Staff recommends the Commission deny Evergy Metro's and Evergy West's proposal for a Storm Reserve and the Wholesale Revenue Credit. Staff also recommends that the Commission require Evergy Metro to continue to provide an annual surveillance report. In addition, Staff will reflect Evergy West's proposed maintenance reserve with modifications that are addressed later in my testimony. STAFF'S DIRECT REVENUE REQUIREMENT CORRECTIONS Q. Did Staff make corrections to its recommended revenue requirement for Evergy Metro, filed on June 8, 2022, and for Evergy West's revised revenue requirement filed on June 13, 2022? A. Yes. Staff made several corrections that include but are not limited to the following; Fuel expense Property taxes **Plant Amortizations** Plant in Service Accounting ("PISA") balance and amortization Maintenance Reserve Corrections are reflected in Staff's revised Accounting Schedules, filed with Staff's Rebuttal testimony, for Evergy Metro and Evergy West. Q. What is Staff's revised recommended revenue requirement for Evergy Metro and Evergy West after making the corrections? A. Staff's recommended revenue requirement, after making the corrections, is \$(6,284,902) for Evergy Metro and \$11,669,929 for Evergy West. The recommended revenue requirements are based on Staff's mid-point recommended rate of return ("ROR") of 6.77% and 6.70% for Evergy Metro and Evergy West, respectively.

Q. 1 What is Staff's revised recommended revenue requirement for Evergy Metro 2 and Evergy West including the true-up allowance? 3 A. Staff's revised recommended revenue requirement for Evergy Metro and Evergy West including the true-up allowance and based on Staff recommended ROR is \$19,859,743 4 5 for Evergy Metro and \$36,272,657 for Evergy West. STORM RESERVE 6 7 Q. Please explain Evergy Metro's and Evergy West's proposed storm reserve. 8 A. Evergy Metro proposes to set the storm reserve for Evergy Metro using a 9 three-year average of storm costs and use overcollections of regulatory liabilities to fund the 10 reserve. To determine the level of storm costs to include in the storm reserve, Mr. Klote states 11 the following beginning on page 39, line 7 of his direct testimony: 12 The company is proposing to set a reserve level based upon a three year 13 average of storm costs (2018, 2019, and 2020) where the non-labor costs 14 related to individual storms were greater than \$200,000. This average 15 was then multiplied times three to establish the base reserve amount. An 16 annual amount equal to the three year average has been included in the 17 revenue requirement on an on-going basis. 18 Q. How does the Company propose to fund the initial balance for the reserve? 19 A. Beginning on page 39, line 21 of his direct testimony, Mr. Klote states; 20 Currently, the Company prospectively tracks regulatory assets and 21 liabilities. As of the period ending just prior to rates going into effect, 22 the Company will have significant prospectively tracked regulatory 23 assets which have now become liabilities as a result of overcollection in 24 rates. We propose to utilize a portion of the combined prospectively 25 tracked regulatory liability to fund the establishment of this storm 26 reserve. 27 Q. Is Evergy West proposing similar treatment for the storm reserve?

A.	Evergy West proposed the same three-year average to determine the level of
storm reserve	but proposes to use the excess maintenance reserve to establish the storm reserve
balance for Ev	ergy West. Evergy witness Linda J. Nunn states on page 26, lines 14-20;
	In recent years this reserve has grown beyond the level of need for the overhauls. Therefore, I am proposing to reset the level of reserve needed for major maintenance on power plants and to use the excess reserve to establish a storm reserve which is discussed in the Direct Testimony of Company Witness Ronald A. Klote.
Q.	What is the proposed storm reserve balance for Evergy Metro and Evergy West?
A.	The proposed storm reserve balance for Evergy Metro on a total company basis
is \$2,299,893	and \$593,144 for Evergy West.
Q.	Are there additional adjustments proposed by Evergy Metro and Evergy West
for the storm r	eserve?
A.	Yes. An adjustment was made to eliminate test year storm costs in Evergy
Metro's and E	vergy West's proposed distribution maintenance normalization.
Q.	Did Staff exclude these costs in its recommended revenue requirement for
Evergy Metro	and Evergy West?
A.	No. Evergy eliminated the test year storm costs to prevent double recovery.
Since Staff did	I not adopt Evergy's proposed storm reserve, this adjustment was not necessary.
Q.	Does Staff support Evergy Metro's and Evergy West's proposed storm reserve?
A.	No. Listed below are the reasons Staff opposes Evergy Metro's and Evergy
West's propos	ed storm reserve.
	<ul> <li>The proposal is for unknown future storm costs.</li> <li>The funds used to set the reserve are funds that Evergy Metro and Evergy West overcollected from its customers. These funds should be returned to Evergy Metro's and Evergy West's customers.</li> </ul>

