR THE NETWORK TEST. CAN YOU COMMENT?

5 A. Mr. Schoonmaker has mischaracterized my statements. What is so very complex  
6 about the reconciliation process for the records test has been the fact that the small  
7 companies' terminating recordings do not contain enough information—certainly  
8 not as much as the originating records—which causes increased effort required to  
9 reconcile and match the sample data. These terminating recordings—the very  
10 “records” on which the small companies base their proposal for a new business  
11 relationship and “billing system”, do not contain enough information from which  
12 to identify the originating and responsible carrier.

13 This makes the small companies' entire terminating “records” proposal  
14 unworkable and impractical from any perspective.

15

16 Q. MR. JONES STATES THAT SWB, GTE AND SPRINT SOMEHOW GET  
17 A COMPETITIVE ADVANTAGE OVER IXCS THAT ARE REQUIRED  
18 TO PAY TERMINATING COMPENSATION FOR THE TRAFFIC OF  
19 OTHERS (JONES REBUTTAL, P. 5). DO YOU AGREE WITH HIM?

20 A. Absolutely not. As has been stated in previous testimony, the former PTCs do not  
21 have a competitive advantage over the IXC. This is extremely apparent by the  
22 recent withdrawal of AT&T from this case and the absence of any IXC  
23 participation in this case. The former PTCs do not receive the same revenue  
24 stream that the IXCs. IXCs enter into voluntary agreements with other IXCs to

1 carry their traffic to the terminating exchange and pay terminating charges to all  
2 parties on the call path. They are compensated for performing this service.

3 Alternatively, former PTCs acting as the transiting company do not collect  
4 from the originating party the fees to pay the terminating exchange company.  
5 Rather, the former PTCs simply bill their portion of the route of the call. The  
6 small companies proposal would have the PTCs pay the terminating company  
7 without the revenue stream that IXC's enjoy.

8  
9 **Q. MR. JONES STATES THAT, "IT APPEARS TO ME THAT THE**  
10 **FORMER PTCS ARE USING THE IXC BUSINESS RELATIONSHIP**  
11 **COMPENSATION MECHANISM WITH THESE CONNECTING**  
12 **CARRIERS [CLECS AND WIRELESS CARRIERS]. (JONES REBUTTAL**  
13 **P. 15) . IF THAT WERE TRUE, WOULDN'T THE INTERCONNECTION**  
14 **AGREEMENTS STATE THAT THE TRANSITING PARTY HAS THE**  
15 **RESPONSIBILITY TO PAY ANY THIRD PARTY LEC, ILEC OR CMRS**  
16 **PROVIDER FOR TERMINATION.**

17 **A.** Yes. As I stated previously, Sprint's interconnection agreements state just the  
18 opposite of what Mr. Jones suggests. Sprint is under no obligation to pay third  
19 parties for termination of non-Sprint originated traffic. Conversely, it is my  
20 understanding that many of the IXC's arrangements include language that the  
21 transiting IXC has the responsibility to pay any third party.

22  
23 **Q. MS. ALLISON'S REBUTTAL TESTIMONY DISCUSSES THE**  
24 **CONFLICTS WITH CURRENT INTERCONNECTION AGREEMENTS**

1       **THAT THE SMALL COMPANY PROPOSAL WOULD CAUSE. ARE**  
2       **THERE       CONFLICTS       BETWEEN       SPRINT'S       CLEC**  
3       **INTERCONNECTION AGREEMENTS THAT CONFLICT WITH THE**  
4       **SMALL COMPANY PROPOSAL?**

5   **A.**   Yes. Sprint's Interconnection Agreement Terms and Conditions regarding Transit  
6       Traffic state as follows:

7               Each party acknowledges that the transiting Party does not have any  
8               responsibility to pay any third party LEC, ILEC, or CMRS provider  
9               charges for termination or any identifiable transit traffic from the  
10              originating Party. Both parties reserve the right not to pay such charges on  
11              *behalf of the originating party.*

12       Each of Sprint's interconnection agreements would need to be modified should  
13       the Commission adopt the small companies' business relationship proposal.

14  
15   **Q.**   **MR. JONES SUGGESTS THAT THE SMALL LECS SHOULD BE ABLE**  
16       **TO AVOID MULTIPLE SYSTEMS BY UTILIZING THE FGD BUSINESS**  
17       **MODEL. DIDN'T THE COMMISSION ORDER THE FORMER PTCS TO**  
18       **CREATE CATEGORY 11 RECORDS SO THAT THE SMALL**  
19       **COMPANIES WOULD NOT HAVE TO CREATE A NEW SYSTEM TO**  
20       **PROCESS RECORDS? (JONES REBUTTAL P. 4)**

21   **A.**   Yes, in the Report and Order in Case No. TO-99-254, et al., the Commission  
22       stated that requiring the Small Companies to use Category 92-99 records would  
23       require the small companies to develop a system to bill using these records or  
24       require the small companies to convert them to Category 11 records. With that

1        understanding, the Commission ordered the former PTCs to create industry  
2        standard Category 11 records. The small companies and the former PTCs worked  
3        cooperatively to ensure that the Category 11 records were industry standard and  
4        these records were implemented for intercompany compensation in April, 2000.

5

6        **Q.     DOES THIS CONCLUDE YOUR TESTIMONY?**

7        **A.     Yes.**

**BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF MISSOURI**
