Additional damage to drive from concrete workers

Additional damage to drive from concrete workers

Additional damage to drive from concrete workers

Karen Smith
8930 Harrison - Yards

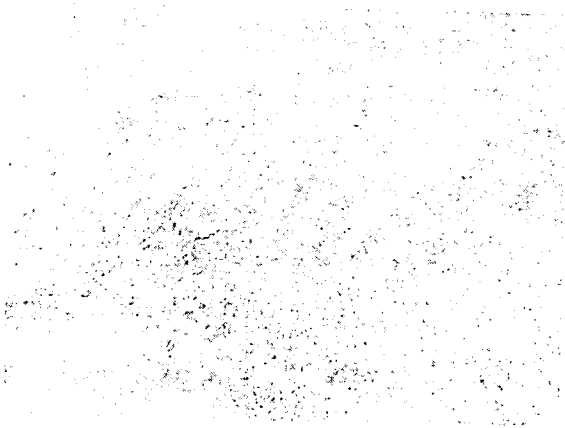

Example of dirt piled in yard. Shows evidence of additional digging up into my yard after gas and water company left following the Feb. 4th event. On Feb 12th spent 1 ½ hours shoveling dirt off of my yard back into the easement/sidewalk area (i.e., I didn't want excess dirt sitting in my yard ontop of grass causing additional damage).

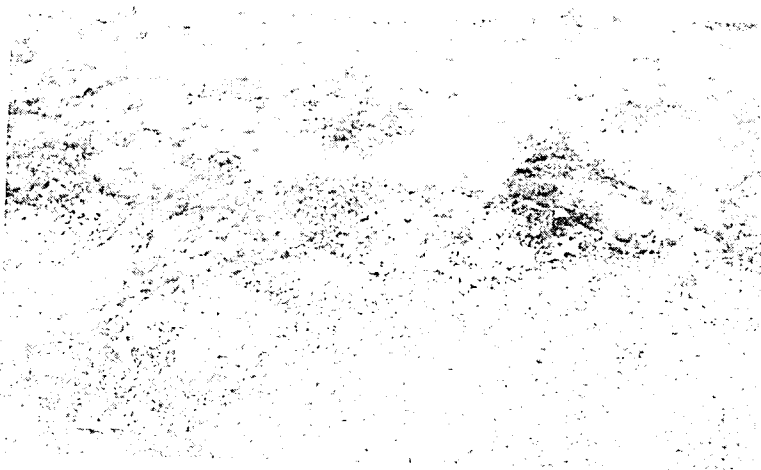

Same area after I cleaned off excess dirt/rocks.

Evidence of additional damage to yard – marks from shovel of back hoe. These marks were not repaired.

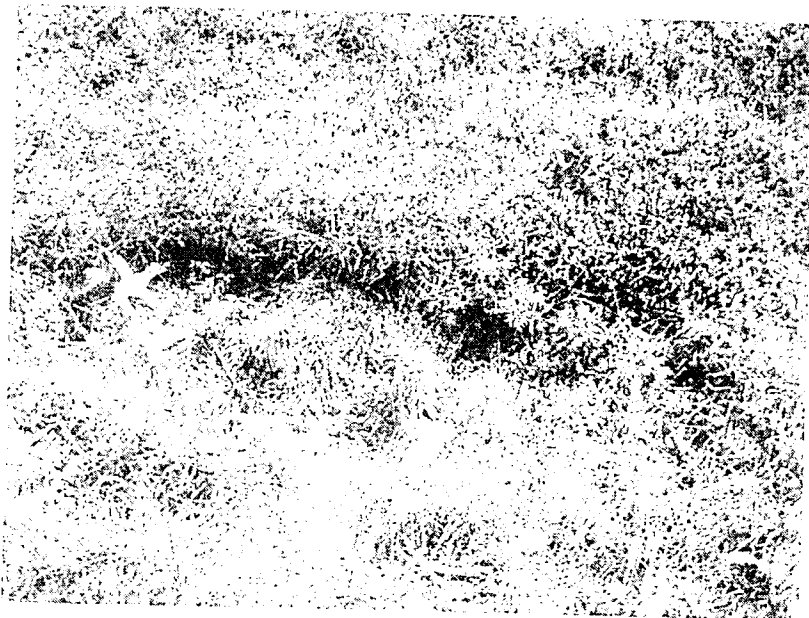

Condition of street from Feb. 4th until June 3rd when subcontractors completed work.

Yards and Easements At the end of Summer 2013

Yard still torn up:

Grass did not take due to be planted in June in many places..even with watering.