The threshold of \$200,000 described by Mr. Klote is not material when 1 2 compared to Evergy Metro's and Evergy West's total operating expenses. 3 Alternative regulatory mechanisms are available to Evergy Metro and 4 Evergy West when significant storm costs are incurred. 5 Storm costs are included in Staff's normalized level of distribution 6 maintenance expense. 7 Q. Is Evergy Metro's and Evergy West's proposed storm reserve based on the 8 regulatory concept of known and measurable storm costs? 9 A. No. Known and measurable costs are costs that are known and can be calculated with a high degree of accuracy. Mr. Klote states. "The establishment of a storm reserve would 10 11 allow Evergy Metro and Evergy West to collect in rates the cost of storms that are significant in nature that are likely to occur in the future." Potential future storm costs do not meet the 12 13 known and measurable standard. 14 O. Does Staff agree that funds previously collected from Evergy Metro and Evergy West customers should be used to establish a storm reserve? 15 16 A. No. Evergy Metro and Evergy West over collected amortizations and 17 maintenance reserve from its customers. These funds should be returned to customers and not 18 used by the Company for potential future storm costs that are not known and measurable and 19 are not material in nature. This is especially egregious considering the economic hardship that 20 Evergy Metro and Evergy West customers are currently facing. 21 Q. Do you consider the storm threshold of \$200,000 to be material?

<sup>&</sup>lt;sup>1</sup> Case No. ER-2022-0129, Ronald A. Klote Direct Testimony, page 38, lines 11-13. Case No. ER-2022-0130, Ronald A. Klote, Direct Testimony, page 35, lines 8-10.

- A. No. The \$200,000 threshold of non-labor storm costs compared to Evergy Metro's and Evergy West's operating expenses is infinitesimal. It equates to less than one half of one percent of Evergy Metro's and Evergy West's total operating expenses.<sup>2</sup>
- Q. What alternative regulatory mechanisms are available in the event a significant storm occurs?
- A. Evergy Metro and Evergy West may file an Accounting Authority Order ("AAO") application with the Commission. Typically, AAOs have been used to allow utilities to capture certain unanticipated and extraordinary costs that are not included in their ongoing rate levels. An example is the occurrence of a natural disaster, such as a wind or ice storm that may impact a utility's service territory.
- Q. How did Staff account for Evergy Metro's and Evergy West's storm costs in its recommended revenue requirement filed with its direct testimony on June 8, 2022?
- A. Consistent with historical Evergy Metro and Evergy West general rate cases, Staff normalized non-labor distribution expense. In this case, Staff recommends a 4-year average (2018-2021) for Evergy Metro and a 3-year average (2019-2021) for Evergy West.
- Q. Please summarize Staff's position on Evergy Metro's and Evergy West's proposed storm reserve.
- A. Staff opposes the Company proposal for a storm reserve for the reasons previously addressed. Staff utilized normal ratemaking methods by including a normalized level of maintenance expense that includes storm costs that occurred during the normalized period.

<sup>&</sup>lt;sup>2</sup> The calculation is based on total operating expenses for Evergy Metro and Evergy West as recommended by Staff in its revised accounting schedules filed with this rebuttal testimony.

