EXECUTIVE SUMMARY..... 2  
REPLACEMENT OF PLASTIC MAINS AND SERVICE LINES..... 3

Direct Testimony of  
Kimberly K. Bolin

1 Q. What knowledge, skill, experience, training and education do you have in the  
2 areas of which you are testifying as an expert witness?

3 A. I have received continuous training at in-house and outside seminars on  
4 technical ratemaking matters both when employed by OPC and since I began my  
5 employment at the Commission. I have been employed by this Commission or by OPC as  
6 a Regulatory Auditor for over 20 years and have submitted testimony on ratemaking matters  
7 numerous times before the Commission. I have also been responsible for the supervision of  
8 other Commission employees in rate cases and other regulatory proceedings.

9 Q. Did you participate in the Commission Staff's ("Staff") review of the  
10 applications filed by Spire Missouri ("Company" or "Spire") in Case Nos. GO-2018-0309  
11 and GO-2018-0310?

12 A. Yes, I did, with the assistance of other members of Staff.

13 **EXECUTIVE SUMMARY**

14 Q. Please summarize your testimony in this proceeding.

15 A. In this testimony I will discuss Staff's calculation of the appropriate value  
16 of the replacement cost of the plastic pipe to be removed from the Infrastructure Replacement  
17 Surcharge (ISRS). Staff is using the same methodology Staff recommended in  
18 direct testimony filed concurrently concerning the remand of Case Nos. GO-2016-0332 and  
19 GO-2016-0333, as well as the related cases GO-2017-0201 and GO-2017-0202. Staff based  
20 its recommendation to remove the cost of the replacement of plastic mains and services lines  
21 upon the Western District Court of Appeals' opinion that reversed and remanded the  
22 Commission Report and Order in Case Nos. GO-2016-0332 and GO-2016-0333.

1 REPLACEMENT OF PLASTIC MAINS AND SERVICE LINES

2 Q. Did Staff review all of the work order authorizations provided by Spire for  
3 both cases (GO-2018-0309 and GO-2018-0310)?

4 A. Yes, Staff reviewed all of the work order authorizations provided by the  
5 Company to determine the feet of main and service lines replaced and retired by the type of  
6 pipe (plastic, cast iron, steel, etc.). The Company did not provide work orders authorizations  
7 for projects totaling less than \$25,000 and open "blanket" work orders.

8 Q. For the work orders provided, was Staff able to determine the actual  
9 percentage of plastic footage replaced for mains and service lines compared to the total  
10 footage replaced for both mains and service lines?

11 A. No, not for all of the work orders. Some of the work orders provided by the  
12 Company only had estimations of the feet of main and service lines replaced. Staff applied the  
13 actual individual plastic main and services line percentages to the work order cost to  
14 determine the value of the replacement of plastic pipe for the work order. Staff did not  
15 remove any amounts for work orders that were associated with relocations required by a  
16 governmental authority, encapsulation work orders, and meter and regulator replacement  
17 work orders.

18 Q. How did Staff handle the work order authorizations that were not provided, or  
19 that included estimations?

20 A. Staff calculated an average of plastic mains and service lines replaced for the  
21 work order authorizations that had actual information provided and applied that percentage to  
22 work order authorizations that were not provided or estimated. This methodology assumes  
23 that the work orders that were not provided or estimated were comparable to the group of  
24 work orders that were made available to Staff. Attached to my direct testimony are the

Direct Testimony of  
Kimberly K. Bolin

1 following Schedules which show the work orders and the feet of main and service lines

2 replaced by type:

- 3 • Schedule KKB-d2– Case No. GO-2018-0309
- 4 • Schedule KKB-d3 – Case No. GO-2018-0310

5 These Schedules also show the calculation of the average of plastic mains and services lines

6 replaced that were applied to the work order authorizations that were not provided or

7 estimated.

8 Q. What percentage of ISRS additions do the work orders less than \$25,000 and  
9 blanket work orders total?

10 A. The following table outlines the percentage of dollars associated with ISRS  
11 additions stemming from work orders less than \$25,000 and blanket work orders:

	GO-2018-0309		GO-2018-0310	
	Amount	% of Total*	Amount	% of Total*
Work Orders with Full Recovery (Cathodic Protection, Main Leak Clamps, Relocations)	\$4,615,298	7%	\$7,433,427	11%
Work Orders with Actual Percentages	\$26,363,026	39%	\$12,440,835	17%
Work Orders using Average Percentages (Work Orders totaling less than \$25,000, blanket work orders and work orders with estimated plastic amounts)	\$36,605,090	54%	\$63,580,608	72%
Total Work Orders	\$67,583,414	100%	\$83,454,869	100%

13 \*% of Total Work Orders included in the Company's ISRS filing

14 Q. Does this conclude your direct testimony in this proceeding?

15 A. Yes, it does.

BEFORE THE PUBLIC SERVICE COMMISSION