#### MAINTENANCE RESERVE

- Q. Earlier in this testimony addressing Evergy West's proposed storm reserve you also mention a maintenance reserve. Please describe Evergy's maintenance reserve.
- A. Since at least 2009, Evergy West has had a maintenance reserve to account for major steam turbine overhauls. Evergy witness Nunn states<sup>3</sup>

To mitigate the large variability, major maintenance expense is spread out over the service life of the related equipment through an accrual process. This method provides a more consistent measurement of annual maintenance expense. In recent years this reserve has grown beyond the level of need for the overhauls. Therefore, I am proposing to reset the level of reserve needed for major maintenance on the power plants and to use the excess reserve to establish a storm reserve which is discussed in the Direct Testimony of Company Witness Ronald A. Klote. For all remaining excess major maintenance reserve after the establishment of a storm reserve we are proposing to amortize back to our customers over a four-year period.

- Q. Did Staff include the maintenance reserve in its accounting schedules supporting its Direct Filing?
- A. No. Staff inadvertently omitted this adjustment in its recommended revenue requirement for Evergy West in its Direct Filing.
  - Q. Does Staff agree with Evergy West's proposed maintenance reserve?
- A. Not entirely. Staff agrees that the reserve should be reset as a result of the excess maintenance reserve balances and agrees to a 4-year amortization to return the excess reserve to Evergy West's customers. However, Staff disagrees with an adjustment made by Evergy West to the maintenance reserve balance; specifically, Staff disagrees with Evergy's proposal to use some of the excess maintenance reserve to fund its proposed storm reserve that is discussed above.

 $<sup>^{3}</sup>$  Case No. ER-2022-0130, Linda J. Nunn Direct Testimony, page 26 lines 11-20.

1	Q.	Did Evergy make any other adjustments to the maintenance reserve?
2	A.	Yes. Evergy proposed to move excess maintenance reserve related to the Sibley
3	generating s	station to depreciation reserve. Staff will adopt this adjustment for the maintenance
4	reserve. Th	e impact to the depreciation reserve will be addressed by Staff witness Keith Majors
5	in his rebut	tal testimony.
6	Q.	What is the revenue requirement impact of Staff's treatment of the maintenance
7	reserve?	
8	A.	Evergy West's revenue requirement will be reduced by approximately
9	\$8.1 million	1.
10	Q.	What is Staff's recommendation for Evergy West's maintenance reserve?
11	A.	During the true-up phase of this case, Staff will include a four-year amortization
12	of the exce	ss maintenance reserve balances as of May 31, 2022. Staff will not reflect the
13	adjustment	to the maintenance reserve for the storm reserve as proposed by Evergy West.
14	SURVEIL	LANCE REPORTS
15	Q.	What is Evergy Metro and Evergy West proposing for surveillance reporting?
16	A.	Evergy proposes to discontinue the annual surveillance reporting requirements
17	for Evergy	Metro and proposes to discontinue monthly surveillance reporting requirements for
18	Evergy We	st.
19	Q.	Does Staff agree that these surveillance reports should be discontinued?
20	A.	As described in my direct testimony in this proceeding, Staff agrees to
21	discontinue	the monthly surveillance report for Evergy West if the parties that entered into the
22	Stipulation	and Agreement in Case No. HR-2005-0450 are also in agreement or if the

- 1 Commission decides the reporting is no longer needed.<sup>4</sup> Staff recommends that the 2 Commission require Evergy Metro to continue to provide the annual surveillance report.
  - Q. When did Evergy Metro begin providing an annual surveillance report?
  - A. As described in my direct testimony, the Commission approved an annual surveillance report for Evergy Metro (or its predecessor) on November 6, 1992.<sup>5</sup>
  - Q. Does Evergy Metro attempt to compare the annual surveillance report and the quarterly annual reporting requirements for the Missouri Energy Efficiency Investment Act ("MEEIA") and the Fuel Adjustment Clause ("FAC")?
    - A. Yes. On page 39 of Evergy Metro witness Nunn's direct testimony, she states:

One requirement that goes along with the Company having FAC and MEEIA riders, is the condition that the Company provide quarterly surveillance reports which are filed in EFIS. Another requirement to continue the FAC is to file rate cases at least every four years. Because of these requirements, the financial information included in our surveillance reporting is provided every quarter. Additionally, more in-depth information beyond the financial status of the Company is routinely provided within rate cases that now happen on a regular basis.

- Q. What is the difference between the annual surveillance reporting Evergy Metro has submitted since 1992 and the quarterly reporting it provides for the Missouri Energy Efficiency Investment Act ("MEEIA") and the Fuel Adjustment Clause ("FAC")?
- A. There is no relationship between the annual surveillance reporting and Evergy Metro's FAC quarterly surveillance report (which also includes MEEIA reporting). The reports are completely different and are prepared for different purposes. The annual surveillance reporting made on a calendar year is based on the actual Missouri financial results incorporating certain ratemaking adjustments like allocations, cash working capital, and advertising

<sup>&</sup>lt;sup>4</sup> Case Nos. ER-2022-0129 and ER-2022-0130, Lyons Direct Testimony, page 35.

<sup>&</sup>lt;sup>5</sup> Case Nos. ER-2022-0129 and ER-2022-0130, Lyons Direct Testimony, page 35.

disallowances, as examples. The annual surveillance report is intended to reflect Evergy Metro's earnings on more of a regulated basis using ratemaking concepts. In addition to the actual reporting, Evergy Metro provided detailed information regarding the adjustments it was making, actual results of operations, selected financial information from the Company's books and records, and a host of information on a variety of topics including capital structure and jurisdictional allocations. Essentially, the surveillance reporting Evergy Metro agreed to was to provide an actual scaled down cost of service calculation very similar to what is developed for a rate case. In fact, Evergy Metro's surveillance report filed in the past relied on its revenue requirement model, which is very similar to Staff's Exhibit Modeling System (EMS) run filed as Accounting Schedules in every rate case. Evergy Metro's 2021 surveillance report is attached to this testimony as Schedule KL-r1.6 Conversely, the FAC quarterly surveillance reports that also includes MEEIA reporting consist of financial data on a quarterly basis. These reports are used for prudence reviews and do not include the level of detail and support provided in the annual surveillance reports. An example of a FAC quarterly surveillance report is attached as Schedule KL-r2.

- Q. Does Ms. Nunn agree that the annual surveillance report provides more detailed financial information than the required FAC and MEEIA surveillance reports?
  - A. Yes. Ms. Nunn states on page 38:

Evergy Missouri Metro provides surveillance reports on a quarterly basis to fulfill the requirement under the FAC and MEEIA sections of the Code of State Regulations. In addition, the Company provides an annual surveillance report which is a **more in-depth analysis of yearend financial information**. In addition to the annual surveillance report

<sup>&</sup>lt;sup>6</sup> The supplemental information and detailed workpapers for the annual surveillance report are too voluminous to include as a schedule attachment.

- 1 itself, additional financial and operational information is provided.
  2 [Emphasis added.]
  - Q. Why is the annual surveillance reporting important?
  - A. The annual surveillance report provides Staff a better understanding of Evergy Metro's actual Missouri financial results on a regulated basis. In addition to the surveillance report, the Company also provides supporting workpapers for adjustments made to the financial information for ratemaking purposes. This allows Staff to evaluate the financial status of the Company.

#### WHOLESALE REVENUE CREDIT

- Q. How do the Companies and Staff positions differ with respect to Evergy Metro's and Evergy West's adjustments to eliminate wholesale transmission revenue?
- A. Evergy Metro and Evergy West propose an adjustment to reduce wholesale transmission revenue based on the difference between the FERC authorized ROE and the ROE the Commission approves in this rate case. In its direct filing on June 8, 2022, Staff did not reduce transmission revenues as proposed by Evergy Metro and Evergy West. If the Commission agrees with Evergy Metro and Evergy West that transmission revenues should be reduced to reflect the difference between the FERC authorized ROE and the ROE approved by the Commission, then Staff recommends a corresponding adjustment be made to reduce Evergy Metro's and Evergy West's transmission expense.
  - Q. What type of revenues are Evergy Metro and Evergy West proposing to reduce?
- A. Evergy Metro and Evergy West receive transmission revenues from SPP for both Zonal and Base Plan transmission upgrades. Base Plan projects are directed by SPP, while Zonal projects are initiated by Evergy Metro and Evergy West.

1 According to Mr. Flucke in his Direct Testimony in Case Nos. ER-2022-0129 and 2 ER-2022-0130, beginning on line 16 of page 2: 3 This adjustment provides for the Company's retail customers to bear 4 responsibility for the return on transmission rate base at the MPSC-5 authorized level. Essentially, the adjustment reduces the amount of transmission revenue that is credited against the gross transmission 6 7 revenue requirement so that the adjusted revenue credit is consistent with 8 the Company's allowed ROE rather than the return allowed by the 9 Federal Energy Regulatory Commission ("FERC"). 10 The transmission revenue received by SPP is calculated using Evergy Metro's and Evergy 11 West's authorized FERC ROE of 11.1%, which consists of a base ROE of 10.6% and 50 basis 12 point adder. The 50 basis point adder, approved by FERC, is available to Transmission Owners 13 participating in Regional Transmission Organizations. SPP utilizes Evergy Metro's and Evergy 14 West's Annual Transmission Revenue Requirement ("ATRR") to allocate revenues to 15 Transmission Owners and expenses to Transmission Customers. What is a "Transmission Owner?" 16 Q. 17 A. Based on SPP's Open Access Transmission Tariff, a Transmission Owner, as a 18 member of SPP, is an entity that is obligated to construct, own, operate, and maintain 19 transmission facilities as directed by SPP. SPP utilizes Evergy Metro's and Evergy West's 20 ATRR to allocate revenues to Transmission Owners and expenses to Transmission Customers. 21 Transmission revenues are collected from SPP Transmission Customers for the amount 22 necessary to recover the revenue requirement for the Transmission Owner. 23 Q. Are Evergy Metro and Evergy West charged by SPP on behalf of other Transmission Owners that are members of SPP? 24 25 A. Yes. Other Transmission Owners of SPP receive an authorized FERC ROE 26 that may include FERC ratemaking incentives and ROE adders. As Transmission Customers

- of SPP, Evergy Metro and Evergy West are charged their allocated share of transmission expense by SPP for other transmission owners of SPP that have constructed, upgraded, and maintained transmission infrastructure. The allocated transmission expense charged to Evergy Metro and Evergy West includes approved FERC ratemaking incentives and adders for other SPP members.
- Q. Did Evergy Metro and Evergy West make corresponding adjustments to reduce transmission expense to account for a higher FERC ROE included in the transmission charges billed by SPP?
- A. No. Based on prior discussions with Evergy personnel, any FERC ratemaking incentives included in transmission expense billed by SPP is considered a "cost of doing business," and should be recovered in retail rates.
- Q. Please summarize Staff's position on Evergy Metro's and Evergy West's proposed adjustment to reduce transmission revenues.
- A. Evergy Metro and Evergy West are asking the Commission to reduce transmission revenues, while, on the other hand, expecting their customers to pay full transmission expense that includes a higher FERC authorized ROE for Zonal and Base Plan upgrades constructed by other SPP transmission owners. Staff has accepted that Evergy Metro's and Evergy West's transmission expense has increased, and recognizes that a significant factor in the increase is the SPP directed transmission upgrades that include FERC ROE incentives. Staff did not recommend an adjustment to reduce Evergy Metro's and Evergy West's transmission expense that includes FERC incentives. To be consistent, Staff also did not make an adjustment to reduce transmission revenues as Evergy Metro and Evergy West have proposed.

Staff recommends that Evergy Metro and Evergy West transmission revenues should not be reduced for the difference between the higher FERC ROE and the Commission authorized ROE in this case. However, if the Commission agrees with Evergy Metro's and Evergy West's proposed reduction to transmission revenues, then Staff recommends the Commission order a corresponding adjustment to reduce transmission expense that includes a higher FERC ROE. If ratepayers are not entitled to transmission revenues received from SPP that includes an ROE higher than the Missouri authorized rate of return, then ratepayers should not have to pay for transmission costs from SPP that includes an ROE higher than what is authorized by the Commission.

- Q. Does this conclude your rebuttal testimony?
- A. Yes it does.
